In a day when radio is undergoing ever-increasing levels of research-driven tunnel-vision, believing the hype that "People really DO want to hear the same 200 songs over and over" and refusing to see that while *some* people like that format, there is an ever increasing number of people who are NOT tuning in BECAUSE of the repetition.

Stern proves that people want to be entertained, even shocked a little, when they listen to the radio. Stern, Imus, Dahl, Greaseman, Limbaugh and others prove, also, that people want something different. Something that makes them laugh, think, even react in disgust. People want to be treated like adults again, by radio programmers.

What we need (I have said this before) in radio today is more visionary programmers who do like the programmers in the fifties, sixties and seventies... program to the people. Respond to the audience, involve the audience. Not be afraid to make changes on a gut level, to listen to the listeners.

Sure, research is important. But when we have come so far that we need reams of data, focus groups, and testing, just to add a song or two to a playlist, we have gone *too far* from what the whole thing is based upon.... attracting an audience to our station so we can sell them something. It is this over-tested, over-consulted, over-sanitized method of programming that results in an on-air product that is dull and lifeless to the listener.

People tune in Stern in droves, because he seems to be the antithesis of all that structure. He (and even more so, Imus and Dahl) seem to converse with their listener, not talk AT their listener. This is an aspect of radio that has been on the decline for years and is now reaching anemic low-levels. And Stern, et-al, are catering to these lost listeners who seek involvement, apparent spontaneity and life, in their listening. And judging by the ratings, there are an AWFUL lot of those lost listeners out there.

Sure, I know there will be people telling me that I am 'making the biggest mistake in programming philosophy' by assuming that because *I* like it that the rest of the listeners will. But I submit that it is the 'same-old same-old' approach which is making the biggest mistake. Stern, THE LOOP, (and others) show that there *IS* a big, mostly untapped, audience out there who wants something different. Who will step up to the plate and reap this harvest?

Bill

Here's the rest of the best-of week on WYNY:

Wednesday, Feb. 7 is a simulcast of Johnny B. and the rest of the the gang from Evergreen's WLUP-FM, Chicago.
Thursday is a simulcast of San Francisco A.C. KIOI.

Friday is a simulcast of newly-acquired Evergreen CHR WXKS, Boston.

Evergreen's now confirming that there will be a Big Announcement Friday mornning (Feb. 9) at the Rihga Royal Hotel in Manhattan. Big bash with Evergreen execs and (presumably) new format and talent. Stay tuned -- We haven't seen this much fun in New York
in ages! Tom Taylor/Inside Radio

For those of you on the edge of your seats about the next phase of WYNY in New York...here is the latest. After today (2/7) Evergreen(the owners) will continue "format stunting" with KIOI-FM/SF (HOT AC) they will take the airwaves for Thursday, then Kiss 108FM/Boston (Top40) will be on Friday.

On Friday (2/9) Evergreen Media will hold a press conference in NYC at 11am to announce the end-results..new call letters, new PD, new format. The rumor is heavy on Urban/Dance, since several Mix DJ's from Hot97 have been contacted by Evergreen? However, we may still be in for a surprise...another ROCK station in NYC is still a strong possibility.

The format change can happen as early as this weekend???

>simulcasting Rock 103.5 WRCX from Chicago.

> Well I was expecting to hear Rock 103.5 when I woke up Tuesday
>morning. However the satellite feed was now 92.3 The Beat KKBT in Los
>Angeles.

Today, Wednesday the 7th, they're simulcasting 97.9 WLUP Chicago.
Am I the only one getting a kick out of getting to hear different radio
stations from around the country for a change?!
While listening to the ROck 103 simulcast on Monday I got a kick
when I learned that the afternoon jock (La Brutus I think?) kept
announcing that he was on the air in his hometown of Manalapan, NJ! (My
hometown TOO!) Before segueing into the NY traffic report, he asked the
reporter how traffic was on Church La. near Manalapan High (a small local
street that backs up all the time from HS traffic)! I got a lot of it on
tape.
BTW, Mancow wasn't the only Rock 103 jock poking fun of NY
stations and jocks. La Brutus was poking fun of Scott Muni on WNEW FM by
doing impressions of Muni's deep monotone voice, even suggesting that he
cough up his lung! I guess since the Chicago jocks knew they were only
going to be on for one day, they figured they could get away with
anything.
It will be interesting to see what else we're going to hear this
week until Evergreen kicks off it's new station. Tape is rolling....

I heard that Mancow used the word 'asshole' twice on his show, referring to Stern. What I'd like to know is why the FCC fines Infinity millions of dollars because Howard talks about his sex life or bathroom habits? I've never heard Stern use any of the 'seven dirty words' on his show, although I guess 'asshole' isn't one of them.

BTW, so far Howard isn't mentioning that MC is on in NYC. Guess he figures there's no reason to give the guy any free publicity.

If done correctly(in most cases,not) you can create the most loyal and
devout listner base of any known market. For a great reference station
check out WEQX Manchester,VT. 10 years of alternative programming. PD's
need to relize that the format will never be the "top" format, but the
most stable if done right. The problem today with the programming is
that there are to many past and present "top 40" programmers trying to
be alternative(in a nut shell).

I think many stations were looking for a format that was free of the negatives that Top 40 carries with it. Less teen oriented, less rap and urban music, plus it was music they (boomer aged management and sales) could personally relate to...you know young white guys with long hair and guitars...kinda like the AOR they grew up with back when they were young.

But...many alternatives found that they only got a new set of objections from sponsors. With top 40 sponsors incorrectly complained that their audience was "just a bunch of kids with boom boxes" now they're hearing that their new audience is "just a bunch of unemployed kids with purple hair and heavy body piercing".

Add that problem to the fact that "Alternative" music is a branch of male dominated Album Rock, not a substitute for female targeted Top 40. They're just two different kinds of radio/audience. Not saying that one is better than the other, they are just two very different things.

I personally think that the many in the music industry were thinking along the same lines as the radio management...trying to find music with less objections and perceived problems...something they could personally get into more.

The audience did not agree.

I heard them on the evening of 2/6 from about 2000 to 2200. Signal just N.W. of Boston MA was quite good most of the time but with some deep fades on a Yamaha stereo with it's regular am indoor antenna. The 1660 station in NJ was only slightly better. I heard the DJ say at one point that the fidelity should sound better than other am stations because they were not using the NRSC cutoff curve.

I heard the reaction of the staff of WWWE to the death of the reporter & pilot. It was quite superficial. The reason: the management of that station decided that WWWE's traffic reporter(s) should just report the traff ic and remain anonymous. So when the plane went down, there was a "loss" albeit an unnamed one. The air staff reported the deaths, and it seems sad that it this occurance was the first time we listeners learned the identities of the traffic reporter (and pilot). Just goes to show you that airstaff can be taken for granted. As a sidebar.....it should be noted the "new" traffic reporters are EQUALLY anonymous!
Will they ever learn?

I agree. Here in San Jose (CA), we have a station (KLIV-AM 1590) that broadcasts CNN Headline News audio 24 hours a day. I have tried to listen to it for an extended period of time, but always come away from it confused. It's very difficult to try and "guess" who is speaking, especially if there is more than one soundbite in the story. For me, listening to the audio portion of a VISUAL medium just doesn't cut it.

<hhallika@slonet.org> wrote:

>> In my continuing argument for reversible compression...

In this context, it is interesting to note what is going on with the
initial DAB systems in Europe.

The original concept was that a dynamic range control signal would be
transmitted in the bitstream along with the coded audio. Six bits are
reserved for this function and are specified to adjust gain over a 15 dB
range in .25 dB increments. The audio was to be transmitted uncompressed,
a device at the transmitter would generate the gain control information,
and the receivers would do the actual gain controlling.

The first systems are now on in Bavaria and London, and there is no gain
control information being transmitted.

This presents the usual problems to listeners in automobiles, so the
manufacturers have proposed to include gain processing at the *receiver*
end. I hear that some will have pretty fancy multi-band beasties!

So far, only the conservative public broadcasters are using DAB. When the
private guys join, I wonder how long it will take before processing (the
traditional transmission kind) and "loudness wars" break out? Then what
will happen when the two processors interact?

In Bavaria, the government may just pass a law making compression illegal.
Somehow, I don't see this in London, though.

I don't recall having heard of an FCC initiated "reverse"
discrimination issues.

There aren't any guidelines for recruitment (amount of ads, # of
people reached), they just have to be effective. If you only
advertise in magazines of high minority readership, but you're not
getting any response, then you need to find another medium to
advertise in. Contrarily, if you're under-represented in minorities,
but you're getting many qualified applicants and can document why they
weren't the best qualified, you'll probably be ok.

I remember when Steve Mason was the morning show host at WRQN (93.5, 93Q)
he had the best April Fools joke. Not only did he do it once, but he
pulled it off TWICE!! I think somewhere around Christmas Steve Mason and
his Co-host, Diane Scribner started talking about a "GREAT movie" they
had just seen, of course this movie missed the theatres. Anyways, Mason
talked about how all the local video stores had this move. The only
thing was when people rented it, and took it home they found out that the
"GREAT movie" was really a scheme, and that Mason and Diane were on the
screen and their was some kind of home movie starring the DJ'S at WRQN.

ADVISORY FROM THE LIBERTARIAN PARTY
News from the National LP headquarters for
members and supporters of the Libertarian Party

Watergate Office Building
2600 Virginia Avenue, NW, Suite 100
Washington DC 20037
(202) 333-0008
For Information: (800) 682-1776

February 6, 1996

Top-Rated Atlanta (GA) Radio Talk Show Host Joins LP

WASHINGTON, DC -- Neal Boortz -- the "Big Kahuna" of Atlanta talk radio and the #1 rated talk show host on WSB-AM -- has joined the Libertarian Party.

Boortz, a 25-year fixture on the Atlanta, Georgia airwaves, has often described himself as philosophically "libertarian," but had resisted any partisan affiliation.

The decision to end his "non-joiner" status came after Boortz spent several hours last week on his top-rated program ruminating over whether he should take the plunge -- and become an official member of America's third largest political party.

"Mr. Boortz made the right decision," said National LP Chair Steve Dasbach. "He has joined a growing chorus of voices -- both on talk radio and in the voting booth -- speaking out in favor of more liberty and less government. We're proud to welcome such an articulate and influential individual into our party."

The drama started on Friday, February 2nd, when Boortz announced to his audience that he might join the LP if a membership form was faxed to him.

Both the National Libertarian Party and the Georgia LP immediately faxed party membership forms to his studio at WSB radio, and a few minutes later Libertarian National Committee member Ron Crickenberger was on the air to encourage Boortz to sign on the dotted line.

"He had become fed up with the Republicans -- the fact that [they] are dramatically increasing the size of the federal government," said Crickenberger later. "It was the realization that the Republicans won't do what they said they'd do."

By contrast, Crickenberger said, Boortz found the Libertarian Party's commitment to principle very appealing.

"He talked about our 'pledge' [membership statement] in a very favorable manner. He liked the fact that you had to sign a statement of principle to join this party, while you didn't have to with the other two [parties]," said Crickenberger.

But Boortz continued his on-air debate about whether or not to join, so LP National Director Perry Willis called to extend an invitation from the National Libertarian Party.

"He was surprised I was calling all the way from Washington, DC," recounted Willis. "He said, 'I've really opened a can of worms!'" -- apparently referring to the fact that his announcement had generated calls from leaders in both the Republican and Democratic parties as well.

Boortz's on-air discussion about joining the party also sparked a flurry of calls to the Georgia LP's information line.

"The phone started ringing," said Audrey Goldstein, a staff member at the Georgia LP's office, "[with people] saying, 'If Neal is going to get off the fence, so will I.'"

On February 6th, the Georgia LP received a signed membership form and yearly dues payment from Boortz.

Goldstein said the decision by the popular talk show host to join is "worth 50 regular memberships" in terms of credibility and influence for the Libertarian Party.

Boortz was named one of the "25 Most Important Radio Talk Show Hosts in America" in the February 1995 issue of Talkers Magazine, and one of the "100 Most Powerful & Influential People in Georgia" by the January 1995 issue of Georgia Trend magazine.

Atlanta magazine described Boortz as "the Big Mouth No. 1, the Alpha Male, le grande fromage, the Big Kuhuna, the baddest of the bad" in Atlanta talk radio, generating Arbitron ratings in "the Godzilla category," with up to 47,500 people listening to a single hour of his show.

Boortz is "too cerebral to dismiss," continued the magazine. "[He] has more on-air depth than other hosts ... [and] enormous clout among listeners."

According to Georgia Trend magazine, Boortz is "the king of local talk, with more than 260,000 people tuning in to his Libertarian philosophy each week."

The same magazine also noted Boortz's distrust of the GOP: "An equal opportunity harasser, Boortz vowed to bash Republicans if they squander 'the golden opportunity to bring less government, lower taxes, and more individual responsibility.'"

Boortz has appeared on the Phil Donahue Show, the Today Show, and CNN's Talk Back Live. He has been written about in Entertainment Weekly, USA

Today, and the Wall Street Journal.

Boortz broadcasts on WSB Radio, AM-750, from 8:30 am to 12:00 noon, Monday to Friday. His show is rebroadcast each evening from 11:00 pm to 2:00 am.

Boortz is the second influential talk show host of join the Libertarian Party in the past three months. In late 1995, "Lionel" on New York's powerhouse WABC officially joined the party.

The London market is quite different from any American market. British radio is primarily made up of BBC (governemnt owned) radio stations and then Independent (Commerical) radio stations. As an American, working for the BBC is next to impossible. In London, the main commerical station is Capital Radio. There have been Americans who have worked on that station in the past, but not really in a full-time capacity; even though the English do have a fascination with Americans and the American culture.

Government regulation tightly controls "alien" employment too. If a radio station wanted to hire an American, it would have to prove that the foreigner could do the job better than a nationale. Or pocess a skill that is unique. I investigated working in London a few years ago and becuase my Mother is British, I would have no problem securing a work permit.

I like English radio because it's more personality oriented. They still aren't that concerned with playing 50 songs in a row with less talk. People still listen to the radio for the personality more than the music.

I've never used the SMARTS RSS system, but I will say two things in
defense of Selector. Despite its hefty cost, it:
A) Never makes mistakes. Completely bug-free.
B) Comes with excellent tech support.
No, it's not the easiest to use right away, but once figured and
configured, it always does the trick for me.

Here are a few details on the US Army portable AM broadcast facility currently being tested at Fort Meade Md.

The station is housed in modular units capable of being lifted onto palates and transported anywhere in the world. The test, which runs through this Friday, is being conducted on 1670khz with a power of 5/1kw. They seem to be using 5kw at night, 1kw during the day. The are using a Harris solid state transmitter. The station will be sent to Bosnia within a month and likely begin transmitting on 1143khz.

A retractable 140 foot tower is part of the package. The ground system consisrts of 120 radials "strung out in the snow" per the operator I spoke with.

The station is being staffed by civilian volunteers during the test period. Hey, here's your chance to spin a few tunes in the nation's capital :-) They're even taking requests!

At my location in northwest Washington (about 35 air miles from Fort Meade) the 1kw daytime signal registers an S5. Pretty good given the notoriously poor ground conductivity of this region. Test programming consists of rock and roll oldies. Tone is broadcast between midnight and 600AM EST, or at least was last night.

They are using the call sign KTRK (K-truck). That, of course, is an unofficial designation, since this facility has no offical call sign. Last night they said they were changing to KRMY (K-army), which they continued to use this morning. Who knows. maybe they'll use WKRP next :-)

Just a couple more nights to catch this station.

>Why are stations choosing
>alternative over CHR?

Demos. In many markets, it's a much more salable format. Many advertisers who initially assumed that the core Alternative audience sported mohawks and nose rings have discovered that the core is actually upscale, educated, and prone to spend money.

Classical stations have lower ratings than Top 40 also. MUCH lower. But compare the income of the audience. After all, this is the advertising business.

Message-ID: <4fccjf$o65@vixen.cso.uiuc.edu>
Source record: 26026

I have been reading with interest the thread of CNN Headline News on the radio...(simulcast)... when I went to work for a station in Dallas/Ft.Worth they were the CNN affiliate and with that they used CNN Headline News as their sorce.

This was 1991 when the Gulf War broke out.. so the idea and the plan worked.. people were glued to the TV during the War and lets face it when they left the house they still could listen to the War... the trouble is, as you have stated in the thread... was the fact that they (the anchors) would say things like: " Look at these pictures of the destruction..." and of course this was RADIO!!!

When our station decided that they wanted to branch out and do their own talk shows.. they broke down and moved away from the staple of Headline News and took CNN Radio... which has 5 minutes at the top and 3 at the bottom of every hour of news... it worked out great... and when breaking stories happened.. then we would flip to the CNN Headline News for more information.. like the Waco Standoff and the eventual ending to that...

By the way this station no longer is in exstitance in the Dallas/Ft. Worth area.. it was bought last fall and the call letters changed along with the format... it is now KDFX christian format... (former KGBS AM 1190)...

Reminds me of a station in Minnesota that simulcasts an FM. They are licensed for night power, but it is not set up (its only a few watts), so they sign off at sunset. One night, I noticed that the station was still on the air hours after sunset and the legal ID included only the FM. I called the studio and told the DJ that the AM was still on the air, to which she replied "oh, (obscenity)." The station went off that second and then she thanked me.

Mark Manuelian (CE at CBS's Boston flamethrower WBZ) makes
the point that even the giants can end up hurt by daytimers and
limited-service stations that are cavalier about their license
parameters for either sign-off time, power-down time, pattern
changes/parameters, or any or all of the above. Regional stations
serving metro areas and adjacent territory on the class III channels
(I guess they call them Class B now under the new rules) are
being hit even harder...it's happening to stations like us every day.
I fear it's going to get worse...as deregulation fever burns
ever hotter...

Bob Smith, middays WXXI-AM 1370 Rochester NY

1556. WPIX-FM (101.9) New York

Newsgroup: rec.radio.broadcasting
Date: 1996-02-08 00:00:00 UTC
From: "PETER Q. GEORGE, N1GGP" <PGEORGE@WELLESLEY.EDU>
Message-ID: <4fcck1$o6s@vixen.cso.uiuc.edu>
Source record: 26033

WPIX-FM basically played "musical chairs" in terms of formats in 1970's
and 80's. It WAS Greater New York's FIRST ALL DISCO station, but was
trouced upon by "Disco 92/WKTU" (now WXRK) and WBLS didn't help much in
keeping disco alive on 101.9 . But in 1977, WPIX went AOR with Jim Kerr
and his morning crew (from WPLJ) and made some great radio with "The New 102".
I was living in Western Massachusetts at the time and saw the barrage of
WPIX-FM ads on sister TV station WPIX "11 Alive !" throughout fall 77' and
early 78'. On very good conditions and if the FM cable was running right,
I could tune in to WPIX-FM and crank-it-up ! I guess Kerr went back to
PLJ' in 1980 and thus precipitated the eventual ratings decline for PIX-FM'.
After 3 more years of mixed ratings, WPIX-FM become all "Love Songs" in
late 1982. You know......."102.....WPIX......Your "X" wants you back !"
Not bad. The TV spots were cute with claymation couples singing to the
music of Joe Cocker and Jennifer Warnes "Love Lift Us Where We Belong" and
an introduction to the spot with Smokey Robinson and host of other AC
artists. When "Love Songs" died, WPIX-FM just hung in there with AC music
and finally in the late 80's...WPIX-FM became WQCD "CD 101.9" with some
nice upbeat TV spots with Al Jarreau and a "sooooo cool" animated cat at
the end of the spot. Once again, the spots were on WPIX-TV. It seems
that CD-101.9 has made a niche for itself. I had the opportunity to listen
to WQCD during a "tropo" inversion (long distance reception) in Summer
of 94' and was quite impressed. This was definately NOT the same WPIX-FM
that simply could not get its' act together. It used to be that if you
mentioned WPIX-FM to someone in the business, you'd more than likely get
a little giggle and maybe a little comment like "what are they playing NOW !"
I guess WQCD has had the last laugh. They are good, and I'm not much of
a Jazz listener myself. That's my own opinion !

1557. Western NY Radio Watcher, special

Newsgroup: rec.radio.broadcasting
Date: 1996-02-08 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <4fccj5$o5r@vixen.cso.uiuc.edu>
Source record: 26034

It appears the I-man is gone from the Western NY air-
waves. And it indirectly means a lot to the future of the AM
band in one of America's top 50 markets, because it may be
a sign that the station involved is essentially giving up.
WHTK, Hot Talk 1280, has dropped Don Imus' syndicated
morning show (and its six figure annual carriage fee) and
replaced it with satellite business news out of the Bloom-
berg NYC operation, followed by an extended Gordon Liddy
program (the added 9-10 hour of which will almost certainly
be a replay of a previous day's feed, since he starts his live
show at 10 Eastern Time).
Hot Talk 1280 had spent considerable effort trying to
gain a younger talk audience and displace WXXI-AM as the
#2 talker in the market...staging what turned out to be one last
big push during the fall book. When that failed, the die was ap-
parently cast. Now Imus is gone from the market at least for
now. WHTK is replacing him with a service that has never
reached a 1 share in any market where it's heard (including
NYC and Boston) and sometimes doesn't even show in the Ar-
bitrons in those markets in some dayparts. The rest of the
schedule never competed either with its stablemate WHAM
or with WXXI, and needed the Imus lead-in. But like the rest
of the new WHTK schedule, Bloomberg's business news ser-
vice is available for no more than the cost of electricity to
operate the satellite downlink. The cost savings probably looks
more attractive now to them than the inevitable loss of a lot
of their cume and 12+ AQH across the board.
I point this out because this is typical of what's happening
in a lot of the markets just below the top 20...the AM band will
have two serious talk players left to offer local news and talk
programming (in Rochester's case, WHAM and WXXI), one success-
ful nostalgia station (locally, WBBF) and the rest either brokered
religious format, simulcast of successful FMs or all satellite-fed
with barter shows. While WHTK was a competitor, and naturally
you might expect a certain amount of glee at burying it as
a serious rival player, I don't see it as welcome news at all in the
longer run. The more serious players we had on the AM band, the
stronger the whole band was going to be in the long run, and that
couldn't be anything but good for everyone. Now, only three AMs
will be left with any substantial audience in a top-50 market of
over 1.1 million population. There's been a very high mortality
rate on the AM band in this and most other large markets, and that
is a phenomenon NONE of the survivors should celebrate.

It was interesting, but a bit narrow. It mentions Bruce Morrow and Dan
Ingram
as two of the reasons that NY radio used to be good, but fails to mention
that
they are still on the air in NY with much the same format of their hey-day.

In fact, Mr. Strauss omits the oldies format altogether.

Buzz... I saw that article...the saddest part of that whole piece was the cover picture of the empty K-Rock studio...at 345pm Eastern time...practically dark, with the station on auto-pilot programmed from some hard-disk in a closet somewhere. This is the future of the business so many of us care about.

And so it goes...

Intriguing blurb in "Radio & Records" hot fax today (2/7). It asked if there's a Long Island radio station ready to flip to Country. Only know of 2 stations that are currently in dreadful ratings shape: WRCN and WDRE. Don't know Gary Starr, owner of 'RCN. Do know that 'DRE folks are fond of Country, considering their Canadian rural roots, and they WERE fond of WYNY. Do know that they're trying to make the current "alternative" format work. So....you make the call!!

1562. Radio Advertising Salesperson Wanted - BC, Canada

Newsgroup: rec.radio.broadcasting
Date: 1996-02-08 00:00:00 UTC

****
Radio Advertising Salesperson Wanted
****

February 1995
Company: Fraser Valley Radio Group

We are looking for an experienced salesperson to sell radio advertising for our four radio stations in the Fraser Valley area of British Columbia, Canada. The position requires the selected individual to sell and service an existing portfolio of accounts and also prospect for new business. This is a commissioned sales position.

Experience in the radio industry or advertising industry is a definate asset. The position does require the individual to go out into the field and meet with retail accounts and consult with them about their plans.

The Fraser Valley Radio Group operates four radio stations in the Fraser Valley area. The stations combined listening audience makes it the largest in British Columbia outside the Vancouver market. This company is also the Link-Deco advertising agent for British Columbia and also manages a tradeshow in the Chilliwack area. The Fraser Valley Radio Group has been in operation for 67 years and is one of the country's leaders in digital radio operation.

More information about the Fraser Valley Radio Group can be found at their Internet World Wide Web Site at http://www.fraservalley.com

Although e-mail resumes will be accepted it is preferred that interested individuals call Steve Hemenway at 604-795-5711 to set up an interview. The e-mail address is shemewa@uniserve.com .

Deadline for submissions is March 1st, 1995

Source record: 26041

If you do not know by now, there is a station on the air until 0900 (2/9/96) Friday called KTRK "kilo, tango, romeo, kilo" better known as "K-TRUCK RADIO". What you will hear is wall-to-wall Classic Album Rock introduced by "radio specialists" from Fort Meade, Maryland. KTRK is an experiment of the Army's Broadcast Service. "K-TRUCK" operates from, you guessed it, a truck..... specially designed for quick deployment whenever need arises to provide entertainment to the troops in a given area. After this "shakedown cruise" ends on Friday, both the KTRK truck and personnel will be re-deployed in Bosnia to serve our troops in that highly dangerous area of the world.

In talking to the folks at "K_TRUCK", they told me that they would love to get reception reports and will respond with a QSL card. Their mailing address is.....

ABS
Room 340
601 North Fairfax Street
Alexandria, VA 22314
and be sure to label the letter and envelope with "DX" !

KTRK operates at 1670 kHz with a power output of 5,000 watts non-directional. It really does a number on WJDM/1660. Get it while it's HOT !!!

Message-ID: <4fcck7$o76@vixen.cso.uiuc.edu>
Source record: 26042

Tonight (Feb 6, 96) I received a very strong station on 1670 Khz, using the call letters ARMY. They announced that they were operating in the Washington D.C/Baltimore area testing a 10KW transmitter that would be deployed to Europe (Bosnia?). The announcement also said that the transmitter was not restricted to the bandwidth curve required for U.S. service and therefore had higher fidelity. I bet it was a DX-10.

It did indeed sound great! The signal was very strong here in Des Moines, Iowa except for normal fading and phase distortion.

They gave an address to receive reports, but I was unable to copy it down in the car. Did anybody else get the address?

Source record: 26043

This morning, we called the people doing the testing on 1670 Khz. They will be testing until Friday 2/9/96, then the radio truck will go to Bosnia. It will be going on another frequency over there.

On the night of 2/6, they were running 1000 watts to a 150 foot portable tower with 120 radials laying on the ground. The studio and transmitter are in a truck trailer. In conflict with what they annoounced on the air Tuesday night, the technician said that they were running 1,000 watts that night and the transmitter is capable of 5,000 watts. The allowable bandwidth is wider over there, so they had it opened up further than the commercial stations can do here.

It sounded great and hard to believe that it was only 1,000 watts.

1570. St. Louis errors? A reply to Frank Absher.

Newsgroup: rec.radio.broadcasting
Date: 1996-02-08 00:00:00 UTC
From: ssimon9@ix.netcom.com
Message-ID: <4fccke$o7f@vixen.cso.uiuc.edu>
Source record: 26047

This is in response to a recent post made by Mr. Frank Absher, News Director of WSIE-FM, Edwardsville, Illinois, concerning a recent article posted by me concerning negotiations between the St. Louis Chapter of the American Federation of Television and Radio Artists and the management of KMOX radio.

ABSHER: There have been many errors in the recent reporting of St. Louis happenings, and I've been in touch with our moderator about the problem. The most recent misleading statement has to do with station "demands" at KMOX in its negotiations with AFTRA. The report mentions a "mandatory six day work week." This has been in the AFTRA contract at KMOX since I worked there 16 years ago. The wording, if I remember, simply allows the station to schedule announcers to work six days. It is not mandatory.

AUTHOR: Absher may have been in touch with the moderator, but he's never been in touch with the author, "about the problem," even though the author in the past requested Absher do so if there needed to be a correction or clarification.

First of all, there haven't been any errors. All the information gathered has come from sources at KMOX radio AND from the AFTRA Chapter office.

Actual text: "According to an anonymous KMOX on-air talent, "there is some progress being made, like the new description and scale for reporters. But others aren't in favor of the six day work week."

Absher says there are mistakes. Well, when both staff members and chapter representative tell me the same thing, some who are actually working first-hand in the negotiations, is what they are telling me wrong?

Strange.

This was the actual text:

"But the sticking point with the rank and file may be the proposal by KMOX for a mandatory six day work week, and other takebacks that still aren't being disclosed. Another negotiating session is being held today at 10 a.m."

The six-day mandatory work week is a PROPOSAL by KMOX. It never was mandatory, and the above text never said that previous contracts called for a mandatory six-day work week. Until 1993, all staff announcers were bound by a five-day agreement; all additional days were to be compensated with overtime pay, or compensatory time off.

There IS a working proviso for a six-day work week at KMOX for some announcers under the current agreement. In the last CBA (collective bargaining agreement) between KMOX and AFTRA, staff "sports" announcers agreed to a six-day work week, in return for all positions remaining in tact during the duration of the CBA. A five-day week for sports staff announcers was proposed, but one position would have been eliminated. All other staff announcers continued to be bound to just a five-day work week.

This comes from Ron Jacober, Manager of Sports Operations for KMOX.

I agree with Mr. Absher on one point. I salute Bill for being our moderator. And because of it, this news was published first in AIRWAVES, before it was tipped to, and published in the St. Louis Post-Dispatch.

Frank, was I wrong reporting on the dismissal of your boss, Roy Gerritsen?

Scott

[Moderator's Note: I do hope these gentlemen can work this matter out between themselves. I appreciate Scott's reports, *and* Frank's input as well. Gentlemen, for the good of the group, please come to some understanding on these matters. Peace. Bill]

> I dunno but it seems to me that using clipping as a means of 'brick
> wall' overmodulation protection, is like trying to cut a diamond with a
> chisel and hammer. It is hard to believe that someone hasn't devised a
> way to do lossless processing w/o clipping.

While clipping is the general method for controlling overmodulation, please understand that in the generation of processors currently produced, their are additional "goings on" of the clipped signal. Much of which has to do with trying to control, or surpress perceived distortion. In most cases these applications are allowing the signal to actually be clipped harder than what the ear perceives. Without this, the audio when degrade much more.

Regarding another method to control overmodulation is almost a study unto itself. The trick is to provide an instantaneous limiter that will control overmod, but not carry with it the audio "baggage" that might cause "breathing." I.M.H.O. the sound of a clipper is more tolerable than that of a limiter "breathing."

Anyway, I'm always trying to find additional methods or alternatives to final limiting. So far, my knowledge still leans towards the hard limiter approach.

Actually some orgainized college students could probably do a better job
than most professional broadcasters. As mentioned, make it a "lab"
project with a class that relates to doing research. The hardest thing
about doing a survey is getting the labor to conduct the survey. You can
probably get many bodies involved in a class/college situation.

Radio AAHS just needs to create their own action heros and develop a line of super action hero toys to market. Then once toy sales hit the roof, everyone will be jumping on the kid radio bandwagon! <g>

That was a joke, but I agree with you. Arbitron should be rating kids under 12. If they don't, there's something one of their competitors should jump on! My son is 6, and while he likes his rock and roll, nearly every time we get into the car, he hits the button for Radio AAHS. He can't wait until he's old enough to try out for the local affillate's Air Force. I know he can't be the only kid in town who's that crazy for kid radio. (Though he may be the only kid in town who loves OTR!)

Dan Kingerski wrote of his lack of confidence after a quick rise to prominence as a DJ, a promotion to the news-director position and then a demotion to a Sunday-night-only DJ shift. He noted a lack of confidence, and indicated that he didn't sound as good as he wanted to. How to get over this "hump?" Here are some thoughts.

Dan, I know how it is when the winds of change can buffet you personally. It's hard to keep positive energy going when you don't feel positive yourself. But here are some thoughts:

1. Whatever has happened between you and management, it isn't the audience's fault or problem. They deserve the best you're capable of giving them every time you open that mike. That being said, you will have good days and bad days, of course. Sometimes, despite your best efforts, it just won't sound as good as you'd like. But always try to be your best.

2. Imagine you're in a major market, and you've got to DESTROY all the competition. Or think of a strong, effective local personality (keep said name to yourself!), and try to be BETTER. Use that person's abilities as a challenge to enhance your own. Cream him! Show him who's boss! Yes, and admire him at the same time.

3. Visit, or listen to, people in other markets. What do you like about what they do? How can you blend their knowledge with your unique style? (You may even have to "borrow" some of their traits until your own style shows through. That's why it's better do to that with skilled professionals that the average listener doesn't hear.)

4. You've just met the girl of your dreams (at least in your imagination.) She hates a show-off, but she is receptive to you. Do the best show you can--just for her.

5. Think of a close friend or relative, or make a mental picture of a listener you'd especially like to relate to. Talk to this person one-on-one, with warmth, humor and sincerity. Again, don't show off. Do have fun. DO care.

6. Try your best, while you're on the air, to just have a good time. Rememer what your bosses tell you to do, but don't dwell on the negative aspects of your job while you're on the air. The more positive you feel, the more excitement and good will you'll generate with your audience.

7. Always be on the lookout for things that make you think, laugh, react. Share what you can with your audience. Don't just limit

yourself to being creative while you're on the air. Write things down. Even have a pencil and paper at your bedside table. You never know when a good idea will come to you. If that idea doesn't last, you'll want to catch it while it's hot.

8. Even if your show consists of reading liners, have fun. Your listeners won't enjoy your show if you don't.

Oh, one more thing. Look in the trades for humor services that fax their material to you. Some'll let you sample their wares for a week at no charge. (Not all of this stuff is funny; if you or your friends don't laugh, and your parents shake their heeads in consternation, don't use it.

You won't always be as good as you want to be. But, if you keep at it, you'll get better and better as time goes by. When you fall short, analyze what you do, but don't put yourself through the wringer; you'll learn to be constructively critical of yourself in time.

I hope some of this helps. Even if it didn't--SMILE!!!! You got some E-Mail!!!!

Good luck. All creative people have mental blocks and hurdles to overcome from time to time. Yours will make you better. It doesn't happen instantly, but it happens. And the good news is that the reward of finding yourself an improved person will bring back that confidence that's missing right now. Let us know how it goes.

Although not directly related to Mancow and/or WYNY, I couldn't help commenting on this. Bill, you are absolutely correct, IMHO, on the over-emphasis of research, focus groups, consultants, etc. This is exactly what is killing the 70's format across the country. Here's a format that, if executed correctly (personality, fun, and a broad playlist) had the potential to be a dominant force among 25-54's in most markets. But there's only so many times one can listen to the same 300-400 "carefully researched and selected" Fleetwood Mac/Eagles/Doobie Brothers songs over and over again with nothing between the records except for segues, sweepers, and liner cards. After the initial couple of books, interest drops off quickly, and the format is labeled "a passing fad" and "a failure" by the corporate bean-counters.

WE>well known...and after this morning's radiocast, I don't think there's anyon
WE>left in New York who doesn't know about Mancow's hatred of Stern.

Actually, very few New Yorkers heard the show. I was one of the unfortunate who did. Don't forget that the old WYNY audience was gone and there was no promotion of Mancow's show. Even after the show there were only one or two short articles in the local papers. Even those made more mention of Stern than they did Mancow. The only effect the show might have is to boost Sterns numbers by a few people.

WE>It'll be interesting to see how Mancow/WYNY fits into New York City radio in
WE>the coming days/weeks. It's still not certain if Mancow will stay and 'YNY
WE>will be New York's Rock, but if it does, I think WPLJ's morning show is in
WE>trouble..as is Z100's. And with another rocker in NYC, that's just another
WE>gun pointing at Z100 to change/align it's format a little better.

I seriously doubt you can make a show in New York out of hate that runs that deep. Particularly one that originates in Chicago and gives Central Time time checks. It was one of the all time low points in New York radio.

Rich

RU>Look for MANCOW to be simulcast for 1 day (maybe 1 week) along with the
RU>rest of Evergreen's Chicago property WRCX. Will this just be a ruse to
RU>shake up the market or will Evergreen actually simulcast Mancow each
RU>morning on a station compatible w/ his talents (Urban?Rock?)?...The fun
RU>awaits. I can hardly wait to hear Stern's comments.

How will it "shake up the market?" New York has gone through many format changes, station swaps and sales without being "shaken up." Certainly some foul mouthed disk jerkey isn't the stuff market shaking is made of. If he comes here, it'll be just another personality change and the vast majority of New Yorkers will ignore him just as they always do. Don't forget that the top rated morning show (all news) is listened to by about 5% of people actually listening to radio. That percentage is far smaller than even 5% of the total population of the city.

A stalled subway train has more impact on a New Yorker's life than all the city's disk jerkeys combined. Let's keep this in perspective.

1597. Quarter Hour Question

Newsgroup: rec.radio.broadcasting
Date: 1996-02-09 00:00:00 UTC
From: sborre@asc.upenn.edu
Message-ID: <4fecf9$1gi@vixen.cso.uiuc.edu>
Source record: 25874

I need some help confirming a ratings related question.

I understand that radio listening is not evenly spread throughout an average hour. I remember reading (though I can't for the life of me remember where I read this!) that the first 15 minutes of the hour are the most listened to and the last 15 minutes of the hour have the fewest listeners. One result of this fact is that radio stations are more likely to sweep the first quarter hour with programming and confine commercials to around :50 after (if possible) with the goal of giving an artificial boost to the ratings.

Can anyone out there in radioland confirm this or refer me to a definitive, preferably textual, resource?

Thanks,
Joe Borrell

1600. Music tests and college radio

Newsgroup: rec.radio.broadcasting
Date: 1996-02-09 00:00:00 UTC
From: Rob Landry <umar@cybercom.net>
Message-ID: <4fecfb$1gn@vixen.cso.uiuc.edu>
Source record: 25877

[Moderator's Note: So, Rob, I am confused. Are you saying you *are*
in favor of testing or *are not* in favor? Bill]

In general I don't like it. As I said in my previous post, it can easily lead to a situation where test participants vote for songs which are, or sound like, the same ones they already hear on the radio. When marketing research becomes a substitute for artistic creativity the eventual result is likely to be a station that's not very entertaining.

I endorse music testing (and audience research in general) for college stations because their programmers are otherwise less likely to develop the good judgement of a commercial PD who knows what sounds good when he hears it. Also, music testing, for better or worse, is very much the rule in the "real world", and college programmers who learns to use it are likely to find the experience useful if they go into radio prfessionally.

1601. Re: WBBM-FM

Newsgroup: rec.radio.broadcasting
Date: 1996-02-09 00:00:00 UTC
From: ricklew@aztec.asu.edu
Message-ID: <4fecfc$1gq@vixen.cso.uiuc.edu>
Source record: 25878

In a previous posting, "Doug Fleming" decries the tendency
of stations like WBBM-FM to switch from dance to a CHR lean. Well,
Doug, it's the old dilemma: in some markets, dance can be hard to
sell. The stereotype of the dance listener may not be the upwardly-
mobile, affluent folks who are just itching to buy cars, wine,
computers and other products. But you may protest: That's not fair!
No, but unfair as it is, the revenue-based business of radio leaves

a lot of people out in the cold; if you don't believe me, just
sincerely ask some people you talk to in-depth: How satisfied are
you, specifically, with what you get from your radio?
While not at all a fan of dance music, I sympathize with the
plight of the listener who feels ill-served by the station running
his favorite format. The seesaw approach of going dance to get
ratings, and then leaning to CHR to garner sales, can only be
unsettling to most listeners. But as the potential audience for
radio finds more friendly media, it'll only get worse--and of
course,
then the accountants and CEO's will demand more sameness and even
less risk-taking. It won't be all that long before the folks who
spend dozens of megabucks to buy radio stations will be wondering
why they left. You are not alone in your discontent, but the money
men won't see the problem till AFTER it's too late.
So I'll bet you're right. You'll see more of these flip-flops,
as efforts will be made to get quick returns on massive
investments. But take heart. The audience for dance is large enough

that if WBBM-FM changes its focus, other stations in the market
will
be clamoring to fill that niche. At least, the kind of music you
like is in enough demand for that to happen. Fans of Celtic music,
African rhythms, oldies besides LOUI LOUI, jazz that isn't
"smooth", Eighties rock that isn't "old school", and those with
more eclectic tastes aren'st so fortunate in many markets. They
have to go to a noncommercial outlet for a few hours a week to find

what they like--if they can find it at all.--Rick Lewis,
(ricklew@aztec.asu.edu)

I'm thoroughly committed to a system that's probably out of your price range (the Orban DSE7000), but I can suggest a source for _unbiased_ information:

Get hold of some back issues of Radio and Production magazine. They interview top professionals in all kinds of stations and markets, and usually each gives his/her reasons for using particular equipment. Also, in the back of the mag, there are phone numbers of owners of the various systems who are willing to chat about the pros/cons of what they're using.

It's also a great magazine to read if you want to learn something about the world of radio production after you graduate...

>People tune in Stern in droves, because he seems to be the antithesis
>of all that structure

Bill,
I simply don't understand this kind of sweeping generalization with regard to Sterns' audience. How many stations is he on? Maybe 15 or 20. How many radio stations are there in the US? Upwards of 10,000. Let's see, that works out to a whopping percentage of, well... point 002. Listeners versus potential US listeners yields similar results.

Clearly, there are many reasons for the paucity of stations carrying the show, not the least of which is dollar aquisition cost. However, I submit (and hope) that more importantly, the vast majority of stations simply don't have time for this type of fare.....nor do vast majority of listeners. How do you think the Stern show would fly in say, Boise, Eau Claire, Topeka et al ad nauseum. Yes, it would likely generate the 6 per cent share it does in major markets. But in mid to small market radio, that's not enough.

It is my thesis that Stern and his ilk in particular, are limited to major markets where 6 per cent is enough. I hope and believe that the majority of listeners have no time for the locker room except after excercise.

>Stern, THE LOOP, (and others) show that there *IS* a big,
>mostly untapped, audience out there who wants something different.

Absolutely! There is a huge untapped audience out there, which explains the popularity of programs like Morning Edition, which garners a healthy 5 share here in the nations capital. Similarily, afternoon drive Bluegrass Music does well. It's different.

Having said all that, I should point out that my wife listens to Stern on occasion :-)

>I think, personally, that at the core of this attraction is the fact
>that Stern, et-al, push the ever-narrowing envelope of what can be
>said and done on the radio

I agree. But the more important question in my mind is, where does it end? How many times can you say "penis" before it loses whatever impact it might have had? How many times can you talk about other bodily functions before that too becomes routine? And what then? Where do you push the envelope? Live radio intercourse maybe? Snuff radio?

Carried to it's extreme, I find "pushing the envelope" extremely worrisome.

The question that needs to be asked is "where will it end"? Or is this merely another symptom of a society in decay?

Actually, WMAQ doesn't use CNN Headline News, but uses CNN Radio News, a
news service just like CBS or Mutual. Headline News is a simulcast with the
cable channel that is syndicated by ABC/SMN.
AP All News Radio sounds much better than Headline News, but its still not
as good as a local production.

Message-ID: <4fecej$1f1@vixen.cso.uiuc.edu>
Source record: 25944

(WVKS, 92.5, KISS-FM)
Last summer the Breakfast Club, with Denny Schaffer and Tricia Courtney, had tickets to give away for the Rock and Roll Hall of Fame concert deal. Denny Schaffer said he would give away these tickets if a listener would do one of a few things: get the Mayor of Toledo to call the show, for a listener (preferably female) to get their head shaved live on the air, or to go down to the volleyball courts at international park in Downtown Toledo and play volleyball completely naked. Well, two listener did just that. Tricia Courtney along with Junior producer Susie went down to international park and watched as these two listeners played nude volleyball. But, that wasn't the clincher. Because Denny Schaffer's "Breakfast Club" promoted indecency the Toledo Prosecutors office filed charges agains Denny Schaffer, Tricia Courtney, Susie, and the two nude volleyball players. On February 8th Denny and the rest of his co-hosts were in court and will be indicted on Monday the 12th of February. The Breakfast Club could get a fine of $250 and 6 months in jail.

Also, as everyone knows Jacor Communications bought/acquired/merged (I've heard several different reports) with Noble Broadcasting Group. This effects Toledo because Noble owns WVKS (KISS-FM), WSPD (NewsRadio 1370), and WRVF (The River, 101.5). No changes are expected at any of the stations.

You drive past it on I-75 in Allen Park, MI just south of Detroit. The
freeway passes almost close enough to throw rocks and hit the towers.
All twelve towers are no longer there, however. The station requested,
and received, a reduction in power and trimmed the array back to nine towers.

>Hi.. Does anyone know of a station near the Buffalo/S.Ontario boarder that carries the AFRTS radio
>programming? Used to listen to them in Saudi Arabia last spring and was wondering if it can be
>heard anywhere around here?...

I saw a demonstration of a satellite receiver for getting the AFRTS feed to their overseas stations. The frequency was in the neighborhood of 1500-1600 MHz. The dish size was about four feet in diameter.

There are no AFRTS stations in the USA or Canada that I know of. I think the closest one is in Guantanamo Bay Cuba. The station operates on 1340 KHz with 250 watts. Their range is quite good over saltwater for this power level. They have an FM transmitter in parallel with 1340 which operates on 102MHz. They also send the satellite feed at 103 MHz FM with continuous relay of the satellite feed. I heard them in the day time on AM while visiting Jamaica about 20 years ago. There is not much chance of receiving them in Buffalo.

There are occasional feeds on shortwave for special events or operations which are out of range of existing stations. These are very sporadic and are not widely publicized.

>I don't recall having heard of an FCC initiated "reverse"
>discrimination issues.

Hopefully, this will change soon. These days, the odds are stacked against you if you're a white male searching for employment. This is especially true in broadcasting, due to the EEO requirements that licensees have been burdened with. Everyone else is a member of a "protected class" and, therefore, entitled to special preferences, quotas, etc.

Reverse-discrimination is alive and well in our industry.

How very annoying! After listening to the WYNY Format Of The Day,
Friday being WXKS-FM Kiss 108 in Boston, at 9:30 PM EST the carrier was
reduced to a constant beep and rhythmic thumping. It is now 12:30 AM
Saturday (3 hours! later) and the thumping continues. At first I thought it
was the announcement of the new format. However this MAJOR techincal problem
has gone on far too long. It seems that not only doesn't 103.5 have an
audience, the owners and technical staff aren't listening either. That
is truely pathetic. The computer controlled ID'er continues to give
promo announcements every twenty minutes on top of the thumping.

It seems the new WYNY format is a simulcast of Joe Anybody's EKG at
County Hospital!!!

THIS IS INEXCUSABLE FOR A NEW YORK CITY RADIO STATION!

Message-ID: <4fhvkj$k7u@vixen.cso.uiuc.edu>
Source record: 25802

I was listening to the WXKS-FM being broadcast over WYNY in NY
tonight when around 9:30 it stopped, static appeared and then a beeping
noise (heartbeat). I was enjoying the music on WXKS, which was a nice
mix of "dance" and current rock stuff. I was also enjoying the station
since I used to live in Boston and noticed how some things hadn't changed.

I didn't like the fact that WYNY kept sticking their promos for new stuff
coming in the middle of songs like they had them on a timer and weren't listen
listening.

I tried WYNY's main #, no answer. I then called WXKS long distance.
A very nice gentleman told me that WYNY was making a big announcement
on 12:00 Saturday. I told him I enjoyed the music and that WYNY should
have left the music on till then. (Friday night during a sweeps month -
heartbeats get no ratings :)). He gave me the 800#. I called. No answer.
I just tried again, and the voice mail box is full.

Of course they don't have a web page or e-mail like other NY stations.

Source record: 25803

Yesterday, an Oakland County (Michigan) Circuit Court Judge ruled in favor of current WKQI-FM morning drive man Dick Purtan. This gives Purtan the ability to negotiate with other stations. Rumor around town here in Detroit is that Purtan will move to do mornings at WJR-AM. Of course, he could just stay with Q95.
Purtan, in an interview with WDIV-TV's Devan Scillian, said that he would not be comfortable with the format he would have to adopt at JR since there's no music and he's been doing pretty much the same morning show for 15 years (at WCZY and then KQI)

We'll have to see what happens at the end of April.

Sorry, but I had to jump in and set the record straight concerning the 'New Sony AM stereo/FM stereo' carried by Radio Shack. It is shown on page 49 of the 1996 Radio Shack catalogue and sells for US $29.99. I saw one a couple of months ago at the Radio Shack store at the ZCMI Mall in downtown Salt Lake City, Utah. The unit is very small. The tuning dial is roughly one inch in length (2.54 cm) and all antennas are internal. I was unable to test it as all that could be received on AM inside the mall was static from fluorescent lighting. I did not get one, as there is only one local AM station where I live (a second one is pending). It does not broadcast in stereo and I really did not like the fact that the tuning dial was so small. Anyone who has one of these units (no Sony model number listed in RS catalogue), I would be interested in knowing what you think of it.

>I read about it in this news group. I then went to my local Radio Shack
>in Scottsdale and the salesmen I thought I was nuts.

Don't worry about that. Most of them never had jobs before they were hired
by Rat Shack, and in most cases, don't know squat about what they are trying
to sell. Radio Shack at one time had two different AM Stereo recievers. One
was an add-on, or stand alone reciever that plugged into your stereo/amp. The
other was an auto AM Stereo/FM Stereo/Cassette player. Both have since been
discontinued, but weren't bad little units. This was in the mid 80's.

>Three of the salesman on duty claimed that AM stereo does not exist, and I
>could not make them believe that it really does. Does anyone know of any
>other store other than radio shack that sells a Sony Walkman with AM Stereo??
>and for how much money???

Yes, AM Stereo does exsist, however thanks to the F.C.C., reciever
manufacturers, and American radio station owners, it has become a rather
non-issue. Take heart though, you can still get AM Stereo/FM Stereo car
radios in late 80's and early 90's Chryslers. Most of them had the recievers
as standard equipment.

I listened to 3WE the day after the fatal crash. The morning news
program put together a nice tribute to Endsley, which included a lot of
bantering back and forth with Jeff and Flash. They praised his sense of
humour, and his personality on and off the air. It didn't sound
anonymous to me.

Here in Cincinnati, our traffic reporter (on WLW) is anything but
anonymous. He'll be listening to the news/talk before he gives his report,
and before he reports the traffic, he'll usually offer some comment on the
news. He's very insightful! He also does personal appearances, like, if he
lands his helicopter at a Hardee's where you're eating, you get a free
lunch. I'm glad our guy is _not_ anonymous....

1635. Quality Rock(?) 102.7- WNEW

Newsgroup: rec.radio.broadcasting
Date: 1996-02-10 00:00:00 UTC
From: Jerome Myers <jerome_myers@prenhall.com>
Message-ID: <4fhvs8$ki1@vixen.cso.uiuc.edu>
Source record: 25896

Is NY's WNEW-FM picking up the K-ROCK Classic Rock slack? They now have the slogan "Quality Rock". In the past hour I have heard Rolling Stones, Pink Floyd, old Neil Young along with Smashing Pumpkins, Aimee Mann, etc.. It actually sounds like the old WNEW-FM from the days when "Progressive" was the "in" thing. It seems that NEW-FM is trying to pick up some Classic Rock fans abandoned by K-ROCK. Someone- please define Quality Rock?

Other NYC radio news..."Pure Rock" Q104.3 could be up for sale? Potential buyers EVERGREEN, Infinity, or Emmis. The news hit the daily papers along with the pending departure of Q104.3 morning man- Trent Tyler. If Mancow from Chicago doesn't make it on the new WYNY 103.5- he would be a prime suspect for Q104.3 (syndication?).

As the "Radio" World Turns...should be how to describe the NY scene!

Message-ID: <4fhvj9$k5l@vixen.cso.uiuc.edu>
Source record: 25897

Greetings, Airwavers! Here's the top of the radio biz headlines from the Nation's Capital this week!

Item First: Keep on Truckin! -- As has been already reported here in Airwaves/rec.radio.broadcasting, the U.S. Army is field testing a mobile radio station
installed in a truck out of Fort Meade, Md. at 1670 khz...that's right, the expanded AM band. Gannett's W*USA-TV (Channel 9) profiled ABS/K-TRUCK tonight (Thursday, the 8th), what they called "Washington's newest radio station", complete with a look inside the truck, and interviews with the personnel who will operate the facility. It comes complete with a 1,000-watt transmitter, and its own,
portable, guyed tower. W*USA reports that after signing off sometime this weekend (other reports say the station will sign off this Friday), the army's radio truck will be packed up, and moved to Bosnia, to provide a little taste of home for the U.S. troops assigned to the NATO/IFOR peace mission. W*USA says the station, to be operated by AFRTS, will operate at 1143khz once on station in Bosnia.
One question: did the Army have to get temporary authority from the FCC to test the station at 1670?

Item Second -- He's Bush(ed) -- The Washington Post "On the Dial" (radio) column for Tuesday, the 6th, reports that CBS/Westinghouse o&o WARW-FM ("Arrow 94.7") has hired Bill Bush to host middays on the classic rock station. Bush is the 24-year old nephew of former President George Bush. The Post reports Bush started in radio at Colby College in Maine...his most recent port of call before coming to "Arrow" was at WLKZ-FM, a 3kw oldies station in Wolfeboro, New Hampshire. The move means that former midday host Paula Casey moves to evenings. And, as Paul Harris reported here himself a few days ago, he takes over the morning drive (530-10am) slot at "Arrow". Congratuations, Paul! Another one off the beach! <g>

Item Third -- Sunrise Follies -- The Post has some more information on the most recent ratings period, based on the Arbitron survey, and analyzed by the Radio Research Consortium, a Silver Spring, Md.-group which provides ratings and audience analysis primarily for public radio stations. The Post reports the numbers show WAMU-FM (88.5) and NPR's "Morning Edition with Bob Edwards" is tied for 4th in morning drive with a 5.6 share of the 25-54 audience. Others at 4th in D.C. are the morning shows on country-formatted WMZQ AM-FM (1390/98.7) and Donnie Simpson on urban contemp WPGC-FM (95.5). (Numbers 1, 2, and 3 are, respectively, Stern on WJFK [106.7], Jack Diamond on hot AC WRQX-FM ("Mix 107.3"), and Tom Joyner on urban contemp WHUR-FM (96.3).)

Among *all* listeners to public radio in the area, WETA-FM (90.9), and its Hagerstown, Md. satellite WETH-FM (89.1) claimed a 3.1 share of the audience,

slightly ahead of WAMU's 3.0. The Post and RRC say WAMU enjoys a slightly larger cumulative weekly audience. Pacifica's WPFW-FM (89.3) scored a 0.7 share in the same survey, while WDCU-FM (90.1) registered a 0.6 share. Both WPFW & WDCU program a mix of jazz and community news. Ratings information on other non-commercial public radio stations in the D.C. area is not available.

Item Fourth -- "You can call me Ray, or..." -- The Post also reports that along with good numbers, WAMU's PD Steve Palmer is...well, changing names...sort of. Seems he adopted "Palmer" as an air name in Hartford, Connecticut when he was a newsman there almost 20 yrs ago, because there was this wacky comedian who *just* happened to share his name...that's right, Steve MARTIN. Steve used the "Palmer" handle on the air right through his stop at ABC's WRQX-FM in its days as CHR "Q-107". Last year, he became "Steve Palmer Martin" And now, he's planning on dropping "Palmer" all together, and henceforth, will be "Steve Martin". No word on whether WAMU GM Kim Hodgson will modify the station's dress code to allow for the wearing of fake arrows and white suits... <grin> (Hey, its a joke, ok???)

Item Fifth -- Also on Brandywine Street... -- D.C. Radio Watch has learned that WAMU-FM has hired Kathy Merritt to be the public radio station's new News Director. Kathy comes to D.C. after a long stint as News Director of public radio station WFAE-FM in Charlotte, North Carolina. Among her many accomplishments, Kathy is a former president of the Public Radio News Directors Inc. (formerly the Public Radio News Directors Association). She'll begin work at WAMU later this month.

This weekend, I'll be posting a more complete report from the AWRT D.C. Chapter meeting, featuring the comments of four top radio group honchos, and their take on the future of the radio business in the wake of the signing of the Telcommunications Bill.

Interesting things going on here lately...

* John Picano, PD at WOWO/WQHK/WMEE is gone. He apparently has contracted an illness that has forced him back to Florida. He's now "consulting" the station. No replacement has been named.

* Hal Brandt, afternoon drive time guy at WBYR (the Bear - 98.9) was let go last week. Before the Bear, he was at WXKE (Rock 104). Rumor has it he applied for work at 96.3 The Edge at one time, but was not hired. Seems his monetary demands were excessive. Dunno where he'll end up, he's hoping to stay in the area.

* It seems many in the Fort Wayne area wonder why WXKE isn't taking their other signal (WEXI - 102.9 Huntington [the former WOWO-FM]) and making it a modern rock station to better compete against the Edge. The idea has arisen with the management and has pretty much fallen on deaf ears. Hmmm...

Think that's about all. Till next time...

Source record: 25952

References: <4f4h0q$n0j@vixen.cso.uiuc.edu> <4fccja$o5u@vixen.cso.uiuc.edu>

Just a casual observation ...

Top 40/CHR got a little old in about the late 80's/early 90's. During that
many of the stations' playlists were too heavily skewed towards black
and rap music. It was a real turn off.

If alternative was a means to rectify this situation, I do not think it worked
really well. While the black music of late is a little harsh for my ears, the
alternative music of today just seems to drone on, and on, and on, and on.

I was heading home from Detroit over the weekend and heard one of those
all-80's shows in my car. I forgot how satisfying the music was.

I'll take a circa 1982-1987 CHR/Top-40 station playlist any day of the week.

From: ivoboude@knoware.nl
Message-ID: <4fhvjc$k5r@vixen.cso.uiuc.edu>
Source record: 25953

In respond to the whole of the Alternative discussion:

Really, what does Alternative mean today? Every station playing Hootie or Alanis Morisette is even perceived as Alternative by some people. Artists like these dominate the charts for some time now, so it's safe to say that they're not Alternative (anymore). They're just a piece of the CHR pie.

Let's take a look at the meaning of the word Alternative. It implies that it's giving you something that wasn't available before. This may be done in many variations. So even a Dance/CHR may be Alternative in that way.
But through the years some dude thought that this word could be used to describe a kind of music. You're just never sure which artist is, and which isn't. How popular may a record or artist be before not to be considered as Alternative anymore?
If New Order and Depeche Mode are Alternative, what are White Zombie and Die Krupps? I think these are just all Industrial-Pop in different styles. And if Hootie is Alternative, what is Skunk Anansie or Foo Fighters. The term Alternative is too broad to describe all of these different music styles.
In Billboard Magazine the PD of WDRE The Underground Network said: "If you really want to be Alternative, then launch an all Polka format. There's something different."

Some Alternatives:

"Tirol-Fm" (All the Polka, all the time)

"The Dinosaur" (So bad, it's even good)

"The Speed Metal Jukebox" (We won't stop the music, even if you bash us in the head with a baseball bat)

"The Elevator" (Sleepy elevator music anywhere you want it)

"Slow Talk" (Old Time Talk at the speed of your comprehension abilities)

And... if you really want some good Alternatives that'll create GOOD ratings e-mail me!

Ivo!

1643. Quarter Hour Question

Joe,

Absent a fly on the wall observing actual listening behavior, we'll never actually know. Very few Arbitron diaries are filled out contemporaneously with actual listening. Most are filled out by recall and most are in even units of time-- hours, half hours, five minutes, etc. It is rare to see a diary with a listening entry of 6:13-6:47.

Many of the programming machinations you describe are engendered by Arbitron's methodology. Essentially Arbitron collects cumulative audience and time spent listening data, then uses that information to compute average quarter hour audience. So, it is fair to say the resolving power of Arbitron data is not seconds and minutes but quarter hours.

Arbitron credits a quarter hour of listening to a station if the diary shows listening to that station for at least five minutes in a

quarter hour. Therefore, a diary showing listening to a station from 8:10am to 8:20am would result in two Arbitron quarter hours of listening. From that methodological quirk came the notion of sweeping music across the quarter hour boundaries. Most commercial clusters are scheduled within a quarter hour or at the end of a quarter hour, not across a quarter hour boundary.

Since an hour is a finite period of time and commercial stations need to broadcast commercials in order to pay the power bill, among other things, the eternal debate is how to schedule the commercials to minimize the negative impact in Arbitron. The predominant notion in FM music stations at the moment is two commercial clusters of about five minutes each about equidistant from eachother-- ergo, :24 and :54.

There are other variants involving long sweeps: commercial clusters at :38 and :54 allowing a long sweep from about :00 to :38-- the disadvantage is the commercial heavy dark side between :38 and :00. Some stations try to schedule their commercials so they are in music when their primary competition is in commercials.

Some stations have tried a single commercial cluster per hour and most have ultimately met with advertiser resistance. Others have tried to make the hour less finite by floating commercial clusters-- playing seven songs, for example, between each cluster. Sales managements hate that because of the inventory uncertainty.

So, the answer to your question, at least in my experience, is there is no convincing behavioral evidence that actual listening varies materially by quarter hour in a typical hour. Logic says people are tuning in and out constantly and in a random pattern influenced as much by what is being broadcast on other stations as on the station in question.

> Sucking Sound from the South."

Eons ago, while I was working in radio to put myself through college,
the college station's calls were KPGY. (I did airshifts there also,
but I wouldn't consider that working) The logo was a flying pig
skewered on a radio tower. The motto was "The big pig in the sky,
KPGY".

At some point the calls went from KPGY to KUSR. The 'official' take
on the acronym was University Student Radio. It immediately became
Unbelievably Stupid Radio, 'unofficially'.

1648. Radio Stations, Can You Help My Collection Grow?

Newsgroup: rec.radio.broadcasting
Date: 1996-02-10 00:00:00 UTC
From: Wayne Harrett <harrett@ra.isisnet.com>
Message-ID: <4fhvjh$k61@vixen.cso.uiuc.edu>
Source record: 25959

Hello!

I'm a 33 year old "wanna be radio host" Ever since I was in my teens I wanted to be a "DJ" My heroes were Wolfman Jack, Dick Clark, Anyone who was on the radio. I dreamed, still do at to being on a radio station. I had a setback in this goal, I have a minor cleft palate. I wish they would come out with a cure to correct this problem I have. If they needed someone to be a test person on a cure I might do it, just to get on the radio. Mind you, my cleft palate isn't really bad, but just enough for those hard to do words over the air.

I started a collection to help in my efforts. A collection that took off when I hooked up to the Internet. I collect radio/television items. Items with the station(s) logo/slogan on them. Items such as shirts, mugs, pins, cds, stickers, caps, posters,etc. Any stations, any formats are welcome from across North America.

Help me to continue my collection of GREAT Radio Items. If you can help, please e-mail me, OR send any items to the following address:

Wayne Harrett
271 Windmill Road,
Apt. #333,
Dartmouth, Nova Scotia.
B3A 4N8
Canada.

Again, THANK YOU to those that helped so far!

Thank You!

Wayne Harrett....Halifax Metro's Radio Watcher

As someone who has listened to something like 100,000 hours of radio (8 hours x 365 days x 30 years), I've gotten so used to compression that uncompressed music sounds a bit annoying and strange. Sometimes it blasts and other times you barely hear it.

I imagine that many experenced radio listeners expect to be able to set the volume control once and leave it there for hours on end.

Once asked someone claiming knowledge in broadcasting what would music would sound like compressed to less than, say, 1 dB of dynamic range (ie, no preceptable range). He said it would not be intresting to listen to (sound terrible). Is he right?

I spoke with one of the owners of the Pony Express on Staten Island tonight with regard to their hosting a rally for the purpose of showing support for the return of country music to New York.

Related to this discussion of yet another rally, let me share some HOT information with you all. I just got off the phone with one of the owners of Pony Express, and, he said that he WOULD BE HAPPY to host a future rally. All we need do is organize it and he will provide the place. He also indicated that he has heard rumors of WPLJ considering a format change, and, in light, of recent developments, that they are considering a switch to country. I think the little bits of music being given to us during their Scott and Todd morning show, their anticipated presence at the Nassau rally, and, the fact that the owners of the Pony Express, who have a VERY CLOSE relationship with our beloved WYNY personalities have indicated an awareness of this possibility, and, I think we really have something here!

What I need is feedback regarding your intention to support a rally at the Pony Express. The biggest thing we'll need, besides participants, of course, is some free publicity (Phyllis' story about the rally at Nassau Country Inn was published in the radio section of the NY Daily News - good thing my wife saw it because I don't read that paper), and, the ear of anyone influential we can reach, most especially representatives of WPLJ. I think this has enormous potential, so, please give it some thought and let me know what ideas you all may have for getting this information out, not just on the Internet, but to the whole region!

I told Marty, who owns the Pony Express, that I'd get back to him as soon as possible with an indication of support, and, he will speak with the WYNY personalities tomorrow night during the event for St. Jude (please see my separate post) regarding their willingness to be present at the Pony Express rally.

I'm looking forward to hearing from all of you regarding this second rally, and, please remember, we need feedback from folks who aren't on the Internet as well, or, who may be unfamiliar with this news group!

If you really get involved we just may be listening to Kat and Dave, Lisa Taylor and all our favorites on 95.5, WPLJ, New York's Country Music Station!

>>grown up. Why any advertiser would want them is beyond me. What are
>>they going to by? Budweiser and what else?

And by what authority do you make this claim? In L.A. (and elsewhere), the average age of Howard's audience is about 30, give or take a year... and he's done extremely well for advertisers (including furniture/bedding, auto, travel, insurance, and many other categories- just ask his clients!). He's the very best salesman on the air right now, and you'd (evidently) be very surprised at the qualitative figures on his show- affluent and educated.

You just have to put aside your personal preferences when determining a show's success or failure. I don't like Rush much at all, but he's delivered for his advertisers. So does Howard, in an even bigger way. That's why he's successful.

The local LA station (KLSX-97.1) has Stern doing local piutches for a couple
of car insurance companies, a matress outlet, and a few other things I can't
remmember. But most of the ads do tend to be youth oriented
(beer, CD's, etc.)

Where does WGSM broadcast from? In my travels around Nassau and Suffolk,
I can only pull in a decent signal on a small stretch of Sunrise Highway
in Freeport. Any place else, from Huntington to RVC etc, reception is
horrible!

Check the demographics. it is Mancow's main audience which is 12-18. Stern has
a VERY strong hold on males 18-35.

I believe the station you're thinking of was, at the time, known as WHAY. It later became WRCH, which are still the call letters for the FM. The AM (910 kHz) went from WRCH to WRCQ to WNEZ (its current call letters.)

> never heard Stern use any of the 'seven dirty words' on his show, although
> I guess 'asshole' isn't one of them.

1. The FCC is, in a word, inconsistant in the way it handles offenders.

Loads of people cuss on the radio, but they only went after Howard Stern
Loads of shady religious shows, but they only went after Gene Scott.
Laads of people jamming the infamous LA repeater, but they only went after one guy . ..

2. I have heard local talk show hosts in LA, as well as Gene Scott use the Adam Henry
word lately, so maybe it's becoming more and more "ok" . . .I remember when
"hell and damn" was a big deal.

yes i agree however it is pretty archaic in its methodology and needs a few retunes, when added with linker it seems to be two products doing the same job, and therefore seems incongruous that one has to leave the music to run the links when they work on the same logs / database, also there is no method of incorperating information on specialist shows. Take for example you run a countdown from say Rick Dees or AT40 and you want to include the elements of the countdown in the manual scheduler to protect against those songs being scheduled next to the countdown. In our format it is quite reasonable to expect the number one song to be an *A* rotate.Also the information needs to be compiled for record company returns.

We are running selector / linker / master control and yes it is good and yes it is bulletproof, providing you run audits regularly and you squeeze the database regularly. And yes *Run All* does NOT do a squeeze.

I do understand that a substantial rewrite is underway and i look forward to the new version

Oh BTW anybody running master control???? And Using the PREH kbd?????
Try This,
1: Hit the rec button
2 Select cart 1
3 Hit the key in the top right hand corner of the keyboard, the one that clears the jingle banks

Source record: 25973

HI SCOTT...RE IDEAS ON APRIL FOOLS STUNTS

THE JAPANESE ARE ALWAYS IN THE NEWS HERE BECAUSE THEY ARE BUYING UP "THE COUNTRY".
SO AT 7.30AM ON APRIL FOOLS DAY WE ANNOUNCED THAT OUR STATION HAD BEEN PURCHASED BY THE JAPANESE COMPANY,"MITSUBISHI BROADCASTING CORPORATION"!!!!!
THE NEW OWNERS HAD DECIDED TO RETAIN THE CURRENT FORMAT, BUT DISMISS ALL THE N.Z. JOX.
AS OF NOW, THEY ANNOUNCED, THE STATION WOULD BE STAFFED IN THE INTERIM BY JAPANESE STUDENTS CURRENTLY STUDYING IN N.Z. THIS WAS SEEN BY THE COMPANY AS A WAY OF HELPING THE STUDENTS FUND THEIR EDUCATION UNTIL A PROFESSIONAL TEAM WAS SENT IN FROM TOKYO. THE ANNOUNCEMENT WAS DONE BY ME WITH JAPANESE TRANSLATION.
WE USED LOCAL JAPANESE STUDENTS WHO FOLLOWED ALL OUR FORMATICS,IN JAPANESE OF COURSE. BUT STILL PLAYED OUR OLDIES MUSIC.
WE DID ALOT OF ENGLISH PRODUCED DROP-INS, LIKE...."THIS IS KOOL 93FM, NOW A DIVISION OF THE MITSUBISHI BROADCASTING COMPANY"....PLUS SOME OTHER SWEEPERS THAT ANNOUNCED THE RECENT SALE ETC ETC.
IT WAS A SCREAM TO LISTEN TOO.
THE PHONES WENT CRAZY. OF COURSE, WE HAD OUR "ON AIR JAP TEAM" ANSWER THE CALLS AND PUT THEM TO AIR. LISTENERS WERE COMPLAINING IN ENGLISH AND THE STUDENTS ON AIR WERE COMMUNICATING IN JAPANESE. JEEZ, IT WAS FUNNY.
WE CAME CLEAN AFTER ABOUT 4 HOURS.

ANOTHER SIMPLER IDEA...BACK SELL EVERY SONG AS SOMETHING DIFFERENT. IE, IF YOU ARE A ROCK STATION...BACK SELL SONGS AS COUNTRY. VICE A VERSA. ETC. JOX HAVE TO BE STRAIGHT. SOME PHONES TO AIR CAN HAVE THE JOX OBLIVIOUS TO THE REAL SONG, SAYING THE SONG SHE PLAYED IN THE STUDIO WAS THE COUNTRY SONG ANNOUNCED.
LOTS OF TWISTS IN THIS ONE.

CHEERS. P.S. I WILL NOT BE CHECKING MY E-MAIL ON 1ST APRIL!!!

ROB

Hi. I am a junior broadcast journalism major at Emerson College. When I first got to Emerson, I thought I wanted to get into the tv aspect of bj, but I got involved heavily with WERS, and absolutely fell in love with radio. Among my experiences at WERS, I have written, anchored, reported, produced, and technically directed news and public affairs. I was the public affairs director last semester, and this semester I am news director. I also have produced and am currently the host of "All A Cappella" our 3 hour a cappella show on Saturdays. I am planning on getting involved more with the many other aspects such as public relations, live mixing, production, etc. I feel that the more rounded I am, the better off I will be. WERS has been the absolute best experience of my life thus far, and an invaluable asset to my education at Emerson College. I have never taken a radio class, but am planning to next year as a senior. I just want to get some info. from you radio professionals out there on how I could prepare for the future to get a job in radio. For example, how do I put together an aircheck tape, a resume, what are some things I have not gotten involved with that are essential to do while at Emerson, what type of internship should I look for, etc. I have gotten great advice from teachers as well as Emerson alum on this, but I want to get more feedback from professionals who are currently working in the field. If you are an Emerson alum reading this, please respond. I am curious to know what you are up to. Any help will be greatly appreciated. Thank you for your time.
Sincerely,
Gretchen Bostrom

Just to clear things up...

It wasn't the FCC that screwed up AM Stereo...the government actually picked a standard system for broadcasting AM Stereo. But station owners and engineers complained, and demanded that the marketplace be allowed to pick a standard and not the government. So the FCC granted their wish, resending the standard, and allow stations to pick their own systems.

Now broadcasters are stuck with the choas they created, and AM is doomed.

It will be sad to see WINU go to RADIO AHHS. WINU is a very good little station with a good signal through most of the area that plays the biggest variety of music, from German to Country. There are not many stations anymore that identify solely as Metro East.Saint Louis already has one kids radio station that can barely pay its bills to stay on the air. Ever since it was taken over by private ownership, I have noticed a steady slide to playing mostly 80s music. I listened to the station the other day for about a half hour before I heard a "kids " song(and I'm really not sure if Weird Al is Kids Music), before they slipped back into playing what sounded like a HOT ACR, mixed with a kids song abiut every 15 minutes.
It is sad to say, but it is my bet that both stations will go DARK within the next five years.

P.S. Have you heard anymore on the KXOK switch?
First I heard Americana, but now I hear All Oldeies.

Does anyone have any thoughts on the new telecommunications bill, passed by Congress and signed into law by the President?

>From what I understand, it will allow one company to own up to 50% of the radio stations in many markets. That means some day, we may have many towns in which 2 owners, control all the radio signals in a given town.

How will this affect employment, creativity, programming, news, public affairs, and music?

This could be the end of radio as we know it.

[Moderator's Note: Radio as we 'knew' it has been dying 'the death of a thousand cuts' for years. The current deregulation is just the inevidable 'checkmate' to a long and painful game of chess. It will be a windfall for broadcasting giants and for the owners who sell out at a huge profit. For the grand old lady of broadcasting... well it more like a funeral. Chicago's two news outlets are now co-owned. We used to call this conflict of interest. Now its just called 'doing business'. Bill]

Here in New Zealand we have a conplete network of Tourist information continuous loop transmitters. there are 53 sites each with three 300 mw transmitters on 88.2 mhz in english 100.4 mhz in german and 100.8 mhz in japanese. The units are manufactured in australia and use eprom to store the 4 minute loop audio. The operation is privately owned and is fully commercial. Advertisers include a major banking group, NZ telecom, NZ post and AVIS NZ. The network is promoted by road signage and tuning information in most rental cars. It is also quite remarkable how well 300 mw gets out when sited right.

Nine of the 12 towers still stand (the other 3 were razed for
a parking lot). It's on Dix Ave. in Lincoln Park, near I-75.
There's another 3x3 array a few miles to the south...WDFN's
9 tower site on Rt. 85. WDOZ 1310 has six towers...they're
on the south side of I-94 near Monroe Rd. And there's a TEN-tower
site in Garden City, off Venoy Rd. just north of Ford, belonging
to WCAR 1090.

Ah Detroit...land of the directional array!

Hey all thought that you might be interested in what the Guinness Book says about the tallest towers. If you have this info disregaurd

The tallest-ever structure in the worl was the guyed Warszawa Radio mast at Konsrantynow, 60 miles northwest of Warsaw, Poland. Prior to its fall during renovation work on 10 Aug. 1991 it was 2,120 2/3 ft tall, or more than four tenths of a mile. It was completed on 18 Jul 1974 and put into operation on 22 Jul 1974. The mast was designed by Jan Polak and weighed 606 tons.

The tallest structure now is a stayed television transmitting tower 2,3063 ft tall, between Fargo and Blanchard ND. It was built at a cost of about $5000,000 for channel 11 KTHI-TV in 30 days (2 Oct to 1 Nov 1963) by 11 men of Hamilton Erection, Inc. of York SC.

If I come across any thing else I will post it

The 12 tower1500 AM farm was originally constructed circa 1963 for
the then WJBK-AM. The array was to permit the station to run
50KW days and 10KW nights, protecting WTOP and many others.
The station's chief engineer at the time, Don Hein, still lives
in the Detroit metro area. The station is now religious WLQV.

I think you're a bit under-informed.

Sony MAKES (present tense) an AM stereo portable, the SRF-42.
It has been around for at least 2 years. Radio Shack sells it, along with
miscellaneous other third-party audio and computer gear.

> using?

I have a Sony CFS-6000 from about ten years ago, it too has the
2-position switch (on the front) to allow switching between Motorola
C-Quam and Khan-Hazeltine et al. Although AM stations used to employ
one or another of about four different kinds of AM stereo b'casting (if
they used it at all, that is), since the FCC settled on C-Quam I think
they have all gone over to that; for which reason the few AM stereo
radios on the market now no longer offer the switch.

But I always thought it myopic of the b'casters not to tell the
listeners which of the various systems they were using.

> Again, both sounded great. Today just about the only AM
> stereo radios around are in cars. Most people don't even
> know they have one.

True enough. They never read their car owner's manuals, so they have no
idea that they could be listening to a better signal than they expect.
My wife's '89 Mazda has an excellent radio with a good AM stereo tuner.

In my home, I prefer the Denon TU-680NAB tuner, excellent and now (at
last) reasonably priced.

Source record: 25997

For the last seven months we have been using the SAW audio workshop (Innovative Quality Software,
Las Vegas, NV. It costs about $600 with utility rack of effects and runs on virtually any Windows
based PC environment. One can use any one of a number of associated sound cards, such as the
ubiquitous Sound Blaster; I chose the Cardd+ for its better specs and am using a conversion box to
line level. An additional feature I added was a SCSI-based 230 meg 'floptical' drive; each
re-writable disc holds about 20 minutes of two-track audio at 44.1 sample rate. These discs are
used for saving and archiving production, ultimately much is saved on standard audio DAT. The cost
breakdown of the system was:

Software $600 (approx)
100 Mhz Pentium PC- 8 meg RAM, 1 gig HD $1700
With Windows 3.11 and SCSI card..
Floptical drive $1000
Audio card $250 (approx)

If cost is a consideration, of course, the optical drive is un-necessary but it sure make it easy
to move sound files from one machine to another in the digital domain. And, unlike digital DAT
storage, read-write access of the floptical is about as fast as a hard drive allowing real-time
playback and instant access to any sound file.

How's it work? Our production guys absolutely love the system; they've come from environments
using other digital workstations and think it's first-rate. Best of all, the software can run on
ANY DOS/Windows machine one might already own that meets certain minimum standards.

Dan -

You also might want to check into picking up a Mac and an Audiomedia II card, which comes with Sound Designer II. SDII is basically a scaled down version of Pro Tools. The benefits to a software based system is that you can upgrade easily down the road. I heard Digidesign is coming out with a relatively inexpensive software-only package of Pro Tools that you can use with the Audiomedia card. I use the Roland DM-80 at my station, and SDII at home, and I find that, while the Roland is easy to use once you get rolling, Sound Designer is a lot more flexible - plus you can't do software updates on the Roland. However, the Roland DM-800 (newer version of the DM-80) is a pretty cost effective unit that you may want to check out.

>Scott and Todd morning show, their anticipated presence at the Nassau

I hardly think that WPLJ is considering changing formats. For one thing, the switch of WXRK and WNEW to "alternative" is giving 'PLJ a large number of new listeners who still want to hear the older songs they grew up with. They have a great, highly rated AM and PM drive shows, a '70s and '80s rock and dance show weeknights and a '70s show on Saturday nights, and decent overall numbers. Even WMXV, their big format competition, plays less "classic rock," especially '70s music, than does WPLJ.

In addition, though WYNY may have been the most listened to country station in the US, their last ratings were less than a two shoare. PLJ is double that, and will likely increase it with the demise of K-Rock. Country is just not a huge format in NYC as a percentage of the listeners. Maybe a country format can make it if done properly, maybe not, but WYNY had trouble as the *only* big FM country outlet in NYC.

Don't look for Disney to drop a sucessfully formatted station in NYC to replace it with the format of a station which just folded. Shannon is probably trying to to attract old WYNY listeners to his (and Todd's) morning show and to Rocky Allan's PM drive show, which are less music-intensive and are more humor and other bits (phone scams, parodies, strange stories, etc.)

But then again, this is NY radio, and anything can happen! Just my thoughts.

>last spring and was wondering if it can be heard anywhere around here?...

That's all but impossible -- AFRTS can't distribute most of its programming in (or near) the continental U.S., because it comes from various program suppliers (such as the radio networks) that license it at low rates for use only at U.S. bases overseas. There are some AFRTS stations at remote bases in Alaska, but otherwise AFRTS doesn't operate domestically.

: References: <4f4h0q$n0j@vixen.cso.uiuc.edu> <4fccja$o5u@vixen.cso.uiuc.edu>

: Just a casual observation ...

: Top 40/CHR got a little old in about the late 80's/early 90's. During that
: many of the stations' playlists were too heavily skewed towards black
: and rap music. It was a real turn off.

To *you* maybe. I personally like rap.

As I just mentioned in another post, WZJM Cleveland is dropping it's rap
(most of it, anyhow). It ain't gonna work. The idiots who run the station
forget what the ethnic and racial makeup of, oh, about 60-70% of Cleveland's
650K population is. (and that's not counting suburbs, either.) :>

Urban WZAK tried a no-rap workday for a while, a few years back. Guess what?
They put rap back on the playlist. People do actually listen to it...

Plus... there are some of us white middle-class folks (e.g. me) who do like
rap and other forms of "black" music.

Well.. I couldn't get e-mail addresses for the owners but I have sent
e-mail to management, as well as a voice mail for the PD. The messages were
not nice, and I have taken Jammin' 92 off the button on my car radio and
replaced it with WHOT, another CHR (not too much better, but as I said in my
e-mail, "at least it's not 92.")

: If alternative was a means to rectify this situation, I do not think it worked
: really well. While the black music of late is a little harsh for my ears, the
: alternative music of today just seems to drone on, and on, and on, and on.
: I was heading home from Detroit over the weekend and heard one of those
: all-80's shows in my car. I forgot how satisfying the music was.
: I'll take a circa 1982-1987 CHR/Top-40 station playlist any day of the week.

The thing is, Danny, you seem to be talking like you are the only person who
listens to radio in your market. Just because you don't like rap doesn't mean
there shouldn't be any stations that play it.

Cleveland does not need another AC. There are two Cleveland stations,
one in Canton, one in Mansfield and one in Sandusky that play AC. That's
five within a 60-to-90-mile radius. Not to mention the one in Youngstown
that is CHR, but tends to stay away from a lot of the hardcore stuff.

I'm not complaining about radio stations making money. I'm just complaining
about everything sounding exactly the same.

Has the switch taken place yet? I'm curious to hear what the new 103.5
sounds like. Since I'm not within listening range...I have to rely in
second-hand accounts.

Any jocks?
What kind of tunes?

Seconded, thirded, and fourthed! The single biggest mistake in the radio
industry today is the near-complete abandonment of this format. If a
station would take on this format (and not just an all-80s mix; add in
plenty of new _satisfying_ music as well), they could be the Z100 of the
late 90s. The industry really does not get how utterly and completely sick
millions of us are of the current state of popular music.

From: Michael Hagerty <Michael_Hagerty@ktvk.com>
Message-ID: <4fkg73$s06@vixen.cso.uiuc.edu>
Source record: 25809

Changes are beginning at Nationwide Hot AC KVRY(104.7). PD Steve Elliott and PM Drive talent Christopher Caldwell are out the door. Rumors continue to swirl of a return to the KZZP calls and CHR format the station dumped five years ago.
Charlie Van Dyke's column in Saturday(2/10)'s Arizona Republic notes that new GM Paul Talbot worked at KZZP in the 80's(as reported here earlier)...and that ZZP's PD in the glory years, Guy Zapolean, is on board as a consultant at KVRY.
Also from Van Dyke: KBZR(103.9) "The Blaze" sold for $7.5 million. New World President and consultant Jerry Clifton and two partners bought the station last week. Rumors are flying about signal improvements and a high-profile CHR attempt.

L-band INMARSAT satellite feed. They are also up on TVRO, but
I don't know how complete that feed is of AFRTS programming (to
me, it sounds like bits and pieces of the total radio programming
package, but I can't verify that).

That's pretty sad, because they're in Huntington, with a four tower array
pointing southeast, I believe. Almost anywhere on the Southern State
Parkway they phase. I'm told that when they were lower power and less
directional they had a better signal.

Whoa! You lost me at the bakery. You haven't been able to recapture the confidence you once had...why? If you see room for improvement, where is it and why don't you do it?

My advice is just do it and have fun. If you're having fun doing what you're doing then you'll be better on your show. Don't take the attitude like "Oh God! I've got to get in and out of there in 15 seconds or else." You can do quick breaks but you don't have to put 10 pounds of crap in a 5 pound bag. Less is more. Use your judgement, use your vocal range to your advantage. The difference between an interesting break and "talk" is up to you. If you're not interested and plugged in to what you're doing, how do you expect listeners to be?

Hope that helps
Eric Leikam

I truly did like to listen to Larry Glick and Dick Summer from
WBZ in Boston, and I live in Baltimore. We do have Joey Reynolds to
listen to which airs on WCBM in Baltimore, but I don't think they have
much of an allegiance to him or his audience. They are full of Limbaugh
copy cats and the ratings are awful...Joey Reynodls has been there awhile and
is a bit entertaining, but full of ego and he blows his anonymity with the
AA 12 steps.

We also have Jim Bohannon on another station when they finish with baseball
and Dr Dean Edelle,,,who I can't stomach. I enjoy Bohanon but Baltimore just
gets it in bits and pieces. And there is nothing cooking anywhere talk wise
on the air in Baltimore.

1709. Muzak, Income from SCA

Newsgroup: rec.radio.broadcasting
Date: 1996-02-11 00:00:00 UTC
From: anon1723@nyx10.cs.du.edu
Message-ID: <4fkg7q$s19@vixen.cso.uiuc.edu>
Source record: 25821

I would like to hear opinions and facts on the future of SCA as a source of income for FM stations. It seems to me like the income from SCA's is going to start declining in the near future, and that factoring in the income from SCA's might not be a good idea in determining the value of a station.

Muzak, as we all know, has an SCA on a station in almost every market. I believe that most of these stations, for some reason, are those which were once on the now-defunct "beautiful music", or easy-listening format. This SCA income from Muzak has been a goldmine for the affiliate stations since all they have to do is stick some equipment like a satellite dish and an encoder in a corner, and rake in the money.

However, I suspect strongly that Muzak is phasing out the SCA's in favor of some other mode of transmission of their background music service. Can someone please explain what their plans are? I know that for the past few years, they have been doing installations with direct satellite broadcasts, using a 2-foot dish on K-band. But the satellite they use, K2, is going offline in about 2 years I am told. I have also observed establishments playing Muzak where there is NO satellite dish and NO telltale FM yagi on the roof. SCA receivers always need an outside antenna; also the sound quality was far too good for an SCA. They aren't using an SCA or a K-band satellite, what are they using? Some type of microwave transmission? Is it terrestrial or satellite?

Whatever it is, I'm sure that the number of installations using the SCA signal is dwindling. Has anyone heard of Muzak's plans to abandon SCA? Does anyone work for a station where they have pulled the plug on the SCA?

And also does any station have information about Muzak trying to cut the fees paid for the use of the station's SCA? It seems like since Muzak's number of SCA users is dwindling, they would like to be spending less of their money on it. However, they probably would like to keep the SCA on in order to satisfy their old customers who aren't complaining. If the SCA goes off they have to quickly go out and re-install the equipment at each location. Even changing from one station's SCA to another's is expensive as each unit is fixed-tuned and would have to have a crystal replaced. Thus, the station has some negotiating leverage against Muzak and can threaten to back out. Does anyone have any stories on how this situation was handled at their station?

Also, Muzak is not the only SCA user. In general, is there in any future in SCA or is it quickly going to become obsolete. New frequencies seem to be opening up all the time with hundreds of channels. Does anyone believe that any SCA income will come to stations 5-10 years from now?

One other thing. What is the rule on SCA's on stations in the 88-92Mhz band? I've heard stories where a "public" station will be begging for your contributions on their main channel, yet raking in more from leasing their SCA. Is this true, or have the rules changed recently?

Although very useful, learning selector isn't the key to becoming a
music director, it's just another computer program which is realy very
dumb. As with all computer programs, it only does what you tell it to
do. (believe me, I work with the program on a daily basis at Classic
FM the Netherlands) The way to becomming an MD is by working your way
to the top, reading a lot of books about it (which are expensive, but
as you learn on the job, your boss already has those, probably) and,
ofcourse, natural ability. Although scheduling itself is nowadays a
very mathematic thing, you need to judge a song's 'parameters'
corectly. In short: get a job as a producer, read all the books you
can find in the station about this subject (ask your station's MD
which are the best) and show your interest to the MD.

And don't expect overnight succes!

as for obtaining a copy of selector: it is very expensive, and you
need to buy a new license every month or so. One way to work around
that is probably resetting you computers clock, but this will probably
mess up your history files... so: no fun, sorry.

Good luck,

Bas Scheffers

>business'. Bill]

Hi Bill,

Well, I guess just for a change, we have some disagreement here.

Your statement that radio as we knew it has been dying the death of a thousand cuts for years does not make a lot of sense to me. Radio is a medium that is constantly changing. It is not static (no pun intended....). Back in the 50's the death of radio was also being lamented due to the advent of TV. We all know that did not happen. I do agree that "radio as we 'knew' it" has changed. But it is always changing. That does not mean it is bad or "dead". Just different.

What is so terrible with large broadcasters trying to make a profit here? I can argue that their deeper pockets and greater resources means there will be more, not less, competition between them. You are correct that they own numerous stations in a market and will own more. So what? This is not like the government owning ALL the stations. There is still a huge amount of competition here. They still have to sound good to survive. To use your Chicago example: If WBBM and co. do a poor job (real or perceived) don't worry..... A competitor will come along. So what that the competitor is owned by another big company? It's still a free market...even more so than it was when there were owenership restrictions.

How about your example earlier this week of WLUP? I was able to hear the Loop this week in NY thanks to the great "WYNY simulcast a station a day" format. I agree with all the things you have said about LUP. Great station. Innovative and different. (I wish we were getting it here in NY.) And, it's owned by one of these broadcast giants you are criticizing: Evergreen.

Sell out at a huge profit? Again, you're right. And again I say so what? If the stations they own prosper and can therefore be sold at a profit, so be it. That will only happen if the stations are successful. That means attracting listeners. Isn't that the real goal here? Why is this a conflict of interest? Lots of small owners or a few big ones. Either way, the product they put out on the dial is what will make or break them. That competition IS the one the counts. And, it is as fierce as ever.

Allan Sniffen
asniffen@computer.net

[Moderator's Note: What? You and I disagree? Never <g>. Ill have a reply to this soon, Alan. You mistook some of my intent. However, if I have to have disagreement, I am glad it is with someone who can do so intelligently, such as yourself.. Bill]

: In Columbus, 105.7 used to be both the Power Pig and Hot 105. They too had
: kind of a "poor man's" dance format (it was somewhere between urban
: contemporary and dance.) They used to get very respectable ratings,
: especially for a 6,000 watt station with a mediocre signal broadcasting in a
: very white-bread midwestern city.

Hot 105 was doing pretty well! Located in Marysville, about an hour north
of Columbus, with the mediocre 6000- watt signal, they even bought WTLT-FM in
Circleville, south of the city, to improve their reception (they turned
it into a repeater).

I can perhaps understand Hot 105's move more than B-96's. B-96's move still
does not make sense.

1717. WPLJ- A little bit country?

Newsgroup: rec.radio.broadcasting
Date: 1996-02-11 00:00:00 UTC
From: yt50@panix.com
Message-ID: <4fkg88$s1v@vixen.cso.uiuc.edu>
Source record: 25829

On weekday mornings this week, I have heard several country songs on WPLJ New York during drive time. The format is still 85% unchanged. Are they trying to pick up a few WYNY listeners?

1718. Re: Quarter Hour Question

Newsgroup: rec.radio.broadcasting

Julian H. Breen (breen@ix.netcom.com) wrote:

: Arbitron credits a quarter hour of listening to a station if the
: diary shows listening to that station for at least five minutes in a
: quarter hour. Therefore, a diary showing listening to a station from
: 8:10am to 8:20am would result in two Arbitron quarter hours of
: listening. From that methodological quirk came the notion of
: sweeping music across the quarter hour boundaries. Most commercial
: clusters are scheduled within a quarter hour or at the end of a
: quarter hour, not across a quarter hour boundary.

Aren't contests designed to exploit this methodology? A common example would be to have contest which requires you to listen at 7:20. The programming people are assuming that a "typical" listener would show up at work at 8:00, and would normally listen for an average of 20 or so minutes on their drive to work. This would give, perhaps, two quarter-hours to the station in morning drive. If the listener tunes in at 7:20, and writes down 7:20-8:00 in the diary, the station will get credit for three quarter-hours, an increase of 50%.

Of course a good contest will also try to induce the listener to tune in at work. Stations obviously want people to listen at work. One reason is that they will tend to write the whole workday in the diary which will give a huge number of quarter-hours.

Also, can someone explain how the "at home", "at work", "in the car", or "some other place" factors in the ratings? I've always thought that "at work" would weight the listening higher because more people (co-workers, customers, etc.) might be in earshot of the radio. And that "in the car" would be weighted less because the driver is almost always alone, and also has the car radio buttons in easy reach (and fingers just itching to tune out the commercials).

: Some stations try to schedule their commercials so they are in music
: when their primary competition is in commercials.

Can someone please comment on this? I thought that when there are two competing statons on the same format they have some sort of unwritten agreement to synchronize their commercials. They don't want the listener being able to just hear a commercial, punch a button, and go right back to their favorite music.

Or does the program director really care about things like this? Arbitron measures the time spent listening to the station, regardless of whether it is music or commercials. If the listener listens to all music and no commercials, and writes this down, the ratings will be good.

Does pressure to do things like synchronize commericals with a competitor
come from the sales deparment, and does this cause conflicts between
sales and programming?

>anonymous.

Same here in Charlotte. The traffic reporters on all the stations have become very much a part of the morning & afternoon shows that they are featured on. My favorite is on Jefferson-Pilot's WBT AM 1110 and Sunny 107.9. Know what his name is? "JEFF PILOT!" Is that great or what?

Steve,
It is only my opinion but I believe the the beat we all heard last night and this morning was intentional. Evergreen has put too much into this to allow something like that to happen. The "beat" we all head played right up to the second before they signed on as WKTU. Jimmy de Castro was in the studio to address us new listeners a few minutes after the sign on.

THE BEAT 103-5 KTU

After months of speculation, New York got a double
blast from the past plus an exciting glimpse of the future!
At 12 in the afternoon, on February 10th, *THE BEAT OF NEW
YORK* premiered on 103.5 WKTU. Legendary calls given to a
one-time *hot* frequency...WOW!!! THE BEAT OF NEW YORK is
gonna clean up...grabbing listeners from HOT 97, Z100 and
WPLJ with it's mainstream-dance format!!!! Check it out--
it's gonna be one helluva ride!

Is there anything that a college radio station could afford to keep our ID clock reasonably accurate. I'm using a Zenith mini-sport computer for station automation and it's only accurate to about 30 seconds a day. It has to be reset every few days. Even someting that gave me a strobe at midnight or noon would be helpful.

From: arnold@dallas.email.net
Message-ID: <4fkg7r$s1b@vixen.cso.uiuc.edu>
Source record: 25844

Rumors are flying hot and heavy that one of the Dallas FM stations will soon flip to an all news format. Several local news people have been hired away for this venture and apparently some person from KTRH in Houston is being brought in to start it up. Which station will change formats is the main speculation now. Possibilities include Bonneville's KZPS, Infinity's KSNN, and CBS/Westinghouse's KRRW or KTXQ.

That's what I've heard. I am curious if anyone out there has any information or insight they could share.

Personally, I would doubt Infinity would switch KSNN due to the fact that it is a low overhead station with decent (and profitable) ratings/sales.

As for the others...who knows? Any thoughts?

1735. On Stern, Mancow, Consultants and Music

Newsgroup: rec.radio.broadcasting
Date: 1996-02-11 00:00:00 UTC
From: af660@freenet.carleton.ca
Message-ID: <4fkg7u$s1g@vixen.cso.uiuc.edu>
Source record: 25847

Reply-To: af660@freenet.carleton.ca (Charles Hobbs)

A few general responses to some ideas brought up here recently . . .

There is a concern that most of today's radio programming is determined
by consultants and research, discouraging "spontaneity" and "Creativity".
That's probably true to a certain extent, although, due to the competitive
nature of most radio markets, I don't see us backing away from it anytime
soon.

Of course, some programs may "sound" more spontaneous/reative than others,
but I wouldn't be fooled, knowing what I know about the radio business.
Take Howard Stern, for example. He may *sound* outrageous on the air, but
day to day, the formula never changes. It's always the same sutff; dirty jokes,
verbal sparring with other radio personalities such as Mancow, etc. This stuff
works to get a certain segment of the total radio audience; it's not going
to change or go away anytime soon.

Another question posed is; how much "dirtier" can Stern get, as the
current set of jokes loses its shock value. As I might have said before,
I think there's a slowly increasing acceptance of broadcasting certain
words and ideas, which were once considered "taboo". And, I think there
will always be a market for that type of thing, although changes in
political or socal moods might reduce the size of that particular market
segment (i.e. those into off-color jokes on the radio).

Of course, competition (all the Rush/Stern/etc. sound-a-likes) will
split up the market for those particular formats. (Look at what happened
to TV daytime talk shows. For a time, almost everyone and his uncle had
one of these shows, but then came the big shakeout not too long ago!)

Also, people, supposedly fed up with the "over-researched" music stations,
are tuning into alternatives like NPR, etc. As far as I'm concerned, these
are fine for background music. But, when I listen to songs on the radio, and
find one I like, I like to hear it over and over, find out the artist, perhaps
buy it in a record store and make my own car tapes, etc. Certain "adult
alternative" stations rarely, if ever, play a particular song frequently
enough for me to "bond" or "Connect" with it, so I am somewhat
frustrated in listening to these stations.

Over the years, I haven't heard too many pirate stations, but I have heard
one called KDX, which operated out of Orange County in 1984. I found it
easy to listen to, lacking to "pressure" of a commercial station. Did it play
wierd music? No (although it played everythign from country to heavy metal!)
Did they cuss? No! Did they espouse radical political beliefs? No. I would
guess that the guy was just spinning records and having fun, and not worrying

about a slight dip in a rating point costing him his job.

How do we get to that point? Or should we?

(I have tapes of the KDX and one other pirate, Radio Music International,
for trade, if anyone is interested in hearing what it sounded like)

All I know is that we treat callers like guests in our living room. Now, occasionally, you have to ask a gues to leave, but that is no excuse for a lack of civility. We don't call names and we try to keep the discourse civil. When we fail, we hit the dump button and go on.

You never know when a caller is also a big advertiser, so it doesn't pay to insult anybody.

Radioworld Magazine published a story recently that basically stated Seiko was creating/expanding pager services, and they are leasing SCA's for that purpose. They use more than one station in each market that they come to, to assure the best pager service coverage...

Will SCA's go away??? I doubt it... There's to much potential use for SCA, such as "radio for the blind". Some stations put special programming for blind people on their SCA's.

I hope that Seiko "does" expand to the Dallas market, because the station I work for was one of the stations that they used to "test" their system, durning the Dallas NAB show a few years ago....

1745. Is this "radio show" a scam?

Newsgroup: rec.radio.broadcasting

I was recently offered an opportunity to host my own radio
show. The details sounded good: I could do the show from my telephone
(no need to travel to the radio station), I could talk about whatever
I wanted, the show was during prime time, and I could even advertise
my own products (my books) in the commercials.

The catch? I must seek out sponsors to pay $300/week to cover
the cost of the show. When I asked how large the listening audience
is, I was told that it's "hard to estimate" but that the show was
broadcast in 3 states with a population of "3 million plus."

I smell a scam. Is this kind of arrangement common or
unusual? Aren't radio stations supposed to know their estimated
audience size?

I'm surprised Selector isn't on here explaining things, but some throughts come to mind:

1) Most medium and major market MD's and PD's are Selector trained. To get into these positions, Selector knowledge is a must. Do yourself a favor, learn it early, so you won't have to try to translate from one system to Selector.

2) Actually, each of the music systems mentioned do a pretty good job os basic music scheduling. They all have strengths and weaknesses, Selector included.

3) Selector is working on a Windows version that will replace the DOS one most people now have. Get ready to re-learn a lot of things. It is my understanding that, while they will continue to support the DOS version, there will be no updates or enhancements to it.

4) Nine times out of ten, the "problems" with Selector turn out to be lack of knowledge of how all the features work, or trying to get it to do more than a computerized music system can do.

Bill,
There's nothing to make up. I have nothing but good feelings for Jim.
It's just that using one city as an example is a bit narrow, and
besides I know and worked with Mark Davis at WBAP and he's smart and
can be tough as nails. You don't ever want to take him on unless you
know what you're talking about. He's one of the best conservative talk
show hosts in this bizz, and he can take your head off if he has to
and I have head him roast a caller alive with a smile on his face. So
Jim should get out ans hear some of the other hosts around this
country. Their not all as smooth as Mark.

I don't think anyone will agree that we are all better off, now that most cities only have one or two daily newspapers. Why would we be better off with one or two owners controlling all the radio stations in one city?

I can't understand why the government would break up the bell system, claiming the monopoly was bad for America...and at the same time decide that monopoly is good for radio.

It means big companies will control advertising rates, have more control over music and what artists can and can't get on the air. They will have greater control over restricting, and even eliminating news coverage, and talk programming.

Since this is all about profit, I think the goal of such groups will be to force down programming costs, and wages, in order to boost profits.

And what if neither of the owners in your town, like YOU! You will not work.

The 2-tower site at 8 Mile Road at Meyers is that of WWJ, 950 CBS
O&O, all-news format. The nifty transmitter building still stands.
The call letters still adorn the tower, but I don't think they light
them up anymore. The station now has a website with programming and
historical info (WWJ is a claimant to "first" commercial broadcast).
URL is http://www.wwj.com

If anyone can help with information, please reply via private e-mail. I'll summarize the list at a later date. Airchecks are available (for trade only) if interested, e-mail me.

Kid Cruise, Hilde, "Just Plain Mark" (WXXL Orlando)

Kid Cruise and Hilde Remain at the station. Mark left over a year ago.

Crash (WFKS Daytona Beach)

He's at WDIZ doing afternoon's (3-7p)

(Mike) Welch + Woody, Jojo, Mojo, Cedrick Hollywood (WJHM Daytona Beach)

All 3 are still there.

Gnarley Charlie, ToddZilla, (WPLJ NYC)

Jeff Thomas, George Williams, Broadway Bill (WHYT NYC)

Pete Fournatello, Dave Herman (WXRK NYC)

Balthasar, Al Bandero (he hosted a show called "The Classic Showcase", Dave Kendall (all from WQHT NYC)

Flyin' Brian, "Candi" (WKSS Hartford, CT)

"Renee" (WTIC Hartford, CT)

Keith Allen, Scott Miller (WBLI - Long Island, NY)

Kid Corunna (KKFR 92.3 Phoenix)

Planet Harrison (Eagle 106 - Philadelphia)

"Beemer + Company" (which includes Ryan Paul, for sure) (Z-90 - San Diego)

"Tim + Tom", Hawk Harrison (WFLZ Tampa Bay [the station formerly known as the Power Pig])

Rick Chase (KMEL San Francisco)

Panama Jack, "Sterling + Steele" (Hot 97.7 San Francisco)

Brian Christopher (WKXX Birmingham)

Brother J.J. Malone, "Walton + Johnson" (B-97 New Orleans)

"Cox in the Morning" (WPOW Miami)

"Gnarley" (WHYI Miami)

Dean Kerfman (KS104 Denver)

"Doctor Dave" (KWSS San Jose)

Larry Morgan (KHMX Houston - I have his last signoff from KWSS San Jose)
(There's some debate...some say he's in Nashville [heard this from 2 people]
someone else says he's with a private firm, not involved in radio anymore)

"Boomer" (Q-102 Philadelphia)

Harry Williams, J.J. Jackson (WGCI Chicago)

Bill Gable, Frank Lasko (WOCL Orlando)

Also heard Radio OZ confirmed on 1660 last friday at 7pm local time in Toronto Canda.
Radio was standard Chrysler factory Am/FM in my van parked outside a shopping mall.
Signal was very weak but readable. Is this station "all kids" programming?

went through a similiar situation last year, and we decided on a MacOS system running DECK II from Macromedia. Since you're in a academic setting, my guess is there are macs everywhere. get a decent mac (or clone) the biggest, fastest harddrive you can afford, an AudioMedia II (or some other form of dig i/o) and a Iomega Jaz drive for backup.

you'll be getting 10-24 tracks from DECK, and it has some effects built in. plug in cybersound FX for $120 and you are all set.

nothing beats the mac and DECK for ease of use and plug n play. trust me - i've worked on PC's, Amiga's and macs, and the mac still holds that edge.

I have researched this for a little while and....
The best thing for us was the buy a Power Macintosh 8500 series computer with
a 2 gig hard drive and equip. it with Deck II Software. The higher end
Power Mac come with a great digital audio card pre-installed.

It might run your around $5,000 for the entire package if you can get
educational discounts from Apple. I just ordered one, but haven't got it
yet so I can't speak from experience.

Hello, from Canada's Ocean Playground, Nova Scotia.

Here, in the Halifax Metro area Dalhousie Unversity's CKDU/97.5 FM, which broadcasts in the area just completed their 11th funding drive, with a great success!

The station was $810.00 short at 5p.m on Sunday at closing time, BUT within a couple of extra hours CKDU met it's goal of $45.000.

CKDU features more then 100 programs. Oldtime country music is heard on Halipalachia and Country Pick-Up; womens issues are centre stage on Spinsters on Air and Radio Free Kansas. Metro's ethic communtires also enjoy airtime. Shows include Radio Egypt, Hellenic Voice, America Latina Presente, and Voice of Taprobane (featuring music from both the Tamil and Sinhalse people of Sir Lanka) CKDU also carries the BBC News via shortwave.
97.5/CKDU is a community that deals with issues that the commerical Metro stations don't.

*"The Home Of Rock & Roll Q104" and the Atlantic Satellite Network (ASN) are bringing on TOM COCHRANE's "Ragged Ass Road" North America Tour to the Halifax Metro Centre, on Saturday February 24 with special guest AMANDA MARSHALL.

For Country Music fans, CHFX (COUNTRY 101) are bringing BROOKS & DUNN, with opening acts: TRACY BYRD and DAVID LEE MURPHY on Thursday March 7 at the Halifax Metro Centre....

That's it for NOW from Halifax!!!!!

>

Hmmm that would make sense since they carry UPI news and AP news and sometimes CNN radio news. Does the AC music programming come from their own studios or is that a syndicated thing too? I
think it was called "Unistars adult rock and roll on AFRTS" In Saudi, there are transmitters (on FM in
stereo) in most of the major cities. I was in Riyadh and Jeddah and there were transmitters there that easily
covered the whole city with American AC/AOR format music, US news, and the first hour of the Rush
Limbah show..

There is plenty of good music out today; it just doesn't get
played on most major market stations, which are just scared to
death that they might inadvertently challenge their listeners.
I seldom listen to the radio anymore, here in Dallas, because
IMO the only decent pop station around here is KNIN (92.9) in
Wichita Falls, which I can only receive some of the time (its
about 100 miles away).
KNIN knows how to do Top 40 right! A broad range of current
music, pop, dance, rock, and "alternative" such that none of
it gets tedious, and they generally beat Dallas radio on new
music. They promote themselves as the "alternative to boring
radio" and "different kinds of music for different kinds of
people".
I would like to believe that if someone offered up this type
of programming in a larger market, it could do well if
properly promoted. Anyone want to try?

Tom Desmond

>millions of us are of the current state of popular music.

IMO, there is enough diversity in the "Top 40" (for example, the top 40 songs of Billboard's Hot 100) to use that as the basis for a CHR station, and augment it with local preferences.

However, the general consensus seems to be that no one would listen; people only want to hear "their" music and nothing else. Either that, or people think advertisers wouldn't be interested.

Anyway, I'm glad that there are still some CHRs around, such as WXKS-FM Boston (Kiss 108), KIIS Los Angeles, and WRZE Nantucket/Hyannis (The Rose).

I am not the engineer, but we here at KVSC (St. Cloud State University) went with the DHK/Audisk digital audio system for on-air playback of station promos, PSA's, underwriters, etc. (more info can be found at http://www.stcloud.msus.edu/~kvsc/tech.htm).

We installed this system about 2 months ago and, personally, if I never see anything related to a cart again it would be too soon. The system is networked from both production studios and the on-air.

Hope this helps a little bit, if you'd like s'more info on the Audisk, please email me!

It seems easiest to use the ABC or NBC radio network begin at the top of the hour to set your clock... Most stations open the network pot early enough that you can hear the network closed circuit "chirp" so you can get ready, then set it at the start of the theme on ABC or the chime on CBS.

Why not go with HeathKit's "Worlds Most Accurate Clock"?
It sets itself constantly to WWV or WWVH.
Plus it has an output that you can hook into the Zenith to keep it
dead-accurate as well.
I think that Zenith might even still own HeathKit, but they could have sold
it off.

Here's an idea. Contact an outfit named Parsons Technology in Hiawatha, Iowa (319-395-0115). They have a little software package called "Atomic Clock for Windows." You can set it up to automatically dial National Institute of Standards and Technology (WWV) or the United States Naval Observatory time systems however many times a day you wish and synchronize your PC's internal clock with the time service's atomic clock. There are a zillion other little features to the program that might interest you. I don't have any connection with the company. I just use it to keep my PC's clock right on the button. Why? Because I'm anal retentive, that's why.

Good luck..

Don

1772. Re: Q: College radio music testing - how feasible?

>their needs, especially if what are being tested are _styles_ of music
>rather than individual songs.
>

What?? I think you're missing the point of college radio! A college radio show should focus on a jock's likes and dislikes. Our station had blocked hours for Rock, Jazz, Urban and Freeform; not to mention a lot of specialty programming on the weekend. Having a different jock on each day exposed many people to the different niches and generes of their specific type of music. Sure there was a core set of songs that every jock played, but a lot of the old stuff was left up to the jock's particular knowledge.

There are the college stations that emulate the big boys; whether they be CHR, AOR etc., etc.. They serve as a great training ground for people who want a career in radio. I just think if you bring music testing into the college arena, you're taking away an outlet for undiscovered talent and music. The best example is the whole modern rock format. Commercial radio did not discover it!!! There were people listening to Soundgarden and Nine Inch Nails 10 years ago. They just weren't commercial listeners.

1773. Dance music radio in Vancouver, BC?

Newsgroup: rec.radio.broadcasting
Date: 1996-02-14 00:00:00 UTC
From: Edward Hsu <ehsu@direct.ca>
Message-ID: <4frg9a$a0l@vixen.cso.uiuc.edu>
Source record: 25769

Hello to fellow radiophiles and dance music fans...

I'd like to know what the professionals think of the possibility of an all dance station in Vancouver, British Columbia, Canada? (Dance station, I mean an urban Top 40 station specializing in European Ni-NRG dance, along with some R&B and rap.) A station like Energy 108 in Toronto (CING-FM 107.9, Burlington, Ontario) would fit perfect in the region bounded by Vancouver, Victoria, and also Seattle, WA. I was rather intrigued by the move by a Metro NYC station to switch to a dance station, and I would like to know the prognosis of the dance format in other portions of the continent. Thanks in advance...:)

That would be WWJ, two towers on 8 Mile on the Detroit/Oak Park line.
The original building is still there, but no letters on the towers
these days. It's still a fine-looking site, though. I'm told there
are murals inside the building depicting the early history of radio.
Now that the company that employs me also owns WWJ, maybe I can wangle
a tour inside the transmitter building one of these years...

WJR is south of Detroit, on Sibley Rd. in Riverview. One tall main
tower, one shorter backup, and a very neat Art Deco style building.
They do NOT make 'em like that anymore.

The station mentioned in this particular post is WWJ (950AM). I have not been by there (Eight Mile Road near Wyoming Rd) for several years, having moved out of the area....but I had the pleasure of visiting the transmitter building about 10 years ago. What was remarkable about it was the artwork on the walls and ceiling inside. Is reminiscent of (if not authentic) art deco murals by an artist whose name escapes me at the moment (Don Diego comes to mind). Quite unusual for a non-public building.

(I apologize for not knowing the artist to whom I refer.....I'm sure you all out there know his name)...

1776. Re: Detroit 1500 array

Newsgroup: rec.radio.broadcasting
Date: 1996-02-14 00:00:00 UTC
From: Dan Strassberg <EDNSTRASSBERG@cahners.com>
Message-ID: <4frg9c$a0t@vixen.cso.uiuc.edu>
Source record: 25772

I was quite surprised to read that the 12-tower array is now only nine towers. That facility has an interesting history. As someone else noted, the first complex array for 1500 in Detroit was constructed around 1952, I think, by the then WJBK. At that time WJBK was a Class IV station on 1490. There was a complex frequency swap involved--a 250W daytimer on 1500 north of Detroit swapped frequencies with WJBK and became a fulltimer. I think that a third station was also involved, but I can't recall which station it might have been. (I believe the station on 1500 was WLEW Bad Axe, MI.)

Anyhow WJBK was originally authorized 10 kW-D and 5 kW-N using a nine-tower array. At that time, there were very few arrays of equal complexity in the US or Canada. As soon as WJBK got on the air on 1500, WTOP began to complain of interference. WJBK had to reduce its night power to 1 kW. (Remember that, back then, the FCC was not licensing stations to use 2.5 kW, and all the powers used by new AMs were round numbers: 250W, 500W, 1 kW, 5 kW, 10 kW, 25 kW, or 50 kW.) The 1 kW nighttime operation continued for a long time. I remember visiting Detroit in 1958 or 1959, and in the hotel in which I stayed in downtown Detroit, the station became inaudible after sunset.

I imagine that it wasn't until well into the '60s or possibly the '70s that WJBK applied once again to increase its night power to 5 kW. This time the application was combined with an application to increase day power to 50 kW. The applications were

granted and led to the construction of the 12-tower array. I don't know if the station simply added three towers to its existing array or built a completely new array. WJBK's successor, WLQV (there was at least one other set of calls between WJBK and WLQV), is still listed in all of the directories I've consulted as running 50 kW-D, 5 kW-N DA-2.

I'd really like to know how 5 kW works now with nine towers when it didn't work originally. When the problems first manifested themselves, the consultants blamed reradiation from a nearby high-voltage power line. The effects of this line were supposed to have been accounted for in the design of the original array. Before the CP was granted, WJBK had to build and make measurements on an experimental two-tower array at the proposed site. The transmission lines for the original array were buried beneath the ground system. That has become standard practice in the construction of directional arrays, but it was considered a novel and extreme step when the original WJBK array was built.

>incompatible color television standards!)

As pointed out, the FCC DID select a standard for AM stereo way back in the very beginning (the Magnavox system, as I recall). Also, as I have heard, AM stereo was proposed in the 1950's, but rejected by the FCC as unnecessary. The technology was then used by XETRA to concentrate their audio in one sideband, away from an interfering station (the original PowerSide). Eventually, they went ISB AM stereo long before it was authorized in the US.
I think there's always been a lot of controversy around standards setting. Remember that the FCC first adopted the CBS system for color television. This system involved a big filter wheel spinning in front of your TV, and the broadcasts were incompatible with monochrome TV broadcasts. When in high school, I was given a junk Sears TV that included an octal socket on the rear of the chassis for a "color adaptor". It was no longer available... Finally, the FCC adopted the existing RCA color system.

Well, it sounds like the dance crowd will be happy at the expense of the many people who enjoyed country music in NYC. Actually, 'KTU of the 80s was a pretty terrific radio station...today's 'KTU is trading on a pretty solid legacy. Now if someone can verify that the non-talent Mancow will *not* make a repeat visit to
NYC at 103.5, the station is assured of a bright future!

P.S. I think that the idea of a rhythmic "beat" over the top of the audio from the other Evergreen stations leading up to the format change was *brilliant*!

None yet. However, 'KTU is having a "You Be the DJ" event at a local
record store sometime this week, where any yahoo off the street will get
to intro a record or two.

> What kind of tunes?

I'm not sure how to put this....is "classic dance" a format? Cause that's
pretty much what this is: light-to-middle-of-the-road dance; nothing too
hard or threatening, with lots of old stuff thrown in. Basically they're
like the Mix 105 of dance: "all the best dance of the 80s, 90s and
today".

I have to admit it was sort of fun to listen to on my Walkman while
shopping this weekend. Who knows...done properly this just might work, but
Evergreen could easily blow it. And it's going to take me a while to get
used to those call letters....

1788. WKTU - Historical Questions

Newsgroup: rec.radio.broadcasting

Source record: 25784

I have some questions about the old WKTU:

1. When did WHOM-FM become WKTU at 92.3 FM?

2. When did Infinity buy WKTU? If I remember correctly, back in the mid 1970s. The Spanish Racing Association (please correct me if I am wrong) owned that station.

103.5 FM in New York City is still WYNY. If you listen carefully the official ID (said quietly, of course) is still WYNY - lake success- NEW YORK CITY.

Apparently there must still must be some legal maneuvering that must be done before the calls are transferred from the Ocean City, NJ station.

As a fan of radio for many years, & once having actually worked in it (back when there was still a station worthy of being associated with on a creative & fun level) I have to throw my two cents in on the recent change of "Country 103.5"

When the announcement came down that a format change was really going to happen this time, I was interested to see what new format we would be privy to in New York. I figured anything had to be better than country music, & even if we were subject to another "Modern Rock" format, maybe it would be slightly different than the other four we currently have.

Then 12 noon came Saturday February 10-th, & along with it, the "NEW- KTU" New York's new beat! I'm not a big fan of dance music either, but considering the liners that ran 24-hours prior to the switch, & the week's worth of evergreen properties that were aired on New York's (then: YNY) I was hoping there would be something exciting to listen to.

I have to express how disappointed I was when moments after the new format aired, & an announcement was made by Jimmy Decastro, one of evergreens top exec's, the very first people he thanked was the consulting agency that was hired to "research" this new project.
Seems to me that all the liners that ran for the past week about turning the radio over to the listeners, & wanting "our" opinions were just "hype" (isn't it always in media anyway).. & then adding injury insult- Decastro went on to thank wall street & Madison Ave for making all this happen.

So now New Yorker's can listen to the same 150 overly researched hit's over & over again, with little hope of ever hearing anything unique or interesting. I have to give Decastro credit at least for warning us up front. Now I know to program something new in my autoscan slot# which formerly held 103.5 for a week.

Every time I hear the call letters WKTU I think of *92*-WKTU

I wonder if there will be any confusion among the old WKTU
listeners?

WKTU as it is now is so bland that it will have a hard
time getting a 2 share. They are not not well focused at all.
Try to describe the format in one sentence.

I'm a programmer in Bloomington, Illinois just wondering if anyone has a fix on where Larry Lujack (formerly of WLS and WCFL, Chicago) might be? Last I knew he was still in the Chicago area after his retirement a number of years ago.

Anyone help?

anon1723@nyx10.cs.du.edu (L. T. Randall) writes:

>I would like to hear opinions and facts on the future of SCA as a source
>of income for FM stations.

WCRB in Boston put a background music SCA on the air in the early sixties in competition with MUZAK, and set up a company called WCRB Sound Systems, Inc. to sell music service. It was very successful. There was a time in the seventies when SSI, as we called it, made more money than the radio station. When the recession hit after 1989, though, that started to change and SSI became something of a drag. It is now part of a company called Sound & Media Technologies, which I understand does quite well.

>However, I suspect strongly that Muzak is phasing out the SCA's in favor
>of some other mode of transmission of their background music service.

It used to be there were only two ways to get background music: SCA and tape. Tape players required a lot more maintenance than SCA tuners so we tried to use SCA wherever possible.

I think it was around 1990 that our music supplier, AEI, started putting music on Ku-band satellite. They made six formats available including classical and jazz. We had only two SCA's, one of which was (is) running the traditional instrumental format and the other soft rock, so anyone interested in the other formats had to get them via satellite. The satellite receivers were addressable, had 15 kHz fidelity and much better dynamic range than SCA tuners but they were much more expensive. Also, in the winter the dishes would fill up with snow and we would get flooded with calls from satellite customers complaining about dropouts. Heavy rain would also mute the receivers. I don't think we made much money on the satellite customers after all was said and done. The SCA customers were our bread and butter.

Towards the end we were very worried about DMX and other digital audio cable services targeting our customers. Their services were cheaper than our satellite service and offered better fidelity and a much wider choice of formats. Cable, DARS and music-on-hard-drive may be the future of the background music industry.

>Whatever it is, I'm sure that the number of installations using the SCA
>signal is dwindling.

That may be, but there are a lot of other uses for SCA besides background music. My old college station leases one SCA to an Italian-language service and another to a Haitian group. Some other stations in the area are datacasting.

SCA's will always be valuable. Many of the same datacasting services advocated by DAB proponents can also be done via SCA. I've heard of at least one proposal to build FM receiver cards for personal computers that would take data off SCA subcarriers. Both Sanyo and Seiko demonstrated high-speed data transmission technoloy at the Radio Show in New Orleans last September.

Message-ID: <4frg9o$a1p@vixen.cso.uiuc.edu>
Source record: 25792

>From: Larry Lomax, 75561.2574@compuserve.com

Does your station, or another in the market, feature "local" artists?

A few years back when I was doing mornings in Virginia Beach
at The Coast (WKOC) we included a dozen different local artists
within the format. It helped define our market niche, and also
enabled some very talented people to get airplay who otherwise
would have a difficult time.

If you've spent any time in radio, we all concede there are hundreds
of talented musicians that will not realize airplay simply because
most programmers are reluctant to take the "risk" on "unknowns."
I understand the dilemma, but I am curious as to which stations do
play local artists, and how it's working for them.

Have some input?

Please note station, market, format, whether it's part of regular station

programming or a special weekend show, plus any comments.

Best regards....

Larry Lomax

KSNN may have a low overhead, but their ratings have been stuck in the low 2's since it went on, and Infinity isn't exactly one to keep a low profile.

CBS/W's stations overlap a bit, and one could just about do the job of both, leaving one to go to anything else. Plus, witness CBS/W's D.C. switch from Arrow to Classic Rock. Neither KRRW nor KTXQ are doing _that_ well, but smart money might say to stick with Q-102's heritage and try something else with 97.9.

Bonneville isn't doing THAT well with the Buzz/KIRO-FM Seattle; at least not well enough to throw KZPS out the window. But, that too, is a possibility.

Forwarded from rec.radio.shortwave:

>From: gayle@grove.net (Gayle Van Horn)
>Subject: WNOO on the ir on 1640 kHz
>Organization: Heller Information Services, Inc.

I'm not sure how far out this is being heard but the saga of the new expanded AM band continues. Right now (2330 UTC) a Chattanooga, TN AM station WNOO-AM 1260 is up on 1640 kHz loud and clear. To rule out all possibilities I have it on four different receivers (Drake R8/Icom R72/Drake SPR4/Sony 2010. I also checked with my DXing neighbor, Bob Grove up the hill from me and he also has them rock solid. They are doing urban contemporary and IDing as AM 1260 WNOO. This is not suppose to be one of the expanded band stations and I have absolutely no idea what these folks are doing on 1640. I've ruled out all the normal stuff (Harmonics, spurs, images, etc) and Chattanooga is about 60 air miles from us so others things that could cause a freak reception has been ruled out. Nope, I beilieve they are there so AM DXers, go to 1640 and add another one to the logbooks.

Best of DX and 73 de N5FPW

>From: andy.gardner@ibm.net (Andy Gardner)
>Subject: Re: WNOO on the ir on 1640 kHz

I hate to burst your bubble, but I did a little research on this using the FCC database. My guess is that WLMR on 1450 shares a tower with WNOO 1260. It's time the CE of those stations checked his traps.

(1450 * 2) - 880 = 1640kHz. So there is a product of WLMR & WNOO sitting on 1620kHz. Is the audio fully modulating? Can you hear WLMR's audio underneath WNOO's?

Now that the AM band is expanding, these products will be found more regularly as more people will be listening for them!. Honolulu (as at November last year)

had the same problem with KULA 1460, KISA 1540 & KCCN 1420 sharing a tower. Listening from Honolulu Airport, I could hear products on 1620 (KULA/KISA) & 1660 (KCCN/KISA).

Let's everyone tune between 1600 & 1700 and see who can hear other products? Report back to rec.radio.shortwave.

Well, it's nice to be able to pinpoint U.S. radio stations engineering problems remotely from New Zealand. Any job offers gratefully received!

Cheers,

Well, I went to an authority on this one. According to Guiness' 1995 Record book, the following should answer our questions concerning the oldest radio show. Please note: This is quoted directly from The Guiness World Book of Records, 1995 Edition.

Radio: Most durable programs

Rambling with Gambling, the early morning program on WOR, New York City, was first broadcast in March 1925 and celebrated its 21,569th show on 30 Apr 1994. The show has been hosted by three generations of the Gambling family: John B. Gambling (1925-59), John A. Gambling (1959-present) and John R. Gambling (1985-present). The show currently airs six days a week, year round.

The Grand Ole Opry has broadcast continuously from November 1925 to May 1994, a total of more than 68 years.

The weekly sports report "The Tenpin Tattler" was first broadcast on WCFL, Chicago, IL on 24 Aug, 1935. Fifty-eight years and more than 2,900 broadcasts later it still continues on WGN, Chicago with the original host, Sam Weinstein, who is the longest continuing host of a program.

1805. 1000LB Gorilla/Jacor

Newsgroup: rec.radio.broadcasting
Date: 1996-02-16 00:00:00 UTC
From: mbeall@freenet.columbus.oh.us
Message-ID: <4g1dvt$3aa@vixen.cso.uiuc.edu>
Source record: 25651

With this week's announced deal between Jacor and Citicasters producing a group of 47 stations one industry observer chimed in that {Jacor} was the 600 lb. gorilla, now it's a 1000 lb. gorilla, and it owns the zoo. Jacor was a powerful agressive competitor, now what? One major difference between Jacor and most other groups is their "extreme" competitive nature. Randy Michaels (Jacor-VP) showed up on 550-WKRC just after they took it over a few years back, and blasted every other Non-Jacor station in town, got specific and named names. In summary called them a waste of electricity. Where does this mega-olopy take Jacor? I'd love to read your thoughts.

It seems as though _Cincinnati Enquirer_ TV and radio reporter John Kiesewetter was not quite as conservative as I was in predicting what will happen to Jacor's newly acquired radio stations in Cincinnati. Kiesewetter speculates that WOFX-FM 92.5 will switch to country to compete with Chancellor's WUBE-FM 105.1 "B105" and WYGY-FM 96.5 "Young Country Y96" and that "The Fox"'s classic rock format will move to WWNK-FM 94.1. The theory for making WOFX country instead of WWNK is that WOFX has a stronger signal. Kiesewetter also specualtes that WKRQ-FM 101.9 could switch to a AAA format, but I don't follow his logic here. It would seem to make more sense to keep AAA on WAQZ-FM 107.1, which has a much weaker signal than WKRQ, and switch WKRQ to something that competes with one of the few single-FM station owners. The logical choice would seem to be urban contemporary or dance/urban CHR. On the AM side, the historic WKRC call letters could return to 550 AM now that Jacor owns WKRC-TV Channel 12. Would the WCKY calls then move back to 1530 AM and the WSAI calls to 1360 AM? Who knows?

Today's business section of the _Enquirer_ contained another Jacor-related article. This article quoted a local advertising agent as saying that there would soon likely be only two FM station owners in Cincinnati. The other would likely be Chancellor or Heritage Media, owners of WVAE-FM 94.9. Owners of other single FM stations (WRRM-FM 98.5, WIZF-FM 100.9, and WGRR-FM 103.5) could be squeezed out.

Hi! I'm into the home stretch at school, and will be entering the workforce in a few weeks. As I've aimed myself at a production job, there aren't many positions out there that are available. Are there any points or hints that would help me getting a job at any radio station? Any ideas of what I should put on a resume tape? If you do have ideas or comments, please send them via e-mail if you wouldn't mind. Also, if anyone knows of production job openings at production houses or radio stations in Western Canada, please let me know! Thanks in advance,
Jon

KTU is back, K-rock is not classic and there's no country on the dial in
the #1 market in the country...anything goes!

Can anyone confirm or deny the following (latest) rumors:

A country format settling at the currently low rated WDRE 92.7/98.5 combo.

Q-104.3 set to drop the hard rock format for something else?

Also, are there any plans for WRCN 94.3/103.9 combo to change formats.

No facts...just what I heard. What do you know?

> ratings.

It's true that the least listened to Quarter hour is the :45-:00 quarter, and that most radio stations put their contests at :10-:13 minutes after the hour...listen to almost any radio station and you're guaranteed to hear some sort of contest at around 7:10 in the morning...the most listened to quarter in the entire day by some measurements. People are most likely to stay tuned past that to hear the winner's name and/or the answer to the contest...

However, I'm not too sure about the commercials at 10 to the hour...one radio station I listen to here doesn't put any commercials in the first two quarters after 9am...I guess there's some truth to what you're saying, but I am not entirely sure why...

The I.T.U. treaties allow unlicensed operations by the governments and governmental agencies. The pecking order is usually National Security, (i.e. spy stations), Diplomatic communications, and the military, (KTRK/ARMY/ABS would fall in that catagory).

Usually diplomacys and consulates request permission and frequency assignments from the host government agency that regulates communications. They really don't have to, but it is proper protocol to do so.

The military can operate tactical communications anywhere it wants to for security reasons, but when it comes to a broadcast station for military personel, they ask a military department that interfaces with the civil licensing authority of the country for a frequency. Domesticly, the FCC had to give ICRA(?) the ok for the 1670 kHz. channel's use. The FCC had no direct authority over the station, they already gave the ARMY frequency coordinator the OK so they abdicated responsability for the period of time they were on the air. The stations said it could do whatever it wanted within the ABS rules.

>military is using two way SS radios covering 40-90 MHz. Same
>question. If they can do it, why can't I? How about an STL at
>300-400 MHz?

You are not the military that's why. The frequency use has been cordinated with the FCC and the State Department, anyway.

I think Rush's big problem is that he's overexposed.

Paul Harvey has enormous staying power because he's on the air less than a total of 3 hours a week. Rush appears to have chosen big bucks now over longevity...that's ok, I'm not sure I wouldn't have done the same thing. But he probably won't be on the air when he's in his 70's.

As far as I know, Larry Lujack is still retired and living somewhere near Palatine, Illinois. This information from former WLS and WCFL PD John Rook. I have no more details, unfortunately.

By the way, Dan, you have a fine sounding, legendary, and well rated full service AM station there in Bloomington. I've heard it several times while driving through town.

>HAVE a standard for SCA, we wont have to wait for the feds to set one
><g>. But we would need to open the SCA for general public listening.

Bill,
I'm not aware of any prohibition of public listening to SCA. For example, here in the nations capital, one of the local AM hispanic stations, WMDO 1540khz/5kw/D uses and promotes (on busus no less) the SCA of one of the local FM stations (either 97.1 or 98.7, I can't remember which). They program the SCA as if it were their FM station, allowing them 24 hour operation.

Also, back in my home state of Wisconsin, Wisconsin Public Radio used to make their SCA available to the State Reading Service for the blind (for which I used to volunteer). Not just the local WERN transmitter, but the entire state network of transmitters. The SCA service also featured educational programs transmitted on a daily basis, as well as easy listening background music as filler between Reading Service material and educational offerings. Anybody could receive and listen to these transmissions.

In rec.radio.broadcasting you write:

> I smell a scam. Is this kind of arrangement common or
>unusual? Aren't radio stations supposed to know their estimated
>audience size?

Assuming you're dealing with somebody who really owns a radio station, this is probably not a scam, but it may not be something you'll want to pursue.

The practice of selling blocks of time on a station to customers who program their own radio shows is called "time-brokering". It used to be rare, but now it's becoming more common as many broadcasters, especially owners of AM stations, find they can't pay their bills any other way.

If the station that approached you is like the one I used to work for, it's an AM in a large market whose signal isn't quite good enough to compete with the leading stations in town. Maybe it's a daytimer-- that is, it has to sign off or reduce power drastically at sunset. The technical plant may be ancient and unreliable. In any case you can be sure it has no ratings to speak of.

I would not buy time on a station like that unless I had a programming concept in mind and a target audience. I'd make sure the station's signal could reach that audience (don't put a show aimed at upper-middle-class suburbanites on a station whose signal only covers the inner city). And I'd want my show on at the right hour for my audience, too.

You don't want to do a radio show over the phone. You'll want access to a good studio facility. Make sure the station will give you that access before you sign a contract. Also ask if they will let you use one of their engineers (they do have engineers, don't they?). Insist on an inspection of their facilities before you sign anything.

If I were looking to do a deal like this I'd shop around rather than jumping at the first offer.

Good luck!

Upscale GM cars(Suburbans, Cadillacs, Buick Park Avenues, Auroras) have AM stereo (as an option) as well....and so do Lincolns, Mercury Grand Marquis and Ford Crown Vics. I've heard several..and on the few music stations left on AM...it sounds quite good. Tragically, that's not very many, and most of the stations using it are news/talk(!) where you only get the stereo effect on bumps and commercials.

RO>Over the weekend I read that the CHANGE in format for 103.5 FM in New York
RO>was determined by a group of CONSULTANTS called Broadcast Architects of
RO>Princeton. Seems to back up what you say.

It backs up nothing, other than the fact that the company felt the need to ask people (focus groups) what they'd like to hear. The format was "determined" by the company, based on the results of the research they did.

Why would it have been better to have a bunch of middle aged white males in starched shirts, strangling ties and proper blue suits decide on a format than to have a research company actually ask potential listeners? The guys in the suits don't exactly live the kind of lives most of their listeners do. If they did, the golf courses would look like subway stations at rush hour.

Broadcast Architects is one company that has actually introduced a unique format to this industry with New Age.

If they hadn't used research we'd probably see a clone of the most profitable format in the city and be done with it.

1828. Syndicated (CD based) Shows

Newsgroup: rec.radio.broadcasting
Date: 1996-02-16 00:00:00 UTC
From: rich@harborcom.net
Message-ID: <4g1e0b$3b4@vixen.cso.uiuc.edu>
Source record: 25674

Can someone educate this newbie as to syndicated (CD based) shows? At my station, these shows run Sunday mornings and evenings. Our format is somewhere between AC and Hot-AC. My questions:

1. Since the shows contain advertising, are these shows offered to the station on a no-charge basis? a charge basis? or does the station earn a fee?

2. Since a board op is used to run the show, why not run a local, live music shift? or specialty music shift? or community show?

3. Does anyone have any comments about trying to change the PD's (or owners) mind about switching to live, local programming?

Thanks, Tony

As best I can figure, I'm the little guy everybody is worrying about being forced out of business and I love most of the new bill. In fact, I didn't think it went far enough.

The big guys can never care about their markets as well as we do, there will always be stations available and there is a practical limit on what any company can do in any market.

BTW <g> radio does not exist to give people jobs.

GB>I can't understand why the government would break up the bell system,
GB>claiming the monopoly was bad for America...and at the same time decide
GB>that monopoly is good for radio.

The last time I checked, a monopoly was a single company controlling an entire industry. As bad as this bill may be, it doesn't come close to creating monopolies. There are so many alternatives to radio that it's a foolish argument.

GB>It means big companies will control advertising rates, have more control
GB>over music and what artists can and can't get on the air. They will have
GB>greater control over restricting, and even eliminating news coverage, and
GB>talk programming.

At this point, the top rated station in a market has more influence on rates and record sales than this bill will encourage. Radio's job is not to provide an outlet for record companies. It's to make a profit. If it satisfies a need in a market, it'll survive. If it doesn't, it'll die. In New York City I have so many alternatives to radio that I'm not trapped by programmers. Either they provide what I want or I'll go elsewhere. Audiences have no loyalty (nor should they have to) to any station.

GB>Since this is all about profit, I think the goal of such groups will be
GB>to force down programming costs, and wages, in order to boost profits.

It's called Capitalism. Their goal is already to force down programming costs.

GB>And what if neither of the owners in your town, like YOU! You will not
GB>work.

Then you'll have to do what everyone else whose particular talents no longer have a maklet - learn something else. Workers in buggy whip factories, I'm sure, felt the same way. The smart ones learned something new and got on with their lives. The other option is to do what the folks "creating monopolies" have done: start your own business and take the same risks they did.

It's always much easier to play the victim than it is to get off your butt and become a player in the game. No company has an obligation to provide you with a job. It's your responsibility to make yourself a valuable commodity they'll want to hire. It's a perfect example of survival of the fittest.

Rich

Yes, I have seen the CFTR 8-tower array in Grimsby, and I have pictures <grin> However, I believe this array was newly constructed sometime in the early 1980s when CFTR changed their pattern, a process which involved the non-directional daytimer on 680 here in Rochester (WNYR) moving to 990, so that CFTR would no longer have to protect them. Before this time, I was told that CFTR used a 13-tower array behind a mall somewhere on the QEW. Anyone know for sure?

Stations that have more than one transmitter can run different programming
on each one. Shortwave stations WWCR, (now testing transmitter #4), and
WHRI, (2 transmitters), do this all the time. WHRI does a lot of
simulcasting.

1834. 1660 info and a question...

Newsgroup: rec.radio.broadcasting
Date: 1996-02-16 00:00:00 UTC
From: Bill P <rrb@clm.aiss.uiuc.edu>
Message-ID: <4g1e0o$3bl@vixen.cso.uiuc.edu>
Source record: 25680

Chris Spil asked...

} Where is 1660 KHz (Radio Oz) coming out from?

Actually it is spelled AAHS...

It is based in Minneapolis Mn, where it broadcasts on 1280 AM and up on the satellite (G6/15 digital). The affiliate at 1660 is WJDM in Elizabeth NJ, right across the Hudson from NYC.

They use 10kw days and 1kw night non-directional

Decent signal. Amazing what a kilowatt can do in a "totally' clear channel. And it gives a nation a rare opportunity to hear this marvelous format, even if you don;t have an affiliate in your listening area. Since the signal seems to cover the eastern third of the US quite well right now, and the central third with a bit more fading, you should really give AAHS a listen. Sure it is for kids, but it is not Romper Room, it is a hip, fun and positive radio station that is really refreshing on a number of levels. If you are wondering what Kids Radio sounds like, you owe it to yourself to find out.

Bill (OK, Stella, you can send me that twenty now) Pfeiffer

P.S.. On a related note, does anyone know what we are hearing on various frequencies between 1710 and 1790 Khz? They are carriers with short bursts of data which are repeated. Each frequency sounds a little different, but all are carrying these bursts of data.

Ideas?

I believe early 1977, or very late 76. The original format was "mellow 92", soft rock. Murray The K was the morning man. WPIX-FM was doing Disco at the time.

>2. When did Infinity buy WKTU? If I remember correctly, back in the
>mid 1970s. The Spanish Racing Association (please correct me if I am
>wrong) owned that station.

It was the San Juan Racing Assn. which was really an investors group that owned the race track, not an offical government/quasi government racing regulatory agency as the name would imply. The station was sold to Infinity's predecessor. I believe they were a spin off of RKO, that's who Jay Thomas said after they fired him and he was asked about his radio career. I misquote: "That's what happens if you work for RKO stations", or something similar.

I don't know how that could have been since they owned WOR/WRKS-FM. RKO knew they would probably loose the FCC case and have to sell the stations they owned so I guess this could have been a plan to somehow stay in the business. If true then I guess the company became Infinity after RKO was banned from having anything to do with broadcasting.

1836. The New 103.5 WKTU

Newsgroup: rec.radio.broadcasting
Date: 1996-02-16 00:00:00 UTC
From: steve c walko ee stnt <scw1118@hertz.njit.edu>
Message-ID: <4g1e0q$3bn@vixen.cso.uiuc.edu>
Source record: 25682

Well, the heartbeat on 103.5 in NYC that I thought was a technical problem Friday night and Saturday morning turned out to be a pseudo-promo for the new format on WYNY.

At 12 noon Saturday, WYNY became WKTU "The Beat Of New York" and "The New KTU", taking the call letters from the famous 92 WKTU in the early 80's. The last time a dance song was played on 103.5 was 5:30 PM September 22, 1988 when Hot 103 WQHT flipped with Country 97 to become Hot 97 and Country 103.5 respectively.

The KTU format can best be described as Dance/Classic Dance/Disco. All the dance and club songs of the 80's and 90's are played along with disco/dance hits from the 70's. A typical KTU half hour would be 2 Unlimited, Stevie B, KC and the Sunshine Band, Ace Of Base, TLC, Donna Summer and C&C Music Factory.

The 70's rock/pop stations have not taken a big stab at 70's disco but KTU is taking that chance. The only question is whether the format can support a large playlist. I've been listening for four days now, and I've heard a lot of repetition of the older hits. I expect to hear "Kiss >From a Rose", "Fantasy", "Shoop", and "Be My Lover" often, but not the same classic Nancy Martinez, Alisha and Donna Summer songs three times a day. I suppose when they have live DJ's soon, the mix will improve.

This station could be considered major competition for Hot 97, Kiss-FM, WPLJ, WBLS and Z-100. If not, 103.5 WKTU will certainly be added to car and home stereo presets. An arbitron in the 2's for KTU would be an improvement from Evergreen's country venture. We'll be wathcing and listening.

This seems to be the consensus in all the mail I have received on this thread! There many towers in the US at or around 2000' and 2049' seems to be a common one now (supposedly for FAA reasons). However, KTHI in Fargo seems to be the tallest at 2063'. Note..I did get one piece of mail from someone who said that KTHI had changed calls to something else.

Well, the rumors have been put to rest. Clear Channel (of San Antonia, Texas) announced today that the company has entered into a definitive agreement to acquire WOOD-FM, WOOD-AM, and WBCT-FM in Grand Rapids, Michigan, for an approximate amount of $42,250,000 cash from WOOD Radio Limited Partnership. Clear Channel has entered into a Local Marketing Agreement to operate the stations effective immediately.

WBCT-FM is the nation's most powerful FM signal while WOOD-FM is third in the nation at 265,000 watts.

Clear Channel currently owns and operates 36 radio stations and 10 television stations in 21 markets in the US, as well as 8 radio stations in 5 markets in Australia.

1841. Wichita, Kansas Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1996-02-16 00:00:00 UTC
From: sbauer@southwind.net
Message-ID: <4g1e0m$3bh@vixen.cso.uiuc.edu>
Source record: 25724

With the signing of the new Telecommunication Bill, radio acquisitions of stations in the Wichita, Kansas market have gone wild.

Triathlon Broadcasting Co. has announced two additional transactions by agreeing to acquire four radio stations from privately-owned Southern Skies Corp. for $24.5 million in cash and Triathlon Class A Common Stock. The stations are KSSN(FM) and KMVK(FM) serving Little Rock, Ark. and KZSN(FM) and its simulcast, KZSN-AM, serving Wichita, Kansas. KZSN(FM) 102.1 and its simulcast KZSN-AM 1480 have a country format. The FM ranks number two among FM stations in the market. Wichita is the eighty-eighth largest market. Triathlon Broadcasting Co., which is headquartered in San Diego, owns and operates Wichita radio stations KXLK(FM), 105.3, KRBB(FM), 97.9, KFH-AM 1330 and KQAM-AM 1410, and sells advertising for its own account on radio station KEYN(FM) 103.7 in Wichita pursuant to a joint sales agreement containing an option to buy.

SFX Broadcasting, Inc. has entered into a definitive purchase agreement to acquire the assets of privately-owned Prism Radio Partners, L.P., an owner/operator of sixteen radio stations in five markets for $105.25 million. SFX will be operating in sixteen markets, with 51 total stations, gaining broader and more diverse market penetration than any other radio station owner. KKRD(FM) 107.3, ranks third in the Wichita market and plays contemporary hit radio. KRZZ(FM) 96.3, ranks fourth and plays classic rock. KNSS-AM 1240, has a news/talk format and Radio Consultants Inc.is the #2 rated news talk station in the market.

The real interesting thing that keeps popping up is the name Robert F.X. Sillerman, executive chairman of SFX Broadcasting Inc. In several articles it was referenced that the SFX and Triathlon purchases were brokered by The Sillerman Cos. who represented the buyer. It doesn't take a rocket scientist to figure this one out.

If the FCC approves both the SFX and Triathlon purchases, combined, Sillerman will be a major owner in nine Wichita radio stations officially owned by two companies. This number could easily grow to 10 or 12 before it's all over.

X-Mailer: SPRY Mail Version: 04.00.06.22

There's talk radio...and then there's radio worth talking about.
After the bizarre arrest of a longtime civil rights activist
radio stations in Columbia, Missouri turned their talk shows
into public forums on the issue of persistent racism in the
college town.
Missouri's NAACP president, Mary Ratliff, was arrested and released
without bond February 6, along with her daughter and eight-year-old
grandson, after an incident involving alleged vandalism by the child.
Ratliff and her daughter were accused of interfering with the child's
arrest.
Police reports on the incident and Ratliff's version sharply diverge.
Relations between Ratliff and city government officials have often
been contentious.
One outcome of the arrest was a protest march on the city police
station Friday (Feb. 9), with more than 100 Columbia residents
participating. The U.S. Justice Department has been called in to mediate
the dispute.
Ratliff appeared on KOPN(FM)'s Saturday afternoon talk show on
African-American issues to give her side of the story. She stated her
belief that the arresting officers were reacting to her defense
of a black Columbia police officer who had been fired after a
department store accused him of shoplifting.
The show, "Straight Talk," also took calls from listeners, many of whom
related their own stories of harassment by Columbia police.
News/talk KFRU(AM) has also had extensive coverage of the incident. A
call from Ratliff was reportedly cut short one day, and the station was
unable to reach her since. Some callers to KFRU's talk programs noted
the difference in treatment received by black citizens as compared to
whites; others accused Ratliff of being too prompt to accuse the city's
mostly-white power structure of racism.
While Columbia's mayor has proposed a task force on racism, one KFRU
talk show host Sunday morning pointed out that it would be the latest in a
series of task forces that produce reports without effecting meaningful
change in race relations.
Commercial KFRU and noncommercial KOPN both provided a valuable service
by giving listeners a forum to talk about Columbia's persistent
lack of progress in relations between blacks and whites.
****
A Mid-Missouri station facing license revocation hearings has
filed a petition that would delay competing stations' plans to
increase power in Columbia.
The FCC has scheduled license revocation hearings for stations

owned by companies associated with Michael Rice, who is presently serving a prison sentence for his 1994 conviction on charges of deviate sexual assualt. Among the stations facing hearings are KFMZ(FM) in Columbia and KBMX(FM) in Eldon.

According to the petition filed Jan. 11 by Lake Broadcasting, one of Rice's companies, the FCC incorrectly gave Cuba, Missouri a second FM allocation and, alleges the petition, should not have allocated a frequency to Dixon, Missouri. Both communities are small towns in the south-central part of the state.

The Lake Broadcasting petition charges that the FCC action also unfairly prevents its station, KBMX, from upgrading to class C1 (100,000-watt) facilities. The KBMX application also conflicts with an application by Columbia station KPLA(FM) to get higher power.

The petition also has the indirect effect of delaying Zimmer Broadcasting's upgrade of KCMQ(FM) in Columbia from 18,000 to 100,000 watts. Zimmer at one time had expressed interest in a second Cuba station, but the Lake petition says Zimmer has dropped those plans.

Zimmer's KCMQ is presently locked in a head-to-head battle in Columbia with Rice's KFMZ. Both stations program current-oriented rock formats. KCMQ, which flipped from country on New Year's Eve, calls itself "Solid Rock." Longtime rocker KFMZ now calls itself "The Total Rock Experience."

Between this latest 80-90-induced frequency allocation tangle and the KFMZ and KBMX license revocation hearings, it could be several years before KCMQ and KPLA get their power increases.

****

The management of WPCS(FM) in Pensacola, Florida evidently must think people in mid-America are severely deprived if they can't hear that particular station's brand of gospel.

It has submitted applications for FM translators in the capital cities of both Missouri and Kansas.

The FCC has not yet accepted the applications for filing. The moves would put translators on 90.9 MHz in Topeka, Kansas and 91.9 MHz in Jefferson City, Missouri.

Also submitting an application for a full-power FM station is the owner of KCVO(FM) in Camdenton, which has numerous translators throughout west-central Missouri. KCVO's owner is proposing a station on 89.7 in Knob Noster, Missouri, about halfway between Kansas City and Sedalia.

****

Country station WDAF(AM) in Kansas City has yanked a spot from the local TV airwaves after complaints from groups concerned with violence against women.

The spot for "61 Country" showed a woman in a shower listening to a radio. A man dressed as a stalker enters the bathroom, reaches into the shower, and retunes the radio to WDAF, writing "61 Country" on the steam in the mirror as he leaves.

The first station to pull the spot a couple of weeks ago was WDAF-TV (which is no longer connected with WDAF) after getting complaints from viewers and its own employees. The issue of violence against women was especially poignant at Channel 4: one of its female

anchors was the victim of a stalker for nearly two years.
Shortly after the Channel 4 decision, WDAF(AM) decided to discontinue its TV commercials.
****
Impertinent Question of the Week: Now that the calls "WKTU" have been revived in New York, will someone revive "KJLA" and its slogan "Your 24-Hour Dancing Machine" in Kansas City?
I suspect not.

1846. PHOENIX RADIOWATCHERS 2/13

Newsgroup: rec.radio.broadcasting
Date: 1996-02-16 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@ktvk.com>
Message-ID: <4g1dvh$39j@vixen.cso.uiuc.edu>
Source record: 25729

INSIDER INFORMATION: Sources tell us that Nationwide Hot AC KVRY(104.7) will indeed morph back into its old identity of CHR KZZP. Nationwide's lawyers are talking money with the North Dakota broadcaster who owns the calls now...he'll sell when they put the right number in front of the zeros. As noted before, new GM Paul Talbot did news there in the 80's...glory days PD Guy Zapolean is consulting...AND...sources say KZZP's 80's morning guy, Johnathon Brandmeier, will do mornings via satellite from Chicago...he'll also do some weeks(probably the cold ones in Chicago)from Phoenix. Look for the new format in 3 or 4 weeks. Meantime...both the music and the processing have gotten mighty soft at KVRY...will the new format be preceded by stunting that includes letting the old one literally fade away?

THE (BIG) BOYS ARE IN TOWN: Jacor's acquisiton of Citicasters for $800 million Monday(2/12) gives them a presence in Phoenix....namely Classic Rock KSLX AM/FM(1440/100.7). It also vaults them(for now) into the top spot of radio ownership totals with 52 stations in the USA. #7 Chancellor Broadcasting is awaiting FCC approval of its purchase of Country KMLE(107.9). And, a few miles south in Tucson, SFX Broacasting has bought Prism, which owns CHR KRQ(93.7). That acquisition makes SFX #2 , with 51 stations.

AND THE TELCOM DE-REG BUYOUTS JUST KEEP ON COMIN'(Do a Bill Drake impression and read it out loud and it's a lot funnier...well, maybe just a little funnier): Par Broadcasting,
which bought KOOL AM/FM(960/94.5) as part of its acquisition of Compass two months ago, sold those stations Tuesday(2/13)...but won't say to whom until Wednesday(2/14). Talk on the street is that one of 3 things has happened: 1: Pulitzer has bought the KOOL combo and will add them to newstalk KTAR(620) and AC KKLT(98.7)....or 2: Pulitzer has bought the combo but will sell the FM to Jacor at a profit...possibly even paying for the AM acquisition.....or 3: Pulitzer bought the AM and Jacor bought the FM in separate deals with Par. Details to be furnished tomorrow and posted (Bobby Ocean voice) in mere seconds.

1847. So. Illinois Radiowatch

SOUTHERN ILLINOIS BROADCASTER ADDS TO HIS GROUP

by Joey Helleny

3D Communications Corporation announced today that it would purchase WFRX-AM-FM in West Frankfort, Illinois, adding to the Southern Illinois' company's holdings.
Dutch Doelitzsch already owns WDDD-AM-FM in Marion, Illinois and WVZA-FM, licensed to Herrin, Illinois, but operated out of 3D's Marion studios. He was also formerly the owner of a UHF television station, but sold channel 27 to a religious broadcaster several years ago.
WDDD-FM (Country) has been the consistent market-leader in the Carbondale-Marion MSA. WVZA-FM (AC) has been growing quickly, using an SMN format.
On-air announcements indicated that long-time WFRX manager/owner Art Smith would remain with the stations.

General query:

Anyone know where I could get lists of radio station affiliates for
different radio networks (ABC, NBC, CBS, etc...and so on) on the net?
I need as many lists as i can possibly get. Thanx for any help.

1849. Re: Why are stations going alternative???

WS> KNIN knows how to do Top 40 right! A broad range of current
WS>music, pop, dance, rock, and "alternative" such that none of
WS>it gets tedious, and they generally beat Dallas radio on new
WS>music. They promote themselves as the "alternative to boring
WS>radio" and "different kinds of music for different kinds of
WS>people".

Tom,
Then they're not Top 40. Top 40, by definition, plays the top songs
on the charts. It's probably the least innovative format because it
bases its playlist on lists created elsewhere. Top 40 is tedious to
anyone not interested in a limited playlist and it would hardly be
known for a "broad range" of music.

> The London market is quite different from any American market. British radio
> is primarily made up of BBC (governemnt owned) radio stations and then
> Independent (Commerical) radio stations.

May I correct a small point about the BBC? The Corporation is *not*
government-owned, but operates free of the government of the day under
its Royal Charter and Licence. Although it is true that the Board of
Governors is appointed on Prime Ministerial advice, it does not control
the output of the BBC -- that is left up to the Board of Directors,
appointed by the Corporation itself. You could say that the Board of
Governors, consisting of prominent men and women from all walks of
life, is there to put the nation's case to the BBC Board of Directors.

For example, if the Conservative government were voted out tomorrow, the
Board of Governors would remain until its members' terms of office
expire. Political tinkering by the Government would be recognised
immediately, and you might find a great many programmes would tell the
public if this were found to be the case.

This post does *not* represent the official views of the BBC; it is
simply how I understand it as a producer working for the Corporation.

1851. A Chilling Thought...

Newsgroup: rec.radio.broadcasting
Date: 1996-02-16 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@ktvk.com>
Message-ID: <4g1dvk$39o@vixen.cso.uiuc.edu>
Source record: 25734

I was visiting a friend this weekend. He's a business/accounting guy, never worked in broadcasting. He asked me about the telecom bill and what it means for radio. I told him about the new local ownership caps and the abolishment of national ownership caps. And then he said...
"You know what I'd do if I owned one of these big chains with 50 or 60 radio stations in 15 or 20 cities? I'd find a city where I wanted to do business, build a studio for each format I owned somewhere...hire management and talent for each of those, what, maybe 6 or 7 formats?...and uplink them...then downlink them at each of the stations according to format. "
What he's talking about, in essence is this: If ACME Broadcasting owns 15 CHR's, 14 Oldies stations, 16 Country outlets, 12 Classic Rocks, 13 Alternatives in cities around the country...why wouldn't ACME simply become its own exclusive satellite service...with its format, its music and its jocks? And why wouldn't every other company with dozens of stations do the same?
In the days since, I've talked with four very big names in the business here in Phoenix...people whose names I won't share because I don't have their permission...people you've heard of, people with long and distinguished careers in radio...people who, like me, never considered that this would be the next logical step of de-reg.
If you're a Jacor, do you want to manage and program 52 stations, or do you want to manage and program 6 and rake in the revenue from 52?
Do you want to try to find 52 good morning drive talents(ARE there 52 good morning drive talents??) or 6?
Undoubtedly, some operators would want to keep certain time slots in certain cities local, but Stern and Imus show that mornings don't have to be local to be successful. Music-intensive formats could probably switch to a company owned and formatted satellite without too many listeners perceiving a difference(if there is any in reality)from
what the consultants have been telling the station to play anyway.

Reply-To: knight@nr.infi.net (Jerry Palladino)

I listen to KDKA in Pittsburgh at night when it comes in. I live in North Carolina. About 7:00 PM ET, a station from the British West Indies, "Superpower 1020" blots out everything due to its 100,000 watts of "Christian Radio." I know that this station is NOT in the US jurisdiction. I wanted to know if there is some way I could make a formal complaint about how it blocks out US stations. If so, please let me know - I am sick and tire of listening to this fundamental Christian crap.

Sincerely,

Jerry Palladino
Former Pittsburgher

In Canada, we have the NRC, or National Research Council. They are the official "Keepers of Time" in Canada. They provide a number for you to call wiath a modem to sync your PC clock with. I don't know much about the US system, but might I suggest finding out the government department that "Keeps Time"? They'd be able to provide you with either a) A phone number to call (and the software) or b) a Shortwave Frequency on which time bursts are broadcast.

On another note, I have a Zenith Mini-sport, and the clock seems to be reasonably accurate. Is there a clock battery that could use changing?

Hope this helps!

RM>What?? I think you're missing the point of college radio! A college radio
RM>show should focus on a jock's likes and dislikes.

Rob,
Why? Unless a jock has an expert knowledge of a particular genre,
there's no reason for a station to indulge his whims.

RM>There are the college stations that emulate the big boys; whether they be CH
RM>AOR etc., etc.. They serve as a great training ground for people who want a
RM>career in radio.

There's no commercial station I know of that allows a jock to select
his own music. It's hardly a training ground if a college station
allows it and gives the jock the impression he'll be able to do it in
real life.

What the music sounds like with or without compression I feel is a
matter of personal perception!

However in my humble opinion I think if the gate level was raised and
the driving output increased and the compression level raised the result
would probably be high quality sounds played at a constant level

Contest strategies could fill a big book. The one you describe, although implausible, is one of them. Adroit contesting can really balloon the ratings in one book. Almost invariably the contest-bloated numbers settle back to reality in the next book. I was associated with a station in Detroit years ago which gave away a house in a Spring book and literally doubled the ratings. A three to a six and back to a three over three books.

The exception is a station for which contesting and promotion is a constant and key aspect of the format. KVIL in Dallas comes to mind.

> Also, can someone explain how the "at home", "at work", "in the car", or

Before this turns into the radio equivalent of an urban legend I should point out Arbitron does not weight by location of listening, period. The location of listening data is gathered and reported, but does not in any way influence the size of the total audience estimate.

Just plain not true. Most program directors and general managers I know do not look good in handcuffs.

There have been some experiments by commonly owned stations in similar formats to schedule commercials so one station is always in music. The theory is to try to capture 100% of the, let's say rock, listening on the two stations among those listeners who punch out the commercials. So far the results have been inconclusive.

Actually, one of the first Canadian licence applications for a station doing Dance music was in Vancouver. They were turned down - in part (I believe) because none of the CRTC commissioners could figure out how "dance" differed from other pop music variations.

The open frequency was given to a country station instead. This was about ten years ago.

WWJ, on 8 Mile Road, is still in its original building. That is, and always was, just the transmitter site. The studios were downtown on Lafayette Boulevard until 1982 when they were moved into the Channel 2 building on 9 Mile Road near the Southfield Freeway. TV2 and WWJ are _NOT_, however co-owned.

The truly beautiful transmitter site in the area belongs to WJR. It is located downriver (Riverview, maybe? I've been gone too long!) and is a marvelous old art deco building. Just gorgeous.

Source record: 25745

-- [From: Robert Paine * EMC.Ver #2.10P] --

Bob Steele, now partly-semi-retired morning personality at WTIC-AM, Hartford CT, used to announce every April 1st that he was finally retiring and that this was his last broadcast. Was very convincing, too - right up to the very last seconds of the show. As his theme music faded he'd say "April Fool."
I think Ray Poindexter's book Arkansas Airwaves was where I read about the prank played by one city's radio stations. Each ran their normal program schedule with one exception: Station A's announcers were on Station B, Station B's on Station C, C's on D and D's on Station A. (Are you thoroughly confused?) I think this went on throughout the whole broadcast day.
Of course, the climate in radio has changed such that I don't think this could happen today. Too much competition, too corny an idea, too whatever for today's industry.
Still, it would be fun to try to get listeners wondering what the heck's going on.....

>Ray Dennis

Yes.....In my opinion the Super Radio is the best consumer-grade AM receiver on the market. I live in Florida and all of my northern clear-channels....(WCBS, WLW, WNBC...er WFAN, WLS,..ect.) come in perfectly...daytime! The receiver is a mono AM/FM receiver with a full-range speaker, volume-bass-treble controls, internal AM antenna with terminal-connectors for an external antenna, and a headphone jack. It can run off of batteries or the included AC cord. It also incorporates the new AMAX bandwidth standard circutry and has a wideband or narrowband switch for AM. If you have enough signal and the AM's-up-to-snuff, the AM sound approaches FM quality. The FM receiver isn't too shabby, either. The FM antenna is the standard retractable job that folds under the carrying-handle. Retail is about $30-$50 US. A great radio....AM or FM....for the price.

Yes, and yes. I have both the Superadio II and III. At that price, it
seems to be one of the most sensitive AM receivers on the market. Use a
Select-A-Tenna with it and you'd be amazed what comes in.

Tonight my father and I were talking about or knowledge
on ISDN (or rather, lack of) and we came up with some questions
that perhaps some of you who actually use ISDN can answer.

1. Does ISDN work on fiber optic or copper cable?

2. If a station uses ISDN lines to broadcast from a
remote location (example, sports remotes) and they
use an ISDN system, how does it work?

3. Will ISDN eventually replace our current analog
telephone system as we know it, and if so, when?
What kind of an impact would ISDN have on data
transmission, such as computer modems?

4. Would using ISDN for remote broadcasts be easier
and more affordable vs. using a "cable" system?
(example, a station wants to cover sports events
from a number of local stadiums and gyms.
The station considers wiring a cable from every
stadium or gym where the event will occur, and
run these cables back to the station. Would
it be cheaper and less complex to use ISDN rather
than wiring a cable from every single stadium or
gym?)

5. How reliable is ISDN? Does it have a good, flat
frequency response range? Does it fail easily
or is it a trustworthy system?

Thanks for any response!

Rob Bass

<<>>

The Ocean City, NJ station (I used to work there) changed it calls to WTKU.
The new owner owns a couple of stations in the Atlantic City area.

<<<1. When did WHOM-FM become WKTU at 92.3 FM?>>>

In 1975 or 76, I recall. I don't think Infinity ever owned the station. Emmis
owned in the 80's. They changed from the Apple (WAPP) to WQHT (Hot 103.5)
then moved the station down the dial after buying and spinning off WYNY from
NBC.

actually, it makes WKLS (96 Rock) it's third FM signal in the market.
There is WPCH (Peach 94.9) and WGST AM and FM. Of course it is using it's
WGST FM signal to simulcast it's AM programming, to compensate for it's
miserable signal in the Atlanta market, especially at night. Second
different FM program, third technical signal. just thought i'd be a bit
picky :)

well, while i sit and watch all the selector fans bash the musicmaster fans and vice versa... :-)

i am writing a music scheduling "program" (add-in) as a part of microsoft excel. i'm sure the demand may not be that great, but at least it makes *me* more marketable. :-) i have the basic routines done...the program currently creates a 24-hour schedule, based on any number of custom hourly clocks, and will rotate songs in any number of custom music categories. nothing earth-shattering yet :-) next step is the toughie: maintain a history of playdates/times and create all those lovely tests (last time the artist/title played, tempo matching, etc. etc.).

anyone out there in net-land willing to try a test version (when complete)? i would appreciate input. are there any stations out there that actually have PC's with windows loaded? with excel users? it seems to me that while some stations are gradually adding more and more computers, the only software they buy are ms-dos and wordperfect for dos :-(

thanks... net discussions welcome. if you would like to become part of my testing team please e-mail responses.

A good start for someone interested in audio production is "Radio and Production" published by Jerry Vigil. Contact "RAP" at P.O. Box 170625, Irving, TX 75017-0265. This monthly magazine and cassette (with subscription only) pretty much chronicles the state of the production art in USA and Canadian radio today. The recording trades Mix, EQ, Home Recording etc. can be helpful if you can get past all the advertising and photos of studios to die for. The best advice I have is buy a cheap Tascam or Fostex multi-track cassette deck to learn the basics of multi-tracking, or if your computer can handle it a soundcard and audio edit program and practice practice practice. Find a station you like to listen to and try emulating their production style (I spent my first couple of years in radio trying to copy WIBC in Indianapolis....in the 70's they were an on-air production powerhouse). Also....learn how to write! Strong copy says it all. I've got 23 years in the audio produciton for radio and TV and if the copy is well written, you can and will create magic with it. Good luck!

The :45-:00 quarter-hour does not necessarily have the least listening. It does, however, frequently have the least reported listening in Arbitron diaries.

} Mebbe I'm dumb, but why would the station program kids' radio in the
} middle of the night? The signal might be strong in that uncluttered
} 'hood, but are Europe and the Far East in their game plan?

I am not a spokesman for kids radio but I have studied it, and find it fascinating, so Ill take a stab at this. If Stella (clever phrase) Starr is here (and I know she is) maybe she can fill in the gaps.

Speaking of Radio AAHS, since my personal exposure to Kidstar is too minimal to permit a proper evaluation.

The music overnight is a lot different than at other parts of the day.. More pop, AC and hit music, woven in with the kids stuff. Nights seem to appeal more to the upper end of their target demo. I can see a 12 - 15 y/o listening to the night music. Hell I am more than twice that age and I listen, but then I am a huge believer in the format.

More importantly, one of the missions of Radio AAHS was to only be on full-time stations so that they were there whenever a kid wanted them, even at 3 AM. I don't know whether the current incarnation of AAHS still holds to that, but originally that was thee idea. A good idea, in my opinion.

Also, AAHS is not specifically 'kids radio' they are 'family radio' with kids as the primary focus. Unlike some 'other' formats calling themselves family radio formats, AAHS really is something that can be enjoyed by a very wide age group. AAHS is bright, energetic, fun, and contains elements of 'radio' that are just plain missing from today's so-called 'Adult' radio. It just bubbles with excitement and fun. We are not talking "Barney" here. We are talking music from virtually all styles, picked on the basis of their positivity, integrity and fun.

I would rather listen to AAHS than 'another 25 in a row' on some AC or rock station. I think that once one gets rid of the emotional aversion to "eeek its kids radio" ... and really listens, you will see why this format needs to exist. I have loved AAHS style programming since I first heard it on WWTC in Minneapolis, long before they went satellite. They sound quite different today, more pop music, but the sound really fine and I am glad Disney is finally in their camp (by way of ABC). Hey Stella, take it from here.....

Hey Kidstar.. send me some tapes so I can comment on your product too.

Hi :)

I am gathering information on children's interaction with the media
for my thesis. I am particularly interested in kids radio - I have
seen the odd post on this subject previously and seem to remember
something about a kids format station.

Any information such as name of station, locality, and possible e-mail
address would be greatly appreciated.

If I am successful in gaining the funding I am seeking, I will be
looking at flying over to view the station in operation.

Thanking you.....

Kris

Reply-To: qtoonz@aol.com (Qtoonz)

WYHY in Nashville has ditched its Y-107 moniker and is now calling itself "107.5 The River"

As Y-107 they billed themselves as "Today's Hit Music without the rap or hard rock". As "The River" not much has changed except that they got rid of what they call they're "obnoxious DJs". The jocks are still there but there's no hype and they talk much less.

They've got new jingles singing "ALL NEW.. The River" and listener testimonials saying how much better the station is. One even says it's more relaxing. I don't sense it as more relaxing. The music still rocks. I've heard Aerosmith, Alannis Morrisette and similar alternative edged stuff mixed in with Mariah Carey, just as they have been doing all along.

As a slogan, "The River" to me means a softer AC or a AAA format,not techno-dance music and pop/alternative rock.

Local listeners, what do you think?

I'm familiar with the station in question...and they've become rather notorious in the area for making this same pitch to people whose names they've pulled out of Chamber of Commerce directories and the like.

The station in question is now handing out an alleged "coverage map" that's provoked gales of laughter in every knowledgeable radio person who's seen it.

The station has 50kw day and 500 watts at night, but its transmitter site is some 18 miles west of the city of license, and even the 50kw is VERY highly directional. Nobody's listening...and I'd be surprised if anybody but the station's owners are making money off this shady deal.

Want leased-time in New England? There are plenty of more reputable deals to be had out there...but don't bite at this, er, "big fish" of a tale.

>
Yes this is true..it used to be in Mississauga near Square One Shopping Mall...but that has LONG LONG been demolished and is now the downtown residential area of Mississauga. The site was close the the HWY 403 where it crosses the credit river if i remember correctly.

While surveying AM patterns for CFRB a couple of years back, I came across the remains of an
AM station
in this area in a new and I mean NEW (like no grass in the front lawns yet) subdivision of homes.
I think this was one of 'TRs towers. It was still standing and was in a small field beside some new
homes. It was a single tower all by itself and according to the construction workers, it was the last
thing left to be taken down before the next phase of houses was to be built (as i said, this was back
around 1987?). That whole area has long since been ovetaken by the new housing developments in
Mississauga...

Little bit of history....

I bought one of the Sony SRF-42 FM/AM Stereo Walkman models for $29.9x
at a Radio Shack in La Mesa, CA (Grossmont Mall). I have since seen it
in stock for $5 less at the large Incredible Universe store off Route
15 in San Diego. The instruction pamphlet had a 1993 copyright date.

I tested the radio for several days, using studio quality Sony MDR-V6
headphones. There is only one AM station in San Diego broadcasting in
stereo, playing oldies (1170 on the dial). Two AM stations in Mexico
seemed to be running in stereo.

The stereo quality of the AM tuner was surprisingly good, when the
oldies station was playing a cut in true stereo, that is. (My only
other experience hearing AM stereo was briefly at a Bradlees store in
Fairfield County, CT, c. 1984.)

Using the Sony SRF-42, when I would switch to *mono,* the listenability (of the stereo music station) using headphones became almost nil, that is, like normal AM mono -- suggesting to me the real value of AM stereo.

As I tuned around the dial (late at night) an odd phenomenon was noticed: Very weak competing DX signals on the same frequency seemed to come in on alternate channels, i.e., one station on the left, the other on the right. As stations faded in and out, this sounded very odd, indeed. Static and noise also seemed to come in on one channel or the other. It added quite a bit of depth and dimension to the AM band!

Curiously, some stations broadcasting in mono sounded absolutely terrible unless the radio was manually switched to *mono* (this was particularly apparent with KSDO AM 1130 San Diego, a talk station -- it sounded very distorted and like it was out of phase). Other mono AM stations sounded fine -- in fact, better -- as if there was enhanced frequency response on the high end -- when the AM mono/stereo switch was set to *stereo.*

The sensitivity of the AM tuner was only fair, however.

I tested the FM stereo part of the tuner only briefly -- it was very disappointing and lacked good frequency response at the high end. (Keep in mind I was using near top-of-the-line Sony headphones. The FM on other radios in the $20-40 range that I own in contrast sounds great with the Sony MDR-V6s.)

The radio seemed rather cheaply made. It was somewhat difficult to tune and to tune precisely. There was a red tuning indicator but it stayed lit even if one was slightly off the frequency of the station. I returned the SRF-42 Sony Walkman to Radio Shack for a refund because the battery compartment would not close completely. (It takes 2 AA batteries.)

As noted earlier, I have (since buying the radio at Radio Shack) seen it for $5 less at Incredible Universe. I will probably buy one thereto have on hand for traveling, as I'm interested to see if there are stations broadcasting in AM stereo in other cities. In addition, the rarity of AM stereo radios (this is the first one I've seen since 1984!) makes it worth spending $25 on. BTW, I learned about its existence last week by reading this newsgroup.

Hmmm. I don't recall them doing disco, at least not all-disco, in late '76/early '77. I remember they played a variety of things. They used to have an hour of a featured artist's music around 7pm or so, and I think they also used to air most or all of new albums. (I vaguely recall hearing most of the Fleetwood Mac "Rumors" album on WPIX before the single releases.) They carried American Top 40 on Sunday mornings as well.

I don't remember when "Crazy" Jay Thomas started doing mornings at WXLO (then on 98.7), but he was there by the late fall of '78.

Incidentally, speaking of NYC radio alums, Charley Steiner, now with ESPN, was doing the morning news at WXLO during that time period.

One sentence? Okay.....

"A FORMAT WITH A LOT OF POTENTIAL."

This station is the best thing that has happened to NYC. People who criticize it are either not knowledgeable in dance or still feel upset about 'YNY dropping country. (And rightfully you should but now take anger into action!)

Tom,

Care to focus in a little more? Any possibility you're talking about K-ROCK, 92.3? I understand their ratings are down in the NY market. The country format was number 20 in a market of 60 stations. Considering the relatively small percentage of listeners who contributed to that ranking (about 1 million in a potential market of 20 million), the top thord doesn't sound all that bad to me. According to any public information I can find, WYNY was always in the black, and, Evergreen Media's stock rose from a low of 14 to a high of 36+ while they owned the station and remained country.

I still can't justify a format change here except to help pay for other recent and future acquisitions..

Just my opinion, of course..

Ron

Reply-To: ag365@freenet.Buffalo.EDU

Happenings in the #40 market:

*The Planet decides to get down & dance....

CKEY(101.1;FM 101 The Planet)has altered their format...sort of.
Beginning last Monday,it went to a modern/dance mix from 3pm-7am(according to AllAccess;Tony Violanti's brief piece in last Friday's Gusto said it was from 3pm-5am). Modern rock remains from AM drive to PM drive. No jocks have been blown out-as yet. (Personal note:The modern/dance mix works like this:modern track,then one that could easily fit in at many other stations(i.e.Mariah Carey,etc.,then a dance track.) Why are they doing this? Well,one of my tipsters told me that-through the grapevine-the Planet has been sold to the same company that owns CING(107.9,Burlington,dance;Energy 108).(BTW,I haven't been able as yet to confirm it;if true,the CRTC would have to OK it.) He adds, "Energy has been successful with their dance format on 108 and (Hot)103.5(CIDC) in Toronto(true,but they were being consulted by the same company that consults CKEY for a while;now,only Hot 103.5 is)...It seems to me that(the) market is ripe for an Energy 108-style station." Maybe,but WKSE(Kiss 98.5) runs-more or less-the same dance music the Planet is playing.

*WXRL(1300,Lancaster;country)has returned to its old mix of music(about 75% current/25% gold-based)after about a month-plus of boosting the gold content to 60% in response to WWKB switching to SMN's Real Country. Outside of AM drive,jock talk is limited.

*More on the WHTT studio situation:'HTTer Larry Jones wired me on it and said the situation was more complex that I had written,saying that it goes back to Pyramid's sale to Evergreen-adding,"Someone-we don't know who-was contracted to build the new studios(he adds that he believes it was Pyramid's, as they had bought new equipment),but as the sale kept getting closer to being final they were doing less & less,including a new lease. That's why there's back rent & no studios." Jones adds that with Evergreen now owning the station,the station may be sold again & the studios are a long way from becoming reality-and also said that they have great equipment & studios to put it in,and nowhere to go.

*From Joel Denver's AllAccess site:
-Syracuse's WNTQ(93.1,CHR;93 Q)kicks PD Dave Edwards upstairs to the operations manager post,and brings in Tom Mitchell to replace him. Mitchell arrives from WMME in Augusta,Maine.
-In Albany,WFLY(92.3,CHR;Fly 92)PM driver/MD Shawn Scott-who had been at 'FLY for over 5 years-leaves over philosophical reasons. PD Mike Morgan is handling music duties for now.
-Interesting rumor in its Net Talk area:Is WGR(NewsRadio 55)going to be

reducing its news presence?

*Stations changing hands:

-The CP for WTOR in Youngstown was sold for $409,000(less land costs)from Stanford,CA-based Multinat Corp.(who is also dumping a San Jose radio station) to Birach Broadcasting of Southfield,MI(near Detroit;owns 4 other stations). (The station,at 770 AM w/5 kW(daytime only),has been bandied about since the late 80s,with little-if any-action taken.)
-WKBE/100.5 in Warrensburg(near Glens Falls,well in Adirondack Park)was sold for $625,000 from Karamatt Broadcasting to Bendat Communications & Broadcasting(who owns WABY & WKLI in Albany,and WUTQ/WOUR in Utica).('KBE,at 185 w,runs an AC format w/an 80's-90's base.)
-WFXV(ch.33,Fox)and LP WUPN in Utica were both dealt off to Boston,Mass.-based Sullivan Broadcasting(which owns Buffalo's WUTV(Fox 29)and Rochester's WUHF(Fox 31)(both Fox/UPN affiliates),as well as the rest of Act III Broadcasting's TV holdings)for $3.2 million. 'FXP was owned by Mohawk Valley Broadcasting,while WUPN was owned by Acme TV Corp.in Syracuse(with Kevin O'Kane involved in both stations;'FXP as principal owner,and 'UPN as the company president).
-WOCD(ch.55,Amsterdam)was dealt for $2.5 million from Cornerstone Tele Vision of Wall,Pa.to the Christian Network(based in Clearwater,Fla.;they own 5 stations and are buying 3 more).
-WICU(ch.12,NBC;Erie)was sold for $11 million from Erie-based Great Lakes Commiunications to SJL Communications(which owns a station in Santa Barbara). (source for all:Broadcasting & Cable)

-And WNDR/WNTQ(93 Q)in Syracuse has a new owner:Osborn Communications dealt it off to Pilot Communications(price unknown,but Osborn's deals totaleds $15 million).(according to Radio & Records)

TTYL...

Burlington, VT - Plattsburgh, NY Radio Watch

WIZN and WOKO had a killer fall book. An article in the Burlington Free Press gave all the details a few weeks ago. The big story appeared to be the return to the top of the morning heap for Corm and the Coach on WIZN as they posted a 19.4 share 12+, followd by WOKO and WXXX. WCPV (Champ 101.3), who runs Imus in the Morning dropped from a 7.3 to a 3.2 in the A.M. slot. 12+ Numbers Looked like this:

Fall 1995 Last Spring
WOKO (country) 20.9 17.0
WIZN (AOR) 16.8 15.9
WJOY (EZ) 7.1 4.4
WEZF (Hot AC) 6.6 8.2
WXXX (CHR) 6.6 10.4
WKOL (Oldies) 5.6 2.7(as WEXP)
WKDR (Talk) 4.6 4.4
WCPV (CR-Imus) 3.1 4.9
WNCS (AAA) 2.6 2.7
WVMT (Oldies) 2.0 3.3
WGLY (REL) 0.5 2.2
WLFE (Country) 0.5 1.1
WVMX (CR) 0.5 0.5
WGFB (AC) 0.5 1.1 (includes WEAV-AM?)

There are a couple of Web Pages to check out. Wizn has had one for a about a month now. They are WWW.WIZN.COM. Also WKDR made an appearance on the web as well.. WWW.CAFENONO.COM.:80/WKDR/. Cafenono, by the way, is an "internet cafe" in Burlington's old North End (the heart of old city) that serves up coffee and the internet.

Did my ears deceive me on the way home from work on Friday (2/16)? I did, I *did* hear Chip Hobart reading news and weather on Vermont Public Radio breaks during All Things Considered. Chip (who has worked damned near everywhere), A Burlington native, has been at several stations in the area since returning home and has also been heard rcenetly doing weekends on Champ 101.3. My favorite "Chip Hobart" was in an old aircheck from the AOR days of WAPP in new York. It went somthing like "...and this is Chip Hobart, rollin' Doobies on WAPP." VPR's morning host, Lisa Peeks, appears to have gone in the oposite direction, moving over to do breaks during the Imus on Champ 101.3.

Finally, there is another new signal in the area, a small translator that re-broadcasts Family Radio (religous) from KEAR in San Francisco. It is a low power signal but gets out pretty just the same on 90.0 FM.

Here is the way things look these days:

Radio List - Burlington, VT - Plattsburgh, NY 2/96 rev. 01

620 WVMT Burlington, VT, Oldies/talk (Gill Gross, Late-late, ESPN)
1070+WZBZ Plattsburgh, NY, Talk (Mike Walker, G. Gordon Liddy)
760+WCHP Champlain, NY, Religious
960 WEAV PLattsburgh, NY, AC, simulcast of WGFB-FM
1230 WJOY Burlington, VT, EZ/Big Band, "Original Hits"
1340 WIRY Plattsburgh, NY, MOR?
1390 WKDR Burlington, VT, talk (Rush Limbaugh, Alan Colmbs)
1420 WWSR, St. Albans, VT, MOR?

88.3 WXLU Peru, NY, Public, Simulcasts WSLU, Canton, NY
88.7 WWPV Colchester, VT, St. Michael's College
90.1 WRUV Burlington, VT, University of VT
90.9 KEAR (Translator), Religous
91.7 WCMK Bolton, VT, Religous
91.9 WCFE Plattsburgh, NY, Public, "Mountain Lake Public Radio"
92.1*WMNM Port Henry,NY, Oldies, "Oldies 92"
92.9 WEZF Burlington, VT, AC, "The Best Songs on the Radio"
93.9 WPLT PLattsburgh, NY, SUNY Plattsburgh
95.5 WXXX S. Burlington, VT, CHR, "95 Triple X"
98.9 WOKO Burlington, VT, Country, "Hot New Country"
99.9 WGFB Plattsburgh, NY, AC, "B 100"
100.9*WGTK Middlebury, VT, Classic Rock, "K 101"
101.3 WCPV Essex, NY, Classic Rock, Imus, "Champ 101.3"
101.7*WVMX Stowe, VT, Classic Rock, "Classic Hits"
102.3 WLFE St. Albans, VT, Country
103.3 WGLY Waterbury, VT, Religous
103.9*WANC Ticonderoga, NY, Public, simulcasts WAMC, Albany, NY
104.7 WNCS Montpelier, VT, AAA
105.1 WKOL Plattsburgh, NY, Oldies, "Kool 105"
106.7 WIZN, Vergennes, VT, AOR, "The Wizard"
107.9 WVPS Burlington, VT, Public, "Vermont Public Radio"
* Poor signals over parts of Chittenden and Clinton counties.
+ Daytime ONLY Operation

Regards for now,
Joe Tymecki

Message-ID: <4g4a7p$cg@vixen.cso.uiuc.edu>
Source record: 25685

The Dallas Morning News today (Friday 2/16) reported the upcoming arrival of yet another radio station in the Dallas Ft Worth area. The latest announcement is for a new build on 93.3, licensed to Haltom City, which is a northern suburb of Fort Worth. Per the article, the station will be owned by Hispanic Coalition Inc, which is headed by Marcos Rodriguez Jr, who is also president of KLTY(FM) 94.1, a local Christian Music formatted station. The station will actually be built, marketed, and have advertising sold by Susquehanna Radio Corp (who also owns news-talk KLIF 570 and country KPLX 99.5, locally) under an LMA. The article states that Hispanic Coalition, Inc will control the station and its programming. Programming format has not yet been determined.
The article states that the transmitter will be located between Dallas and Ft Worth, and will serve both cities. However, I noted when I looked Hispanic Coalitions application up, the transmitter site shows as being near Azle, which is on the Ft. Worth side of the metroplex. Whether a class C2 facility can really cover the entire Metroplex from such a location is questionable, I believe.

Yesterday's Dallas Morning News reported on the rumors that have been circulating in this newsgroup about an FM news-talk station coming to the area. The article indicated that a staff has been hired and sworn to secrecy as to which station is making the switch. The rumors reported center around Westinghouse/CBS's KRRW 97.9 and Infinity's KSNN 94.9, which are among the lower rated of the local full facility FMs. The article gives the sign on date as March 1. With two powerful talk stations and one powerful news station already operating in Dallas (all on the AM band), the question in my mind is whether this is a concept whose time has come for the Dallas market...

London Radio Watch:

What's Going On in the UK Radio Market?

The UK has two broadcasting sectors, the public sector is represented by the BBC who run two national TV networks, five national radio networks and a number of local stations. Contrary to popular opinion the BBC isn't government owned, it is an independent body operating under a Royal Charter. Funding for the BBC comes directly from a receiver licence fee payable by everyone that has a TV.

The 5 national BBC networks are:

Radio 1 (seems they've just abandoned 1FM ident again) plays a very wide range of "pop"
music, some commercial, some distinctly not. It also has programmes of dance music (house, rap, soul etc.) "world" music and other current but non-mainstream styles. There are also segments of speech and audio art and documentaries on "lifestyle" topics affecting its (mainly young) audience. It is perhaps one of the most eclectic stations to be found anywhere at the moment.

Radio 1 recently re-jigged itself with the sacking of many of it's older presenters and took a huge drop in audience figures. This ratings drop is now turning around and the station has hired some hot young but experienced talent. In my opinion they are sounding better than they have done for a very long time. (And bear in mind that they are a direct competitor to the statio I work for, in fact they hired away several of our presenters and producers).

Radio 2 is, in effect, the same type of programming for the next generation up. It plays a mixture of softer current music mixed with older records and also includes easy listening, big bands and other styles that appeal to a slightly older audience. Presentation style is relaxed and mature with quite a lot of speech.

Radio 3 is a full-on, no-compromise, intellectual classical music, drama and arts station. They play quite a lot of "difficult" music, including modern works that are disliked by many "classical" fans. They play almost everything in its entirety, not single movements of a symphony for example. Quite a lot of the output is recorded specifically for the BBC which directly employs a number of orchestras and at least one choir.

Percieved by many to be elitist, Radio 3 probably epitomises the "public service" nature of the BBC better than anything else on radio (TV is a different matter, but we'll leave that one for now). Depite this they have approx 1 million listeners weekly. (ballpark figure, sorry I can't be more exact, I don't have any research figures to hand).

There is a comercial classical music station - Classic FM - which is closer in style to the types of classic stations I've heard in the US, playing mainly the more accessible

parts of the repetoire and entirely avoiding difficult avant-garde pieces.

Radio 4 is a speech based network. In addition to three major news programmes they broadcast a wide range of magazine programmes, significant amounts of drama, book serialisations (currently 3 per day) light entertainment and programme-length features.

Radio 5, which started life a a hybrid childrens/educational/general music and features mixture has reinvented itself as primarily a news and sport channel with some more general programming (including a weekly programme on net topics) I don't generally listen to this so I can't really offer much detail. I'll try to give a fuller review another time.

Additionally, three BBC regional networks are located in Scotland, Wales and Northern Ireland.

And there are a number of local stations run by the BBC, mostly covering a major metropolitan area or a county, these have a commitment to at least 50% speech programming almost entirely of a local nature.

The commercial sector consists of 3 national networks and nearly 200 local and regional stations. More new licences are being issued every year.

Commercial Radio in the UK has been growing rapidly in recent years with the release of large numbers of new licences. Revenue has also improved. Historically radio has been known as the "two-percent medium" taking approximately 2% of total dislay advertising spend. To counter this, the radio industry formed a new, jointly-owned operating company, The Radio Advertising Bureau, whose function is to promote radio to the adverising industry. As a result, last year the share of display ad spend went up to 4 % and is set to rise even further this year.

Also the industry has seen a spate of takeovers leading to the formation of big groups owning a majority of UK stations.

The largest groups are:

Capital Radio Group.
EMAP
GWR
Scottish Radio Holdings

Of these only EMAP has the major amount of their business outside of radio. EMAP is a very large publisher of trade and consumer magazines (number two in the UK publishing market) and also runs various exhibitions and online services.

There are also several smaller groups which own a few stations each. This picture is further complicated by groups owning part shares in other stations.

In addition to this there are also many pirate stations, a few are full-time (well, between raids they are full-time, anyway) but many are weekend only. On one recent weekend I found 28 pirate stations audible at my home in London. There are some 30 licenced stations receivable in the same location.

Currently the list of local licenced stations in London is as follows.

FM:
94.9 GLR - BBC local station, music & news/talk
95.8 Capital FM - top-rated station, contemporary hits
96.9 Choice FM - r&b, reggae, carribean community station (south London only)
97.3 News 97.3 - news/current affairs.
100.0 Kiss 100 - dance.
102.2 Jazz FM - jazz and related music.
103.3 London Greek Radio - Greek (north London only)
105.4 Melody - easy listening
105.8 Virgin - classic & new rock (London FM outlet, also nationwide on AM)
106.2 Heart 106.2 - adult contemporary

AM
558 Spectrum - multicultural, multi lingual
963 Viva 963 - music/speech, targeting female listeners
1035 Country 1035 - country music
1152 Newstalk 1152 - talk
1305/1332/1413 Premier Radio - Christian
1458 Sunrise - Asian radio
1548 Capital Gold - oldies
1584 London Turkish Radio - Turkish

Figures below are taken from the Q3/95 RAJAR sweep. (RAJAR is the UK radio industry ratings compiler):

Capital FM Capital Gold KISS Jazz Melody Virgin FM

% share 18 7 3.5 1.3 4 4.5

% Reach 31 15 10 6 8 9

Hours 10.3 8 6 3.9 8.3 8.4

So that's what the London market looks like at the moment. Later this year a new licence will be advertised for London. Current speculation is that this might go to an Indie/alternative rock station.

1899. New England Radio Watcher: WBPS reborn, WZLX subs

Newsgroup: rec.radio.broadcasting
Date: 1996-02-17 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <4g4a7r$cj@vixen.cso.uiuc.edu>
Source record: 25687

*To paraphrase Mark Twain, rumors of the demise of sports on WBPS (AM 890 Dedham-Boston) appear to have been greatly exaggerated. Station owner Douglas Broadcasting has pulled back from its plans to take the signal to leased-time ethnic or religious in the wake of the end of a full-time lease to Prime Sports Radio. For the last week or so, we've been treated to nonstop music (well, they break for PSA's once an hour), ranging from blues to disco to oldies. Now it appears that veteran Boston sports voice Jimmy Myers (ex-WEEI, ex-WBZ, ex-WFXT-TV, ex-WWOR New York, etc.) will take over morning drive on 890 starting March 4. The Boston Herald's Jim Baker (probably the most accurate radio writer in town) says local lawyer Mark Miliotis will pony up the $4,000 a week for the airtime. Meantime, Douglas has struck a separate deal to bring former umpire Dave Pallone to WBPS from noon till 3 daily. Anyone else wanting to lease time on WBPS has to track them down first -- the station's 617-242-0890 main number is disconnected, and the promised wbps.com website never materialized. To be continued, no doubt.

*Infinity's classic rocker, WZLX 100.7, is trying a new tack to fill the morning shift when George Taylor Morgan goes on vacation next week. They're bringing in local celebrities to co-host with sidekick Debbie Enblom (misspelled as "Emblom" in the station's own news release!). The lineup includes:

Monday 2/19: Steve Morse (Boston Globe music writer), Dean Johnson (Herald music critic and radio writer)
Tuesday 2/20: Attorneys Harry Castleman and Paul Ayoub, Senator John Kerry and WLVI-TV/WBZ radio political analyst Jon Keller
Weds. 2/21: Chamber of Commerce president Flash Wiley, Crimestoppers spokeswoman Sgt. Margo Hill, Monica Collins (Boston Herald TV critic), and Collins' boss, Herald publisher Pat Purcell
Thurs. 2/22: Fleet Center president Larry Moulter, State Treasurer Joe Malone
Fri. 2/23: Mass. Film Office head Robin Dawson (who also produces Calling All Sports on WBZ radio), WLVI-TV's Jeff Barnd and Michael Barkann.

It's a little change from the usual, and should be fun for a week.

*Boston's broadcasters are moving north in droves. Network affiliates WBZ-TV, WCVB-TV, and WHDH-TV are all doing their news from Manchester until primary day next Tuesday. WCVB is leasing space from fellow ABC affiliate WMUR-TV; the others had to find their own offices. Boston University's WABU-TV (which is reportedly up for sale to the right buyer) has been originating town meetings from NH, along with media partners WBUR-FM and the Boston Globe. And now radio's up there as well; several of WRKO's talk shows are broadcasting from Manchester, and WBZ's morning newscasts

will come from Manchester next Monday and Tuesday. And on Wednesday, Don Imus (heard locally on WEEI 850, and in NH on WNHI 93.3 Belmont/ WRCI 107.7 Hillsboro) will broadcast from Manchester. Those outside New England can see Imus's show, as well as WMUR's nightly newscasts, on C-SPAN.

*North Shore classical outlet WBOQ 104.9 Gloucester MA is applying to boost its power. The station now runs 1530 watts from a 446' AAT antenna in Gloucester, some 30 miles north of Boston. "W-Bach" has applied for 3400 watts, a move that should increase its coverage at the expense of Northeastern University's WRBB Boston, all of 18.5 watts on 104.9.

*The "splat" is gone: Boston's WJMN, "Jam'n 94.5," has apparently returned to its normal antenna, putting an end to the incredible splattering that obliterated everything from 93.9 to 95.1 for several weeks. At almost the same time, Providence's WHJY 94.1 fixed *its* antenna problems, returning to full 50kw strength. Still missing in action are the tower lights on the tall FM tower at the WMEX-1150 transmitter site in Lexington MA. Two of the three shorter AM towers remain lit, but being one of the tallest points for miles around, I'd think the FM tower (former home to WCOP-FM 100.7) should be lit. It's been dark since before New Year's Day. (This seems especially relevant after the news in Inside Radio -- hi Tom! -- that a plane hit the unlit WIPI/WODE tower in Easton PA this past week. WIPI/WODE had notified the FAA; I wonder if WMEX has done the same?)

*Moving ever closer to CHR?: American Radio Systems' WBMX, "Mix 98.5," bills itself as a hot AC, but between the addition of John Lander (ex-Z100) in mornings last week, and the 80s CHR show they're running every Friday night, and the playlist that's edging out as far as Gin Blossoms and Alanis Morrissette, it's looking more and more as though ARS wants to use Mix as a blunt weapon against Evergreen's sagging CHR, Kiss-108 (WXKS 107.9).

*Moving ever closer to oblivion?: Last weekend, I had the opportunity to drive up to the Littleton NH-St. Johnsbury VT area, some 60 miles south of the Canadian border and more than three hours north of Boston. Here's what I heard:

1340 WSTJ St. Johnsbury: satellite oldies (not a soul in site at the studios when I stopped by)
1400 WLTN Littleton: satellite talk
91.5 WWLR Lyndonville VT: rock, with a live DJ, from Lyndon State College
96.7 WLTN Lisbon NH: satellite oldies
98.3 WGMT Lyndon VT: satellite AC
101.3 WYKR Haverhill NH (//1100 WYKR Wells River VT): satellite country
105.5 WNKV St. Johnsbury: satellite country (co-owned with WSTJ)
106.3 WMTK Littleton: satellite rock

See a pattern here? The most interesting things on the dial, besides little WWLR, were the French stations from Sherbrooke and Montreal. I'm

told there's a bit more live presence on weekdays on WLTN-AM and WMTK, but it still seemed incredibly sterile and depressing. One wonders whether all the ad revenue in the market combined would be enough to sustain just one station doing real local programming that spoke to the real local issues that really concern the real local people who really live way up there.

*And finally, speaking of ad revenue, the Boston Herald today reports Duncan's American Radio's estimates of total revenue for the market in 1995. Among individual stations, top billers were modern rock WBCN with $19.5 million, closely trailed by all-news WBZ and sports WEEI. Among groups, American Radio Systems (WRKO/WBMX/WEEI/WEGQ) dominated, pulling in more than 25 percent of all the market's revenue. Still, it's got to beat Cincinnati, where Duncan says Jacor controls almost 62 percent of the market's revenue. Something deep inside me says this just can't possibly be healthy.

More in a week or so, when I return from lovely, scenic Fort Wayne, Indiana.

Rumor has it that Zimmer Broadcasting of Cape Girerdeau,MO is in talks with the ownership of Poplar Bluff's KDBB, while the station is small now, they are getting ready to submit a COL change to Crystal City,MO along with a power increase to 36k directional, north towards Saint Louis. The reason Zimmer has no objections to the liscense change, as the talks with the ownership are to take control of the station in an LMA to buy agreement, to act basically as a translator of Zimmer's Jerseyville,IL station WKBQ(104.1), whose signal is virtually nonexistant in Jefferson and Southern Saint Louis Counties.More on this as the story develops.....

MAJOR LAYOFFS AT KMOX RADIO
AFTRA CONSIDERING CHALLENGE

by Scott Simon

ST. LOUIS --- Market leader KMOX today announced the layoff of eight people, effective immediately, and the union for the station's talent may file a grievance.

Most notable are sports anchor Randy Karraker and executive sports producer Randy Karraker. Both have been with KMOX since the mid-1980's.

Also being let go is producer/board operator Frank Pawloski, who has been with the station for over 20 years, morning news editor Kevin Killeen, and four off-air personnel.

The layoffs come during a time when the St. Louis Chapter of the American Federation of Television and Radio Artists is trying to negotiate a new contract for its rank-and-file members.

Attempts to reach executive director Jackie Dietrich were unsuccessful, but sources at the station tell me tonight she is considering filing an unfair labor practice with the National Labor Relations Board.

A memo by KMOX general manager Rod Zimmerman told the staff the station must meet new challenges in today's world of radio business.

KMOX, which always has the most listeners of any station in St. Louis, was part of the CBS group that was recently acquired by Group W.

John from England asked about other automation/live assist equipment...
Several of my client stations use Dalet. This is linked with RCS for music and Airwaves (local traffic software which is terrific, and used by nearly every Kiwi station) for scheduling.
I'm not up to speed with the operation of it, but it seems to work very well. We have 4 "master" stations sending out their programs to affiliates. Our software allows local windows to be inserted in "real" time. Hence the affliates can sound really local whilst being fully automated.
I don't have Dalets u.s. address here, but E-Mail me at mckay@voyager.co.nz and I'll give you the contacts as well as some local user contacts.
Rob

My station is using AudioMetric CD10's. We tested Denon's before we bought these and found them to be much better. The Denon's can easily be ejected while the song is on the air and any careless jock can pop it out. The CD10's did not have this problem and were also at the time smaller than the Denon's. We could fit 3 in a rack as opposed to only 2 Denon's. They are exactly the same size as our ITC Delta Cart machines.

Country music has not totally disapeared from radio dials in at least part of the New York market with the demise of WYNY.

There is still a north Jersey AM country station at 1070 on the dial located about 25 to 30 miles west of Manhattan.

WKMB Stirling bills itself as " The best little country station this side of Texas." It has been doing country for about 20-years, and while it's a 250-watt daytimer, its clean local signal covers an area with more than a million potential listeners.

And while the closer you get to Manhattan the more spotty the reception becomes I was able to get it clearly yesterday on my Honda car radio while sitting in the Ferry parking lot directly across the Hudson from the World Trade Center.

It is a real mom and pop operation though, Pop is a former TV engineer who now is gm and mid-day jock, Mom does news features and management stuff, while one son is sales manager and another is one of the jocks.

With lots of country music broken by only a few local spots its not a bad listen for C&W fans going through WYNY withdrawl, or curious radio types with Superadios ect. who are in signal range.

Bill Scheffler

BTW, I have no connection with WKMB, did a few weeks of part-time there more than 15-years ago while I was between AFTRA type gigs. Just thought its existence was worth mentioning even though its not likely to show up strongly in the New York book even without WYNY in the picture.

[Moderator's Note: Oh, I dont know... When Chicago's only 'Adult Standards' station WJJD went satellite talk, a little directional AM 2.5kw daytimer, 40 - 50 miles to the N.W., did quite well in CHicago books with Unistar's AM-ONLY satellite feed. Bill]

Grant Hudson <ghudson@voicehouse.com> writes:

>WWJ, on 8 Mile Road, is still in its original building. That is, and
>always was, just the transmitter site. The studios were downtown on
>Lafayette Boulevard until 1982 when they were moved into the Channel 2
>building on 9 Mile Road near the Southfield Freeway. TV2 and WWJ are
>_NOT_, however co-owned.

To connect this back to the thread about the 1500 towers, the studios that WWJ occupies in TV2's building were the old WJBK AM 1500 studios. (TV2 is still WJBK-TV). CBS owns WWJ, and recently purchased TV62 in Detroit which has changed (or will) its call to WWJ-TV. A new facility is being built, and I would expect WWJ and its FM sister to relocate to that facility. Final connection: WWJ-TV was the old call of TV4, now WDIV, when WWJ-AM/FM/TV was owned by the Evening News Association - former owner also of the daily paper The Detroit News.

1909. Digital Conversions??

I finally did it! WJDM was received here in Phoenix this evening, Feb. 16, from 9:35 MST till at least 9:55 MST. While I did not hear a top-of-the-hour ID, I was careful to verify my catch. (After all, Orange County, CA, has a Radio AAHS affiliate on 830 kHz; wouldn't want to get its harmonic instead!)
What made it even better is that at times, it wiped out an S3 QRN on the frequency which started at 9:50! Heard at approx. 9:53: a weather forecast: "Let it snow, let it snow, let it snow ''' five to seven inches predicted ''' with a low tonight of 23 and a high tomorrow of 58? on the station that plays great music for great kids on 1660 AM, Radio AAHS." Give it a try from your locale--you just might be surprised!--Rick

I have posted Ken's original article to the RADIO-L list, together
with my comments below as I felt it had relevence.
(RADIO-L is a mail list devoted to discussion on Digital Audio
Broadcasting.)

I suspect the situation would be worse with DAB transmission, due to
DAB adding another stage of bitrate reduction (BRR).

How do the BRR schemes for various systems compare - Eureka/IBOC/IBAC?

If BRR is unavoidable during aquisition/editing/distribution, is it better to stay with the same BRR algorithm as used in transmission (MPEG for Eureka?)- on the basis that it will impose fewer audible artifacts than mixing different algorithms?

Does DAB mean big troubles for those broadcasters who are implementing MiniDisc as a cart & field recorder replacement format?
I was surprised to be told that a DeutschWelle reporter in Melbourne (Australia) to cover the Aust Open tennis last month was using a Sony MD machine as a field recorder/editor - and at a time I am trying to argue against the use of MD due to the savage ATRAC coding.

I would welcome comments on the above and pointers to any recent material available about cascaded similar/dissimilar BRR coding-decoding as it applies to the various DAB systems.

Looking at your theory about a group programming all its stations and formats from one central place...
There's only one trouble with that theory. Rarely do you find any national show, in any daypart, that can match the appeal of a good local show. The strongest of the syndicated morning shows in our market (Stern) gets about 1/3 the AQH of any of the four highest-rated local morning competitors. Imus didn't even make it at all. In middays, local talk hosts on two different stations are creaming Liddy, and Limbaugh in early afternoons has fallen off his perch and is looking up at four local shows in various formats with higher AQH and better demos. Our market is typical of the top 50. (Notice that Stern is really strong only in the markets closest to his home turf; same with Imus.) Some formats, like CHR, oldies and country, have never really taken to syndication (even the best of the country morning hosts out there, Gerry House, didn't last more than a few years in syndication before most of his affiliates dropped out and went local again.)
In short, the first major station group owner that tries to create its own syndication system and program all its properties from a central place, will fall on its butt. There won't be a second one, because the failure of the first one will be so spectacular. It's just like the automation craze 20 years ago. Everyone thought that CHR stations would all be programmed by computer. A number of top 50 market stations in the Great Lakes tried it. Literally every one of them now is programmed live at least from 6 AM to midnight. They all found live and local was the more profitable way to go.

Bob Smith, middays WXXI-AM 1370 Rochester NY

Tom Desmond writes:

> The Dallas Morning News today (Friday 2/16) reported the
>upcoming arrival of yet another radio station in the
>Dallas Ft Worth area. The latest announcement is for a
>new build on 93.3, licensed to Haltom City, which is a
>northern suburb of Fort Worth. Per the article, the
>station will be owned by Hispanic Coalition Inc, which is
>headed by Marcos Rodriguez Jr, who is also president of
>KLTY(FM) 94.1, a local Christian Music formatted station.

This is a frequency that has had something like 29
applications fighting for a CP for maybe 5 or 6
years. Glad there is finally some movement on it.

> The station will actually be built, marketed, and have
>advertising sold by Susquehanna Radio Corp (who also owns
>news-talk KLIF 570 and country KPLX 99.5, locally) under
>an LMA. The article states that Hispanic Coalition, Inc
>will control the station and its programming. Programming
>format has not yet been determined.

This is an arraingement that makes little sense. I predict
one or the other of the co-owners will buy it shortly after
it gets started.

> The article states that the transmitter will be located
>between Dallas and Ft Worth, and will serve both cities.
>However, I noted when I looked Hispanic Coalitions
>application up, the transmitter site shows as being near
>Azle, which is on the Ft. Worth side of the metroplex.
>Whether a class C2 facility can really cover the entire
>Metroplex from such a location is questionable, I believe.

Actually, based on what I know about the allocation and
the other stations on and around that frequency, I think
the only place it can be put is between Dallas and Ft.Worth.
Obviously, they think differently. Maybe they are going to
drop the power and park it up high on one of the towers
at the Cedar Hill antenna farm.

> Yesterday's Dallas Morning News reported on the rumors

>on date as March 1. With two powerful talk stations and
>one powerful news station already operating in Dallas (all
>on the AM band), the question in my mind is whether this
>is a concept whose time has come for the Dallas market...
>
>Tom Desmond

Success in such a format all depends on how it is done.
KRLD had been all-news for years until about 2 years ago
when they added talk shows from 9am to 4pm. (except for
the noon hour.) WBAP is beating them in news head to
head in the morning, middays, and afternoon. WBAP's Mark Davis
and Rush Limbaugh shows are also beating KRLD's talk shows from
9-noon and 1-4pm respectively.

The Dallas Morning News this morning (2/17) said that Jody Dean will
move out of the 9am-noon talk show slot and start "hosting"
the morning news from 5am-9am. The story also said a new
host will be brought in for the 9-noon slot.

Seems to me there might be a news niche that can be filled
in DFW. It will be interesting to see what the new people do.

If you have tried to contact me, or view the Web page for the National Radio Club or DX Audio Service, there appears to be a problem with our local servers connection.

They made some changes to the system, and apparenly the address has changed to the point where mail sent to me is getting bounced.

In WCOIL's letter to users about why we could not connect, they said, "We did not know that a change would be required from you in order to connect to the new server." They went on to say, "Locate name server. It is currently 205.133.95.1 Change this to 206.230.70.3 You are ready to dial in."

I'm not as proficient at the internet as most of you, but since I was not able to log on for four days, I have to assume that this is the reason that messages are getting bounced. Hopefully this address information above, or the path of this message, is enought to locate me in the future.

Please change any distribution lists, or news groups, that are presently feeding Fred Vobbe, National Radio Club, DX Audio Service, or Great Northern Broadcast Company, to reflect the change in address.

By the way, I have been informed that the FidoNet gate is going down on March 1, 1996, so any mail sent to Fred.vobbe@f16.n234.z1.fidonet.org will be invalid after that date.

I own and manage a combo which includes a 500 watt daytimer at 1130khz.
We carry Chuck Harder's For The People in the afternoon, and have
listeners in a 100 mile radius of our tower, just east of Terre Haute, IN.
Some of our listeners complain about reception, especially late in the
afternoon when skywave kicks in. We always recommend a trip to a local
retailer and the purchase of a Superadio III. Invariably we get a call
the next day from a surprised and satisfied listener. I may start
retailing them myself. It's the only radio currenly on the market that I
know of that actually treats AM like radio. --WSDM

1922. Questions about ISDN

RO> 3. Will ISDN eventually replace our current analog
RO> telephone system as we know it, and if so, when?
RO> What kind of an impact would ISDN have on data
RO> transmission, such as computer modems?

Rob,
If NYNEX is any indication, it'll be sometime in the 38th century.
In New York ISDN still means "I Still Don't kNow." Telco knows so
little about it that we use a third party to coordinate the ordering
and installation of ISDN lines. I ordered an ISDN line for my home more
than a week ago and NYNEX has yet to give me an installation date.

RO> 4. Would using ISDN for remote broadcasts be easier
RO> and more affordable vs. using a "cable" system?

ISDN allows a program channel, a mix-minus channel and a data
channel. It's far less expensive than using a half dozen POTS lines for
line extenders, cueing and talkback.

RO> 5. How reliable is ISDN? Does it have a good, flat
RO> frequency response range? Does it fail easily
RO> or is it a trustworthy system?

It's very reliable and high quality. My network uses 15kHz
satellite channels and ISDN is the only remote system that meets our
requirements. Occasionally, we'll use Switched 56 for a one-shot remote
if ISDN isn't available.

Rich
Director, WOR Radio Network

In article <4g4a82$d2@vixen.cso.uiuc.edu>, robert573@dallas.email.net wrote:

> 1. Does ISDN work on fiber optic or copper cable?

ISDN actually works on both. Fiber and copper carry nearly identical signals; fiber carries a great deal more per diameter. ISDN arrives at your front door on the same two copper pairs as would an ordinary Plain Old Telephone Service (POTS) circuit.

> 2. If a station uses ISDN lines to broadcast from a
> remote location (example, sports remotes) and they
> use an ISDN system, how does it work?

Integrated Services Digital Network (ISDN) is an international standard that defines a worldwide, completely digital switched telephone network. ISDN is designed to carry large amounts of information and has a number of potential uses, such as high-speed modem communications and desktop videoconferencing. For broadcast and professional audio, ISDN offers unique opportunities for the transmission of high-quality audio.

The form of ISDN of most interest to broadcasters and audio professionals is Basic Rate Interface, or BRI. (In Europe, this service is called S0.) On a single pair of ordinary phone wires, BRI offers two "bearer" channels at a 64kbps transmission rate and one "data" channel at 16kbps. This configuration is often referred to as 2B+D. When ISDN BRI is installed in your facility, each line is brought in on only one pair of wires.

ISDN is full duplex and calls are dialed and routed just like analog calls. In broadcast remotes, one ISDN equipped location calls another ISDN equipped location. Each side needs to have compatible terminal equipment and codecs. A codec is a device that codes (on the transmit side) and decodes (on the receive side) the digital audio. Most codecs are bidirectional. Without data rate reduction, high-quality audio requires a transmission capacity of about 700kbps for each audio channel. Channels that can handle data rates that high are very expensive and hard to get. More affordable and accessible channels, such as the two 64kbps channels in each ISDN circuit, offer a rate of only about 9% of that of a compact disc. That means you must do some coding to get "12 gallons of water into a one-gallon container." (Note that some refer to coding as "compression" but are generally referring to the same process.)

Most codecs use the two "B" channels for bidirectional audio (transmitted as digital data) and sometimes ancillary RS-232 data. The "D" channel is currently reserved exclusively for telephone network signaling in this type of application.

> 3. Will ISDN eventually replace our current analog
> telephone system as we know it, and if so, when?
> What kind of an impact would ISDN have on data
> transmission, such as computer modems?

We all hope so. All modems could be 128kbps. And since ISDN can carry POTS calls with the right terminal equipment, everyone should soon have access to multipurpose and affordable ISDN telephones. Adtran, Motorola, and Farallon are among the manufacturers of ISDN terminal equipment (often called terminal adapters) that offer both high speed data and the ability to plug-in your regular $19.95 telephone to call Aunt Irma.

Right now, the telephone network is nearly all digital; except for the last mile from the phone company office to you. ISDN extends the all-digital network.

The US lags far behind some other countries in rolling our ISDN. Our recently opened German office had the choice of installing POTS or ISDN at the same price.

> 4. Would using ISDN for remote broadcasts be easier
> and more affordable vs. using a "cable" system?
> (example, a station wants to cover sports events
> from a number of local stadiums and gyms.
> The station considers wiring a cable from every
> stadium or gym where the event will occur, and
> run these cables back to the station. Would
> it be cheaper and less complex to use ISDN rather
> than wiring a cable from every single stadium or
> gym?)

Wiring up these cables is prohibitively expensive for individual users - even networks. The phone companies have provided these dedicated systems in the past. The transition to ISDN has been rapid. Because it is a switched, rather than dedicated service, you pay a moderate monthly fee plus usage fees. Much cheaper than paying for 24hour/7day access for a line you use 12 Sundays a year.

> 5. How reliable is ISDN? Does it have a good, flat
> frequency response range? Does it fail easily
> or is it a trustworthy system?

Outside of the US, just a reliable as POTS. In the US, somewhat less so because the phone companies keep screwing around with their central office equipment. I would stick my neck out (and expect to have it chopped <grin>) and say a little less reliable than POTS and a little more than satellite.

Since the ISDN signal is digital, response is more dependent on your codecs than on the circuit. Broadcast quality is a piece of cake these days. Near-CD quality can also be achieved on a single ISDN circuit. There are codecs that use multiple ISDN circuits to achieve near-near-CD quality.

For more info and links to sites (such as the phone companies who will really confuse you) see our web site (http://www.zephyr.com).

In article <4g4a82$d2@vixen.cso.uiuc.edu>, robert573@dallas.email.net wrote:

|: 1. Does ISDN work on fiber optic or copper cable?
Yes.
It typically uses fiber pipes between phone company main offices, and copper from there to your station. In our setup, it enters the building through a normal 2-conductor drop, comes into the phone terminal room, and then goes to the studio on ordinary telephone quad -- the cheap wire you can get at office supply stores.

|: 2. If a station uses ISDN lines to broadcast from a
|: remote location (example, sports remotes) and they
|: use an ISDN system, how does it work?
Phone company supplies ISDN connections at station and stadium. Station buys an audio-ISDN box for each location (or rents them, or gets a combination of boxes, or a box and a card or two for their computer... there are lots of different configurations).
In the simplest setup:
Game time: sports anncr dials station's ISDN number from the box at the stadium.
Station's box lights up (equivalent to ringing a phone). Station engineer sends feed or IFB into their box's input.
Anncr hears feed in his headphones, talks into microphone plugged into box (or microphone and mixer, etc).
Station takes output of their box and sends it to transmitter.

Yes: bidirectional, stereo, 20kHz bandwidth are all simple on a 2-conductor ISDN hookup.

|: 3. Will ISDN eventually replace our current analog
|: telephone system as we know it, and if so, when?
Probably not, something better will come along.
Eight years ago I produced a film for Motorola's ISDN division, where they quoted telco predictions that 'the whole country will be wired with ISDN by 1994'. Uh huh.
Nobody knows what or when.

|: What kind of an impact would ISDN have on data
|: transmission, such as computer modems?
I'm answering this on an ISDN modem. It cost $300, connects me to the internet at 57kbps, and uses the studio's lines when we're not sending audio.

|:
|: 4. Would using ISDN for remote broadcasts be easier
|: and more affordable vs. using a "cable" system?

|: ... Would
|: it be cheaper and less complex to use ISDN rather
|: than wiring a cable from every single stadium or
|: gym?)
Probably. Depends on your local telco charges for a dedicated loop. Each rboc charges differently for ISDN... some want to encourage it, others couldn't care less. In New England, figure about 2x the normal telephone monthly service charge plus ~$100 installation. You'll need this at each location. Connection time itself is very cheap. OTOH, see below:

|:
|: 5. How reliable is ISDN? Does it have a good, flat
|: frequency response range? Does it fail easily
|: or is it a trustworthy system?
We have found it absolutely trustworthy... the only problems have been one-time configuration or setup hassles, when connecting to a new facility. Sounds better than the best dedicated line or satellite analog I've every heard. Quality of the audio is dependent on the brand of codec you use. Telos and Comrex make particularly reliable, good-sounding ones.

Regarding Dan Strassberg's post on WJBK...
The current station on 1500, WLQV, which runs 5kw at night, has a rather less than satisfactory signal over the metropolitan Detroit area (at night). In fact, the station is barely audible at its studio location in Livonia, Michigan at night.
The station has never had a decent nighttime signal in the metro area at night, per this poster's observation. The signal reportedly goes due north from the transmitter site, thereby missing the whole west side of the metro area (maybe the eastside as well). The daytime signal is less than COMMANDING for a 50kw signal as well.

RE: Including Local Music in the Format

In 1994, Eolin Broadcasting, where I work, LMA'ed WPHD, a Classic Rock station (licensed to Tioga, PA, but predominately getting response out of the Corning/Elmira area). Although I did mornings, the rest of the day was "satellite." One of the things 'PHD had been doing, which we continued, were "Night Out"s at 2 local night spots. Some Night Out's were DJ, but most had the guy MC'ing a band we brought in (e.g. Qiuet Riot, Molly Hatchet, etc) but mostly local bands.
The combination of needing to promote these appearances by local bands (Ice Water Mansion comes to mind as they had a full length CD they were pushing), as well as the fact some were very popular and occasionally garner phone requests meant airplay. The bulk of this came during my (live) morning show, but I even managed to get some cuts in during the satellite hours.
Having gone to a lot of the Nights Out we sponsored, I could see that some local acts were as popular, if not more so, than some of the "name" acts we brought in. I agree that local bands should be played, whether they're incorporated into a regular "show," or they have their own special slot (I remember hearing K-Rock out of Syracuse/Utica with a local showcase Sunday around 7PM). You just might find a local act has got a bigger following among your listeners than some off your "regular" playlist.

Not much, I guess. Long time broadcast equipment manufacturer Pacific Recorders and Engineering, gennerally refered to as Pacific Recorders, has decided that it needed a new image (gee...I always thought of Pacific Recorders as being the premier manufacturer of audio mixing consoles, studio furniture, cart machines and the like)and as of 1/1/96 changed their name to Pacific Research and Engineering.

1930. Please Offer Some Advice/Info On No-Compete Clauses

Newsgroup: rec.radio.broadcasting
Date: 1996-02-18 00:00:00 UTC
From: "Michael J. Phillips / Weatherboy" <weather@cybercomm.net>
Message-ID: <4g7366$gbm@vixen.cso.uiuc.edu>
Source record: 25628

I'd like to know other people's experiences with no-compete clauses.

I've been offered a job/contract at a New York City radio station...but one of the clauses in the contract is a national no-compete clause which prohibits the use of my name/image/voice in any other market while working with this station. They're not offering me enough money to take this offer..especially when I wouldn't be allowed to work outside of NYC. (My guess is the station is interested in pursuing a syndicated route with me..or to "buy out" my presence in other markets.)

In college, one of my broadcasting professors told me that no-compete clauses are illegal; that state and federal laws prohibit any company/individual from restricting the income of another individual.

But I also understand that a station would want a competitive edge over another station by restricting a talent to a particular market. And I also understand the competitive edge of restricting a talent to work in a particular market within a period of time after such a talent leaves the market.

What I'd like to know is:

-Are no-compete clauses legal and binding?

-Can a station restrict you from working in other markets if they don't use you in those markets?

-Can a station restrict you from not-going to a competing station in the same market once you quit/leave/get fired from a station?

I'm also curious to hear about other experiences you have had (or heard about) with no-compete clauses in the radio 'biz.

Weatherboy/NYC

I'm not local, but my station, now Wild Country (WLLD/Columbus) was one of the first River stations (if not THE first), and it was Country.

After our changeover, a Dayton station took the WRVF calls and River concept. (That station has since changed formats and names.)

Thus, as a slogan, you can make it whatever you want. How many Magic stations are A/C? Yet the Magic that was here in Columbus (now the Blitz/WBZX) was Classic Rock. Ditto the Magic in Pittsburgh.

Hi...I might be able to help out a little on this one, since
our sister FM operates a couple of SCAs...
The way the subcarriers work, they can either be sub-
sidiary broadcasts intended for general (or specifc) audiences,
OR proprietary transmissions intended only for a limited tar-
get. The foreign language outlets in many cities are examples
of the former...SCA decoders for those channels are widely
distributed.
The latter kind of SCA, for limited distribution, breaks
down into two parts. One is the commercial background music
service like Muzak, which is intended for transmission to cus-
tomer sites only and not for the general public. (Believe it or
not, stores and factories pay Muzak for the right to transmit
elevator music either to calm their workers/customers, or
excite them.) The other is non-commercial, but copyright-pro-
tected, like a radio reading service for the blind (which we run
out of our station). Publishers don't mind having their books
and magazines read over the air to an audience that otherwise
wouldn't hear them...but they get bent out of shape at the idea
that someone in the general public could get their stuff free
instead of paying to read it. So they allow transmission of their
copyright material only on SCA channels with special receivers
distributed to clients literally on the basis of a doctor's pre-
scription (certifying visual impairment).
The broadcaster, in short, is permitted to operate his own
subcarrier service (or lease it out to others) either as a true
broadcast, or as a limited-distribution service whose audience is
restricted either by terms of a contract or by station policy.
And the courts will enforce whatever contract or restriction the
broadcaster chooses or agrees to. You can build an SCA receiver
for yourself, and it's no crime to listen to whatever you pick up,
but it could be a civil violation of contract or copyright law.
Bob Smith, middays WXXI-AM 1370 Rochester NY

Our moderator is correct. Technically, as a member of the general public, you can't go down to K-Mart and buy a radio with SCA, But of course, you have some access, because it is the prerogative of the individual SCA program provider to make his offerings as "public" as he chooses. Thus, Bonneville has LDS programming available on its FM subcarriers; Family Life Radio programs a Christian format for kids called the Children's Sunshine Network; in Tulare, CA, Portugese is on an SCA, even though no station uses its regular facility for the format. Of course, it is also the provider's role to provide outreach to the groups he's programming to. That's why Family Life Radio will sell you an SCA receiver (fixed-tuned to FLR's SCA) so you can supply their format to your kids if you wish, and radio reading services for the blind loan SCA receivers to their potential audience (thanks to donations.) However, according to theory, if the public had unlimited access to SCA, it would dilute the service's provider's right to sell the service to clients (how would Muzak make a profit if you could supply the receiving equipment without going through them?)
Of course, you can easily have access to SCCA, because some companies provide SCA receivers in kit form or pre-assembled, and those companies do their business openly. But they are also on the edge of the law, in a way; fortunately, their wares have been sold to so few people that it isn't worth it for the big providers to go after them legally.
And, of course, since these signals are not scrambled and appear on the signal of publicly-accessible stations, it's not a big project for the electronically-aware to make SCA a listening option for themselves.
These are not secrets; they are grey areas instead. Trust me; if SCA reception by a few ever really threatened the revenue of service poviders in a significant way, they wouldn't be grey areas for long.--Rick

[Moderator's Note: One way that music services 'sorta' protect themselves from casual sca listeners is to drop the sca carrier between musical selections. This triggers a squelch circuit in the commercial receivers but blasts forth annoying hash in non-squelching radios. I still think that its time to dereg the sca... Bill]

1939. Music Scheduling Software

Newsgroup: rec.radio.broadcasting
Date: 1996-02-18 00:00:00 UTC
From: Jimmy Edwards <jledwrd9@intellinet.com>
Message-ID: <4g736b$gbv@vixen.cso.uiuc.edu>
Source record: 25637

This is a response to the many scheduling software comments and questions posted in the last several weeks:

The bottom line to scheduling software is the end result: A well-balanced music log. Getting there is a matter of what you know about your software and what you are trying to accomplish.

As far as which scheduling software is the best is another matter. Selector has been around much longer than any of its competitors (as long as 10 years in some cases). They had many years to forge relationships with consultants and stations in this time. And if it works for you, GREAT! But that doesn't mean it's the best.

One would have to be versed in ALL scheduling software before he or she could say that one is better than another.

I've read comments that scheduling software from company "A" is better than company "B." Based on what criteria? When you tried "B" did you truly understand how it worked? Or did you not like the fact that one key saves changes in one, while another key saves changes in the other?

Many (not all) people posting messages on this subject seem to think they have mastered each system they have tried and deemed ONE a winner. When in reality they have used one for many years and tried another one for a week or two. One guy posted that our software, POWERGOLD, was not compatible with BP. WHAT!!??

Ask questions if your trying another software. Don't assume one is more feature packed than another until you talk to the provider.

I have encountered this misconception many times. People who call me find out how to do what they want to accomplish. It's not brain surgery. Ask questions.

Ask these questions whenever you get scheduling software (especially with buy-outs):

ALL OF THESE ITEMS SHOULD BE FREE FOR LEASE SOFTWARE******

1. How long will I get upgrades and tech help. (After a certain period of time many companies will charge $100.00 per HOUR if you need help).

2. Will it interface with my automation system? (You will often be charged anywhere from $500-$1000 for this, but shouldn't be).

3. If your software is so great, why do I have to sign a long-term contract? If it's that good, I'll want to keep using it anyway, right? (Watch out for the "...we can give it to you for a lower price with a long

contract," gimmick).

Finally, if you lease your scheduling software, that fee should be all inclusive of anything you need for the future (especially automation).

I would appreciate anyone's thoughts on this.

Jimmy Edwards

Hi All:
As I was scanning the dial this Saturday afternoon,
I noticed that 103.3 KRUZ is now some kind
of rock with jingles which are similar
to KOST. The slogan they are using says:
"1hundred5thousand wats--the sleeping giant just
woke up--the new KRUZ103.3."
Just in the last 2 years or so KRUZ went away from
beautiful music to sort of a light AC but with
that same aproach.
Enjoy!
Hart

1941. Syndicated (CD based) Shows

Newsgroup: rec.radio.broadcasting
Date: 1996-02-18 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <4g736c$gc1@vixen.cso.uiuc.edu>
Source record: 25639

RI>Can someone educate this newbie as to syndicated (CD based) shows? At my
RI>station, these shows run Sunday mornings and evenings. Our format is
RI>somewhere between AC and Hot-AC. My questions:

RI> 1. Since the shows contain advertising, are these shows offered to the
RI>station on a no-charge basis? a charge basis? or does the station earn a
RI>fee?

Tony,
The shows are offered on a barter basis. They're free to the
station in exchange for carrying the advertising in the show.

RI> 2. Since a board op is used to run the show, why not run a local, live
RI>music shift? or specialty music shift? or community show?

Depending on the market, it's unlikely a station will pay for the
kind of talent the syndicated show offers. In most cases, Casey Kasem
is more interesting to listen to than a high school part timer playing
the same music.

RI> 3. Does anyone have any comments about trying to change the PD's (or
RI>owners) mind about switching to live, local programming?

Why? I still can't understand why a local disk jerky playing music
recorded in Los Angeles, New York or Nashville and reading liner cards
offers any more "local" service than a syndicated show. The syndicated
show generally has more resources, better talent and a more listenable
sound than the high school kid most stations hire.

Rich

In a previous article, a writer identifying himself as
"Tony" asked why radio stations run syndicated programs on
CD, rather than do specialized local programming, and if
PD's can be persuaded to run local, community-based
programs instead.
Put yourself in the shoes of a program director who has most
likely worked a six-day week and who wants a day off. y are
required by your boss to run programming people will
want to listen to. Do you go with the work of a seasoned pro
like Rick Dees, Casey Kasem, or Dick Clark? Or do you
entrust your airtime to a broadcasting neophyte with less
experience and savvy? Most PD's will go the safe route, and run
syndicated programming, especially since most of it is free
and supported by the commercials included in the program.
Is this fair/ Is it innovavative use of the airwaves? Not
necessarily, but it IS expedient and convenient. And when a
parttimer quits, the audience is none the wiser; the programs
they've relied on for entertainment are still there.
Understand that parttime people can be either talented folks
who are expanding their career horizons, or
chair-warmers who want to impress their friends with their
star status; ability and motivation vary widely. I've
worked with parttimers who could handle any crisis, and with
some who've given the entire week's allotment of prizes away
in a few hours (due to their inexperience and the
PD's lack of supervision.) So the safe way is usually chosen,
much to the detriment of the talented novice for whom extra
airtime means the sharpening of skills.
Can you convince your PD that a local program is a BETTER
program? That, of course, depends entirely on your PD, and
his assessment of not only your talent and motivation plus:
If it's a specialty program the audience likes, and if
you leave the station, can he still maintain the program?
I have hosted local in-depth oldies shows that the audience
loved (and the consultants in this business would have
hated!). This was due to tne openmindedness of my
bosses, and their feeling that I could handle the
responsibility of the show on a long-term basis. Not all
PD's will take that risk, but if you have an idea, why not
present it to your boss? Just don't take it personally if
he opts for Dick Bartley instead.
Oh, and that brainstorm of yours may sound better after he
knows you longer and is pleased with your growth and
confident of your skills. Persevere! You just could be the

NEXT Dick Clark--if he doesn't live to be 150!--Rick

In 1977, WKTU was still listed as an AC station. (I have all the old directories from back then...) By 1980, however, they were definitely disco. Speaking of old but venerable New York d.j.'s, did any of you listen to Scott Muni and Rosko when they did a primitive form of AOR back in, let's see, it must have been 1965 or so? donna

1947. Bakersfield changes

Newsgroup: rec.radio.broadcasting
Date: 1996-02-18 00:00:00 UTC
From: kuzz1@aol.com
Message-ID: <4g735p$gab@vixen.cso.uiuc.edu>
Source record: 25645

Today (Friday, 2/16) is the last day the Tom Leykis show is being heard on KNZR (AM 1560, 25kw), Bakersfield. The struggling news-talk station will replace Leykis Monday with the local "Rob and Danielle Show" (previously aired 9-11AM), and a news block. The morning time will be filled by the Dolans. Leykis never did much more than a 1 share. KNZR was unable to keep its strong O.J. Simpson trial ratings after the trial ended, falling back to 15th place with a 1.4 share in the fall Arbitrons.

Rocker KRAB-FM has finally moved to its new dial position of 106.1 at 25kw, after a delay at the FCC blamed on the government shutdown. The station had been at 106.3 with 6 kw. Ironically, the FCC had been leaning on KRAB to complete construction or lose its permit. Then when KRAB was ready to fire up the new rig, the government sat on the paperwork.

* Lander lands at WBMX 98.5FM :

On Monday,Feb 12, John Lander, most recently of WHTZ-FM in
New York City, began his official duties as the new morning man
at American Radio's Hot AC WBMX 98.5FM. Lander replaces 'BMX's
16-year morning fixture, Joe Martelle, who was bought of his
contract earlier this year. [Martelle's has been silenced
since last November when he underwent emergency lung surgery.]
Martelle's producer/sidekick Jodi Winchester has also been
taken off the air and given some sort of production assistant
position with 'Lander in the Morning' show. Lander's new
producer is Neil White who was hired last fall.
For Lander's first week in Boston, Amy 'The Dirt Devil' Doyle
was brought in from Florida. She'll continue to phone
in her 'DirtDevil Updates' every morning.

New 'BMX on-air line-up looks like this :

5:30-9am John Lander
9am-2pm Joe Cortesse
2pm-6pm Dan Justin
6pm-9pm Andrea Phillips
9pm-1am Gregg Daniels(you can also hear him on WXLO 104.5 from 12-3pm)
1am-5:30 jockless

*WKOX Update..again :

It appears Boston area is one big step closer in getting a full-time
50,000 watt AM signal this coming spring. Despite numerous
protests from town's residents, on Thursday(2/15) Framingham's
Selectmen have very quietly voted to accept WKOX's plans to
build the new towers which would only be used from sunrise to sunset.
WKOX's nightime signal will beamed off WNTN AM 1550's tower in
Newton[WNTN is a 10,000wat daytimer].

As far as WKOX's programming goes, it will run a mix of assorted
syndicated stuff(Mike Walker, Dr. Laura Schlesinger, Judy
Jarvis, Gil Gross, etc) until the station is driving 50,000
watts of power towards Boston sometime this spring...
Reportedly, Gene Burns(now in San Francisco) is unlikely
to return. He's been fishing for a new contract around
the country(his current deal at KGO-AM expires at the end of March).

* WBPS II : The Jimmy Myers Chapter...

On Thursday, Feb. 8, at precisely 12:00pm, syndicated
Dallas-based Prime Sports Network left WBPS AM 890 airwaves.

After top of the hour 'WBPS AM 890, Dedham-Boston' id,
Fats Domino's "Bluberry Hill" started a continuous mix
of mostly Soul/R+B Gold and Disco classics...The station will
keep playing such greats as Donna Summer and Al Green until
Monday, March 4th at which time WBPS will try to resurrect its
sports image one more time....

Instead of leasing time to ethnic or religious programmers,
California-based Douglas Broadcasting which owns WBPS has
opted to sell its time to *local* sports-talk producers.
Weekday morning drive time(6am-10am) slot has been sold
to none other than Jimmy "Downtown" Myers. Myers, 47,
a controversial Boston sports personality has been openly
criticized for interjecting race into many issues, even
when it did not appear to be a factor.

Myers' last full-time gig was at the
Celtics' owned all-sports WEEI AM 590. On September 23, 1993,
Myers was fired by Program Director Phil Sirkin(now WPRO in
Providence). [Myers was also serving as the studio host
for Celtics' broadcasts on the team's owned
WFXT-TV25; he was let go from that job earler in the summer
of 1993]. At that time, Myers vowed to return to Boston
airwaves. 30 months later, he gets his chance...

Myers' lawyer Mark Milliotis is putting up $4,000/week
in the hopes that Myers' Downtown Productions, which has a
staff of four, will be able to turn profit with the 6a-10am show.

The 12-3pm block has been bought by former National League
umpire and Boston area native Dave Pallone. Pallone, 44,
who acknowledged his homosexuality in the 80s is another
controversial figure which should make WBPS an interesting
listen for a while...

And, this is the Boston Radio Watch exclusive :-) :
Fans of Upton Bell, a well known Boston sports observer,
rejoice. Uppie will resurface at WBPS as well. No days
or time are known yet but Bell, who was fired from WBZ's
popular Sunday night 'Calling All Sports' back in July,
will be heard from at 890 come March...

WBPS which pumps out 26,250 watts during the day and
only 3,670 watts at night, will air all *32* New
England Revolution's Major Soccer League games starting
with the season opener on April 13th. No announcers have
been selected yet.

Maury Wasrhauer, General Manager at Douglas' WNJR-AM in Newark, NJ
is also in charge of WBPS. He's handling all the leasing
inquiries for WBPS.

* Rock-ing the Cash Register :

Infinity's AP WBCN-104.1FM was the top money maker in the nation's
#10 market in 1995. The 'New Rock' which will celebrate
its 28th birthday next month billed $19.5 million. The rest
of top Top Ten looked like this :

2.WBZ-AM 1030(CBS) $19 million
3.WEEI-AM 850(ARS) $17.6 million
4.WXKS-107.9FM(Pyramid) $16.8million
5.WZLX 100.7FM(Infinity) $13.7million
6.WBMX 98.5(ARS) $13.1 million
7.WODS 103.3(CBS) $9.8 million
8.WRKO AM 680(ARS) $9 million
9.WMJX 106.7FM(Greater Media) $8.8 million
10.WJMN 94.5FM(Pyramid)

* WFNX solidifies on air staff :

AP WFNX 101.7FM in Lynn, named weekend/fill-in Angie C('C' for Corbin)
as its new night DJ. Angie C replaces Peter Choyce, former
WBCN staffer, who only lasted a couple of months on the job.

New 'FNX weekday line-up looks like this :

6-10am Thomas A. Irwin(aka Tai) with Henry Santoro(news)
10a-3pm Adrian
3pm-7pm Julie Kramer
7pm-12a Angie C.
12-6am Chris Kennedy

Also, WFNX's Web site is now fully operational at http://www.wfnx.com.
WFNX's "Spin Cycle" airs each Saturday night from 10pm to 2am....

* Programming Notes :

-Another 10 inches of snow fell last night, but Boston
stations are already talking summer :

o All-oldies WODS 103.3FM will move its
very popular 8-year tradition of free summer concert
series from Boston's City Hall Plaza to the Hatch Shell
on the Charles River. WODS' GM Bob Bates said the major
reason behind the move is to accommodate huge Saturday night
crowds. First concert is set for Sat. June 1st -- Little Richard.

o WEGQ-93.7FM "Eagle 93.7" is expected to take WODS' place
at the City Hall Plaza and start its own 70s artists
summer concert series. An announcement is expected any day now.
[In my last BRW, I incorrectly identified
WEGQ's new tower location -- it's in Peabody, not in Topsfieled!]

o Country WBCS 96.9FM is lining up its all-star Country Sunday
for late spring. Meanwhile, its crosstown rival WKLB 105.FM
is throwing its 3-rd anniversary party on Friday, Feb 23rd.[Official
birthday is on Feb 12] at the ROxy nightclub in Boston. 'KLB
hasnt made any announcements regarding its spring or summer

concert/event promotions. The station will be taken over by Evegreen some time in March and a format change at 105.7 is very likely.

o AAA WBOS-FM and its sister station NAC WOAZ 99.5FM will hold free concert series at the Harborlights and the Copley Sq. Park respectively...

o Kiss 108's new owners -- Evergreen -- will continue the annual all-star Kiss Concert tradition. Former Kiss 108's owner, Richie Balsbaugh, is not involved with organizing it this time around...

- Mix 98.5FM will be the latest Boston station to get on the Web some time this spring. Pretty soon when you look at http://www.wbmx.com or http://www.mix985.com you'll find Boston's Variety station....

- Notable Mentions :

o After 30 years at WBZ-AM 1030, reporter Don Batting rerited on January 31st...

o After 46 years at all-classical WCRB 102.5FM, VP of program operations Dave Tucker retired from the station...

Source record: 25647

The following is from today's Denver Post (2-17-96)

BROADCASTER CUTS DOZEN STAFF

Chancellor Broadcasting Co. terminated a dozen jobs at its newly purchased Denver radio properties
on Thursday.(GM of KZDG, 'Big Dog' Country 92.5, research director, salespeople, etc.).....Chancellor also eliminated a number of jobs at KXKL ('Kool 105, AM & FM, a mostly 50s
and early 60s oldies station).....Chancellor's purchase of Shamrock Broadcasting was finallized
Wednesday......Chancellor and Tribune Broadcasting announced the transfer of the format, staff and
classical music library of KVOD (99.5 FM, a long-time classical station) to KZDG 92.5.

Apparently, a country station in the hugely popular Denver country music scene is being flipped
over to a classical format. Go figure!

FRICHLING TO SELL KXOK?
Reports from insiders at KXOK say that JACOR is talking to Frichling about selling them the 100k soul station to add to their combo. The most recent reports say that if Jacor takes over KXOK, it would definately change formats to something that doesn't take away from the audience of Urban Oldies KNJZ and Urban Contemp. KMJM. Speculations on this new format are so many, that I won't even bother to mention them.FM HOT TALK?Probably not, but if they take over at KMOX, I would be looking for an AM/FM simulcast of KMOX.

KSD ADDS LOCAL WEEKEND PROGRAMING
KSD - AM(550) has added new local weekend program including a home show, more sports programing, a buy,sell,trade show, and an auto show hosted by ousted KMOXer Dave Finklestein.
P.S I would be looking for Randy Carriker to resurface at KSD. He was a guest host of Kevin Slaten's HARDBALL program, and hinted that he would soon resurface at KSD. This is a good time for KSD to expand their news/sports operations, with so many good quality talents out of work.

Here's the latest in waves from San Diego, California,
United States of America.

SIGN OF THE TIMES: Two San Diego stations displayed love
messages via well-placed signs in San Diego county. Classic
Rocker KGB used their existing billboard in the Kearny Mesa to
relay listener's wishes. Meanwhile, KKLQ [Q106] team of Jeff
and Jer, plus producer Little Tommy were at three locations in
the county along main roads.

QUOTE: Michael Hart of KiFM Jazz FM98: "Automation is not radio's
worry, it's investment bankers!"

TED SEZ: Ted Leitner took the opportunity to complain [again] on
air about his upcoming contract on 760 KFMB on Tuesday. New
boss Ed Trimble must of heard, as Teddy was back with his famous
word hemmorages Wednesday. He's mostly known for his famed sports
reports on KFMB TV8, and as one of the announcers of Padres
baseball.

ANOTHER 'BRICK IN THE WALL.' John Tournour, known on air as J.T.
the Brick, has a 13-week shot at a Sunday night sports show on
KFMB. He used to be heard on KMAX, Los Angeles [103.1]
[KFMB 760 5kw/50kw DAII]

CBS SPORTS: Xtra Sports 690 will start folding the CBS sports
feeds on the 77.5kw station. Formerly, KFMB, San Diego; and
KNX, Los Angeles, had the rights.

A PAR-FECT DEAL: Is Par Broadcasting getting KCBQ A/F for free?
Follow this: Par agrees to by Compass Radio Group for $68 million.
Telcon bill is signed into law; and the approval for the transer
from Compass to Par is announced by the FCC. KOOL A/F "sold" to
Kolfax Communications for $35 million. Speculation is that the
St. Louis stations in the Compass group are also on the block.
If so, and they $ale, it is most likely will bring in more than the
$68 million for the entire group, and Par keeps KCBQ A/F -- for free.
Smart business? Yes. Good business? Yes. It was no secret in
San Diego radio circles that Par wanted a better signal precence of
KIOZ/Rock 102. After trying to by 100kw KFSD fell short; they went
for the 105.3 spot; and might get it for free.
The expected transfer from Compass to Par is now slated at the end
of March. Compass will get 102.1 FM Oceanside; and Palamor College
will get the 1320 signal.

A CLASSIC MOVE: Making the rounds in the printed media: KFSD [94.1 100kw] will probably drop its classical format. Word on the street is that it'll pick-up c-c-c-country. That'll give San Diego three stations: Top-rated KSON [97.3/1240], KOWF-FM [Escondido, 93.1]and KFSD.

STUDIO MOVES: Once the Jacor take-over of San Diego-based Nobel, KHTS, El Cajon, will move to the XTRA Sports/91X studios in San Diego. KHTS was rumored to be shifting to c-c-c-country, but with the above story, maybe not. The station is still relaying WDUV, Brandenton, Fla.

E.MAIL TO ME: these electrons crossed my electronic desk this week: "Shotgun Tom sounds . . . .like he's on depressents!" Comments on SETS-FM new personality-less format on KCBQ-FM. The SETS-FM format will fold into the 102.1 spot after Par takes control of the original "Q."

"Mark Larson is my sanity-check for the day on the drive home!" Mark Larson has a one hour spot on San Marcos' 1210, KPRZ.

Freindly Kiwi, huh////

Kris:

We have a station here in Wheeling, West Virginia, WOHZ, which is running the satellite service radio AAHS.... it's a childrens format.

On occasions, it's brilliant, other times, it talks down to it's listeners.

I have four children, ages 5 and THREE QUARTERS (her emphasis), 4, 2 and .33. My oldest always like listening to the radio, especially during their 20 minute commute to and from school. The options are Radio AAHS at 1600 am, a satellite oldies format at 95.3fm, and the "eagle", an album rocker. They usually hit all three, but usually end up on the oldies.

They don't like radio aahs because they think it talks down to them. My oldest said that there is no weather there, and that it is important to her. She also said that they have silly things on Radio AAHS. So , it's oldies at my house, especially since they n

From: blake@deejay.com
Message-ID: <4gc1au$mog@vixen.cso.uiuc.edu>
Source record: 25503

"Apparently, a country station in the hugely popular Denver country music scene is being flipped
over to a classical format. Go figure!"

The 99.5 signal of classical KVOD offers them a tower location with better potential coverage of the Denver metro. Putting country on that frequency and moving classical to 92.5 (licensed to Greeley, quite a hike north of Denver with xmtr site to match) makes a lot of sense to me. There's probably a lot more to be gained financially from being a big signal country station in Denver than a classical station. At least the classical fans will still have a place to tune...and top-rated KYGO will have more serious country competition.

My opinion about "non-competes" is simple: If they pay you enough, go with it. If they don't pay you enough, tell 'em to take a hike. How much is enough...only you know that for sure, but you should make an honest assessment of how much you think you can reasonably make IF you offered your services elsewhere for the amount of time of the non-compete. If they aren't at least matching that, it ain' t worth it. Can they force it on you? In many states, no. States that are "right to work" states will not uphold a non-compete, unless you are being compensated for it. Of course, ANY company can choose not to hire you, if you don't sign their non-com...it's up to you...good luck.

WE>What I'd like to know is:

WE>-Are no-compete clauses legal and binding?

It depends. In my experience, any clause that prevents a person from bettering his condition will have less of a chance of surviving a court challenge. If it's simply a lateral move without dramatic improvements you'll have a harder fight. Either way, it's a very expensive legal battle if the employer decides to try and enforce it.

WE>-Can a station restrict you from working in other markets if they don't use
WE>you in those markets?

My attorneys have always told me that you're bound by whatever contract you sign. If you don't agree with a provision, don't sign it.

WE>-Can a station restrict you from not-going to a competing station in the sam
WE>market once you quit/leave/get fired from a station?

Again, if you quit you'll have less of a case. If you're fired, it's assumed that the company doesn't hold your value high and a judge is more likely to rule in your favor.

WE>I'm also curious to hear about other experiences you have had (or heard
WE>about) with no-compete clauses in the radio 'biz.

I've seen all sorts of non-compete battles. It's usually the whim of a judge that determines the outcome. No matter what it's a very expensive proposition. You'll be better off not to sign a non-compete contract if you have any intention of violating it.

Rich

: In college, one of my broadcasting professors told me that no-compete
: clauses are illegal; that state and federal laws prohibit
: any company/individual from restricting the income of
: another individual.

He's partially right. Overly-restrictive Non-compete clauses can
be and have been stricken down in court.

: -Are no-compete clauses legal and binding?

They can be.

: -Can a station restrict you from working in other markets
: if they don't use you in those markets?

It depends. Generally the answer is no.

: -Can a station restrict you from not-going to a competing station in
: the same market once you quit/leave/get fired from a station?

If you have signed a non-compete, yes they can keep you from going to
work for a competitor for a reasonable period of time.The best example I
can give you is of a salesman. He pounds the street, building up business
for station A, then he bolts for Station B, using those contacts he built
up at station A while on their payroll to the detriment of station A. He
could be held to a non-compete in his market for a reasonable period (say
One Year), but would be free to move to another market and work there.
If I were in your shoes, I'd decide now, though. Live with it or find
another gig.

Michael J. Phillips / Weatherboy wrote the quoted material below:

" -Can a station restrict you from working in other markets if they don't use
" you in those markets?

To my knowledge, yes.

" -Can a station restrict you from not-going to a competing station in the same
" market once you quit/leave/get fired from a station?

No, they can't...BUT you can't bring proprietary stuff with you such as
customer lists, trade secrets, etc. If they restrict you from working for
a competitor for a year (for instance) then they've got to compensate you
for this.

Michael has a couple of conflicting terms here. See below.

> In college, one of my broadcasting professors told me that no-compete clauses
> are illegal; that state and federal laws prohibit any company/individual from
> restricting the income of another individual.

Tell your professor to go back to law school. Non-compete contracts are not
only perfectly legal, they've been upheld in court on numerous occasions. The
question is on an individual basis, are the terms of your proposed
non-compete REASONABLE? Should you decide to litigate the termination, a
judge would decide whether it's REASONABLE to prevent you from working
anywhere in the U.S. The probable answer is "no". If the contract prohibited
you from working within 75 miles of the metropolitan N.Y. area, that would
probably be considered reasonable and the contract would be upheld. Another
component that would have to fit the "reasonable" test is the term of the
non-compete. If it prohibited you from working even a reasonable distance
from N.Y. for perhaps 5 years, that would be unreasonable. If, however, the
term were for 6 months or a year, it would probably stick.

<original post edited>
>
>
>
> What I'd like to know is:
>
> -Are no-compete clauses legal and binding?

Yes, as long as the terms are determined to be resonable in court and as long
as it's your signature at the bottom.

> -Can a station restrict you from working in other markets if they don't use
> you in those markets?

YES

>
> -Can a station restrict you from not-going to a competing station in the same
> market once you quit/leave/get fired from a station?

YES
>
> I'm also curious to hear about other experiences you have had (or heard
> about) with no-compete clauses in the radio 'biz.
>
> Weatherboy/NYC

I suspect you've already made your decision not to accept the contract based on your statement that they're not going to pay you enough. The chances are good that this NATIONAL non-compete contract would not be upheld in court since the geographic prohibition is too wide. But why mess with it? Until a challenge to this specific contract could be heard in court, it would still have the effect of preventing you from working anywhere in radio.

Before you consider accepting the terms of this contract, you should have a competent lawyer go over it with a fine tooth comb.

Jerry

1965. Re: Please Offer Some Advice/Info On No-Compete Clauses

Newsgroup: rec.radio.broadcasting
Date: 1996-02-20 00:00:00 UTC
From: jcrose@dplay.com
Message-ID: <4gc1b5$mos@vixen.cso.uiuc.edu>
Source record: 25513

```
|:
|: -Are no-compete clauses legal and binding?

If the contract is properly written, yes. I've been involved in court
challenges on both sides -- employer and employee -- and in both cases the
contract held. One of the biggest tests are if the contract is otherwise
fair -- that is, is there something in it for both sides. Also, is the
non-compete fair -- saying you can't work again, ever, anywhere patently
isn't.

|: -Can a station restrict you from working in other markets if they don't use
|: you in those markets?

Yes, if you've signed that kind of an agreement. They might have to go to
court and demonstrate they were planning to sell you in those markets, or
there's some market overlap, but that might not be too hard.

|: -Can a station restrict you from not-going to a competing station in
the same
|: market once you quit/leave/get fired from a station?

Yes, if that's what you agreed to in writing. But maybe you can change the
clause so it's not so restrictive if they fire you.

Bigger issue:

Why are you contemplating signing a contract while asking if it's for
real? If you give your word on something it should be binding. Not an
excuse to look for loopholes. If you say you won't compete for two years
within 100 miles -- or for eight years nationwide -- that's what you've
agreed to.

Read it carefully and make sure you agree with everything in the contract.
If you don't understand something, get somebody unbiased to explain it to
you. Show the thing to a lawyer. Negotiate to change the terms you don't
like.

And then, when you sign the thing, stick to it.

Julian H. Breen (breen@ix.netcom.com) wrote:

: > Can someone please comment on this? I thought that when there are two
: > competing statons on the same format they have some sort of unwritten
: > agreement to synchronize their commercials. They don't want the listener
: > being able to just hear a commercial, punch a button, and go right back
: > to their favorite music.

: Just plain not true. Most program directors and general managers I
: know do not look good in handcuffs.

Are you saying this is illegal, for competing stations to run their commercials at the same time?

What if there are two, for example, oldies stations in the same town. They both run 5-minute stopsets at :35 and :50 almost every hour. It just conveniently "happens" that way, no one from the stations talk to each other about it. Does someone from the FCC receive a complaint from some listener and go out and investigate?

: There have been some experiments by commonly owned stations in
: similar formats to schedule commercials so one station is always in
: music. The theory is to try to capture 100% of the, let's say rock,
: listening on the two stations among those listeners who punch out the
: commercials. So far the results have been inconclusive.

It goes to show that people who advertise on radio stations might ought to take a closer look at what is going on. Of course, those in radio realize how the agencies buy time. They get people with MBA's to import the printout of Arbitron numbers (25-54 only, of course) into Excel spreadsheets, then base their buying on what numbers appear in a certain column of this spreadsheet. There's no time to worry about little details about who's running music and who's running commercials at the same time. The stations are absolutely doing the right thing to try to maximize the numbers which get entered into this spreadsheet.

I believe that studies were done on how many people tune out after the first, second, etc., commerical in a stopset. I believe something like only 31% are still listening by the time the second commercial begins. Of course, people in radio don't print statistics like this on a flag and fly it in the face of advertisers. I know when it's me in my car, the percentage of time I hear the second commercial is near zero, I start punching buttons, and if they don't work, there's always the volume control to turn down.

Besides, most music stations are so good at warning me a commerical is coming up, I rarely ever hear the FIRST one. Whenever the DJ starts

announcing what is "coming up", what is surely coming up is 5 minutes of ads! Click!

I'd have a hard time plopping down $10000 of my money on ads on a station where I knew they also owned another station playing the same kind of music, always, when my ads were running. But who cares, I have no need to buy radio time anyway.

1970. RCS is a dog, but maybe the best dog on the block

Newsgroup: rec.radio.broadcasting
Date: 1996-02-20 00:00:00 UTC
From: charles@i-max.co.nz
Message-ID: <4gc1b8$mp1@vixen.cso.uiuc.edu>
Source record: 25518

Al this talk about Music scheduling / automation ha smade me wonder where it will end up.

I am not very familiar with all the automation systems in the world however i would like to point out one or two facts about RCS

But first an overview

Automation in my mind should be just that, and i have not seen many that are, the fundamental point is that we all need to schedule songs and want to be in control

Is an automation system really automation when you have to schedule everything exactly for it to be automatic????

The big problem is we are dealing with so many variables, music traffic links news and then the voicebreaks. Each of these need to be scheduled, and in the case of RCS they are schedluled separately

There is no direct corelation between the processes, the only way to get RCS to time out is by using the "exact time marker" this will force a fade of the event preceeding it to allow the system to get into sync with the world, we run the exact time markers at 57 mins just befor the 3 mins of cmmercials to the top of the hour. This works fine and we have got it down to a fine art however all we need is one commercial to be missing, for any strange reason, or even a 15 getting scheduled instead of a 30 and wham out of sync again.

the links are scheduled separately , that includes jingles sweepers promos etc, and the traffic is integrated. All these processes are performed by software written by "ONE" company and yet you have to go in and out of 4 different programs to do all this.

You then have to copy out a log to the on air studio, no problems, except that you better do a squeeze of the database first as the on air program doesn't like it if you dont, it then copies out all the selector databases to the studio, as well as the log, oh no, the mastercontrol system can't access the selector database directly.

Now you would think that a reputable bit of software written by a reputable company like rcs would check the integrity of the copied out log wouldn't you. a simple CRC or checksum algorith could work yes????

no, it gets an error and it crashes, like it did at 3 am, i have copied the paper log and copied the digital log and they are to be sent to New York wrapped around a brick, i think,

All in all though, it is not bad and i believe to be streets ahead of dalet and others but ....

I REALLY LIKE THE LOOK OF SCOTT SYSTEMS

and if rcs don't get it together soon , they will be getting it out of my station

you can buy external scpc receivers from universal electronics in ohio.
you must also already have a dish and tvro (televission reception only receiver
there is no direct audio sat receiver. more info write me at my email address
shown at the top of the msg

tandy way

[Moderator's Note: If you post to rec.video.satellite.tvro you can
get a lot of help in scpc. The average SCPC receiver is about
$500.00. For a little over $600 you can get an ICOM R100 which is a
receiver that covers longwave through microwave. It will give you
SCPC, and FM2 on satelite as well as doubling as an excellent full
coverage receiver. It scans too. Bill]

: [Moderator's Note: One way that music services 'sorta' protect
: themselves from casual sca listeners is to drop the sca carrier
: between musical selections. This triggers a squelch circuit in
: the commercial receivers but blasts forth annoying hash in
: non-squelching radios. I still think that its time to dereg the
: sca... Bill]

I thought the real reason they did that was to provide a cue to in-store machines which play advertisements. Every time the SCA cuts off, a counting device in the in-store machine advances. After every 7 or 8 or 10 (or how many ever) songs, the machine will switch off the Muzak and play a tape announcing the latest special. Perhaps a tape of the assistant manager announcing the blue-light special, or the fact that the week-old ground sirloin is on sale for $2.99 a pound. After the tape runs out, the machine waits for the next SCA dropout to resume the music. It sounds a lot less intrusive to the shoppers if the in-store ads are synchronized with the music like this.

1976. Acc't Rec'vable & Traffic Software for Radio Stations?

I'm looking for reasonably priced radio newsroom software that can handle incoming wire services and provide full editing and storage capabilities. Looking at a maximum 6 terminals. I'm aware of the BN I-NES system here in Canada, and the Prompter system (which is tied to hardware I understand.)

Any other suggestions? And what are the hardware requirements for same? (don't need audio editing at the moment, but that would be a bonus)

Thanks in advance,

In the past several months the Harrisburg-Lancaster-York
Pennsylvania region has seen dramatic changes in the world of radio.
First and foremost has been the sale of several area radio stations. Most
recently, Hall Communications, owners of the area's top-rated WROZ 101.3
FM, "The Rose,"purchased WHTM "92-7 StarView" and relocated the York
radio station to its building in Mount Joy.
This brings the total to three (3) communications companies that now
own two FM stations in the same market, a trend that was unheard of only
a few years ago.
I would like to get some feedback on this. I understand the rules
governing ownership, as mandated by the FCC. But do you think radio has
benefitted from a few companies owning all of the stations in one market?
Do you think it presents a conflict of interest or do you think profit is
the sole driving factor for companies that own more than one station in
the same market?
As a future radio programmer I would be interested in your comments,
especially those from radio insiders.

I think it could have been put more tactfully, but, let's face
it...Sunday morning/night are not exactly prime listening time. Given
the difficulty most stations have finding decent part-time help, it's a
lot more entertaining to have a "canned" show on. And as Rich noted,
these outfits have access to interviews and research that would probably
be beyond most stations.

Source record: 25532

Hey there all in radio land. Name is Jed an on air talent in Rhode Island. I had a question for all of you. We at my station 93.3 WSNE are trying to figure out what the latest rules are reguarding transmitter readings. I am visually impaired and this has been a problem since I've been on the air. I usually have someone else there during the show just for the transmitter. That is all. Unfortunately our remote control can't speak or print out the data. I heard that the FCC was going to pass a law that would make it so that if need be we can go for several hours before taking another reading. If anyone can shed some light on this issue it would be greatly appreciated. Thanks, ---Jed Barton.

Steve...

Greetings from Long Beach Island New Jersey!

When I was a little shaver (1956-57), I'd visit my Grandma in El Dorado. Long before entering broadcasting, I loved hanging out behind the control room glass at KBTO in beautiful Butler County.

It was wonderful, with open reel AMPEX 501s and the smell of warm 1/4" mag.
What ever happened to KBTO? Air staff from 50s?

Any info would be appreciated. It helped form my love of broadcasting...

Thanks in advance.

> why this format needs to exist.

I listened extensively to WWTC last summer when I was in the US. It reminded of the some of the best of UK commercial radio in the seventies - radio that didn't take itself too seriously. Now that so much British (and American) radio is so self important, how can you expect people to learn how to enjoy listening to the medium? One thing the Radio AAHS format does is letting the next generation know that you can have _fun_ listening to the radio, it isn't just an endless cash-free juke box. I 'learnt' how to listen to the radio through shows like Junior Choice on the BBC, programming that doesn't find a home in todays all-format stations.

And I don't see how anyone can _not_ like a station that has both the 'Sesame Street' theme tune and 'Trouble' by Shampoo on its playlist. :-)

Gavin

1987. WKTU, early AOR - Historical Questions

Newsgroup: rec.radio.broadcasting
Date: 1996-02-20 00:00:00 UTC
From: Stefan Daystrom <75300.3331@CompuServe.COM>

> directories from back then...) By 1980, however, they were definitely
> disco.

And by summer 1983, I'd say they'd evolved to a dance-leaning urban. Here's the one WKTU unscoped aircheck I have (and made):

4 Jul 83, WKTU-FM "92 KTU" New York, urban, Rosko, 10:38 am [30m].
Great DJ, good presentation. Rosko interacts rhythmically with the music (in marked contrast to his laid-back announcing style when at WNEW-FM two-plus decades earlier).

> Speaking of old but venerable New York d.j.'s, did any of you
> listen to Scott Muni and Rosko when they did a primitive form of AOR
> back in, let's see, it must have been 1965 or so?

Are you thinking of WOR-FM from fall 1966 on (where they both were at the launch), or someplace else they worked together before that? I wasn't there then <g>, but recently I got an unscoped aircheck from then and here's how I described it in my list:

8 Oct 66, WOR-FM New York, top 40, first day, Scott Muni, 10:34 am (Saturday) [=21m].
Looking back at this now, the laid-back MOR-style presentation seems to forecast Scott's and Rosko's (whose later timeslot is mentioned, plus he's heard here in an ad) future in the soon-to-be-born album rock format.

I dunno if I'd quite call it a primitive form of AOR _music_ wise (they talk a lot about "the hits" and a top 40 survey), but it certainly was heading there _attitude_ wise. The songs on that aircheck: "I Can't Control Myself" (Troggs), "Come On Up" (Troggs), "Black Is Black" (Los Bravos, announced as being #7), "Goin' All The Way" (Squires), "Look Through My Window" (Mamas & Papas), "Johnny Angel" (Shelley Fabares), "If I Were A Carpenter" (Bobby Darin) -- and in a non-contiguous snippet "I Just Don't Know What To Do With Myself" (Dionne Warwick).

Of course, I haven't heard them _past_ their first day, so I can't say what ways they may have changed soon after their debut...

Four Seasons Radio will be launching its popular RSL service 'WSM fM' again this year in style. The sea-side town of Weston-super-Mare will never be the same again after its august launch.

Our aim is to provide the public with up-to date local as well as national information, better music and fast presentation.

As a twenty-four hours a day service, you will able to tune in to the best mix of local, national and world-wide music.

We are also hoping to involve people on the internet with programming, making us one of the first RSL stations to be interactive.

For more information or if you would like to be involved let us know.

1993. Harrisburg, PA Radio Update

Newsgroup: rec.radio.broadcasting
Date: 1996-02-20 00:00:00 UTC
From: "M. Hale" <halem@access.digex.net>
Message-ID: <4gc1a9$mn7@vixen.cso.uiuc.edu>
Source record: 25569

A couple of things from my recent trip to the Harrisburg, PA area:

WRVV (The River 97.3) - AOR/AAA: Afternoon DJ Scott Matthews has left Harrisburg, PA for Dame Media's WRVE in Troy, NY, also a "River" station. The new afternoon voice is Jim Allen. Sounds much like Scott with a little Wolfman Jack mixed in.

WHTF (The Eagle) - Classic Rock: "Solid Rock, Starview 92.7" is gone. Its been replaced by "The Eagle", a mainstream Classic Rock format. Sounds good, although they tend to repeat stuff too often.

WCMB (Hot/Talk 1460) - Hot Talk: Don and Mike are gone. Replaced by some female talk host from CBS whose name I didn't catch. I suspect Don and Mike were somewhat riske for the predoniately conservative Central PA area. However, 1460 continues to carry Liddy and his talk of females, guns, potency, etc, etc. Doesn't seem to make sense.

Fall 1995 arbs are out: 12+ Top 10:
1. WNNK-FM (Top 40)
2. WRKZ-FM (Country)
3. WHP-AM (News/Talk)
4. WTPA-FM (Album Rock)
5. WRVV-FM (AOR/AAA)
6. WWKL-FM (Oldies)
7. WYMJ-FM (AC)
8. WHYL-AM (Adult Standards)
9. WROZ-FM (AC)
10. WQXA-FM (Alternative/Modern Rock)

That's it for now.

See ya-
Mike

Some quick notes on the local scene:
* The mystery of disappearing Spanish-language programming
in Kansas City has been solved. Thanks to KCXL(AM) owner Pete Schartel,
who reports that "Michael G" is playing a mix of Spanish-language hits
and classic tunes at the suburban KC station on Sundays. Last Sunday,
the show was on during the morning.
* The Investigative Listener headed west this weekend to see if any
progress had been made on construction of a new tower for KZTO(FM), once
planned as a Kansas City rimshot on 95.7 MHz. I saw no evidence of
construction. Moreover, a bridge over the Kansas River on Leavenworth
County Route 1, near the proposed KZTO site, is now closed for repairs
until June. KZTO has been off the air for 25 months.
* On the other side of the state, KNJZ(FM) in St. Louis (licensed to
Alton, Illinois) is now KATZ-FM. The call-letter application got caught in the
congressional budgetary tantrum that shut down the FCC and other agencies
late last year.
****
DISCLAIMER: The following contains SPECULATION.
The Jacor purchase of Citicasters, including as it does WDAF(AM) and
KYYS(FM), has me wondering about some things.
Jacor is known for what might be described as an 'in-your-face' style of
management and promotion. That's something you almost never encounter in
Kansas City.
In WDAF, Jacor acquires a rather unusual beast: a full-service country
station. Actually such stations are not so unusual out here on the Great
Plains, but I believe it's the first of its kind for Jacor.
KYYS is rebuilding as a heritage album-rocker that's trying to contend
with the apparent sudden rise of modern rock, lest it become an obsolete
rock station, while facing stiff competition from KQRC(FM).
Of course, Jacor could choose to stay in the market. If it did that, the
best course would be to watch WDAF carefully but not make any sudden moves
with it, while applying intensive effort to curing KYYS' ills.
Or, and I am SPECULATING that this is the more likely outcome: Jacor
could decide to spin off the KC properties.
Face it, Kansas City is a staid market where change comes gradually.
Jacor's style of doing business might not go over well here.
Moreover, there are not a lot of properties up for grabs with which a
duopoly, tripoly, or heptopoly could be formed. (More on that coming up.)
Who might be interested in WDAF and KYYS? More SPECULATION:
* The Milwaukee Journal, whose KQRC is now the king of album rock in KC.
The purchase of KYYS would allow it to reposition KY-102 either to
complement KQRC or take it into a different field of competition
altogether. The Journal also has experience with at least one
news-intensive station (WTMJ in its hometown).

* EZ Communications (KFKF and KBEQ-AM/FM), for whom a purchase of
WDAF would nearly lock up the Kansas City country-music market. What EZ would
do with KYYS would be anyone's guess.
* Bonneville...well, maybe. Acquiring WDAF would give it three of the
city's four best AM signals (KCMO and KMBZ are already in the Bonneville
family), and KYYS attracts an audience somewhat different than
oldies KCMO-FM or soft-rock KLTH. It would be KC's first six-station
combine if that happened.
* Heritage? I don't think this is so likely. WDAF would be its first AM
in the market. However, KYYS, if repositioned, could complement both
70s-rock KCFX and smoooth-jazz KCIY.
****
So who might be up for grabs during duopoly mating season?
Again, more SPECULATION:
* Modern-rock rimshot KISF(FM). There have been rumors about this
station for years, but its signal problems make it a tough sell.
* Silent rimshot KZTO. The new site would give it a good signal in
rich, suburban Johnson County, and maybe a reasonable signal in most of the
Missouri cities in the metro area.
* Classical KXTR(FM). The owner is 77 years old. Unless he cooks up an
arrangement similar to the one that protected WCRB(FM) in Boston,
one would SPECULATE that he is getting plenty of calls from brokers.
* Urban-contemporary KPRS(FM). This one is a maybe; equally likely would
be a decision on its part to acquire other stations to remain
locally-owned, and remain a force among Kansas City's African-American
listeners.
OK, that's enough speculation to get me in trouble for a while.
****
Next week...Houston. Really!

1995. Nashville RadioWatch 2/18/96

Newsgroup: rec.radio.broadcasting
Date: 1996-02-20 00:00:00 UTC
From: mdonegan@edge.net
Message-ID: <4gc1aa$mnc@vixen.cso.uiuc.edu>
Source record: 25571

Longtime Nashville talk-show host Les Jameson has resurfaced on a low power AM station in nearby Franklin, Tennessee. Les recently underwent heart surgery just days after being canned at WLAC. He returns to WIZO for a midday shift....9 to 11.

WSM-FM morning man Karl Shannon will become a race car driver. Shannon says he and country singer John Michael Montgomery are buying a car they will call "the Dimple Special". Karl says he'll drive it and all proceeds will go to chairty.

Fearing they might not get their severance checks, ousted WYHY-FM (hot ac) morning show hosts Danny and Brian were forced to turn down an appearance on rival WKDF-FM's morning show two days after their firing. Big Dave and The Dook were going to have the recently dumped Danny and Brian broadcast live from a dumpster on Valentine's Day. YHY meantime has put a new face on its hot ac format changing its calls and renaming itself The River...no doubt so its new morning show host Proud Mary can have jingles that sing "Rollin'....Rollin'...Rollin' down the River."

The loss of a country station in New York City has been the talk on Music Row. Is it another sign that country music is on a downslide?

No, says former WSM-FM p-d Kevin O'Neal, now at WXTU/Philadelphia. "Mainstream country will work...but in New York City, where not alot of people are country music p1's, you've got to be hip, hot and very well-produced."

1996. Springfield Missouri RadioWatch (2-19-96)

Newsgroup: rec.radio.broadcasting
Date: 1996-02-20 00:00:00 UTC
From: William Pfeiffer <wdp@airwaves.com>

Greetings radio fans:

It has been quite a while since I have reported on the goings on in my little corner of the world, namely Springfield Missouri, the queen city of the Ozarks (no cracks), and surrounding areas. Actually quite a bit has been happening over the past several months. Here are the highlights of what I have been made privy to in this market.

Please note that I welcome other sources of market data for further (and hopefully more frequent) reports, especially (but not limited to) info on the Branson/Tri-lakes area. Also, note that the order in which I report things is random and in no way reflects an attempt to prioritize the relative importance of these findings.

==========

Rock War$

Grunge/COR KTOZ-FM (Channel Z) purchased, in late 1995, the combo of KZBE (B-95/AOR) and KHTO (Hot 106.7/CHR). The influence was felt almost immediately. Among the first orders of business was to 'dismiss' the current GM Curt Boney. The formats of the two stations also underwent some changes. B-95, which is licensed to, and broadcasts from, Pleasant Hope Mo. (about 15 miles to the north) dropped its 'classic hits' format (which it had been doing in one form or another for several years), and began to add a lot of modern rock to its classic library. It now bills itself as "Springfield's Adult Rock Station". The music is pretty standard AOR with about a 60/40 classic/new mix. It doesn't get into the heavy grunge of its triopoly partner KTOZ-FM, but it definitely leans more in the AAA/COR direction than it did prior to the buyout. Whether it is truly any more 'adult' is a matter of dispute. Formatics certainly have improved, but the music mix is still pretty much the standard AOR fare. KZBE is obviously positioning themselves to do battle with heritage rocker KXUS (US97) which has a similar, but more hard-edged, format of classics and new rock.

CHR Rimshot in flux

KHTO, which uses the positioner-calls of KHOT and broadcasts from Mt. Vernon Mo, about 25 miles west, also felt the hand of Channel-Z. They have killed their dance-oriented CHR format (that had made some serious ratings inroads *against* KTOZ-FM) in favor of a more rock-driven CHR format. They still have some dance in the rotation, and they still do the live dance mix shows from a local nightclub on weekends, but the mix definitely leans more AAA/COR than before the acquisition. In addition (shades of a previous thread) the processing has been reset to a much more

aggressive (read: seriously distorted) level. Channel-Z, while formatically innovative and interesting, has the dubious distinction of having the most overdriven and distorted audio in the market, and apparently the same philosophy is now being used at KHTO. Some have wondered if the format change was made to lessen the devastating effects KHTO was having on KTOZ-FM in the ratings... Who knows. I do know that KHTO now has less of an 'identity' than it did under previous owners and there is 'quite a bit' of crossover, musically, between KHTO, KZBE and KTOZ-FM. If I were programming the tribo, I would keep Channel-Z just as it is (perhaps with less audio clipping), keep KHTO programmed as a rhythmic CHR (where it was doing very well) and develop B-95 into a 'true' adult rocker. I see no point in programming all three stations with so much musical crossover that it robs each of its identity.

[Note: Since writing this, the KHTO processing seems to have been relaxed slightly. The sound is still very bright and loud, but the distortion levels have been reduced substantially. The station now sounds much better than it did before the change, but still falls apart on very loud, guitar-oriented music. Thanks to whoever made the changes.]

==========

'My Country' Split

The Triopoly of KGBX (Mix/AC) KGMY-FM/AM (Hot Country) has undergone some changes as well. The AM side of KGMY has split from the simulcast with its FM and gone satellite AS/MOR via the Unistar AM-ONLY feed. Now called 'Memories 1400', the AM is trying to target the audience of 45 to Death, which is now being served by automated AS/MOR KZPD (The Gentle Beat) and, to a lesser extent, by all-volunteer KTOZ-AM (no relation to KTOZ-FM). The jury is still out as to what level of success they will attain, but the signal does sound quite good in AMAX stereo. However, as with most class-D stations (graveyard channels) the nighttime signal suffers from intense co-channel skip as close as 8 miles from the tower, despite the 1kw. of power. Recently KGMY-AM tuned its transmitter and made other improvements that have helped its nighttime (and daytime) signals, but with 300 or more stations on 1400, all using 1kw ND, there isn't a lot that can be done to improve the night signal. Doug Cannon (DC1051@aol.com) is the 'PD' of Memories 1400 and midday talent on KGMY-FM. (Doug posts here on occasion). We wish Doug and Memories 1400 good luck in the new venture.

KGMY-FM (My Country 100.5, Aurora) continues to give long-time market leader KTTS a run for its ratings with a fresh, current-oriented, music-intensive country format. It has recently started playing '20 in a row' (well not actually 'in a row', just between stopsets). This move is in anticipation of a new country player in this already 'country-saturated' market... More later.

KGBX (105.9) continues to do a great job as the market's only true AC, and at the same time is attracting many listeners from 60's Oldies outlet 105.1, KOSP, by adding a great deal of seventies material to its

rotation. KGBX plays songs from the seventies through the nineties and has, IMHO the finest 'sounding' FM signal on the band in this market.

==========

Market Leader Expands.....

KTTS, the long-time leader in Springfield *may* be launching a bid to directly compete with KGMY-FM by adding a second FM signal and programming (you guessed it) Hot Young Country. As of February first, KTTS (Great Empire Broadcasting) has entered into a JSA (Joint Sales Agreement) with KLTQ (96.5 Sparta). KLTQ used to be country, but has been programming a lackluster Light Rock format for a couple years that has been summarily ignored by virtually everybody. KLTQ has a good signal, though, with 50kw. @ 500' from a mountain-top site halfway between Springfield and Branson, thus placing a very hot signal in Branson that rivals only this market's class-C signals. Rumor is that KTTS will buy this signal once de-regulation is fully in place, or at least LMA it and flip it to a hot country format. Such a move will free KTTS-FM (94.7 100kw@1180') to return to a more traditional Great Empire format more closely resembling its current AM. KTTS-FM has had to skew its music in a more contemporary direction with the presence of KGMY in the market. KTTS's core audience has always been a more mature one than KGMY's and by opening up direct competition to KGMY, the KTTS operation can, once again, return to serving that demographic completely. Wonder what will become of its AM station? All News perhaps?

KTTS has held a number 1 rating in 12+ since 1972 under the GM-ship of Curt Brown, a man respected by all in this market. Much of that #1 standing is not, so much, due to the music KTTS plays, but due to its exemplary and ever-present commitment to public service, news and weather information. KTTS maintains a 24 hour news room and is legend in these parts for that commitment. Even those who HATE country music will listen to KTTS during any type of weather problems. Question is, can this market support yet another country format? There are currently 5 country signals that are city-grade in this area with several others that are near-city grade. I would like to see 96.5 go NAC, but that is not likely under Great Empire. Currently, the sound seems brighter (better processing) and the spot load has gone *way* up. I am not sure, but it sounds like the music mix is a little better too, but frankly I have not spend much time listening to 96.5 until this recent development.

Curt... you reading this? Drop me a line and fill me in.

==========

More pop, less jazz...

The flipping of KGMY-AM to Unistar AM Only seems to have made an impact on KZPD (104.1 Ash Grove). Len Smith (Owner) has increased the number of 40's - 60's pop vocals and decreased the amount of big-band and traditional jazz tracks he plays. This happened almost immediately after Memories 1400 went on the air. Knowing Len's love for the Big Bands, I am

sure this hurt him to do. But we all know that radio *is* a business and he must have felt that this would increase his share. KZPD now has 27kw. (up from 3kw.) @ 325' and puts a decent signal into both Springfield and Branson. With the new musical skew, KZPD is sounding like a cross between Memories 1400 and market-leading EZ/AC KTXR. This leaves KTOZ-AM as the market's only reliable source for Big Band music..

==========

Imus in Springfield

Thanks to Meyers Communications, (owner of KTXR and KWTO AM/FM), Imus is now in the market. Ken Meyers brought Imus in on classic rock KWTO (which cannot seem to decide if they want to call themselves 'The Buzzard' or the longstanding positioner 'Rock 99'). KWTO-FM (98.7 100kw. @600') has played a game of formatic musical-chairs over the past couple of years switching between CHR/Alternative/Progressive and now, straight classic rock. Imus came on board in late 1995. It is unknown to me how well his show is doing, but I do know that it is awful nice to hear it in the market.

==========

Real Rimshots...

Marshfield's KMRF-AM (1510Khz Daytimer) was bought last year by St. Louis-based New Life Evangelists (Larry Rice). Under that new ownership, the station has gone from 250 watts non-DA to 1kw.-DA, aimed at Springfield. The new facility sports two 300' towers and is manned by homeless people who are being housed at the church's shelter which is on the same site as the station. The fellow who does the DJing actually lives in the same building as the station. There is a kitchen, bedroom, and in the living room is the control board, transmitter and library. Very interesting setup. The station is 100% live and local, playing mostly southern gospel. Rice and the NLE also own a string of LPTV station in the area that carry. the churches programs. KMRF *is* a commercial station, however. I wonder if the Labor Department which harassed KTOZ-AM last year is talking to KMRF about the volunteer staff?!?!?!

==========

Mel's Musical Chairs..

Bolivar Missouri - Boliver's KYOO AM/FM and Buffalo's KBFL-FM have switched again. A short history.... Mel Pulley (owner of all three stations) used to own the 105.9 signal, now known as KGBX, which was sold to the Springfield owners some time back and moved to a new site, leaving Pulley with only a 1kw. daytimer on 1200 and a CP for a class-A FM on 93.1. Problem is that there was another class-A CP on 92.9 in Ozark, just south of Springfield. Well to make a long story shorter, Pulley (who is involved in the Branson Music Network) managed to get a CP for a C3 FM at 99.1, gave up his class A at 93.1 and Branson Music Network built a class-C2 on 92.9 in Ozark.

Pulley built the 99.1 signal, which broadcasts from a site considerably north of Bolivar (so far north that even in Bolivar, the signal is less than city grade and drops off very fast moving south toward Springfield) and flipped both the AM and the new FM from Jones Satellite Country to Jones AC, and called the stations 'Cool FM'. At the same time, the 99.9 signal in Buffalo (class-A) was flipped from Jones Oldies to Branson Music Network.

Well last month or so, the AC format on KYOO A/F was killed and the stations are now both back to Jones Satellite Country and the Buffalo signal is back to Jones Oldies.. Go figure. Bolivar is about 30 miles north of Springfield and Buffalo is just east of Boliver.

==========

Talk about saturation...

Branson Music Network, the Branson-based country music satellite service is now heard on 3 signals in the Springfield/Branson area.

92.9 (Ozark) Springfield AND Branson 50kw. @ 500'

107.9 (Lebanon) Spfld to Lakes Of The Ozarks 50kw. @ 500' DA

104.3 (Marshal Ar) Branson and south 100kw. @ 900'

Other than the evening program, hosted by a British Talent named Rick Player, this service is pretty lackluster, calling itself 'Your Brand Of Country' and playing a very forgettable mix of traditional country and some currents. In a market like Springfield, with such high quality players as KTTS and KGMY, it is no wonder that this network has never even made it to the rating books. Most people I talk to, other than broadcasters, don't even know that the signal exists! B.M.N. needs to get an identity, and work it. Right now Player is their only drawing card and even he gets old after a while.

==========

-From Barney to Branson:

Former children's station KIDS (1340 1kw. ND) which was taken dark by its owner last year after operations manager Hershel Hartford left the station, has finally been sold and is back on the air. KIDS now calls itself 'Branson Information Radio' and broadcasts an hour loop of Branson tourism info, commercials for certain attractions and a smattering of marginally entertaining comedy and Branson Lore'. The comedy is provided by Walter Brennan sound-alike who calls himself "Miltom Crabapple". Usually they only play a couple minutes at a time.

All major routes into Branson are littered with billboards urging travelers to tune in for "Official Branson Information". One of their slogans (where have we heard this before?) is "You give us one hour and we'll give you Branson".

The station is operated off of a hard drive which can be updated via modem from its Branson home office. However, there seems to be less than a vigilant effort to keep things current. It is now February 19th and they still have announcements for "The Ozark Christmas", including dates for events in November.... Also, last month there were several announcements for shops selling 'for the holidays'. The station is unattended and its building makes no mention of its current format. Even during the day the signal barely reaches Branson, and at night it barely gets out of Springfield. However the owners are hoping to attract vacationers as they travel past Springfield to get to Branson. There is an 'audio coupon' program that urges listeners to tell all businesses they patronize the following pass-phrase.. "I had fun with Branson Information Radio" for discounts and such.

No word on how successful the operation is, but I would imagine that they might do well with the concept, although it needs work. If I were them, I would consider applying for a transfer of license, or inquire about some sort of synchronous booster station in the Branson area. It is all well and good to attract listeners coming into town, but I would imagine that being able to reach them IN town would be even more attractive to advertisers who, then, would be able to tune in and see what they were buying.

Interesting thing is that a couple of years ago this author had the idea of using otherwise useless AM signals in tourist areas as 'information services' that advertised local events and attractions. Once again, I seem to have been ahead of my time <g>.

==========

That's it for now from the Queen City of the Ozarks. I welcome additions, corrections and more in-depth information. Please email me at wdp@airwaves.com.

BIG CUTS AT KMOX INCREASE
PROFITS IN A BIG WAY

by Scott Simon

ST. LOUIS --- When it is added up, the layoff last week by KMOX radio affected
many people, such as Randy Karraker and John Cooper in sports, Darryl Lloyd and Kevin
Killeen in news, and several off-air personnel.

But the addition represents an approximate 8 to 9 percent increase in KMOX's
projected pre-tax profit for calendar year 1996.

That's the survey of St. Louis broadcasters and financial analysts who took the
weekend to review this unusual move for the "Voice of St. Louis."

Estimated revenue of $18 million dollars in 1995 for KMOX produced a profit of
$6 million according to the non-survey made by observers. The layoffs represented a
savings to the station of about $525,000, which includes salary, benefits, and other
associated costs related to the employment of those individuals.

Not included are the cuts of several per diem talents in the past two months,
such as Gordon Curry, Tripp Frohlichstein, Dave Finkelstein, Harriet Woods, and Vince
Schoemehl. When news reporter Margie Manning left last summer to join the St. Louis
Business Journal, her position was eliminated by attrition.

It won't stop here. Although negotiations have been temporarily stopped in
negotiations between the American Federation and Television and Radio Artists and the
station, when they resume, the station will ask for takebacks. If, and when, a settlement is
reached, KMOX will be a lean, mean, profitable machine for Group W, the new owner of
CBS and KMOX.

Were the cuts a bad move? Analysts at Edward Jones and A.G.
Edwards
recommend a conservative buy of Group W stock and carefully monitor it
through the
year. They say that chances are good there will be a moderate return on
investment.

More profitability could spur Group W to reinvest those profits
into KMOX in
ways we can't see right now. Many critics say it won't happen --
they're the same critics
who said that KMOX would never make the layoffs we witnessed last week.

2000. ATTN ALUMNI: ACRN's 25th Anniversary!!

Newsgroup: rec.radio.broadcasting
Date: 1996-02-20 00:00:00 UTC
From: jodin@apk.net
Message-ID: <4gc1ad$mnh@vixen.cso.uiuc.edu>
Source record: 25576

Just a pre-press release note to any alumni out there (we know there are plenty) from 99.3 CaFM ACRN at Ohio University - the 25th anniversary is on it's way!!

the little station that could has made it to 25, and is better than ever. If you haven't been back down to OU in a while, here's a reason. The oldest Cable FM station in america (and one of the oldest FM stations) is throwing a birthday party.

Tentative dates are the weekend of April 26th and 27th. We encourage all alumni to come down for the weekend. A dinner reception and concert are planned, as well as all kinds of reminiscing and fun with other "Rock Lobsters".

Contact acrn@oak.cats.ohiou.edu for more info or me (but i'm just a recent grad). Official invites should be on their way for all registered alumni. If you wish to be on the mailing list or know a ACRN alum that might not be, either email or call 614.593.2276.

THIS IS THE BIGGEST EVENT IN THE HISTORY OF ACRN (until we turn 50 :-0) SO DON'T MISS IT!

acrn@oak.cats.ohiou.edu

The pay scale varies enormously depending upon the station...

In Baltimore, for example, WCBM pays around $10 an hour... but you could get about $20 per hour at WWMX for part-time work.

In DC, I think, depending upon whether it's a union shop or not, you get about $17 to $20 per hour.

Hope this helps a little.

Date: 1996-02-20 00:00:00 UTC
From: skcaldwell@aol.com
Message-ID: <4gc1ag$mnm@vixen.cso.uiuc.edu>
Source record: 25579

Your comments on bit-rate reduction are interesting. Working for a broadcaster in Philadelphia, we were testing bit rate problems with different mini-disc units and found a couple things.

For music or voice, you still could not tell much of a difference between the first generation on the MD and the TENTH generation. That was a surprise to us. I realize there can be problems with multiple stages and types of bit rate reduction in any chain.

What have other users found in terms of real world sound quality?

2004. Bob Crane Airchecks Sought

TA>on two different stations are creaming Liddy, and Limbaugh
TA>in early afternoons has fallen off his perch and is looking up
TA>at four local shows in various formats with higher AQH and
TA>better demos.

Bob,
All that means is that those particular shows are losing audience after very successful runs. In his heyday Limbaugh creamed almost everyone. The change in his style from entertainer to Republican spokesman is more likely to be the cause of eroding numbers. Liddy is a one-trick pony. How long could we expect the G-Man personna to last without freshening it? We're beginning to see political talk wane across the country. Just wait until all the political ads kick in and we have negative political ads, negative political talk and negative political news. Listeners will be so tired of it by election time that they'll accept anything non-political that gives them a breather.

I'm affiliating Dr. Joy Browne, The Dolans and Joey Reynolds faster than ever before. Laura Schlessinger is on a roll. All are non-political, entertaining alternatives. In many cases they're replacing political talk in prime dayparts.

Good programming is what's important, not where it comes from.

WWV P.C. CLOCK CARD
HELP -- Several years ago a company in silicon valley produced a clock card for PCs. It consisted of a WWV receiver on 10 mhz which decoded the WWV data stream and created a super accurate clock. It would "fly wheel" during fade times. The unit was sold to several users of the Pristine MMCS music manager automation system. Unfortunately the company has gone dark and no distributor carried the units. If anyone has one of these clock cards please email or call (602)413-3823. We sure could use one of these units for our on-air controller. Thanks Rich Potyka CE KRXS-FM

This from Ron Krause:

<<>If anyone has the lyrics to "IF YOU LOVED ME" by Tracy Lawrence, I
>would greatly appreciate them. This song is so true about a relationship

>I'm in. but I don't have all the words.
>
>Thanks in advance.
>
>Charlene

Tell me something. What other music genre prompts requests like the
above?>>

I check into the alt.rock-n-roll.oldies group fairly often, and I always
find new requests for song lyrics. There is even a newsgroup dedicated
exclusively to this: alt.music.lyrics (very few requests for country
lyrics, by the way).

Don't think for a minute that something like this makes C&W special; it
doesn't.

>Tell me something. What other music genre prompts requests like the
>above? The answer, I believe, is NONE of the others do.

I don't mean to disrespect your situation wrt the loss of WYNY,
but in my experience, just about every music genre prompts requests
like the above.

>No, country isn't in decline. For some of us, it's becoming a bigger
>part of our lives every day.

Since I think this is a response in part to something I wrote earlier,
I should clarify myself. I have read in some music and radio trade
publications that HNC (hot new country) has peaked, and that some
people feel it is going to decline. A complaint is that there are
too many new artists being pushed into the market to keep up with.
Another complaint is that HNC itself is splitting up into narrower
formats. Given this, plus WYNY's (relatively) low ratings, from a
business standpoint, it's understandable why they switched to a format
that has a better chance of getting good ratings in NYC.

However, this doesn't mean that country music is going away, nor does
it mean that it's losing any of its fan base.

Bill,

What we expect to gain is ANOTHER station that will embrace the Country genre. I know all about business decisions also, and, that's why the posters for this upcoming rally contain the incentive "now we're done complaining! It's Time For ACTION!"

There are over a million of us out here, Bill, and, we are seeking to show our support for Country so that someone who was ranked lower than 20 in the

NY market of 60 stations might think about moving UP in the ratings. That sounds like decent business to me.

The media coverage is not intended to alter Evergreen's business decision. It's intended to show this area that we Country Music listeners are here just waiting for someone to take advantage of our demand. We're simply looking for the supply part of the economic equation.

Thanks for your comments, and, as for the Governor, this isn't a political issue. It's about life having been altered for those of us who have been impacted by the wonderful effects Country has had in our own everyday lives. If you've ever lost something or someone that you love, then you know how the emptiness feels inside each of us.

That's what drives us, Bill. Life.

Correct me if I'm wrong, but what about Z95? They're probably the closest to top-40 radio if I remember correctly...might've changed, but I'm not sure.
Besides, don't radio stations have the right to change format without checking with the CRTC?

Ed... I've explained this to you before.... The market just isn't large enough. Z95.3FM tried it once before and our cume was about half what it is now. If there was a market for Dance don't you think one of the applicant's for the new FM license in Vancouver would have tried it? Well, no one did. Instead we have an application for a modern rock station, when there are already 2 1/2 stations playing rock in Vancouver. (CFOX CFMI and Z counts as 1/2). The audience is a) too young and b) not there.

Don't get me wrong, though. I love the music and, as a listener, I would like to see a more rhythm based CHR on the air as opposed to more big hair rock, but I just don't think there's the potential for success.

catch the buzz... pass it on.

The GE Superadio is definately worth owning. It gets better reception than one of those $200 Sony "no fade radios" any day on my SUPERADIO with a Radio Shack Archer Amplified antenna, I can routinely pick up FM stations from 200 miles away if the conditions are right. Once, I even picked up KIOAFM out of Des Moines on the radio. I can routinely pick up stations 100 miles away as if they were next door. In short, no radio enthusiast is complete without a SUPERRADIO.

From: Gavin <gr@coventry.ac.uk>
Message-ID: <4gc1ar$mob@vixen.cso.uiuc.edu>
Source record: 25598

On 17 Feb 1996 robert573@dallas.email.net wrote:

> 1. Does ISDN work on fiber optic or copper cable?

Either; it just uses standard telephone technology. Here in the UK, many installations just use a standard copper pair for the local loop, although there is a restriction on the distance this carries digital traffic. The trunk part of the system uses whatever technology standard phone systems are using.

> 2. If a station uses ISDN lines to broadcast from a
> remote location (example, sports remotes) and they
> use an ISDN system, how does it work?

You could write a whole book on this, but basically the set up is this: The main output from whatever audio gear you are using at the remote (backpack tx/rx, three channel mixer, 24 channel remote van, etc) is fed into an Analogue to Digital converter (or codec, ie coder/decoder) which converts the audio into a digital signal. The studio dials up the remote location on an ISDN line equipped with a similar codec. The digits travel through the phone network, get converted back to audio at the studio and can then be used like any other source.

The studio sends the remote a clean feed (mix minus, or whatever else you like to call it) which is basically everything in the programme _except_ the remote. Because of the coding used, ISDN introduces a very perceptible delay in the audio, which is doubled if it is fed back to the remote site, causing serious problems if it's fed to the person on-air.

> 3. Will ISDN eventually replace our current analog
> telephone system as we know it, and if so, when?
> What kind of an impact would ISDN have on data
> transmission, such as computer modems?

ISDN may well replace analogue phones eventually, but not in the very near future. Here in the UK, ISDN lines and call charges are virtually exactly the same as analogue charges, but the actual telephone instruments themselves are many times more expensive. ISDN lines are already having a much greater impact on data transmission; many companies use them as a fairly cheap back-up for leased line data networks.

> 4. Would using ISDN for remote broadcasts be easier
> and more affordable vs. using a "cable" system?
> (example, a station wants to cover sports events
> from a number of local stadiums and gyms.
> The station considers wiring a cable from every
> stadium or gym where the event will occur, and

> run these cables back to the station. Would
> it be cheaper and less complex to use ISDN rather
> than wiring a cable from every single stadium or
> gym?)

Yes it's almost certainly cheaper, _but_ it's not so reliable. Because ISDN is carried over the public telephone network, there is a chance that it might fail in the middle of a broadcast, resulting in some embarrasing dead air. But if the broadcaster pays for a cable, it's his as long as he keeps paying for it and it's permanent nature means that faults during a programme are less likely. Many local stations in the UK use ISDN for full remote broadcasts, but national programmes tend to use cabled systems.

> 5. How reliable is ISDN? Does it have a good, flat
> frequency response range? Does it fail easily
> or is it a trustworthy system?

Frequency response, etc is a function of the codec you use. ISDN itself is as reliable as the public telephone network ie probably about 99.9 per cent or so. It has rapidly moved in the past three years from the cutting edge of new technology to something almost every broadcaster in the UK uses daily, although there can be compatability problems if you don't have exactly the same codec at each end. Also, American ISDN uses a 56k bit rate, whereas other countries use 64k which can be a problem.

Obviously, all the above is very much simplified, but I hope it answers the main points.

the days off. The is no mention of why she was gone on the WABC
forum, and the program director did not discuss it either.

>She also said repeatedly, "We don't discuss any other ABC hosts on
>this show any more". Some callers even asked why she had been
>suspended, only to be cut off.

None of the hosts will discuss each other, and there was a time when
Jay and Lynn would bash each other and Bob would be all over her and
Koch, and as a long time listener to the station, it was starting to
get old.

The station could stand some changes, Lynn should get her walking
papers back to WBAI, the Saturday line up after James & Joel should
be trashed, Bernie Ward and the totally lame Armstrong Williams do
zero for the station.

We could also stand to lose Sunday nights, and there should be some
alternate hosts available so Curtis can go home and not fill-in on
every third program.

My two cents on the station today.

STEVE MOORE & DAN STRAUSS SHOW OUT AT KSD
It appears that my previous reporting was wrong, on Monday, Dr. Laura Schlesinger(excuse the spelling) moves from being on tape delay on WIBV, to being live 1 to 4 on KSD. Moore wants to concentrate more on his PD duties at KSD, while Dan Strauss will play a larger role on Frank O. Pinion's Large Morning Show. No word on what the replacement program for Dr. Laura will be on WIBV, probably a return of Bruce Williams Talknet program from the inaudible signals of WBGZ in Alton. Meanwhile, at EZ, KSD/KYKY GM Karen Caroll says that EZ is looking to aquire more properties in the Saint Louis area. In my scope, I might look for EZ to make a move at aquiring KMOX/ KLOU, giving EZ control of the two best signals in the area.

This is a perplexing question for me.

If broadcasters cannot make money in todays climate to the point where they *must* have 3, 4 or even 8 stations to be 'viable', where are the mega-millions of dollars coming from?

I mean if broadcasting companies are so strapped for cash and in such a poor financial state that they *have to* acquire tribos or even quadro's just to stay afloat, then how can they afford the ridiculously inflated prices for anything with a transmitter an a tower?

If they have the tens of millions or more, why not just funnel that into their properties? I (and most of us here) know the answer, but nobody wants to talk about it because everyone's ass is on the line. If you care to enlighten me, please do.

For ten years I've been the morning news guy on an FM in Portland, and while I love the job I think it's killing me. For the second time in ten years I'm deathly ill, with pneumonia, and I'm wondering if anyone has figured out a sleep schedule that enables you to do this shift long term without dropping dead, or worse, leaving the biz. My habit is as follows: Up at 3:30, work from 4 to noon, nap from 1 to 3, dinner at 7, sleep from 9:30 (or 10) till 3:30, and go back jack and do it again. Seems to work on a day to day basis, and maybe my illness is a result of some 18 hour days put in during our recent floods, but that shouldn't be a knockout punch. Are there any morning drive people with similar experiences or ideas??
John Erickson

2030. Thoughts on all-news and talk radio

Newsgroup: rec.radio.broadcasting
Date: 1996-02-22 00:00:00 UTC
From: Lori_Stein@nt.com
Message-ID: <4ghqlv$1ba@vixen.cso.uiuc.edu>
Source record: 25406

Recently there's been some speculation in this usenet group about (1) the future of all-news programming in general, and (2) an all-news FM station possibly coming to Dallas. As an avid talk-radio listener-cum-baby boomer, I'd like to add my two cents to the conversation. Specifically:

1. I think that the only way all-news radio might *have* a future is if it can establish a reputation as being one of the few available sources of in-depth, reliable news coverage. Unfortunately, as I see it, both radio and tv today seem bent on providing "sound-bite" news only, with little substance or context to help the audience draw meaningful conclusions about anything....

I call it "Who cares!" radio. No future there, I think.

2. Better than all-news radio, I believe, is news-features-talk. (Yes, this does sound rather like NPR on a good day.) I think stations interested in the continued well-being of news radio should examine NPR's "feature" format, as used in All Things Considered or Weekend Edition. I'd like to see longer segments of news, exploring various topics. Think of it as a sort of "60 Minutes" of the airwaves. In addition to summary news on the hour, a mixture of political reporting, human interest stories, and exploration of the arts and sciences. (I suspect this format, while more appealing to listeners, might not fly so well with advertisers. Oh well, can't help you there.)

Couple this with a few articulate, savvy call-in talk shows, and I think you'd have something viable.

3. Should news and/or talk radio take on the challenge of FM? I for one think the time has come. Fact is, I've met a couple of people --under 30--who have never set their radios to the AM band. (NO, I'M NOT MAKING THIS UP!) There's a huge population of young Americans who are only vaguely aware that other bands exist besides FM. How do you reach this audience if you're not on their wavelength, literally?

4. And just how do you make news-talk palatable to an FM audience, given the numbers of young people listening? I think, in addition to providing more interesting, in-depth coverage of selected news stories, the FM station must carefully cultivate its talk lineup.Keep in mind that younger listeners may *need* to be informed, but they *want* to be entertained. (A sad commentary, perhaps, but I'll leave that discussion for another usenet group.)

Having said that--now, laugh if you will--I think that the Howard Stern show would fit this type of FM news/talk format well. It's entertaining

--well, when it's not being grossly disgusting, of course--and manages to have some informational value, too, thanks in large part to Robin Quivers. My guess is that if you could hook listeners with Stern, *and* you provided solid news coverage, interesting feature stories, and a few other sharp radio personalities, your news/talk station could do well in the FM market.

Three suggestions...

First, I'm out of the news biz now, but based on what I've been reading I would first check with Avid. They specialize in digital, non-linear editing products, and they recently bought BASYS Automation Systems, who specialize in newsroom computer systems.

Avid Technology, Inc.
One Metropolitan Park W.
Tewksbury, MA 01876

Phone: (800) 949-AVID or (508) 640-6789
Fax: (508) 851-0418

I have worked with NewStar, but only with their old mainframe ENR systems. They did give excellent support service.

Dynatech NewStar
6400 Enterprise Land, Suite 200
Madison, Wis. 53719

Phone: (608) 274-8686
Fax: (608) 273-5876

Check also with Comprompter. Their PC-based system worked great for our 30-terminal staff with CBN News in Virginia Beach & DC.

Comprompter, Inc.
1707 Main St., Suite 113
La Crosse, Wis. 54601

Phone: (608) 785-7766
Fax: (608) 784-5013

Good luck!

George Carden
CCM Communications
Nashville, TN

RADIO LAND!!!!!
I have recently gained the opportunity to produce a series of radio plays over a local station in Reno, Nv. Some people might say that radio plays are out dated but such comments are rather narrowminded, blind, unrealistic, and not to mention, unheard of. The sound medium possess a quality which places the listener in a world painted by their own imagination. With today's technology and your talent, this rare opportunity can become a very beneficial experience and possibly very rewarding.
Therefore, I am in need of persons with:
-Acting Experience
-Musical Talent
-Playwrighting Experience &
-Technical Skills (digital editing)
Thank You.

Dr. Don Rose has retired (due to health reasons, I think) and is living somewhere in the Phoenix, Arizona area. He was a speaker at the "Legends of Radio" panel at the recent Gavin Seminar in Atlanta, which I attended. One of the nicest guys you'd ever want to meet. And I did <grin>

Dr. Don retired in less than excellent health.
The present morning program on KFRC is quite listenable, he said in all
due modesty.

Many of us received a rare treat as Dr. Don Rose was in Atlanta for the Gavin Convention a couple of weeks back. He spoke on a "Legends Of Radio" panel. Don has not been on the air for a number of years (I believe he said he retired in 88 or 89) and is enjoying quality time with his family. A true gentleman, and a superstar when speaking of morning talent!

>until maybe 1989 or 1990.

Though I was neither in Sacramento or with KFBK at the time, I believe Rush went national in the spring or summer of 1988. He was on the air on KFBK between 1984 and 1988, and I believe he did a couple of weeks of shows for KFBK from New York City before flipping the "EIB Network" on.

Incidentally, I believe Rush was either the direct or indirect KFBK replacement for the aforementioned Mr. Downey.

Source record: 25419

Howard Stern debuted Tuesday morning on 105.7 The Edge (WQXA FM) to an audience that had been anticipating his show for weeks. Previously listeners in the area had to rely on poor reception from 94 WYSP in Philadelphia, the closest station carrying the Stern show. Interestingly the Lancaster area, which is covered by WQXA, is considered a very conservative market. Stern's brand of humor, his "shock jock" image makes him an unlikely candidate for these airwaves. I will keep you informed of developments, which are likely to intensify in the coming days, as conservative opponents launch attacks on his show.

2044. Re: Tight Directional Patterns KMPL Sikeston, MO 1520

Speaking of large arrays, I worked on an 8-tower array in Sikeston, MO yes thats right Sikeston, MO. Its in the bootheel of this forboden part of the country and during the summer it sucks to tune!
Anyway, its 6 towers in line for the night pattern, it boasts 500 watts on 1520. On the day pattern it uses towers 3-4 middle of the six towers with 5000 watts, it used to have a critical pattern but was changed to simplfy the situation.
Its an amazing array at dusk, with sun behind it, quite impressive.
Also whats weird is the Madrid fault line runs perpendicular to the array, tower one sits about 20' lower than the rest of the array.
Right now the owner has not taken care of the site and weeds and large trees grow through the array, great capataince when it rains, throws the array out of wack, we had to rebrze all the radials this past summer, fun for the welder, 120 radials times 8 towers and grounding straps! It was a hot time for him!
I dont want this to drag so I will wrap it up but I know whats it like to work on monster array's. Its a challenge but now I have the AM bug. Love to work on them!

2050. Paul W. Smith to be J.P.'s replacement at WJR

Newsgroup: rec.radio.broadcasting
Date: 1996-02-22 00:00:00 UTC
From: "Michael R. Lewis" <lewismik@metronet.lib.mi.us>
Message-ID: <4ghqln$1aq@vixen.cso.uiuc.edu>
Source record: 25451

Reply-To: "Michael R. Lewis" <lewismik@metronet.lib.mi.us>

The day after Warren Pierce did a most exceptional job of fill-in hosting the morning program at WJR 760 Detroit, the station announced that Paul W. Smith will be the permanent replacement for the late-J.P. McCarthy. McCarthy died of a blood disorder last summer after a 30+ year stint as the morning host of the clear channel AM.

Speculation had been furious that Dick Purtan of WKQI 95.5FM would get the position, as the station was making major departures from its past stature and image with the recent additions of long-time rock-jock Ken Calvert and sports writer Mitch Albom to their daytime lineup.

Adding to the speculation that Purtan might be the chosen one, was his recent court battles to be released from his contract at WKQI. The station has been sold and swapped-out several times during his tenure at the station and a couple times during the term of his current contract. Purtan, himself, was also a one-time owner of the station.

Further speculation and even an endorsement of his talents from the Mayor of Detroit, Dennis Archer, would have led listeners to believe yesterday, that Warren Pierce would be the one to get the position. Pierce worked at WJR for 18 years until 2 1/2 years ago when he was let go without any obvious reason. This puzzled Pierce at the time. Although outsiders saw that there was decline in the quality of programming that WJR was intending to offer. Staff was being cut on a variety of fronts. Pierce had done middays at WJR and was the fill-in frequently for McCarthy during those years. He was considered by many to be the heir apparent to the morning program, should J.P. ever retire. Pierce has a long history in Detroit radio, going back to the late 60's. He is also a native Detroiter.

Archer was hosted by Pierce in a weekly "Ask the Mayor" segment and poured accolades on Pierce, in part due to another recent and questionable firing that Pierce suffered at WJBK-TV2 Detroit.

All of this adds to the surprise of the announcement of Paul W. Smith as the morning host. Smith currently does mornings at a WWDB in Philadelphia and does the midday "Focus" program on WJR via a link from that station. Smith has worked at WJR since 1982, on and off. At times while holding down fulltime shifts at stations in Toledo, Ohio. Smith hails from the Michigan-Ohio border area around Lambertville, according to Joel Alexander, WJR's Traffic Copter reporter. Alexander had been doing afternoon-drive until the hiring of Mitch Albom, the Detroit Free Press sports writer. Albom broke ranks with his union (which is one of several that have been on strike against the JOA'd Detroit newspapers since mid-July, 1995) and returned to writing for that newspaper.

Alexander's traffic reports are carried mornings on WJR and WXYZ-TV7 during their morning news block.

No mention was made as to the future plans for Jim Barrett, who has been the fill-in since the day that J.P. left with his illness. Barrett is also the Promotion director at the WJR.

Announced on WJR News: WJR's GM-Mike Feezy says that no starting date has been set for Paul W. Smith as morning host.

Charles Hobbs wrote the quoted material below:

" I was listening to KFRE's new all news format today. It seems to be mostly
" AP network news, with a few local programs here and there. . .

Another giant falls. KFRE packs a tremendous signal from Fresno up and
down the Coast. I used to listen in the days of country music when people
like Pat Kelly used to DJ there. Things like the fruit frost reports, the
highway closings, and other Central Valley-related info gave me a feeling
of comfort. Live local DJs gave KFRE a personality. In fact, if it
weren't for KFRE I wouldn't have visited Fresno -- I had wanted to see the
town I'd heard so much about.

Wjdm, the New York City area radio aahs outlet does do local weather drop-ins. I can only hear them at night, but they seem to be there regularly, at least once an hour.

Radio AAHS comes i pretty good here in Ohio...and after listening a while, it is a refreshing format. I didn't think I would like kids radio, but its the only thing that sounds different on the dial.

A welcome change from depressing, downbeat, over-consulted and focus grouped adult radio.

2054. Layoffs-bad for radio, costing audience

Newsgroup: rec.radio.broadcasting
Date: 1996-02-22 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <4ghqlq$1b0@vixen.cso.uiuc.edu>
Source record: 25455

Looking at the layoffs at even extremely profitable
stations like KMOX, I worry about the business as a whole.
When you trim back people whose contributions are im-
mediate, tangible and audible to the listener, what you
do, quite simply, is cut the quality of the on-air product in
ways that listeners can pick up immediately. This hurts
the entire business, and not just in the area of quality, but
also right in the wallet.
Why? Look beneath the usual stories about AQH share
that we discuss in every Arbitron. You will find that sta-
tions which cut back on local programming and local ser-
vice enjoy a temporary profit bounce, but a longer-term
loss in share and eventually in revenue. But it gets worse.
As more and more stations cut costs, trimming first news
and later entertainment programming and depending more
on satellite, a very important but little-reported phenom-
enon is happening. The total number of people listening to
ALL radio stations in most top-50 markets is shrinking,
even as almost all of them are growing in 12+ population.
Factor in the growth in listening to non-commercial sta-
tions in most markets and you see that the audience for
commercial radio has fallen still faster. This is bad news.
It means less total advertiser dollars for ALL radio sta-
tions to share, and inevitably less revenue for even the
most successful in holding their audience. In my own mar-
ket, we're seeing a 2 to 5 percent drop in total radio lis-
tenership in each key demo over the last five years, worse
if you factor out the cume and AQH growth of the non-com-
mercial public stations, even though all the demos have
grown in size...that means large numbers of people are now
finding NOTHING worth listening to, and turning off the radio
completely in favor of their CDs and cassettes, their books,
their computers or their TV. (And don't forget direct digital
satellites are around the corner...if you're canned for a lot
of your day, your audience will have no reason AT ALL to
prefer you over such services.) And the lost listeners are more
likely to be upscale, better educated and more prosperous---
just the demos we want.
If we keep diluting the quality of the product just
to throw a few more dollars on the bottom line, we are sure
to end up accelerating this trend. We will cause a lot of the
people we hope will be our future core audience, to reject
radio completely as having little or nothing to offer them.
It is already happening. If we let it go on much longer, we will

be marginalizing ourselves as a medium, and a business, in a way that competition from film and television never could. What I fear most, is that once that audience is gone---is there ANY way we can ever get them back? The answer is NO, unless we re-invest in the quality of the product we are offering NOW. Five years from now, when we're reaching 20 or 25 percent fewer people, the younger demos are missing completely, and the direct digital satellite services are up and running, will be too late.
Station managers, think twice before you blow out your air staff and hook up the satellite. Ask yourself this...am I saving a little money now, but throwing away the main reason I gave people for turning on my station instead of the CD deck or cassette? And will that come to haunt me very soon when advertisers decide I can't reach their target customers any more? The numbers indicate this has already started to happen, and that total revenues in many markets are frozen or declining. Why are station managers continuing to do the one thing that's going to cost them even more listeners, and soon afterward, more revenue?

the local music show in Syracuse is on WAQX not K rock as was written. the show hosted by Dave Frissina has been on for many years and plays nothing but local music every sunday... thanks

Thanks for the correction. I visit the Syracuse area periodically and I try to get in as much listening as I can. But sometimes I tend to forget exactly where I heard something. The last time I heard the local show, it tended toward "metal" which I usually associate with K-Rock.

What I hear is that you should read the clause and do not sign it if seems unreasonable. Don't be afraid to negotiate. If they say you can't work in the market for a year after you leave. Come back and say "How about three months?" You might also say, "I'll agree to a 6 month non-compete but only if you can get me $10,000 more...and if YOU fire me...the non-compete is no longer binding."

If you have trouple understanding the deal, if this is a big money gig, it might be worth it to get an attorney to help you out (shop around).

Also, don't forget that you're usually dealing with a salesman...and salesmen love to negotiate...and want very much to get the deal DONE. It may be to your advantage to politely slow things down if they are not going your way.

>
>What I'd like to know is:
>
>-Are no-compete clauses legal and binding?
From personal experience I know that; in Texas, they are not binding. Texas has a "right to work" law that would defeat it. My attorney advised me that this contract could be overcome even without this law. This is not to say that you won't be sued anyway. Anyone can sue anyone else for almost any reason and the only winners are the lawyers!

>-Can a station restrict you from working in other markets if they don't use you in those markets?
Highly unlikely. Aside from salary, how do they plan to compensate you for signing such a contract? Without compensation this is a very one-sided contract.

>-Can a station restrict you from not-going to a competing station in the same market once you quit/leave/get fired from a station?
Why would they even want to... unless you are Howard Stern!

>I'm also curious to hear about other experiences you have had (or heard about) with no-compete clauses in the radio 'biz.

These contracts are more of a scare-tactic than anything. If you are not compensated handsomelly for signing it, it is almost useless! I was warned by the station I left not to work in the market... I did anyway. They harassed me with several phone calls over a month or so threatening legal action. It never happened! I had to set my ego aside and ask "how much am I really worth to that station"? Is it worth thier time and money in a lawsuit to keep me off a competing station? The answer was a big NO! Your situation may be different. If you become exremely successful and start pulling down some BIG numbers... start worrying! Otherwise, I would sign it and not give another thought.

David A. Kaye wrote the quoted material below:

" " -Can a station restrict you from not-going to a competing station in the same
" " market once you quit/leave/get fired from a station?

I should clarify myself on what I said earlier. Yes, they can hold you to a contract if you quit a station, but the contract has to be reasonable. They can't prevent you from earning a living, but if you were compensated for the exclusivity clause (such as higher pay than someone who didn't have such a clause), I don't see how there's much way to fight it, unless they did something unreasonable and prevented you from working over a large territory, such as statewide.

Otherwise, if you are fired or laid off from a station, it's unlikely they'd be able to get a non-compete to stick.

I've signed 3 non-compete clauses in businesses I've sold; while not the same thing, these are similar. I was prevented from engaging in the same business within X number of miles of the business I sold. In each case the dollar value of the non-compete clause was spelled out. In one instance, not only could I not engage in the same business, but I couldn't work for a company doing business in the same city. Again, the value of this non-compete was spelled out.

A word of advice to the gentleman contemplating a
contract with a non-compete clause...
In NY State (where I've seen a number of broadcasters'
careers affected by them, and I've signed one or two my-
self) it depends on the terms of the clause as to whether
it will be enforced. If the clear intent is simply to stop
you from jumping to the competition mid-contract, it's
definitely enforceable, and frankly, it should be. As long as
a deal is reasonable, it SHOULD be enforceable. But in prac-
tice there are some limits. If they fire you, they cannot pre-
vent you from finding work in your field right away unless
they compensate you for it by paying you full salary for
the duration...otherwise you'll be declared a free agent.
And they will also have a difficult time enforcing any clause
preventing you from doing something that is clearly non-
competitive, like voiceovers for another market outside
your home station's signal range, or work in another medium
entirely (like TV, video, film, multimedia or a print column).
They could conceivably limit your outside work to endeavors
that won't reflect unfavorably on the station you work for
(in practical terms, reserving the right to bar you from doing
something like appearing in a porno movie) and as long as
such a clause is interpreted reasonably, that's enforceable
as well. But in practice that won't be likely to limit you.
The one big drawback, of course, is that you may need to
go to the hassle of hiring lawyers and having your rights
enforced in court...so what you want to do is negotiate a
fair contract that protects your employer's exclusive rights
to your talents against all direct competition, but clarifies
your legal rights to moonlight in non-competitive endeavors.
Your employer has every right to expect you not to compete
with him. He doesn't have (and will rarely try to claim) the
right to control what you do off the job as long as it doesn't
interfere with what you do for him. And he certainly shouldn't
be able to restrict your movements if he decides he doesn't
need you any more, no court will accept that.

Steve replied:
> Are you saying this is illegal, for competing stations to run their
> commercials at the same time?

The issue is not whether the stopsets happen to occur at the same
time. The issue is whether the stations involved have made an
agreement to schedule the stopsets in that way. While the former is
clearly not illegal, the latter raises flags in my mind which I leave
to those more learned in the law than I to define.

If I were offered such an agreement by a station with which I
competed, I would be on the phone to my lawyer in a flash.

: I believe that studies were done on how many people tune out after the
: first, second, etc., commerical in a stopset. I believe something like
: only 31% are still listening by the time the second commercial begins.

Yes, studies were done. Here is one. (By Avery Abernathy, Assistant Professor of Marketing, Auburn; Taken from the 1991 Journal of Advertising Research.)

This study was done in Columbia, SC, using stations WCOS, WMFX, WWDM, WTCB, WSCQ and 3 other stations. Based upon the assumption of a 100% program listening level:

47% will hear the 1st commercial whole
31% will hear the 2nd
16% will hear the 3rd
5% will hear the 4th
3% will hear the 5th
1% from here-on

The study goes on to say that an advertiser would get more ad value by buying a fixed first-position slot for a premium.

I am under the impression that (like many other FCC rules) the rule is that you must take reading as often as need to show "reasonable" control of transmitter settings. Many stations read every three hours, some read meters once during every shift. Our's only reads the meters once a day. However, we do have a remote control that constantly monitors transmitter tolerances. I really don't know how far a station could push this.

Correct. I just bought one this past weekend. The FM scale appears to be
okay but the AM scale is WAY out of alignment! I have to tune the dial to
900 to get 1070 on the AM band. That is annoying, but, the reception is
good. At night, I tune to 1400 to get 1520 AM from Buffalo. Sure would be
great is Super Radio IV had presets!

>governing ownership, as mandated by the FCC. But do you think radio has
>benefitted from a few companies owning all of the stations in one market?

>Do you think it presents a conflict of interest or do you think profit is

>the sole driving factor for companies that own more than one station in
>the same market?

I reply as someone who works for a company that currently operates two
FM's, an AM, and a TV in the same market.

I, too, am uneasy about the new rules. But I also know that before they
were enacted, two thirds of radio stations were losing money. I've said
it before--the ideal solution would be to let the failing stations go dark
and delete the allocations, because there are just too damn many stations
on the air.
But the powers-that-be decided more stations are better. So be it. The
only way that can happen, is for the government to subsidize them, or for
private owners to be able to double and triple up to cut down on overhead.
Because folks, the revenue is not there to support all these stations
operated independently. Understand this, because it is fundamental. The
money is _not there_. In fact, as recently as two years ago, this market
had three--count'em, three--dark FM's. Two are back on air in duopolies,
the third is in an LMA with an AM. We still have one dark AM, and an AM
CP that is unlikely ever to be built.

Since the government isn't about to subsidize the stations, the only
solution left is consolidation. Otherwise, stations go belly-up.

No, I don't like it much. Change is uncomfortable. But I've worked at
one station that went broke and went dark, and believe me, it's an
experience I wish never to repeat.

I don't think you need an 8-tower array to get this effect. Back in the 50's, there was a 3 tower array in the town where I lived. There were areas to the side of the array where you couldn't hear much. At night a major portion of the suburban areas were not covered very well. They did change the array in the 60's, which helped the problem. There is a 50 kW station here in the Chicago area with a 4 tower nighttime array. I used to live in their null, about 10 miles away, and you couldn't hear them at night at all. I haven't tuned them in, in 6 or 7 years, so I don't know if this is still the case. I suspect that you could have this kind of problem with a two tower array, you don't need 8 towers to get deep nulls. A lot of towers just give you more nulls, and/or broader nulls.

More on KXOK- JACOR
Rumor is that the sale of KXOK to Jacor is now practically a lock. Reported price for KXOK is $7.2 Million. Expect an anouncement within the week. This will end the reign of the Frichling Dynasty-- Undoubtably the worst owners in radio. I would be looking for a drastic format change, as I have previously speculated, and I would be looking for some repositioning of their Z-100 FM- Probably to a strict format of Blues & R+B Oldies, with the same on air staff.

EZ Buzz

Latest reports have KSD sportscaster Steve Schlanger as the new Midday cohost.

Is Anyone else really annoyed by the overpromotion of KSD-FM touting their new rehashed classic rock format? This isn't the first time that the station has switched to AOR, but each of the previous times, they have had a steady drift back to classic rock. And JC Cororan has already proven that he isn't the ratings winner that he once was at KSHE, and at the old KS-94. I belive that before the end of the year the format will fizzle, and the station will undergo radical format changes. Someone could easily move in and take over KPNT's audience with alternative programing, with KPNTs signal as weak as it is. I think that EZs biggest problem with KSD is that they need to look for a better PD. This new guy Jay Philpot came from WYMG- Sprngfield, a station that most of the time he was there was a simulcast of another station(Was it WLUP?I don't remember).

If timing is everything then I believe in ghosts!
I would like to know what stations welcome visitors in the bright days of August. I will be on vacation the second half of August from Anchorage to Denali to Fairbanks and Gates of the Artic. IF anyone out there works up there let me know. Would be happy to bring tapes of the NYC stations up with me!

IMHO, mini-discs really don't cut it for music. But I'm thinking about
using them for news, when my TC-D5M's need replacing. Sony has a new unit
that was written up in the latest issue of Pro Audio Review--the MZ-B3.
Does anybody have any first-hand knowledge about this unit? Suggestions?

Hi All,

It was suggested by someone on the SINATRA list I post this here: I have been featuring Sinatra on the radio since 1955...at the moment I am on WAMB in Nashville, the only BIG BAND/GREAT SINGER'S station in the market...because of the heavy sports schedule, I created BREAKFAST WITH BLUE EYES to run one hour, Saturday morning at 9am so I could get a "fixed" time and day...I can sell this show for an incredible CPM...I am looking for somebody in advertising, with national client located in Nashville or metro area...full station details, air-check, etc. on request...thanks...sandy singer

>
>Rob Bass

I just pulled three CD's from my collection, all issued by the BBC. One is of Beethoven piano sonatas performed by Edith Vogel, with a playing time of 77:23. Another is of Beethoven and Dvorak piano trios, with a playing time of 78:08. The third is of Walton's Symphony #1 and Takemitsu's "From me flows what you call Time," both live recordings, with a total playing time of 77:01. So much for the 74 minute capacity. But I don't know about 85 minutes.

>why wouldn't ACME simply become its own exclusive satellite
>service...with its format, its music and its jocks? And why wouldn't
>every other company with dozens of stations do the same?

Because it doesn't always work. In the 40s and 50s, local stations from coast to coast carried prime time programming from the "big 3" radio nets. Why did they stop? I remember AM stations in the 60s carring a weekend long network format called Monitor. What happened to that?

Radio used to contain a lot more syndicated programming than it does today. Look at the telecom bill this way... if a company owns 4 FMs in a market, they're a lot more likely to experiment with the format of the 4th one if the other three are established and successful.

None of us know how this will turn out, but I think that the naysayers are failing to acknowledge the possible upside. Has duopoly created more diversity, or less? I believe that the answer would be more.

>complaining! It's Time For ACTION!"
>

Ron,

I'm sympathetic to your cause, although from another angle. Being a Rock 'n Roll music fan, I was dismayed as good rock station after another abandonned the format and switched to Country. For some the change has been permanent and others have since switched formats, becoming a virtual chameleon. I guess those stations' management believed they could cash in on a new opportunity. What seemed to happen was a complete saturation of the market (even for out here in the plains states where there is literally a country station on every corner!) and lowering of the market share and profits for everyone. Of course the savy stations have since found a niche and are exploiting it, while the stations that stayed with the rock format likely saw their audience numbers increase some and may be retaining their share. (I do not work in the biz, so I'm just guessing.)

My point is, don't give up! If your prefered music choice goes off the airwaves, then you'll be forced to do what I do, buy and listen to CDs. At some point what you like today will surface as "classic" and you'll really get to feel old! I don't know whether you read Popular Communications, but former editor Tom Knietel has addressed this issue several times. It's not easy to lose an old friend, especially when it seems you have let it be a part of your everyday life for a long time. I guess it's the nature of the biz.

Good luck finding some one else to pick up the format in the Big Apple.

- Nate

2082. Country music radio in New York City

Newsgroup: rec.radio.broadcasting

An article in the Long Island Newsday of 2/20/96 paints a pretty bleak outlook for country music in new York City. The author, Ed Arnold, states Randy Bongarten, the general manager of WAXQ denied that the station will change formats since "we had our best year [financially] Steve Weed, program director of WMXV (Hi Tripp) also denied a format change saying that "This business is populated by a bunch of little old grannies who like to gossip" (He said it, not me :))

The article also reported that Long Island station WDRE, WBLI and WKJY also denied changing formats to country.

On the other hand college stations (WFDU, WFUV, and WKCR) have added country music to their mix.

As of this posting, the new NEWS station is still a mystery.
In my attempts to track down the station to send our latest (just
completed late last week) NEWS station id package, yesterday I called
KSNN program director Dan Pearman. He firmly stands by the fact they
are staying country and heard it could be the MIX or the ARROW.
Also knowing program directors may be working with some other production
company or may not actually know he is about to be axed, today I called
KSNN station manager Scott Chase. He too has been flooded with calls
regarding the rumor and said his station is NOT changing formats.
I work with stations everyday across the country that are making format
or personnel changes and the information is kept in confidence. When
soliciting for business in cases such as this it sometimes hard to
determine if the station is telling the truth or not.
The higher ups at the TEXAS STATE NETWORK and KRLD/Dallas (also victims
of losing news personnel to the new station) said they believe it to
be KSSN. Something like this will come to light very soon.

In article <4frg9s$a23@vixen.cso.uiuc.edu>, totaylor@delphi.com says...

I hope beyond all hope that the as-yet-un-named news/talk FM station will be an all news format (al-la KCBS, San Francisco) rather than a "News during Drive, talk otherwise" station. I am ashamed that the fouth largest radio market (by advertising $) does not have an all-news station.

However, if the owners insist on "news only during Drive", please let it be serious news. By this I mean "News, News, Sports, Weather, Trafic, feature, News, News..." Contrast this to KRLD/WBAP's "Birthday, Traffic, How ya'doninginthetrafichelicopterHal, news, comedy, entertainment, traffic, buisness headline,sports" current news format.

Am I asking too much?

That's pretty recent. Ten or so years ago they were strictly
controlled. Go down to the CRTC and dig out a mid eighties licence
and check out the mind-numbing detail that had to be provided - like
how many minutes per week were devoted to discussions of crafts!

Source record: 25491

I journeyed fifty-years into the future: here's what I saw:

Like the Stallone movie, all restaurants are Taco Bell

All media is controlled by "Clear JaCox," a media giant
formed when Clear Channel bought and combined Jacor and
Cox Communications.

I hope it was just a night mare.

Chris Carmichael
sdradio@sd.znet.com

[Moderator's Note: They wont all be Taco Bell, but they WILL all be corporate chain shops, that's for sure. Mom and Pop (by this I include smaller companies as well) are just plain doomed. The lure of selling out for 3 - 5 times the market value (or more) is just too great. Plus the price inflation has placed anything of any value out of the reach of all but the mega-conglomerates. There will be no place left to 'break in' to the biz, but no matter... tomorrow radio isnt interested in creativity. They want replacable '10-in-a-row' voices so that when the whole thing goes automated, the listeners wont even notice. It was not a nightmare, Chris, it was a premonition. Bill]

More on our rumoured new FM news-talk station in Tuesday's (2/20) Dallas Morning News. Existing AM N/T outlet KRLD is apparently already feeling the pain. An excerpted version of the article follows:

Officials at KRLD (1080) were granted a temporary restraining order Monday intended to keep a new, as-yet-unnamed FM news/talk station in Dallas from hiring away more KRLD employees.
KRLD has lost five staffers--noon co-anchor Brad Wheelis, sports reporter Roger Emrich, assistant editor Kirsten Frederick and reporter Diann Hodges--to the station, a bit of corporate raiding that general manager Jerry Bobo called unprecedented in the...market....
Initial reports indicated the new station would replace either KRRW (97.9) or KSNN (94.9). Many radio insiders now believe [Infinity owned] KSNN will be the site of the new station.
Still, its identity remains such a closely guarded secret that KRLD was unable to name the new station or its owner in its petition for the restraining order. Instead, the order names two former KRLD employees...Peter Gardner and Cameron Fairchild....
KRLD...accuses Mr. Fairchild and Mr. Gardner of having "evil motives" because of Mr. Fairchild's termination from the station in October 1994...

[end of quoted material]

Fort Wayne. Radio News. Here goes. (No, I'm not applying for the newswriting position at any local radio station)

* Phlash Phelps has been located. After being Phlash-Phired from 95 in Charleston, SC, he's showing up at WPXY Rochester. He was in Fort Wayne on Friday afternoon, and on air at B106 (his old gig). I have about :30 of it unscoped. Pretty funny stuff. He's going to be doing evenings at PXY, I believe (according to what HE said, so don't blame me, Clarke!)

* John O'Rourke is back in town. The former PD at B106 is doing some community involvement work outside of radio.

* Chris Tyler is doing middays at WMEE, he's the one of the former duo knows as "Tyler and Toni in the Morning"

* WGL-AM/FM is changing its morning format to feature different hosts and guests each day. More info when I find out something.

I guess that's about all...more info as I get it.

Yes, and he also did mornings at KNX, Los Angeles, while he was doing
the Donna Reed Show. He was supposed to have a drum set in the studio on
which he could play along with commercials or at any time he wanted.
Needless to say, this was BEFORE KNX was all news. :-)

Hi...
Don't have any airchecks of Crane but I may be able to
point you in a helpful direction, and throw in a little radio
history as well.
Crane started out about 1950 at a Hornell, NY daytimer
(WLEA-AM), which apparently has not found any tapes or
transcriptions of his earliest shows. He quickly moved to
WICC in Bridgeport, CT, which is still around and may even
have some dubs of his old shows there from about 1951
to 1957. Late in 1957 he moved out to KNX, the CBS O&O
in Los Angeles, to do a personality talk-intensive morning
show out there. (Some say his act was a lot like Don Imus,
very heavy on the humor and satire and very entertaining,
though not so political. I've heard a few tapes of his old
shows, and I agree. He was a brilliant air talent, excellent
ad-libber and had some fine produced bits as well.) He stayed
on KNX until about a year or two into the run of Hogan's
Heroes, doing his last show around 1967 when the weekly
series was a big hit and the grind got to be too much for
him to stay on the air with a 4 hour daily morning show.
Change was already in the air at KNX, they were going in the
direction of personality talk (where the initial plan was to
build the format around Crane and just shut off the turntables).
They were years ahead of their time in seeing the growth of
talk as a dominant AM format, at a time when KABC had that
franchise virtually to itself (and was already making big $$$)
and Crane would doubtless have been a major early success
in that format---maybe advancing it locally and nationally,
years sooner than it ultimately did. (And who knows; if he'd
stayed on the air instead of putting all his eggs in the TV and
acting basket, he might even be alive now, and a bigger nat-
ional act than Limbaugh. He certainly was funnier and more
creative.) But with Crane gone, and his replacement a quick
failure, they shifted strategy and went to a version of the
same all-news format already on the air in New York. CBS out
in LA may have airchecks of some of his old radio shows
as well...You may get a sense of what talk radio might have
been.

WKNR's 6-tower array was pretty tight too. I'm not a Detroiter, but I can remember driving down Michigan Avenue from Dearborn to Detroit. There was a two block section of the road where WKNR went from "blowing the radio out of your dash" to inaudible. In downtown Detroit you could look down the river and clearly see the tower lights blinking away but there was no WKNR on the dial.

When I was in college (early 70's) I got a tour of the WDEE 12-tower system in Allen Park. I had absolutely no idea what it was...I just stumbled across it by accident. But it was too fanatastic to ignore. I drove up to the gate, rang the bell, and the electric gate opened. I drove in, and the gate closed behind me. At this point, I was thinking, "What have I done?" For all I knew, it was some super-secret government installation and I was going to spend the rest of my life attached to electrodes. Anyway, the keepers were very friendly and frankly excited to have a visitor, especially one who was as impressed with the place as I was.

They had an X-Y scope display for modulation and the engineer in charge was so determined to demonstrate it that he cranked up the modulation A LOT. After what seemed like days, he said, "Well I guess overmodulating 50000 watts in the middle of Detroit isn't a good idea." I wonder if he noticed the look on my face at that point.

They had two transmitters. The daytime transmitter was an RCA 50K Ampliphase, and the night transmitter was a 10K RCA (plate modulated, I think). It seems to me that there were two separate phasors, but I can't remember for sure.

Hello, I have a complete PRISMA studio and am willing to do some
supervised audio post work for free in the Toronto ON Canada area!

I have a complete recording studio:

* Audio Primsa system with Aux Box, Translator running a 16mb DX4
system using ADAT as converters. Have a house sync generator
* on the recording side I have ADAT Suite with BRC and Meter Bridge,
Tube preamps, high end compressor, large & small condensor mics, ESI32
sampler with 8MB, guitars, Basses, Patchbays Blah blah blah.
* Mixers: Yamaha O1, ART 2408 (Kinda like a mackie)

Experience:
Song writer, Engineer, business experience, Soundtrax writer.

I Understand all aspects of audio post and digital audio just want
some hands on
with a film. I am interested in getting credits.

My name is Dwayne Newman.

2106. Latest on Free Radio Berkeley's court fight

Newsgroup: rec.radio.broadcasting
Date: 1996-02-22 00:00:00 UTC
From: Stephen Dunifer <frbspd@crl.com>
Message-ID: <4ghqlf$1aa@vixen.cso.uiuc.edu>
Source record: 25547

****

MEDIA RELEASE FROM FREE RADIO BERKELEY

FOR IMMEDIATE RELEASE: MONDAY, JANUARY 29, 1996

NOTE: HEARING IS NOW SET FOR FRIDAY, MARCH 15

****

FCC and NAB Join Forces to Silence Free Radio Berkeley

One week after filing a motion in Federal Court asking for an injunction to stop Free Radio Berkeley (FRB) from broadcasting, the Federal Communications Commission (FCC) has been joined by the National Association of Broadcasters (NAB) in its effort to stop the growth of the micro radio movement across the United States. By filing a "friend of the court" ("amicus") brief the NAB now stands in support of the FCC motion to enjoin Free Radio Berkeley.

Free Radio Berkeley has remained a First Amendment thorn in the side of the FCC since its ... FIRST broadcast on April 11, 1993. Since the FCC's motion for a preliminary injunction was denied by a Federal District Court on January 20, 1995 the micro radio movement has continued to grow, giving the people of this country access, almost for the first time to the air waves. This joint action by the FCC and NAB sets the stage for another First Amendment confrontation. The case will be heard in District Court in Oakland, California on Friday, March 15, 1996 in Courtroom #2, at the Federal Building, 13th and Clay streets. A free speech support demonstration will start at 9:00 AM, the hearing begins at 10:30 AM.

Since the beginning of this legal battle the FCC has steadfastly refused to recognize the merits and constitutional issues raised by Free Radio Berkeley. Now they seek to have Free Radio Berkeley and Stephen Dunifer permanently barred from the airwaves without ever letting a court even consider our substantive constitutional arguments.
.
Luke Hiken, Dunifer's attorney, filed a responding brief on behalf of Free Radio Berkeley on Friday, December 22. It was accompanied by a supporting brief filed by the National Lawyers Guild's Committee on Democratic Communications (NLGCDC) on behalf of itself and the Media Alliance and the Women's International News Gathering Service (WINGS). Another amicus brief will be filed on behalf of Free Radio Berkeley listeners, community organizations, and other micropower free radio stations.

Speaking for the National Lawyers Guild Committee on Democratic Communications, Attorney Alan Korn commented,

"In spite of the Communications Act's requirement that the FCC regulate the airwaves "in the public interest," and that they ensure the best use of new technologies, the FCC refuses to promote citizen access, arguing instead that it is more "efficient" to allow corporations and the Rupert Murdochs of the world to control the airwaves. Meanwhile, merger mania in the broadcast industry continues unabated. At no time in our history have so many broadcast stationns been controlled by so few. Entire communities, cultures and ideas are now systematically excluded from the airwaves. It is only by reclaiming the airwaves by direct grassroots action that the American public can regain its voice and begin to engage in true self expression, which is the essence of self-government. This is why the National Lawyers Guild Committee on Democratic Communications is committed to fight for the legal rights of Stephen Dunifer and Free Radio Berkeley".

Speaking for Free Radio Berkeley and as the named defendant, Stephen Dunifer said:

"With the outrageous claim that the Federal Court has jurisdiction to issue an injunction against me, but does not have jurisdication to hear my challenge to the constitutionality of the FCC's rules barring low power radio, the FCC is attempting to shield itself from judicial scrutiny and deprive me of my First Amendment rights and due process. Who are they to determine what is in the public interest when their own chairman, Reed Hundt has stated that 'the FCC 's current implementation of the public interest mandate is intellectually indefensible' ? Free Radio Berkeley and all the other micropower broadcasters will not be silenced by this by this self-serving cabal of corporate broadcast media interests and their lackey, the FCC. As the guardian of the airwaves as a public trust, the FCC is guilty of desertion, reckless endangerment and dereliction of duty. What are they going to do to stop this movement - make the possession of a transistor a felony offense ?"

Allen Hopper, another member of the legal team stated. "

The FCC's audacity is amazing. They themselves have gone into federal district court, and have invoked the jurisdiction of the court to ask for their injunction against FRB. Now they argue that the court doesn't have jurisdiction to determine whether the regulations their injunction request is based upon are constitutional. They are essentially telling Judge Wilken that she has jurisdiction, but if and only if she agrees to grant their injunction. Otherwise, says the FCC, "no jurisdiction." The FCC's audacity is even more incredible when you look back to their position before the 9th Circuit Court of Appeals in the case of Dougan v. FCC, where Bill Dougan challenged the FCC's regulations in the Court of Appeals; the very court the FCC now argues has "exclusive jurisdiction" to hear challenges to their regulations. In Dougan, the FCC argued to the court that "Jurisdiction to decide Dougan's arguments is vested in [the] United States District Court." The FCC's blatant attempts at forum shopping, and at evading judicial review of their unconstitutional ban on

micro radio, should and will be rejected by the Court. We believe that the Court will deny the FCC's request for summary judgment, and we are ready for a trial on the merits, at which we will prove that the FCC's ban of micro radio is not in the public interest, and violates the First Amendment.
"Seeing the NAB filing an amicus brief supporting the FCC reminds me of the argument that the FCC made when the NLG's CDC filed its amicus brief: that the court should refuse the brief because the CDC and FRB attorney Luke Hiken are "one and the same, interchangeable." That charge is much more accurate when applied to the NAB (the lobbying arm of the corporate media cabal) and the FCC; they really are two heads of the same monster."

Copies of all legal documents are available upon request.

Going back to my old National Radio Club night DA book, 1130 in the midwest is Tight!. KDFX-1190 (ex. KGBS-KUII-KLIF) has a pretty tight night pattern too. In the populated far north Dallas area they are poor to fair, but due west along I-30 they dominate. The interesting thing about their pattern is what happens behind (i.e. to the east) of their site....it is the loudest conglomeration of hash known to mankind....totally unlistenable, even when you can see the 12 towers blinking away like sentrys in the night. Once past the site, which is located just south of Rockwall, Texas and Interstate 30, it's fine. Also, there is very little signal south of Dallas of course to protect WOAI. An aside....at the NAB two years ago a company called Dataworld offered a very complete book of AM station maps with the directional antennas plotted. Neat to look at.....and around $250 in cost. They had a similar book with FM plots for about the same price.

On Sunday nights between 8:00 PM and 2:00 AM (or thereabouts -- sometimes Vin goes to 3:30 or so if he feels like it) WNEW-FM in NYC is freeform. Vin Scelsa got it in writing from the PD before he signed on there -- no interference.

As far as I know, that's the only freeform commercial radio show on the air right now, at least in anything like a major market. NEW seems to be getting plenty of advertising during those hours.

>We could also stand to lose Sunday nights, and there should be some
>alternate hosts available so Curtis can go home and not fill-in on
>every third program.

>My two cents on the station today.

In my opinion, the first thing WABC should do is leave Curtis Sliwa on only in the overnight if they keep him at all. The key to talk radio is it being

1. Entertaining
2. Logical

This guy is neither. He is a strong arm from the Guardian Angels. He fits neither of the above two paramenters.

The second thing WABC should do is keep the talk on the station from getting too narrow. Dick Oliver's Show should go. We really don't need a narrow discussion of inner city topics from a news perspective. We have two local newsradio stations for that.

Third, decide whether Lionel is a comedian or an issues talker. He never seems to know. Just as he is getting into something, he makes a joke and kills the whole thread of the topic. And, he's not that funny. He was at his best during the OJ trial when he was talking about something he was familiar with. He is not Don Imus. There really are very few who can get away with making jokes under the guise of a semi-serious talk show.

Fourth: Let the talk show hosts criticize each other. That makes for some of the best talk radio. They are all professionals and they know how to do it. The entertainment level must stay high. To have articulate hosts battling it out would certainly make for some entertaining radio.

Opinionated talkers who forcefully express themselves is the formula John Mainelli used to build WABC (and its imitators) into the success it has become. Current PD Phil Boyce should keep that in mind.

2120. Carrier Current

Newsgroup: rec.radio.broadcasting
Date: 1996-02-23 00:00:00 UTC
From: Sandra Roberts <sroberts@attila.stevens-tech.edu>
Message-ID: <4gkgqf$112@vixen.cso.uiuc.edu>
Source record: 25436

Hello,

I'm looking for information to improve carrier current signals to places with large amounts of interference from computers and other electronic devices. Does anyone have suggestions?

Sandy

2121. TRANSMITTER READINGS.....

Newsgroup: rec.radio.broadcasting
Date: 1996-02-23 00:00:00 UTC

Message-ID: <4gkgql$11c@vixen.cso.uiuc.edu>
Source record: 25437

From what I have told, FCC requires you to take transmitter readings
at least once every three hours. Though many radio stations have embraced
the state of the art in automatic transmitter monitoring (a-la computer),
the majority of you out there still have to do the readings by hand. As
an engineer, I am a stickler in terms of transmitter readings. I require
HOURLY transmitter readings at every station I maintain. Why HOURLY ?
This will guarantee that if anything should go wrong, you will have the
means to see if there is a pattern developing in terms of the transmitter's
overall performance. It will give you a kind of warning signal if trouble
is about to strike. It only takes 15 seconds to take the readings for the
average station, once an hour. I call it peace of mind.

Hi,

Try Tom Konard, AirCheck Factory, AirCheck Acres, RR 1, Box 11,
WILD ROSE, WI 54984-9725. Tom has literally thousands of airchecks dating
way, way back. If anyone has Bob Crane from his earliest days in Conn, Tom
will. I don't have the phone number handy, but there used to be only one
Konard in Wild Rose. Good luck.

2123. Re: Bob Crane Airchecks Sought

Newsgroup: rec.radio.broadcasting

From: Jeff Tellis <jtellis@mhv.net>
Message-ID: <4gkgqe$111@vixen.cso.uiuc.edu>
Source record: 25439

Before he went to LA radio, Bob Crane was the morning man for years at WICC (AM) in Bridgeport, Connecticut. Don't know if they have any airchecks around or not.

Word was that he was such strong competition for WCBS's Jack Sterling in New York, that CBS hired him for their LA station to get him out of the market. Don't know how true that was, but Crane was an institution in southern Connecticut morning radio for years.

2124. Radio Stations Worldwide (USA and South Africa)

Reply-To: simonr@ppushers.demon.co.uk

I wonder if anyone can help. I'm trying to contact Commercial Radio
Stations in the USA in the Georgia/Tennessee and San Fransisco Areas.
I'm also trying to get a list of stations and contacts in South Africa.

Has anyone got any ideas of where I should start looking on the Web?

>mixers used for production that we were originally considering.

try the soundcraft rm100 console from soundcraft UK, it is a moular
frame system and is by far the cheapest on air console i have
encountered. The mix minus bus is handled by the phone channel with
hybrid feed automatically switching between pgm aud and cleenfeed
depending on channel status.

We puchased a 11 channel with 4 mono 6 stereo and one phone channel,
it cost about $3500 US , estimating exchange rates

>Ray Dennis
>
>[Moderator's Note: I know nothing about any directional AM in
>Nromal/Bloomington. But if anyone could make it work, Bob Jones can.
>Does anyone know what station this is/was? Bill]
>
The station was on 1440 Khz and known in the mid 70's as WAKC. In 1976
they were shown to run 500 watts and was listed as a DA-2. It protected
WPRS in Paris, Il. I live in Champaign, Il and about 40 miles in the
null of the pattern and can never remember hearing it and only hearing
WPRS with no co channel interference and I am 55 miles from WPRS. I
believe that the station took on the call that was held by a FM in Leroy,
Il of WMLA. One of the arrays was located west of Downs, Il and north of
I-74 by about 2 miles. The station was selected as one of the expanded
band stations. And the last time I was in Bloomington-Normal I did not
hear the station (possibly silent).

Funny, I checked in here with the same question. I grew up listening to "Ol' DDR" on WFIL in Phila. and I feel his fun approach to radio was a key factor in my becoming a jock. As I understand, he went from WFIL to WRKO in Boston (with a heart attack in between, I believe) to KFRC. Word is he retired awhile back. The last I heard of him was when he appeared on a "Philadelphia Radio Greats" reunion back about 1991 on WOGL. I myself was doing a remote that day, and brought the walkman with me just so I could hear it! If anybody knows where I could drop Don a note, please let me know.Thanks!

I have the following equipment for sale. Please e-mail me if you are interested in either item.

TECHNICS SH-9010 PARAGRAPHIC EQUALIZER. This is a rack mount unit built by Technics as a high-end prosumer equalizer. I bought it second hand. The original carton is with it, although the original packaging is not. I also have the manual. The unit is almost mint. It provides five bands of adjustable frequency and bandwidth EQ, +/- 12 dB on each of two stereo channels. It has an EQ in/out switch for A/B comparisons. It is built like a Sherman tank, solid, heavy and gutsy. I haven't used it in about three years, but it was working fine when I pulled it from the rack back then.
Asking $225.00 plus shipping.

CANON FAXPHONE 50 FAX MACHINE. I threw this in this list just incase anyone is in need of a nearly new, stand alone fax machine. It is about two years old but, was only used for about a year. It is in its original packaging with manual. It uses 328' rolls of thermal paper (two new rolls plus what is in the machine are included). It features a paper decurler, sheet cutter and 10 page document feeder. I now have a plain paper fax and a fax modem in each of our three computers -- we are over-faxed, and we use e-mail for much of what we used to fax. Asking price $250.00 plus shipping.

If you add 570 with 1080 you get 1650. You are simply getting a mixing
product, probably being generated in your radio's front end.
>
>Then again, KRLD 1080 can be heard around certain powerlines at 840,
>and 610, as well their usual harmonics of 2160, and 4320.

The lower signals can be almost anything. They could be spurs from the
transmitter or mixing products with long wave signals. The LW sigs.
would have to be 470 kHz and 240 kHz. Some power companies do send LW
signals down the power line to remote control substations, but these are
much higher than what they normally use. If you are near an airport,
heliport or body of water they could be beacons, the key is listening for
(morse code) beeps under the audio.

Message-ID: <4gmbg6$52k@vixen.cso.uiuc.edu>
Source record: 25361

FROM: Roger Badesch, co-sponsor, Evanston Twp. H. S. student radio station, Evanston, IL:

TO: Any and all radio people

RE: Used and useable broadcast equipment

Please help a high school student radio station get geared up to go "on-the-air". We are looking for DONATED equipment so students can begin broadcasting. We need ASAP:
- a real broadcast console, 8 in, 2-4 out,
- digital clocks
- bulk erasers (w/splice finder if possible)
- two turntables w/amps
- proper audio connectors for ITC 3 stack and R/PB units

Right now we have an old NEOTEK production board (nice, but want kids to learn how to use the right equipment), several ITC machines (we need to test them to see which ones actually work), an old consumer TT (awkward to use and cue with), and other odds and ends. We're making do with it for now but I'm a stickler for reality and would love for the kids to have the proper equipment to work with even if it is old.

ALSO, we would love to be able to get financial backers to purchase a frequency OR some strong help in getting the FCC to approve a frequency for us. ETHS has been trying for more than 30 years to get a student radio station frequency. We are the only HS on the North Shore of Chicago without one. Our school has more than 3000 students and more than 50 in the radio club.

This is the first time that students and faculty sponsors have received help from alumnae and parents but we are still falling a bit short. For the time being, students will record next day's programs the night before. We'll only be broadcasting 4-6 PM, M-F, for time being but hope to expand to live, full 7 days schedule as soon as possible.

We are also still waiting for final approval from school board and superintendant but this can be assured if we can show that we have put this together with no expenditure of funds and done it quickly.

PLEASE! If you can help, e-mail me or leave a message for me at 312/764-5649, or write me at the school: ETHS, WKR-FM, 1600 Dodge Ave., Evanston, IL 60204. THANKS!!!!!!!!

I taped the whole thing and just got finished watching it. Pat O'Brien
fedexxed Imus pictures of himself just so he could be on the air. Chuck
McCord & Bernard ripped them to shreds during the 9:00 news.
Also, there were 3 kids from "Time Machine" magazine (nepotistically)
covering the primary. Two of them at the same time said Morry Taylor
sounded drunk, and the other said that Pat Buchanan was racist.
During one of Breen's sportscasts, he said the Knicks lost, but
the crowd was behind Patrick Ewing. Breen then proceeded to play a track
from Buchanan's rally from the night before, "GO PAT GO! GO PAT GO!"
which resulted in laughter from the entire crowd.
Finally, I-man blew up Lamar Alexander in the middle of each of
his soundbites and asked Fred to change the lining on his Auto Body
Express jackets because it looks too much like Lamar's shirts.

Hi all who latch onto this thread:

Radio is a unique genre. A way to understand just how powerful radio is (other than the obvious astonishing success of talk radio) is to do the following experiment:

The next time any politician gives a speech, especially our President, LISTEN TO IT ON THE RADIO. DO NOT watch the speaker on television.

I suggest listening to a long speech, not a sound bite.

Remember the Nixon-Kennedy debate? Those who heard it only thought Nixon won; those who watched on TV were overwhelmingly in favor of JFK.

As for radio drama, I can think of no other media genre that comes close. Garrison Keillor tries to recreate it; his earlier Prairie Home Companion shows come close. Somehow the current PHC shows don't quite cut it -- maybe they've gone too NEW YORK or HOLLYWOOD; it's somehow too slick. Or perhaps we're all just too used to it. (I could do without his political references -- keep it clean, Keillor. NPR is PC enough).

TTFN,

MJBarczak

>Are you saying this is illegal, for competing stations to run their
>commercials at the same time?

Hmmmm....yes and no. If two program directors or general managers sat down at lunch and agreed to do this, it would be a violation of federal antitrust laws (and probably also carry a penalty from the FCC.) However, over the last decade, the FCC has allowed the development of LMA's, local market agreements, where two seperately owned stations can be managed/programmed by one staff; typically, one sales force also sells the advertising. Soooo...no longer any need to violate federal law: you can't collude with your competitor if Uncle Sam has removed all competition. (sigh)

Say, whatever happened to commercials that were fun to listen to? I've produced quite a few commercials that I actually like to listen to time after time...I guess the creative departments, production departments and the announcers are getting too "pushed" to pump out cookie cutter hard sells and such that the commercials begin to blend into each other...why not put some thought into what you're creating and make it pleasing to listen to? I'd much rather have advertisers talking to me than shouting in my face.

I'd have to do some looking to find the actual citation, but it's been reported that the FCC did ban the sale of SCA receivers to end users some time back -- *even if the user was authorized by the SCA provider* -- not so much to prevent unauthorized listening but to prevent service providers from locking in their customers by selling them a receiver that would be useless unless they continued to pay for service. (This policy was originally established in connection with scrambled pay-TV services broadcast by UHF stations.)

On the other hand, there definitely are SCA receivers being sold to the public -- namely nationwide pagers that scan the FM band for the carrier's subcarrier (pardon the pun) -- so it would seem that the FCC isn't enforcing this rule.

IMHO, the FCC really should consider specifying 67 kHz with a given deviation and pre-emphasis as a standard for an SAP service for FM radio -- meaning a public service, like TV SAP, rather than a private one. The other stuff can go to higher subcarriers or satellite as far as I'm concerned. (I know of at least one TV station, WFWA in Fort Wayne, Indiana, that has been broadcasting a reading-for-the-blind service on SAP.)

Yes it happen when I worked at Signal Radio in Stoke, England, about 4 years ago. But there were a number of problems with producing commercials. A live sound and the odd clicking of buttons etc. Plus Agencies who used the facility could not be trusted to keep quiet, and there was the problem when you, the engineer and the voice artist couldn't stop giggling for some unknown reason.

Double plated, bullet proof, giggle re-enforced glass is the only answer

[Moderator's Note: Sure you could, but we all know that such has
never been the definition of top-40. Bill]

2150. Religious Translators

Newsgroup: rec.radio.broadcasting
Date: 1996-02-24 00:00:00 UTC
From: VUBS79A@prodigy.com
Message-ID: <4gmbge$533@vixen.cso.uiuc.edu>
Source record: 25375

I recently returned to my old stompin' grounds here in Ocala, Florida, and was distressed to learn that there is now what appears to be a low-power translator on 99.3 for the Bible Broadcasting Network. Great! This has the effect of eliminating my reception of three important stations that I need to keep track of: total wipeout of Lite Rock 99.3 (WLRQ) in Melbourne, plus severe bleedover on both WQIK/99.1/Jacksonville and WQYK/99.5/Tampa.

Where do these translators come from? How do they go about getting licensed for operation in situations like this, where there would be obvious short-spacing problems for a commercial broadcaster?

-Drew in Sunny Central Florida-

[Moderator's Note: They are legal pirates, Drew. They have the same (or greater) power as the pirates and they originate no programming. Some translators have many hundreds of watts from mountain-top sites. Plus, the translator rules allow satellite delivery for non-comms. And I know of several non-comms that have no problem 'selling' blocks of time to radio-evangelists who hawk tapes and books and all sorts of merchandise. Some of these so-called 'translators' are repeating stations hundreds or thousands of miles away because of satellite delivery. Sad, really, that we disalow local community stations but allow these translators to flourish like a cancer on the bands. Makes a fellow wonder. Bill]

2151. Re: Sale of WVBR?

Newsgroup: rec.radio.broadcasting
Date: 1996-02-24 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <4gmbgf$534@vixen.cso.uiuc.edu>
Source record: 25376

Hi..re the sale of WVBR...
That would be an interesting development, since the station (while it's commercial and located off campus in Collegetown) is owned by a non-profit membership corporation, the Cornell Radio Guild, Inc., which according to its charter MUST be made up of enrolled undergraduate and graduate students at Cornell. It is a recognized student organization. I don't know how, or if, they could sell it as a non-profit. Theoretically WVBR-FM is a commercial license, and has never been run as anything but a commercial operation; however, its corporate charter has as its main purpose the professional training of college students in the broadcasting field. [I know this, having served as the station's News Director in 1972 before heading off to the Syracuse market to begin my life as a radio derelict and salary slave.] Is this a barrier to its sale to any entity other than another campus-related, student-owned organization like Student Agencies? Lawyers may have to answer that one.
But there is another bigger question about WVBR. Who would buy it and make it succeed? One of its chief competitive edges in the past, was that it was an integral part of the regional college community, in touch with Cornell, with Ithaca College (even more in those years than WICB), and the regional schools like SUNY Cortland, Wells and Elmira Colleges...it even had a significant audience at Hobart and William Smith colleges in Geneva 40 miles away. (The signal carried north surprisingly well.) Even now, with the market Arbitron-rated, and WVBR running a FAR more mainstream AOR format outside of its weekend specialty blocks than most campus-connected stations run, it's been a consistent #2 12+ and leader in its 18-34 target demo. Could another commercial owner maintain that link, and those numbers, or just reduce it to a nonentity by making it one more relay of a satellite music service?
I frankly don't think the station's salable, or that whoever is foolish enough to try to buy it will make it, because its ratings success (and the financial success which SHOULD be flowing from it, though I have no idea whether they're making the money they should be these days) depends on ties to the campus communities in the region which no commercial owner is likely to maintain. Its relatively weak signal (3000 watts) precludes competing effectively in the broader Southern Tier market. Its best coverage area outside the immediate Ithaca/Tompkins County territory (the Finger Lakes region to the north) is now much more saturated with competing signals than it was 25 years

ago, and served largely by signals from Rochester and to a
lesser extent, Geneva, Canandaigua and Syracuse.
Seems to me only another campus-based organization would
really be able to make a go of it, and who on the Cornell campus
other than the university itself would even have the money to try?
All of this is not to say the station won't be sold...just that if
it is, WVBR's future, if divorced of campus ties, does not look
very promising.

Happenings in the #40 market:

*A "Missile" lands in the Edge's silo....

WEDG(103.3,modern AOR;103.3 the Edge)PM driver Rod Ryan has left to take a job in Las Vegas. Kit Missile arrives from Chicago to handle the 10am-2pm shift(and started there Monday),bumping music director Rich Wall to the 2-7pm post. The Edge's lineup now looks like this:

6-10am:Ted Shredd/Tom Ragan
10am-2pm:Kit Missile
2-7pm:Rich Wall
7pm-mid.:Jason Ginty

Also,Lauri Githens relates a piece about Missile in her Buzz column in Thursday's(2/22)Buffalo News. Seems Kit needed a place to call home-and, ironically,it happened to be on the same street in Kenmore where former Buffalo State College student Wendy Kashuba was killed. She was assured that her residence was not the murder site.

*Githens also reported on the happpenings at CKEY(FM 101 The Planet), saying that it had gone from from being "the great hope of local alt-rock(to) ...a horrible cacophony of disco,techno-pop and Mariah Carey. Can they be far from adding the 12-inch remix of Tom Carvel pitching Fudgie-the-Whale cakes?" No,but I'd say a lot of things handicapped it from the get-go-including lousy audio processing and bad management. She adds that a number of posters making fun of the Planet have been spotted at the downtown nightclub Network, turning the station's logo into a stick figure,with one of its stick arms pointing a gun at its little head,saying "the station's slogan,'Niagara's New Rock Alternative',was changed to 'Niagara's Only Alternative',urging the station to pull a Bud Dwyer and shoot itself dead,in full public view if possible. Ouch." Aren't they doing that _now_,Lauri?

*Cross-state:

-The long-awaited move of WOLF(1490,Syracuse;urban)to FM is still a month away,but it's settled on its call letters:WXCD(CD 105.7),according to this week's Vox Jox column in Billboard.
-WAQX(95.7,Syracuse,AOR;95X)morning guy Ray Lytle is apparently being courted by a big market in the Midwest. Does this mean that The Fatman,Steve Corlett,will return for another morning go-round at 95X?
-WNKI(Wink 106,Corning/Elmira)MD Bob Quick is the station's interim PD, replacing Doug Guyer,who's leaving to PD a new top 40 station in Cheyenne,Wyo.
-WFLY(92.3,Albany,CHR;Fly 92)night jock Ellen Rockwell moves to PM drive. Meanwhile,former Fly MD Shawn Scott is said to be talking to WKSS(Kiss 95.7)

in Hartford about the MD job.(last 2 items from AllAccess)

*A number of cyber-items:
-Burlington,Ont.'s CING(107.9,dance;Energy 108)is on the Web at:
http://ns1.cdx.net/energy108/

-WNUC(105.3/107.3/107.7;new country)is Web bound at: http://www.wnuc.com/

-WHEN-AM/FM in Syracuse is at: http://when.dreamscape.com/ . For the AM
site,add 620.html after the slash;for the FM,add 108.html .

-WGRF(97 Rock)'s Anita West is on-line at: west97@aol.com .

Bulletin from market #45....

American Radio Systems announced this morning (2/23) that they are purchasing the Syracuse based Lincoln Group, Ltd. This will add WHAM-AM (1180 News/Talk); WHTK-AM (1280 "Hot Talk"); WVOR-FM (100.5 Hot AC) and WPXY-FM (97.9 CHR) to ARS Rochester holdings WCMF-AM (990 Sports); WCMF-FM (AOR); WRMM-FM (101.3 Soft AC) and a JSA with WNVE (95.1/95.5 Alternative "The Nerve"). Apparently, WHRR-FM (93.3 Classic Rock "The River") is not included in the deal. An AM/FM combo in Salem, Ohio is also included in the deal. No price has been announced as yet. More details as they become available!

2156. Springfield Mo RadioWatch (Post Script)

Newsgroup: rec.radio.broadcasting
Date: 1996-02-24 00:00:00 UTC
From: Bill P <rrb@clm.aiss.uiuc.edu>
Message-ID: <4gmbfq$51a@vixen.cso.uiuc.edu>
Source record: 25443

Hello again.

Just a couple things I recently discovered since my recent RadioWatch.

Near-rimshot KZPD (104.1 27Kw@328') 'The Gentle Beat' has apparently been sold. The buyer is unknown to me except that (he/she/it) is apparently from Dallas. The selling price was reported to me as being between 900,000 and 1 Mil. Not bad for a C3 rimshot. Perhaps a site change is in order.

Format remains as automated adult standards, but my source tells me there is a format change in the works (what else is new) which is likely to be some flavor of AC.

More info as I receive it.

==========

Been listening to KZBE (B-95 AOR) lately. I must say that this station *is* evolving rather quickly to fulfill the positioner of 'Adult Rock'. More deep cuts, long sets, decent formatics and a music mix that is sounding quite alternative in the best sense of the word.

It is obvious that they are fine-tuning the format, and are intending to appeal to a more adult demographic which wants to hear deeper cuts, less grunge and wider playlist consisting of a tasty mix of non-stale classics, non-frantic new rock and acoustic stuff as well.

They do have a couple of very jive, pretentious AT's. One of them sounds like the guy that interviewed Garth and Wayne in the movie Wayne's World-2... You know the type, an endless stream of bad radio cliche's and jive with a feigned attempt at sounding cool and musically knowledgeable. It is often painful to listen to this kind of patter. Losing these two dweebs would go a long way toward the final transition to a true adult rock format.

However, basically I like it. Which means that a format change is probably right around the corner <g>. It still baffles me why Channel-Z would program two modern rock-oriented formats that, while not the same, are similar enough that they will steal audience from each other. Maybe the logic is that either way the progressive/COR listener will be tuned to one of their signals, but I wonder if it will wind up hurting them in the long run.

I hope not, and I hope that B95 is successful enough to continue in the direction of Adult Rock. The market NEEDS someone like this on the air.

==========

If you are reading this, and are involved in the Springfield/Branson
radio scene, email me and we'll do lunch or something. Lets talk!

Bill

I had a rather odd experience recently. I, along with 3 other engineers, had the opportunity to compair the sound of a CD with a copy of it made on a hard disc audio system with 3:1 bit rate reduction. Both the CD and the HD copy were passed through a Dolby digital STL with AC-2 BRR as part of the audition. Our task was to identify which we thought was the original CD (which should, theoretically, sound better) after it passed through the DSTL.

In test after test, we ALL miss-identified the 3:1 HD recording as the CD. It seems that passing the 3:1 copy through the Dolby DSTL actually had some beneficial effect. Simply passing the unprocessed CD through the Dolby DSTL was actually worse!

I admit to being totally confused by this. It was not just on an occasional selection, but on all material auditioned with 100% repeatability. All four of us agreed, too. Note, however, that in this test, none of us had the original CD to compair to.

I offer no explanation, no theoretical discussion, and no further comment, except for this: It is apparent that different types of BRR may actually compliment each other. Certain other types, however, detract from each other.

Perhaps some day someone will try all the permutations and put together a chart of what works and what does not. Until then, the only thing for sure is that using no BRR will be guaranteed to sound best, though the differences might be very, very slight.

I'm sure there's a lot of history there at KFRE. I did some work
for them in the early 1970's after Walter Lake (as I recall his name)
bought the station from Triangle Publications (who owned TV Guide). I
was hired to rebuild the studio for a top 40 format.
When I arrived there, they were in studios that had been used for
many years. The existing control room had a big window overlooking a
large studio where they used to have bands perform. I don't know when
the station first went on the air, but it looks like it was quite a big
deal in its time. The studio audio equipment was all RCA vacuum tube
equipment. There were additional racks of vacuum tube equipment out in
the hallway.
Program audio was sent some 30 miles by phone line out to the 50 KW
AM transmitter site (which I had a chance to visit years later).
Triangle had owned the AM, FM and TV. These were split in the sale. The
TV continued to provide transmitter operators for a while for the AM
(using a Moseley PBR-30). One day, I heard, the FCC visited the AM
studio and asked about transmitter control. Rumor has it the owner said
"What transmitter?"
A couple people on the air at KFRE when I got there were Bill Web
and Bob Vincent. Bob had his "bicycle brigade" of listeners. I still
have one of the stickers on my bicycle. Bob later came over here to San
Luis Obispo, helped found an LPTV station, and is still in the area.
Bill also came over here to San Luis Obispo to become program director of
the station I was at (KSLY, "Famous 14", a 250 watt AM on 1400 KHz).
KSLY was one of three stations in town and regularly got a 67 share with
top 40 music and "Peterson..... and the news." Now there are more
stations that I can count. A really good station might get a 10 or 15
share. Later, KSLY was bought by Terry Robinson and company, who later

started the Transtar radio networks. Bill went on to Transtar as "Mike Web". We don't have a local Transtar station anymore, so I haven't heard if he's still there.
So... I'm sure KFRE has a LOT of history. You've just read a very small portion of the last 25 years of it.

Thanks!

Harold

K103 John works mornings doing radio news, and has trouble with his schedule:
Up at 3:30, work from 4 to noon, nap from 1 to 3, dinner at 7, sleep from 9:30 (or 10) till 3:30, and go back jack and do it again.

John, I live farther from my station than you do from yours and it takes me longer to s, s, s & s my s's than it does you, so I am up at 1, get to work at 3. Since I am, shall we say, rather senior, I have negotiated the right to leave after my last cast at 9, though I'm rarely out that early. Many, MANY years of experience at mornings has taught me that the only way to do it (for me) is to say, this is what I do, and I do what I have to to do it.
I go to bed at 5PM and get eight hours' sleep every night. I sleep in on weekends till 4 or 5, sometimes. No, it's not much of a life, and it's particularly hard when you have a family. My children are grown now, but they remember well that when they were small they had to be quiet starting about six o'clock so Daddy could sleep. If I couldn't do it that way, I couldn't do it.
The only things that make it worthwhile are the check and the fun of doing it. Neither one alone would be enough for me.
I wish you speedy recovery.

ST>Rush went national in July of 1988 with 66 radio stations via "Talkradio
ST>77 WABC" New York

Actually, Rush went national when the ABC Talkradio Network gave EFM Media the 12-2pm block of time on the network. ABC, at the time, was the sales representative for the show. It originated at WABC, but was distributed by the ABC Talkradio Network. It's still on the ABC transponder.

I was the Director of Station Relations for ABC and got most of the calls from stations inquiring about the show. Everyone thought it was an ABC program. Since it wasn't, I referred them to EFM Media.

Rich

>until maybe 1989 or 1990.

I think Rush had his big debut the first week of August, 1988. He did a two hour local show on WABC 10am to noon EST, then would turn around and do another two hours for the rest of the country.

Scott Gillen wrote the quoted material below:

" management is to put the recording engineer "me" and the talent
" voicing the spots or interviewer and guests in the same room. This
" would mean using headphones most of the day.

Dunno if this helps or not, but in the 1970s, KSFX radio here had the announcer and board op in the same room, but with speaker phasing done so that the board op could hear the air signal, but the announcer's mic couldn't pick up the sound. I don't know whether this is feasible for a recording studio, though.

Reply-To: ahermann@oucsace.cs.ohiou.edu (andrew hermann)

I am a junior at Ohio University studying Telecommunications. As of now, i am an audio production major, but have a keen interest in public radio. I work at our AM station (1340-AM WOUB) and over the past summer it was converted to an AM-stereo signal... Well, i had to decide on a topic for a paper in my Telecommunications Laws and Regulations class, and after looking through som trade mags, i found out that a national standard for AM stereo was passed in 1993. We had always studied about how Mark Fowler's FCC (under Reagan) decided to leave the competing systems for AM stereo to be decided in the marketplace, and that's why the issue died...

Well, i've searched all
over the Web looking for info, FCC documents (1982 and 1993), stuff about Fowler, stuff about the chairperson who set the standard, or anything else i could get my hands on. I have a bit of information from the library, but i thought i could add to it with info off the WWW. I would like to thank you for any help in advance, or just for your time in reading this....

We are to be rebuilding
> are production studios. A plan that has ben presented by
> management is to put the recording engineer "me" and the talent
> voicing the spots or interviewer and guests in the same room.

WABC Music Radio 77 had the jock on the opposite side of
the console when I sat in with Dan Ingram and Cuzzin Brucie
back in 1975 (or so).

I was suprised at how large the room was with a lot of glass.

The selection of music carts, which of course was
extremely limited, was behind the jock and I actually
saw Dan Ingram talking while at the same time reaching
behind him for the next music selection.

The mike stand must have been well-oiled because Dan
would hold it and move it around while pulling carts.

Back in those days, I swear they played OJay's Love Train
once per hour on Friday afternoons, even though it was
no longer a "hit-power" as they called it.

For a short time, they also referred to their local one minute
newscast as "Newsie-Dooz" (this came at 6 minutes
before the hour and led into the ABC network
Contemporary newscast at :55). I can't quite picture Bob
Hardt sitting in a studio with his big voice booming:

Newsie-Dooze First from W-A-B-C New York....
---
side note: Today I own a large discotheque in New England
which features "dance music" and the jock always plays
Love Train whenever I walk in (which is seldom as I'm usually
long in bed by that hour of the night). The young crowd is
not that familiar with it and they've asked the jock if it's a
new release ! Maybe Motown should re-release it ?

According to Ron and Ron on WSUN 620am in Tampa, Fl. the "Hooter's Girls" (B.L., Lynn Austin and Julie Williams) will return to local talk radio in the Tampa area on 760 am WBDN. The "Girls" made a appearance on the "Bad Boys" show did some shtick and the announcement.

While this is certainly good news for talk radio (which had the H-Girls and Bob Lassiter blown out of the water by the Fabulous Sports Babe and a local Sport show) questions remain about how well they will do without Fez, Ron and Ron's sidekick. My bet is the Fez-meister will make some regular "surprise" aappearances. When Fez and the Hooters Girls were on the show had that (feminine) glow.

There was no mention of air time though even as friends if the Hooters Show conflicted with R&R that would be radio-suicide. In any case we are part of the way back. If the Hooters Girls can make it back then Bob Lassiter can't be far behind ;). Maybe he'll join them at 760 ?

Which is another thing ... 760am is in Brandon east of Tampa. Anyone know how far it reaches???

Effective December 1, 1995, the FCC has allowed unattended
transmiter operation (with a provision that someone be able to turn it
off within three minutes). They no longer specify what parameters must
be monitored or how frequently.
You can find a pointer to the NPRM, R&O, and Federal Register on
this rulemaking under "FCC Resources" at my web page at
http://slonet.org/~hhallika .
In addition, Radio World is about to publish the first of several
articles looking at the new unattended remote control rules. NAB will
have a book on unattended operation at the upcoming convention. The FCC
SHOULD be releasing a notice shortly on operating unattended with EBS
(prior to installation of EAS). The notice has been in the works since
December, but has been caught in snow storms and government shutdowns.

2177. WVBR Sale

Newsgroup: rec.radio.broadcasting
Date: 1996-02-25 00:00:00 UTC
From: "Michael Black...WEOS-FM" <BLACK@HWS.EDU>
Message-ID: <4gpa1d$lju@vixen.cso.uiuc.edu>
Source record: 25314

The "sale" of WVBR seems to be just an onwership change of record, from the old board of Directors to the New Board of Directors of the Cornell Radio Guild. it was listed in the FCC's applications that way last week.

On another note: WVBR's Coverage is getting crimped a bit in the North end of the Finger Lakes. An 80-90 drop in at 93.7 is now on the air, WAAL (the Wall) licensed to Clyde, NY, is broadcasting an automated Classic Rock/AOR format, and is owned by George Kimble/Bob Martin who also have interest or own WGVA Geneva, WNYR Waterloo, WCGR Canandaigua, WLKA Cananddaigua, and a new FM in Bloomfield. The latter two are LMA'd or leased to WMAX with WLKA repeating the Rochester AAA station, and the Bloomfield programming a Jazz/NAC type format. I have noticed in areas that used to receive the WVBR siganl clean now gets adjacent channel splatter from the new station.

WGVA, WNYR, and WAAL all origonate their broadcasts from the WGVA studio/transmitter site in Geneva, after a falling out of George and his brother Russ, forced the WFLK studio move from the WGVA building to new studios on Hamilton Street (Rt 5&20). For awhile, WFLK was housed in the WGVA building and I have been told that the working relationships of the staff were quite volatile!

You're in Ithaca, aren't you? Sounds like you may be the best source
for that info. Let us know what you can dig up.

Is Cornell Community Radio the rumored buyer, or the current owner?
It used to be owned/run by Cornell Radio Guild, Inc. (a student-owned
membership corporation).

I just gave them a call. The person who answered knew nothing about
any sale or rumor of one. Yeah it's Saturday, but more than likely any
of their regular staff would know, if there was anything to know.

It's still being run by the CRG (Cornell Radio Guild). Still on the air
with main transmitter plus a translator. Business is tough, but with a
few exceptions, that's been their history for most of the past 38 years
(not counting the two or three decades of CRG history before WVBR-FM).

Regards,
Andy
(WVBR-FM alumnus, from the same time as Keith Olbermann)

Q2. You haven't mentioned OTR music, why not?
Q3. Where can I buy recordings of old radio shows?
Q4. Which vendors have (lower prices) (higher quality) (faster
response)?
Q5. Are OTR shows rebroadcast? If so, where and when?
Q6. I remember a great show called (x). When was it aired?
Q7. Are there any books about OTR?
Q8. Does anybody trade tapes of OTR shows?
Q9. What's this stuff about Copyright?
Q10. How can I get my local radio station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
Q16. Is there a World Wide Web page (URL) or FTP address that I can
access for more info?
Q17. Is there an email newsletter on OTR? How do I subscribe to it?
Q18. Can I get archived copies of old issues of the OTR Digest?
```

Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your FTP site?
Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?
Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1960's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band. There is also an Old Time Music on the Radio WWW page (apparently for Bluegrass music).

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from my OTR WWW site.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR Digest to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at my WWW site.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested

various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at the archive site, and my FTP / WWW sites.

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info, or download STATIONS.OTR from my FTP site. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR Digest, or look through the program databases (WWW or FTP). Also see answer A14 below. Please do NOT send requests to -me- to name or find specific programs for you.

Q7. Are there any books about OTR?

A7. Yes, there are many books related to OTR. See my WWW page or FTP site for a list of some of them.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119

Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR Digest. My WWW page has a database of private traders as well. Leave a note in the OTR Digest if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights have been renewed. Examples of the latter include The Shadow (Conde Nast) and some of Arch Oboler's productions. See my WWW site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Local stations may be able to redistribute OTR available via satellite downlink. Ask the station managers to check with either:

Collectors Radio Network (The Radio Vault)
1-800-739-7900

Yesterday USA (YUSA)
(214) 690-3636
YUSAOTR@aol.com

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices.

Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping.

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo. If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible difference. Other audio optimization features are of negligible value for OTR. Dolby HX also requires no playback decoder.

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and leave a note in the OTR Digest asking about local clubs for your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?

A14. Some of the OTR Digest subscribers have contributed Program Logs for several well-known series. The logs are available at my FTP & WWW sites. While you are there, check the online libraries; some collectors have very complete collections of various serials, and they are listed by name or date in their listings. I am currently compiling a database of contributed catalogs and libraries, which will eventually contain most of the readily-available programs for popular OTR series. At present, the database exceeds 90,000 records, and is searchable with your WWW browser.

The "logs and publications" entry in my WWW page gives names and addresses of several vendors of these items. It can be FTP'd as sou_pub.otr. (Thanks to RadioJoe5@aol.com (Joe Coleman)). There is also a Netscape table of logs and log sources at my WWW site.

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 95). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR Digest for inclusion in one of our databases.

Jim Widner and others have contributed some synopses / introductions
to various programs. They are on file at his and my WWW/FTP sites.

Many of the local and national OTR clubs maintain informational
libraries with this material.

Q16. Is there a World Wide Web page (URL) or FTP address that I can
access for more information?

A16. Yes, there is a growing number of WWW sites, as well as FTP sites
and a Gopher. Each site contains different information, so you
might want to visit them all. The sites listed below are good
places to start, since the major OTR WWW pages have links or
pointers to each other. If you learn of any others, I'd
appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.old-time.com

FTP:
ftp://old-time.com/pub/lgenco
(under development)

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: pub/AIRWAVES/OTR

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Yes. The Internet OTR Digest is a freely available electronic
newsletter, mailed every night to subscribers. Traffic has
increased considerably, and the digest is usually mailed more than
once a day!

To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR Digest?

A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible via:

FTP: radio.aiss.uiuc.edu (directory /pub/AIRWAVES/OTR/)
GOPHER radio.aiss.uiuc.edu 7070 (select OTR)
Web http://radio.aiss.uiuc.edu/~airwaves/history.html#archive

Readers with a WWW browser can access a "smart" archive program. This program can sort and display old OTR articles by author, subject, thread or date submitted. Just the thing to use when you want to catch up on a discussion thread, without plowing through a lot of extraneous material. To access this service, point your browser at: http://radio.aiss.uiuc.edu/~rrb/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the takeup reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This may lead to a greater loss of signal (particularly high-frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate

in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibilty with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my

customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

From: ErikS74342@aol.com

I'm using a brand-new dubbing Sony deck that has given me terrific results over the last three months. (Sony TC-WR565, about $200 at Circuit City). It's a dual-motor model, with precise LED volume meters and tape counters. It is one step below Sony's best dubbing deck, which offered few additional features for an additional $70. I wouldn't recommend Sony's entry-level models, which skimp on the details. This deck automatically encodes tapes with Dolby HX.

This particular deck comes with a pitch control that can be used to correct pitch problems with master tapes -- a godsend when working with too-fast reel-to-reel source

copies. (Sony also offers the TC-WR465, without the pitch control, for about $20 less. Believe me, it's worth the price.)

To reset volume levels and correct other deficiencies with master tapes -- yes, you need a second cassette deck and a graphic equalizer.

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO <click> TWO <click> TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake the tape and immediately make a copy. But if you forget to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. A pointer to his FAQ may also be found at my WWW site. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m)
- Focusses on radios, phonos, and related materials made
before the 60s
- Avoids "ham" radio gear (the Boat Anchors group
covers that)
- Has a -very- comprehensive FAQ that new folks should read

Several museum sites are available at my WWW page. The WWW
site, "The Bellingham Antique Radio Museum" is also available
directly via URL http://www.pacificrim.net:80/~radio/ This site
contains info and GIFs on old radio hardware, as well as
soundclips of OTR show intros.

The University of Maryland also has a WWW site entitled "Broadcast
Pioneers' Library". This is an excellent resource for the serious
/ professional researcher. It can be accessed through my WWW
site, or directly via the URL:
http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware
resources may also be found at my WWW site.

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an
excellent choice for picking up distant AM stations that carry OTR
programming. Although the tuning dial has notoriously poor
calibration, the sensitivity and selectivity seem superior to other
radios. A SuperRadio FAQ is available via my WWW site.

-Some- readers have had good success with the Select-A-Tenna
antenna advertised in several magazines, and the Grove Catalog.
The S-A-T seems to be rather directional, and may eliminate
off-axis interference.

Ham Radio magazines sometimes carry information about small loop
antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left
this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, drop me a stamped,
self-addressed envelope:

Dan Hughes
WPCD, Parkland College
2400 West Bradley Ave
Champaign IL 61821

If you are interested in AM Broadcast Band reception, and
technical artlcles related thereto, send a SASE to the following
address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at my WWW site):

Atlanta Radio Theatre Company: http://www.webamerica.com/artc
ZBS Media http://www.zbs.org/zbs.html
LodesTone Productions
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop?
http://www.thoughtport.com/tpa/non/mrtw

There is also a mailing list for folks interested in current radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at your FTP site?

A24. Maybe. There are several FTP-by-email servers. Contact one of them for instructions.

ftpmail@decwrl.dec.com
with no subject line,
and two-line body with line one help and line 2 quit

ftpmail@grasp.insa-lyon.fr
(body: help) Please, European users only.

bitftp@pucc.princeton.edu
(body: help or ftplist for a list of anonymous ftp sites)

BITFTP@DEARN or BITFTP@vm.gmd.de
(body: help or ftplist for a list of anonymous ftp sites)
(Europe only)

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at MIT, and is available from the MIT mailserver. For more info on how to get files by email from MIT, send a message
TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

WWW pages can also be retrieved by email. Contact
agora@www.undp.org for more information

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where
can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained
to OTR topics. Folks interested in early TV shows might be
interested in this note from Kathy O'Connell
(oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman
named Linda has just started a list devoted to
50's-60's Television. You can contact her at
LEEKNIGHTS@delphi.com I signed on immediately, and
it's a wonderful place to meet other people
interested in this subject. Very much like the OTR
list, but for television!!!

Q26. I have never heard "Old Time Radio". Can I get an audio sample
via Internet?

A26. Yes, if you have a suitable WWW browser and sound card. Connect
to any of the WWW sites mentioned above, and follow the pointers
to their audio clips and / or soundbytes. Most of the soundbytes
can be downloaded, and played on your computer's sound card.

Q27. I have lots of loose OTR cassettes filling my drawers. Is there
a better way to store these things?

A27. Collectors with lots of cassettes seem to use just about
everything from "underbed cardboard storage boxes" to old soft
drink cases. If you want your collection to have a more
"professional" look, here is a note from Ron_B._Hare@livewire.com
(Ron B. Hare)

You almost need to buy cassette albums from
specialty suppliers. Radio Shack used to carry a
small line of these and charged too much. We are in
the recording studio business, and receive catalogs
from several sources. The one one I like best has
some of the lowest prices and unhesitatingly deals
with individuals and will take your credit card
number over the phone for instant shipment (in
contrast to some who require account setup, purchase
orders, prepayment, cash and other nuisances).

Polyline Corporation
1233 Rand Road
Des Plaines IL 60016
(708) 390-7744
FAX (708) 390-9886

or, their West Coast branch (where I got mine)
PolyWest Corporation
16018 Adelante Street, Unit C
Irwindale CA 91702
(818) 969-8555
FAX (818) 969-2267

They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in white and CPCN.4+4M/RBLU in royal blue. Outside dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.

I paid $2.11 each plus tax and shipping for my latest batch (November 1995). The minimum economical order is 40 albums. You can order smaller quantities, but the price is $4.68 EACH. Check with Polyline before ordering. The prices change frequently.

Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to read your page?

A28. Yes. Although my WWW page is best viewed with Netscape, I also have a text-only menu that might be easier on your reader. Use the URL http://www.old-time.com/txtindx.html

There are many blind OTR collectors who might be able to help you as well. Two experts in OTR as a hobby and Internet / computers are: Henry Brugsch <henry@g0gku.demon.co.uk> and Ronald Staley <rstaley@netcom.com>. One or the other would be able to help you use your computer and reader to access my pages or maintain your OTR collection.

2181. Infinity buys Advertising Company

Newsgroup: rec.radio.broadcasting
Date: 1996-02-25 00:00:00 UTC
From: Bill Kleronomos <wkleros@csn.net>
Message-ID: <4gpa0q$lip@vixen.cso.uiuc.edu>
Source record: 25380

>From the Denver Post of 2-23-96:

In its first deal outside the radio industry, Infinity Broadcast Co. said yesterday it had agreed
to buy TDI Worldwide, a privately-held company that dominates big-city transit advertising in the USA and Britan for $300M in cash and stock....Last year Infinity had revenues of $325.7M..., TDI had revenue of $262M .....

In response to this unusual development, the Federal Communications Commission is reported to be
considering rules that will restrict Infinity-owned ads to no more than 50% of the cars in a given
subway train, half the taxicabs in line at major airports and no more than eight restroom stalls
at JFK airport. The newly-appointed Infinity director of restroom advertising, Mr. Howard Stern,
has vowed to fight these proposed regulations at a special meeting of the FCC commissioners.

(uuhh, only the first paragraph accurately quotes the Post article.....)

-Bill

2182. San Diego Radio Watcher 2.24.1996

Newsgroup: rec.radio.broadcasting
Date: 1996-02-25 00:00:00 UTC
From: San Diego Radio Watcher! <sdradio@znet.com>
Message-ID: <4gpa0q$liq@vixen.cso.uiuc.edu>
Source record: 25381

San Diego Radio Watcher: 2.24.1996
"It's not the length of the stick, it's how you use it."

**KFMB comments on rumors that the AM/FM/TV are for $ale:
Chris Meyer, owner of KFMB, at a staff meeting;
"These stations are NOT for sale!"

**XTRA XTRA: I'm told by station officials that soon-to-be
owner JACOR has additional property in mind for the San Diego
market. The first paragraph indicates that Midwest TV's
AM/FM/TV combo is not on the block, but recent trades indicate
that "stations" are printing money again. . . .

**I CAST MY VOTE FOR: RockMix 103.7 [KMKX] has a new ad campaign
on the station -- that's quite funny. It's a good barb at the
upcoming election, uses sound bites to promote RockMix 103.7. I heard
Sen. Dole explain his views on radio in a nicely-edited piece Friday
afternoon during Dan Lopez's drive. Check it out at:
http://www.kmkx.com

**San Diego Tribune, page B-10, San Diego [city] editon on Tuesday:
Paid ad by the Catholic League protesting the Dave, Shelly
and Chainsaw segement called "Lash Wednesday."

The team is heard on KIOZ-FM, Oceanside, 102.1.

The ad in part:
"it is a deliberate mockery of Catholicism. . . . The segemnt
features an insulting ridicule of one of the Catholic Church's
sacrements."

"Lash Wednesday," according to the ad, invites callers to report
their worst sin.

Thursday's SD Tribune indicated that the morning team of Dave,
Shelly, and Chainsaw would donate the cost of the ad to the
Catholic League -- nearly $3,400.

**Rock 105: I'm told from the hard-rock choice of San Diego that
the change from 102.1 to 105.3 should "happen at the end of March --
if not sooner." Presently, SETS-FM has the 105.3 spot, but will
shift to 102.1, Oceanside.

On the AM side of the house, KCBQ-AM continues with prep basketball
coverage -- at least until the end of March. Par Broadcasting,
according to the Oceanside Times-Advocate, has not expressed in interest
in the remote broadcasts.

**BEATING A DEAD HORSE: KMAX, the "so-called" sports station based in Los Angeles at 107.1 FM, will continue the sports format. I call it a "so-called" sports station, because, as it's said: "They just can't suck enough."

**IMUS! I caught the replay on CSPAN . . . But he did look the worse for wear. As a poster to the alt.fan.Don-Imus newsgroup, "How can a man who promotes vitimans, be sick so much?" I hope to see more of the [well] I-man on C-SPAN this election year. Nobody does political satire better.

2183. Western NY Radio Watcher; Monopoly in Rochester

Newsgroup: rec.radio.broadcasting
Date: 1996-02-25 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <4gpa0r$lir@vixen.cso.uiuc.edu>
Source record: 25382

Reply-To: talk1370@aol.com (Talk1370)

When Congress enacted the Telecom bill it may or may not have intended some radio markets in the top 50 to become virtual monopolies for one station owner...but it has just happened in Rochester, NY.

Boston-based American Radio Systems, which already owned WCMF AM-FM and WRMM(FM) in Rochester, has just cut a $30 million deal to buy the four local stations of the Lincoln Group, a regional outfit which owned clear channel WHAM (AM), WHTK "Hot Talk 1280," and two prominent music FMs, CHR WPXY and AC format WVOR. This will literally give ARS control of stations with a majority of the commercial 12+ radio audience in a market of over 1.1 million population, a level of concentration not seen in any other top 50 market.

ARS believes that to comply with the rules, it will have to dump one of its AMs (speculation centers on WHTK because it has the poorest signal of the three). It also has a decision to make on whether to hold on to WVOR(FM), which has performed poorly in recent years but has arguably the best signal in the market, or dump WVOR to another company and exercise its option to purchase alternative format WNVE(FM), known as "The Nerve", which has done well since its format change last year. The decision will not have to be made immediately, since the option on "The Nerve" is open-ended and is tied to an ongoing joint sales agreement.

And it won't be an easy one. 'VOR, properly programmed, has better coverage than any other Rochester FM because of its antenna location (on the Monroe/Ontario County border, on a hill just inside the town of Victor) and more potential. But it'll take a format change and heavy promotion and air talent investment to make the most of it. "The Nerve" has signal problems (its transmitter is also in Ontario County but it needs a translator to cover areas of downtown Rochester) but it's attracted quite an audience. And once they dump the expensive Howard Stern morning show and go with a local morning show that's more music-intensive (which may happen this summer) they'll probably be even stronger and more profitable. Maybe a frequency swap that brings The Nerve's programming to WVOR's channel might be worked out, or some other format for 'VOR pursued and the option dropped...there are a lot of possibilities. This may be worked out soon, or may take a year or more to unfold...stay tuned.

Meanwhile the sale has already had some repercussions. Jack Palvino, long time WVOR/WHAM VP and general manager, says he will retire in a couple of months after supervising the transition.

His replacement for the former Lincoln Group stations has already been named; he's Ken Spitzer, who was already GM of WPXY and WVOR. Palvino had a minority equity stake in the stations which should net him a couple of million dollars out of the $30 million package price, so he'll probably be in no hurry to find work. Spitzer will undoubtedly retain Clarke Ingram, who he picked as OM for WPXY and just recently gave a contract with expanded responsibilities including the retooling of WVOR. Ingram has made progress at both stations, and has done especially well in expanding WPXY's demographic reach. But the fate of his counterpart at WHAM, Jeff Howlett, is unknown. Howlett was a close friend and longtime colleague of Palvino, and he did oversee the station's transition from full-service to news/talk. But his tenure, while not without its successes, has also been marked by controversy over programming policies that gave WHAM a partisan (ultra-conservative Republican) image in a moderate and very closely divided market, and an audience demographic considerably older and more downscale than its format rivals. And his efforts to build an audience for "Hot Talk1280" big enough to supplant WXXI-AM as the market's #2 talker were unsuccessful, and ended with the decision to drop Imus in favor of a bartered business news block. So it's hard to say if Spitzer will want to keep him, or put a less controversial figure in place to take WHAM in a different direction and broaden its message and appeal.

And WHAM evening sports host Bob Matthews, angered over the change and furious he wasn't told it was in the works, quit on the air during last night's program. He pointed out that he had a "real job" (his post as a columnist and sports reporter for the Democrat & Chronicle and Times-Union, the city's two daily papers) and didn't need the show. He also announced that while he enjoyed talking with the listeners, he "didn't care" what the station did to fill his slot starting Monday night (2/26).

It may be worth noting here that others at WHAM contacted by me and my colleagues, who requested their names not be revealed, had a different reaction to the sale from Bob Matthews. They are anything but critical, some even celebrating. Many of the station's air staffers and news people were unhappy with station management and direction, and with its very negative and partisan image in the community. These problems may or may not be addressed by the new ownership.

I've never worked for ARS, but I'm told it's regarded as a decent company to work for, and it allows the management of each of its stations a lot of local autonomy. That may mean a free hand in dealing with both personnel policy and editorial policy. What that will produce both internally and for the listener, we'll have to wait and see...

Bob Smith, middays WXXI-AM 1370 Rochester NY

I'll tell you why stations are going alternative:

Top-40 is based upon recordings which have the highest sales in record stores. In the past few years, this market has unfortunately become highly segregated. Both rap and alternative music are selling big in record stores, but when you put these two together on a music chart, and have a station that plays music off that chart, it doesn't please anyone. The rap listeners don't like the hard rock and vice-versa.

Back in the early 1980s, Top-40 would bring listeners TOGETHER as opposed to segregating them. For instance, a song like "Let's Dance" by David Bowie would please both dance AS WELL AS rock listeners.

But things aren't the same today. Unfortunately, there aren't many "mainstream" top-40s left, mainly because the format is not as viable as it was in the 80s, for instance. So stations have to choose a side, either a "rap" or a "hard rock" approach. So in NY, for instance, we have "Hot 97" and we have "Z100". Maybe it's a phase, because a similar thing happened in the '70s with Disco. You either liked it, or you thought "Rock Ruled" and "Disco was Dead."

Hopefully, mainstream will find a place in the hearts of all Americans once again someday. But for now, who even cares to watch the grammy shows?

That's my 2 cents. (hopefully it's worth more).

2185. Re: Bit Rate Reduction - (was Digital Recording Possibilities (need advice))

|: a hard disc audio system with 3:1 bit rate reduction. Both the CD and the
|: HD copy were passed through a Dolby digital STL...
|: ...we ALL miss-identified the 3:1 HD recording as the
|: CD.... Note, however, that in this
|: test, none of us had the original CD to compair to.

Not a big puzzler. Apparently, the hard disk's 3:1 compression simplified the data enough that the Dolby dstl's compression didn't have to mangle it too much.

Remember, all lossy compression schemes -- including the hard disk's, the dstl, MPEG, DCC -- rely on psychoacoustic tricks to eliminate data that 'average people can't hear'. As such, it's an inexact science... and no two schemes make the same assumptions about average hearing.

So what you've proven is that the hard disk's system does a smoother job of eliminating data, for your ears, than the dlst does.

Unfortunately, we still don't have any objective measurements for this. And many combinations of lossy compression make things a lot worse.

TH>sort of book about radio market shares and such.

"The Book" generally refers to the Arbitron rating book. Each rated market gets a compilation of ratings of stations in the market, once, twice or four times a year, depending on the market size. Within the survey period we get "mini books" called Arbitrends that have a three month rolling average.

2188. East Coast Association Of Country Music Broadcasters

Newsgroup: rec.radio.broadcasting
Date: 1996-02-25 00:00:00 UTC
From: ronkr@pipeline.com
Message-ID: <4gpa0v$lj2@vixen.cso.uiuc.edu>
Source record: 25387

A friend of mine is attempting to organize an association of Country Music Format Stations on the East Coast from Maine to Florida. This association has nothing to do with the recent demise of the country format in the NY area.

Anyway, they asked if I could try to compile a list of stations in this geographic area that do broadcast the country format. If you could send me the location, frequency, band, and call letters (via e-mail - don't want to tie up the newgroup with posts of this nature.) I'd certainly appreciate it as I'm trying to compile a list for her.

Alternatively, if there another, easier way that I might be able to obtain this information?

Thanks for your help.

Ron

Thanks Nate,

What a level headed reply. Yet, I find the replies on rec.radio.broadcasting to be far more level headed than on other newsgroups. (Probably the result of the Moderator - Thanks!)

The situation that you described regarding many rock stations shifting to country was perceptible to me whenever I travelled, and, I'm talking about areas as urban as NY (Boston, Detroit, Chicago, LA etc.) This led me to believe that Country (at least what I refer to as HNC - Hot, New Country, was growing in leaps and bounds.) Made the surprise of losing the ONLY MAJOR outlet in NY that much greater. But, your perception of saturation does provide some new insight. It just doesn't seem to be applicable in THIS market, even if it is the case elsewhere.

Let me tell a brief story (if I'm allowed to here). I was ALWAYS a rocker up until a couple of years ago. I had tried country in the past but didn't find it very appealing, finding that I had to suffer through a lot of music that I didn't like to get to one or two that I did. But, a couple of years ago, I turned my dial to 103.5 again, and, wow. What a difference! HNC was NOW Rock n Roll and Country "mixed" together, AND, as a bonus I could understand the words and the story contained in just about every song. I was hooked and have been an EXCLUSIVE Country Fan to this date. I even tried going back to my old stations, here in NY. Can't do it. The appeal is gone. Country became such a significant part of my life that it's absence leaves a gaping hole. I turn to whatever local source I can get, when I can get it, since its availability is severely curtailed, now, by broadcast times and limited local signal strengths, and, I continue to build on my collection of albums.

I tried to look at this from an economic viewpoint. I knew NOTHING about the radio market a few weeks ago but I'm getting an education and I do have a degree in Economics. I looked at the numbers which were publically available for WYNY and they said it was making money. Combining that with my perception of "growing" popularity for HNC, I assumed the growth would continue. (I still don't know that wouldn't have been the case here in NY. Many of my friends had recently crossed over from rock or jazz or whatever to country (HNC variety) and claim to be as upset as those of us who have been country fans for a longer, some much longer than me.)

Anyway, it's been just under 3 weeks and I've experienced a ton of frustrations already. It does seem like a lot longer. But, I'm adjusting and will survive this. But in the meantime, if I see an opportunity to promote the format (strictly from a marketing standpoint) then I'll do it. The way I figure, if it gets all that bad, I can always move closer to the saturated areas. :)

Thanks again. Your response was much appreciated.

Ron

I don't know what will happen, if anything. But, for the first time in my life, I felt compelled to try to DO something about it myself instead of sitting back and let someone else do it for me. That's counter to the rest of my life where I've always been a very private and conservative person and tried to stay with the mainstream just to conform (even though I knew there was something else I should embrace.) I NEVER called the country station until that last weekend before they went off the air, and, after dialing their number about 800 times (at least it felt that way), I finally got to thank them and to wish them good luck, which was the only purpose for my call.

Probably the only way to properly talk about these beasts is to specify
the ERP in the minima, or a specific monitoring point reading (which
will give a relative idea, based on TPO).

For example, it is easier to compare a station with 2.2 mv/m at 2 miles
with one at 5.7 mv/m at a similar distance.

Sure that's easy. The front end of your receiver has 2nd order IM (inter modulation) problems with strong signals. Notice that 570 + 1080 = 1650. The two carriers are mixing in your RF stages. This seems to be a major problem with many AM receivers today, cost, not performance seems to be the watchword in AM receivers today.

KYW is a Group-W Westinghouse station. To the best of my knowledge, all AM's in Group-W do this. Not only the top-of-hour tone, but the apparent lack of network news. Group-W's station near me, KDKA, Pittsburgh, also does this.

I say apparent, because the hour-top news is filled with sound bites from their network. Probably even have the local anchor read the stuff that the network anchor reads around the same cuts. I'll say this for this format, it truly allows them to balance the proportion of local news to non-local news. Great for days when national news is a yawn, but there' something big locally. I wanted so desperately to do this at a small-town NewsTalker, once, but the manpower factor bit me. Had to settle for second best: a little local headliner/teaser into network. I even thought about cutting out the last minute of network news, so that the network's punctuation wouldn't make listeners think that news was over, and they should turn their attention elsewhere.

> My dad, who lives in Philly once told me he'd be lost w/o that BEEP. Every
> morning he has on KYW. Some days he's really listening, somedays it's just
> on in the background, but once that BEEP happens at 8am, he knows that he
> has to leave in the next minute or two to catch his train, or he'll miss
> it!

Talk about a prime example of a feature that teaches listeners not to listen! I understand that a top-of-hour tone can be a service. In fact, I personally think it's a cool thing to make your station sound like a local "standard-bearer". (I even used to enjoy the tone that Hearst's then CHR station in Pittsburgh used in the '80 - yes, Ted Atkins was here! [btw, this is not a cut, Mr. Atkins was a role-model for me!]).

But, the detrements seem to outweigh the benefits. "Hey Mr. Listener: You can ignore our announcer telling you the time (and our sponsors), we'll give you a tone! In fact [pause], it's coming up now... at the tone [boooop], it's time to turn off your radio, and turn on Oprah!"

Of course, with the desperation for unique niche formats for AM, I guess it's only a matter of time until there's an "All Time" format! :)

Here's a couple of slogans:
"All Time, all the time..."
"We've got the time for you..."
"There's no time like our time..."

"Give us twenty minutes, and we'll give you a third-of-an-hour..."

Boy does this date ME. Tom Stelzer was a fellow graduate (June,
'72). Unfortunately, I heard he passed away a couple of years ago. I
also understand Brad Larson (June '72) ended up teaching at Brown.
Might interest you to know that Roy Finden was an instructor in '72,
so he's been a fixture for awhile.

>thought "Rock Ruled" and "Disco was Dead."

I agree with everything you say as far as the music fragmentation as a
reason for Top 40 format's decline. I 'd like to add and ask:

1) how come there is not much *fun* on the radio any more?
Regardless of format, it feels like most stations are now juke-boxes that
play song-after-song.. I remember times when I would just turn the
radio on to put me in a high spirit or in a partying kind of mood...
(upbeat jocks, outrageous promos, really creative stuff and liners, rolling
flow, drop-ins..., listener-involvement..)
Well those days are long gone...

2) I hear all the time the argument that... radio is no longer
targetting the 'kids', therefore, the luck of that distinctive
'top40 sound' (=high energy delivery). Well, although I agree to
an extent, dont try to convince me that highly upbeat shows -- such as
the 'Friday 5 o' clock whistle' (a celebration of weekend kinda show
for office workers primarily) was aimed towards kids; it was clearly
aimed towards 24-34 age group.. Yet, it was a class of its own...

3) I can relate to the fact that music trends come and go, yet, I wont buy
the claim that the *lifestyle* profile of listeners has changed so drastically
in just a couple of years.. (I remember having 2-3 funloving
stations in most major markets in 91, yet 1992 signed the end of most of
these stations). [of course, most top-40 stations are fun-loving, by
nature, but fun-loving is *not* confined to top-40 exclusively]

4) Look at OLDIES stations... most of their listeners are *older* people who grew up with those songs, yet, their delivery is so upbeat and energetic. (Take a look at Wolfman Jack Shows, and you 'll notice what I 'm talking about.)

Bottom line... you can try the 'Mix', adult-like, pseudo-mature, etc whatever you want to call it approach, but dont expect *me* to listen to the radio any more. Apart from a few truly *noteworthy* exceptions, it is B_O_R_I_N_G. In case you wondering about my age group, try again... I am past that age..

Chris

#I recently returned to my old stompin' grounds here in Ocala, Florida,
#and was distressed to learn that there is now what appears to be a low-
#power translator on 99.3 for the Bible Broadcasting Network. Great!
#This has the effect of eliminating my reception of three important
#stations that I need to keep track of [...]

#[Moderator's Note: They are legal pirates, Drew. They have the same
#(or greater) power as the pirates and they originate no programming.
#Some translators have many hundreds of watts from mountain-top sites.
#Plus, the translator rules allow satellite delivery for non-comms. And
#I know of several non-comms that have no problem 'selling' blocks of
#time to radio-evangelists who hawk tapes and books and all sorts of
#merchandise. Some of these so-called 'translators' are repeating
#stations hundreds or thousands of miles away because of satellite
#delivery. Sad, really, that we disalow local community stations but
#allow these translators to flourish like a cancer on the bands. Makes
#a fellow wonder. Bill]

1. Other entities besides religious stations have translators. I've heard KOST-103.5 on 106.3 in Simi Valley, and KXEZ 100.3 on 100.1 in Santa Clarita (both suburbs about 30 miles out of Los Angeles.) There are probably others.

2. I have no comment about specific programming activities of any stations, since I don't believe that one class of format is necessarily morally better or worse than any other.

3. The issue of local community stations is good, but we need the debate joined by more of the public. Radio enthusiasts alone won't do it. Radicals (e.g. Dunifer) hurt more than help.

OTR (OLD-TIME-RADIO) Newsletter Created

OTR, the electronic newsletter for folks who enjoy the hobby of
collecting and listening to nostalgic radio programs is now
online and accepting new subscriptions.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

Some of the covered topics include (but are not limited to):

Lists of radio stations broadcasting OTR.
Lists and critiques of OTR tape vendors.
Contents of personal libraries / collections.
Offers to privately exchange recordings.
Critiques of individual or serialized programs.
Discussions about radio dramas / mysteries / adventures.
Hints on re-recording and preserving audio quality.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

If you fondly reminisce about some of the programs you heard during
the "golden age of radio", would like to learn more about programming
on the "TV without a tube" that fascinated your parents, or would like
to contribute your topical expertise, send in your subscription
request now.

Are you interested in the "Modern Day" radio dramas and how they
compare and contrast to the 'Golden Age" of radio? If so, then OTR
is for you.

Subscribers will receive daily mailings of contributed articles
in a digest format. OTR is a very active and friendly place where
the coffee is always hot and the information plentiful

2205. Chicago Radio Watch 2/25/96

Newsgroup: rec.radio.broadcasting
Date: 1996-02-26 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <4gs40n$b90@vixen.cso.uiuc.edu>
Source record: 25317

Rumors we expected to come true.....

Long time radio guy Dan Fabian has resigned his position as General Manager at full service WGN-AM. As reported in the previous posting, station insiders suspected a change was imminent when former GM Wayne Vriesman moved into Dan's desk while he was "on leave". In typical Tribune management style, they denied a change was going to happen. But...ooops, earlier this week Dan resigned and Wayne was appointed temporary GM. What a coincidence....

Samantha James, who had been handling middays at alternative rocker WKQX-FM has left the station. Samantha could see the writing on the wall. Her shift had been reduced to one hour each day when she hosted the "retro flashback lunch" which was the stations attempt to show that alternative stations can overplay the same songs with the best of them. Samantha left the station to pursue a career in public relations.

Garry Meier is once again a member of the WLS-AM family. Garry, who worked at the station with former partner Steve Dahl now teams up with Roe Conn from 2 to 6 each afternoon.

Money talk......

During 1995, Chicago radio generated $319 million dollars worth of advertising revenue. Here is a breakdown by station..

WGN-AM 35.8 million
WUSN-FM 23.5
WLUP-FM 19.6
WGCI-FM/AM 19.3
WMAQ-AM 18.6
WBBM-AM 17.3
WLIT-FM 16.0
WVAZ-FM 14.2
WJMK-FM 13.9
WKQX-FM 13.8
WNUA-FM 12.8
WBBM-FM 11.7
WCKG-FM 11.0
WRCX-FM 10.2
WTMX-FM 10.0
WOJO-FM 9.5
WPNT-FM 8.8
WLS-AM 7.0

Three media conglomerates, Evergreen (LUP,VAZ,NUA,RCX) Infinity (USN, JMK) and Westinghouse/CBS (MAQ, BBM AM/FM) play a big role in Chicago advertising. Interesting that WLUP finished third in advertising dollars spent despite mediocre ratings. Just goes to prove demos matter much more than numbers. Talker WLS which attracts an older crowd generated about 1/3 of the revenues of LUP.

Although WGN generated the most revenue, they also had to shell out substantial rights fees to maintain the broadcast rights to the Chicago Bears, the city's favorite sports team. WGN also broadcasts the Chicago Cubs which is part of the Tribune family.

Welcome to....

D.J. Armstrong who had been logging time at WZOK-FM in Rockford joined WGCI-FM on the overnight shift. D.J. also handles traffic reports on Steve Harvey's morning program.

Huh????

WMAQ-AM has added an hour to the worst sports talk show in Chicago. "The Sports Huddle", which is shockingly awful, can now be heard nightly from 7 till midnight. "When Radio Was" moves from 11 pm to the midnight hour.

>From today's addition of Jarry Radio Services prep pages -

LAST MINUTE NEWS ADDITION:

DENVER, CO>

Jarry Radio Services has learned, from a reliable internal source, that 92.1
KNRX (Century) will trade hands and become KS-92 at 12:00am MST. A complete
swap and format change for both stations will happen at this time. KNRX has
been purchased by Excel. KNRX sister station KQKS (KS-104) leaves Century
and returns to former owner Western Cities. The stations will swap
frequencies and KS's former 104.3 frequency will become satellite CHR.

Excel also got KYBG-AM (sports) in the package. They will become Spanish.
No news on when the formats will change, but it will be within 30 days.

***If you have any news or wish anything sent to JRS' readers - please email me or Jarry@wizard.com

MACAMERICA GETS KTWC: Seven months after the deal, the FCC has given approval of the sale of MOR KTWC(103.5) from Newmountain II to MACAMERICA, which also owns AC KESZ(99.9). Closing is expected the beginning of April.

KVRY PRANKS: A mysterious "ear" billboard campaign turns out to be Alternative KZON(101.5)'s..but HOT AC KVRY(104.7)took advantage of the mystery to promote "when you see the ear, tune to 104.7." The station, rumored to be about to return to its former identity of KZZP, also has its jocks saying they're filling in for certain people.. then giving the real air names of Power 92 jocks.

DR. LAURA SCHLESSINGER MOVES
FROM WIBV TO KSD ON FEB. 26;
FINAL LAYOFFS AT KMOX

by Scott Simon

ST. LOUIS --- As first reported here in AIRWAVES a month ago,
Dr. Laura Schlessinger's show will move from WIBV to KSD on Feb. 26.
It will air in real time from 1-4 p.m. CST.
The show's syndicators told WIBV they preferred being on the air in
the market live instead of being tape delayed for broadcast between
7-10 p.m.
No word yet from WIBV who or what will replace the Schlessinger
show.
That time slot at KSD-AM had been filled temporarily by program
director Steve Moore, and traffic reporter Dan Strauss. Both will
remain at the station in their normal capacities.
The most interesting comment about KSD-AM came today from "Dollars
and Sense" host Dave Simons, former weekend sports anchor at Channel 4
and the author of two books, who now works in certified financial
planning.
"I am not being paid to do this program, nor am I paying (KSD-AM)
to be on the air.
"It's like a lawyer doing pro bono work."
The message? Applicants wanting a paycheck need not apply.

Two more KMOX employees were laid off earlier this week, part of
the mass layoff on Feb. 16.
News reporter Daryl Lloyd and do-it-all writer and producer Jon
McSweeney got their notices when they returned to work following the
weekend.
The layoff was widely reported in St. Louis, as lead stories on
FOX 2 and News 4. St. Louis Post-Dispatch columnist Bill McClellan took
on Rod Zimmerman, general manager of KMOX, with this stinging
observation:
"From the start of Zimmerman's tenure, it was clear that he didn't
have a vision. At times, it seemed like he didn't have a clue.
"He hired J.C. Corcoran, then the local bad boy of radio, and when
Corcoran performed as he had always performed, Zimmerman fired him."
"He said the cuts would make the station 'more competitive. Our
listeners will not hear a difference,' he said.
"Sadly, we already have," wrote McClellan.

2209. Airware (tm) now Shareware

Newsgroup: rec.radio.broadcasting

2210. Anyone with original AT40s,CT40s,Dick Clark,etc.?

Newsgroup: rec.radio.broadcasting
Date: 1996-02-26 00:00:00 UTC
From: jkonarz@ix.netcom.com
Message-ID: <4grrdb$545@vixen.cso.uiuc.edu>
Source record: 25322

I was just wondering how easy it would be for me to get my hands on a few original phono/CD's of "American Top 40", "Casey's Top 40", "Dick Clark's U.S. Music Survey", "Casey's Countdown", or other radio shows from the 70's, 80's, or the 90's...

I noticed an old "AT40" phono set in a used record store once, but didn't pick it up... Since, I haven't really been looking, but I thought I would start my quest here, since I read the newsgroup regularly...

If you think you could help me out, and would be willing to part with any of the above material at a *reasonable* price (don't have a lot of money to offer on this search), or have any other original radio material I might be interested in, please send me some e-mail, and I'll get back to you as soon as possible.

I just like listening to this stuff... and it doesn't have to be in great condition... but then again, I probably wouldn't want something that skips thru the whole thing...

Thanks,
Jason (jkonarz@ix.netcom.com)

2211. The Term "augmented"

I used to have one of the cheapie classical CDs that had 81 minutes of music, and I had heard that there was a CD (don't know the title) that had 83 minutes. I'd be surprised if the Woodstock CD actually has 85 minutes of music, though. It's not that it isn't possible -- but many of the lower-end or middle-priced CD players could have trouble tracking through the entire disc.

Reply-To: af660@freenet.carleton.ca (Charles Hobbs)

salucce@ix.netcom.com (Sal D'Amato) write:

I'll tell you why stations are going alternative:
#Top-40 is based upon recordings which have the highest sales in record
#stores. In the past few years, this market has unfortunately become
#highly segregated. Both rap and alternative music are selling big in
#record stores, but when you put these two together on a music chart,
#and have a station that plays music off that chart, it doesn't please
#anyone. The rap listeners don't like the hard rock and vice-versa.

In my experience, the Top-40 chart tends to be dominated with one type
of music or another (disco in the late 70's, heavy metal in the late
80's, rap soon after that . . .)

#Back in the early 1980s, Top-40 would bring listeners TOGETHER as
#opposed to segregating them. For instance, a song like "Let's Dance" by
#David Bowie would please both dance AS WELL AS rock listeners.

But the listeners also had access to stations that were all-dance, all
AOR, etc, so the Top-40's appealed to the people with rather broad
musical tastes. There were always "hardcore" types that wouldn't
listen to anything other than what they really liked, anyway.
So, this idea of CHR "bringing listeners together" comes off across
to me more like "Ships that pass in the night", rather than "Hands
Across America" . . .

I'm not convinced that today's so-called "alternative" music is any
different, just a variant of AOR. I'm also not convinced that it will
attract hardcore dance/rap listeners, anymore than it should attract
hardcore Country & Western listeners . ..

#But things aren't the same today. Unfortunately, there aren't many
#"mainstream" top-40s left, mainly because the format is not as viable
#as it was in the 80s, for instance. So stations have to choose a side,
#either a "rap" or a "hard rock" approach. So in NY, for instance, we
#have "Hot 97" and we have "Z100". Maybe it's a phase, because a similar
#thing happened in the '70s with Disco. You either liked it, or you
#thought "Rock Ruled" and "Disco was Dead."

It was always that way, as different types of music evolved and found
disparate audiences. (By the way, I rarely listen to CHR anymore, I tend
to prefer Adult Contemporary . . .)

#Hopefully, mainstream will find a place in the hearts of all Americans
#once again someday. But for now, who even cares to watch the grammy

#shows?

What do we really want here? On the one hand, people complain that all the stations sound the same, play the same songs over and over, etc. But then, we long for the days of the single Top-40 chart, when all the stations *did* play the same stuff over and over, without the varied alternatives we have now.

I think it's just a nostalgia rush, the same way people remininsce over trolley cars and five-cent cokes. The radio business has changed a lot over the past decade or so, admittedly not always for the better, but the only thing that can be guaranteed is more change.

2222. KRKO-Los Angeles

Bob,

I agree with every word you've said. However, I think you're selling the people in our industry short.

It happens all too often. John Smith, local businessman who's always wanted to own a radio station, finally buys station WXYZ for WAY more than it's worth. Station WXYZ is a profitable operation, cash-flowin about 30%. But John, always looking for ways to cut expense and add to the bottom line, attends his first state broadcasters convention and hears about satellite automation, and figures out how he can cut payroll and increase profit to 50%. Upon returning home, John installs the dish, signs the contract for the format, fires his overpaid (in his mind) Program Director and Chief Engineer, promotes the Night Jock and Overnight Jock (translation: the two lowest guys on the payroll totem pole) to P.D. and Production Director, hires a Contract Engineer, and now, he's all set.

He now has a two-man airstaff who now spend all their time babysitting the cheap automation equipment and doing rip and read production. The Contract Engineer could be doing the maintenance and repair on the system, but he charges $45.00 an hour in addition to his $850 monthly retainer. John feels that as long as the two jocks can keep the place on the air with a minimum of dead air, the additional expense is unwarranted.

The part-time receptionist/traffic director/public service director takes a phone call. The Mayor has just been arrested for DUI. She tells Chris, the new P.D., but since John let the News Director go, he just doesn't have the time or manpower to go out and cover the story. Another call comes in from a client who's wondering why Jeff and Ernie (the old Morning Show) aren't on the air anymore, and why can't the new Morning Show let him know when the drawbridge over the river is going up so he can take an alternate route in the morning? Plus, he needs to talk to his AE about doing a live schedule on some closeout merchandise. Trixie, the part-time receptionist, etc., explains that Daddy put up a satellite dish and all the programming is now coming from Dallas, and she's sorry about the drawbridge, but nobody gets to work that early anymore thanks to the new programming unless Chris is here running the satellite live 'cause the equipment broke down. And she'll give his AE the message, but she doubts that he'll be able to do the live commercial thing because of the automation.

It's now one year later. John is sitting at the Country Club, talking business with his golfing buddies at the 19th hole, wondering aloud why his profit margin has shrunk to 20%, after all he's done to cut expenses. Bill Jones, who owns a successful local chain of convenience stores says he has no idea, but he sure does wish the Morning Show on WXYZ had done

something funny on the Mayor's recent drunk driving arrest. Tom Perry, the auto dealer, says he misses the All-Request Lunch Hour. Jack Johnson, the dry-cleaner, openly admits he's switched to the cross-town 70's station because he feels a part of the audience. Besides, they did a fundraiser for the kid with Leukemia and raised $35,000, and everyone he's talked to that gave money feels really good about it. In fact, he's starting an advertising campaing with them next week. He'll be doing live commercials with the Morning Show. He'll be talking to John on Monday about pulling his schedule from WXYZ. Dave Rockefeller, president of the bank whispers to John that he really needs to get current on his station's debt service. He's a couple of months behind because advertising revenues have fallen since the book came out.

It is now six months later, and John is at his attorney's office, closing on the sale of WXYZ (for roughly half of what he paid for it) to the owner of the 70's based station across town. The new owner, Roger Johnson, came up the hard way in radio, and in fact, began his career at WXYZ, doing part-time weekends. He knows he's just bought a turnaround situation, but he knows that with the right PEOPLE, he'll do just fine in a few months.

John licks his wounds, and starts thinking about buying bar across town he's always wanted.

Sorry about the length of this posting, but the door always swings the other way. Yes, the folks in our industry who really make it tick are going through a rough time right now. Jobs are hard to come by and I'm damn glad to have mine. But sooner or later the industry will be forced to come to its senses and remember that PEOPLE listen to PEOPLE on the radio, and watch ESPN and the Playboy Channel on a satellite dish.

With (formally 980) Oldies 990, CKIS's call change change back to the old CKGM, and a change to all talk, this got me to thinking...

What ever happened to morning man Ralph Lockwood?
He was awesome to listen to and many people near the border in Vermont and New York did. I remember he left CKGM, then came back for short awhile, but mostly I only saw him doing ads on TV for the BAR-B-Barn rib joint.

For that matter, what about Robert G. Hall? I heard he left CKGM to go work at a satellite music service (SMN?) but it was just a rumor.

The only other name that pops into my mind is Mark Dennis who went to CJFM for a bit.

With all respect to the fans of country music radio in NYC who are now experiencing withdrawl symptoms:

Welcome to "YouDon'tExistLand"! MSP (metro #16) has no (and has never had a) commercial/metro-coverage *urban* outlet. It's practically the same country scenario as New York, just flip the markets and dominant formats.

Come on over to Minneapolis/St. Paul, where you can choose between two top-10 country stations and a handful of rimshotters!

Conventional wisdom: Country in New York City?! Urban in Minneapolis?!

Speaking as an R&B/urban/dance fan/professional, you now know what it's like to be ignored. Ya don't like it, do ya? Welcome to the club! I empathize with you.

[PS: WLOL's old top-40-based dance doesn't qualify, nor does the recently-arrived Urban Gold *satellite downlink*.]

A group of people in Burlington, VT started a free form station in August
of 1994. It lasted about a year. Even the sales people were saying it
couldn't work. I thought it was great. They played a lot of odd cuts from
rock, folk, blues, jazz, and celtic albums that don't get airplay (except
maybe on High School or College stations). They got bought out by a
country concern, who replaced the format with about the 7th or 8th oldies
rock station in the market area. They are also the biggest country station
in the market and wanted to make sure that some else with the same format
didn't get it. I never listened since the station signed off, but I think
they could have made it if they could have held out. If you want to see
the page about their signing off, run a search on WEXP. I think the page
is still around.

Hi Radio People !!!!

I just want to let you know that I'm proud to be a volunteer on KBOO 90.7 FM in Portland OR. I have been a professional recording artist, voiceover talent for Paramount and part time scrub brush. My wife and I have a midnight show every other Saturday night which has become a quite well appreciated break from the "rock" stations in the local area.

We have a three hour show. We break it up like this :

Hour 1 - Focus on blues, blues rock, soul, R&B all uptempo. We play as many contemporary artists as possible so as to give the new blues performers a "spotlight" as it were. We also feature local players which then segues into

Hour 2 - Transition from blues to jazz with a bent toward some of the more progressive, electric, fusion styles. We'll also play local jazz folks as well. This transitions into

Hour 3 - "Go for broke" with the music of Frank Zappa and other related artists such as Mike Kenneally, Beefheart, etc. I also try to play some of the local electric rock artists in this segment as well.

The local audience (judged by call ins) ranges from teens to "old" guys/gals who haven't heard this kind of mix for quite a while. We believe our show relives the late 60's style of programming. You might hear a Jonathan Winters clip or maybe a Firesign Theater short. One night I read a treatise on life permutations in the universe as that faded into LeadBelly's "Old Rattler". I might interview myself in a night gown while chasing the roaches around the console, screaming about the white/whole wheat bread dilemna as seen from the viewpoint of some twisted beauracrat.

I've also interviewed The Chambers Bros, Jack Walrath, and other performers on air as well as helped plan an upcoming local Zappa "event".

Want to know more ????? I'll be happy to chat with you.

Thanks Roy

CBS wanted to save some money. In 1990 they Killed WCAU, changed the calls to WOGL, and started rebroadcasting oldies from WOGL-FM most of the day. After a few years, the calls were changed to WGMP (The Game...but we called it The Gimp) and started doing a mostly syndicated sports format against WIP.

It's been years, and I still miss the station.

CBS pulled the plug on the old format a couple of years ago and the station became WGMP ("The Game" but known to local wags as "The Gimp"). It runs mostly syndicated sports talk along with Phillies baseball and other play-by-play. The best it does in Arbitron is about a 1.5 share in the summer. It barely makes the book in winter when there is no baseball.

There are local rumors of an attempt to revitalize this 50kw clear as a result of Westinghouse buying CBS, but so far nothing is apparent on the air. I would guess a move will be made in time for the Arbitron spring book.

WCAU-AM is now WGMP-AM still at 1210 and still owned by CBS/Westinghouse.

Its format is all sports. It has a very small (sometimes unmeasurable)
audience.

Rumors are that CBS/Westinghouse will attempt to revive the station with a
new talk/news format. Stay tuned.

2244. ISDN in Phoenix?

Newsgroup: rec.radio.broadcasting

From: Tom@Tass.Com
Message-ID: <4h1ce7$4bn@vixen.cso.uiuc.edu>
Source record: 25206

Hi!

A radio network that I am affiliated with will soon be doing some live broadcasting from the Phoenix International Raceway. After months of phone tag, US West has just informed our Technical Director that they cannot provide ISDN at PIR. Is this true?

Does anyone know if we can get Switched-56 service at the track?

Thanks!

Some concern posted about strange harmonics in 1650 in D-FW...here's my two cents worth on the subject.
KLIF-570 transmitter is located near a power generating station owned by TU Electric northeast of the DFW airport. (Those are the 3 towers you see when you fly in from the north). KRLD's transmitter is in Garland and close by is a major high tension line installation. The power poles along Garland Rd for about a mile in either direction have tuning boxes mounted on them in order to detune the poles and not re-radiate KRLD's signal. The story I heard was that when those poles were installed they really played havoc with KRLD's signal and TU Electric had to detune every pole in the immediate vicinity (they are of course steel structures). KRLD's transmitter is also in a residential neighborhood! I also understand that when KRLD is on night pattern it's ERP in the main lobe is something like 285,000 watts (remember that's ERP!). They of course are 50KW full time off a two tower site. I pass by the site every day on the way to work and on my Voyager's car radio they are well behaved.

The station was KRKD AM 1150. Around 1970 the station changed to
KIIS as an adult contemporary station. After Combined Communications
bought the station in 1975, they renamed their successful top-40 FM
station KIIS-FM. Meanwhile the AM station struggled to survive with
various formats until they went to a full-time simulcast in the '80s.

And one final P.S. KRKD became KIIS-AM in the very late 60's or early '70's.
I always assumed it was because the IIS could be written as 1150, although
they never used this in any advertising. The station that became KIIS-FM
was previously KKDJ (102.7), and prior to that KRHM, and prior to that
KLAC-FM (in the 60's, KLAC-FM and KRHM swapped facilities, giving KLAC-FM
94.7, which eventually became KMET, and KRHM the 8.3kw facility at 102.7).
In any case, KIIS-AM was a stand-alone AM until being acquired by the
corporate entity that owned KKDJ, which then took the letters KIIS-FM.
I believe the letters KKDJ are now in Fresno.

That would be KRKD (as in dog). Former call sign of the station at 1150 AM, and also an FM outlet. When I lived in LA (1960-66), KRKD had a MOR/variety format with a nice style.

KHJ (now KKHJ-AM and KCAL-TV, not sure what happened to KHJ-FM) was owned by RKO.

I believe that these two towers say KRKD and not KRKO. From what I
remember (it was way back when) KRKD was an AM radio station.
This was in the 1950's-60's. Oh, and the building and rooftop towers
are in Hollywood, not downtown LA...I think. I can't be exact because I
have a very fuzzy memory, thanks to Tom Rivers from 1050 CHUM. Besides that,
I want to portray the image of being a young whippersnapper who runs and

I got to hear Lockwood a couple of times when I was in Montreal in the seventies and no question he was an outstanding morning man. Funny, topical, and worked the phones well.
I once heard, and it may be purely legend but it does make a great story, that Ralph decided one morning to call one of the star players of the Montreal Alouettes football team to congratulate him on a great road game the night before. Ralph, who knew all the players personally, knew where he was staying and called the hotel LIVE...the phone in the hotel room was answered by a female voice, not the guy's wife. The player's real wife was listening to the show and was not at all amused. Anyone know if the story is true?

I worked with Ralph at WHLO in Akron/Canton in the 1960s just before his move to Montreal. (An interesting story relating to an Ohio judge, a divorce, and alimony payments that were literally more than he was making.)

I was travelling through York, Pennsylvania several years ago and saw a billboard advertising Ralph on WSBA (owned by Susquehanna, which owned WHLO in the '60s). I honestly don't know if it is the same man, but I assumed it was. He was well-liked in the company.

>Up at 3:30, work from 4 to noon, nap from 1 to 3, dinner at 7, sleep from
>9:30 (or 10) till 3:30, and go back jack and do it again

I've always found, the only thing that works for me, is to live according to my schedule, and not the schedule of the rest of the world. I would eat breakfast at 4:30 am, lunch at 10am, dinner around 4 pm. No Nap!! I would shoot for going to bed between 7 and 8pm, and get 7 1/2 to 8 1/2 hours of uninterrupted, glorious, wonderful, sleep! I then stayed on a normal rhythm that I had always been used to, only now it's about three hours earlier.

And make sure to set aside some late afternoon time for your family!

Network radio is not intended to provide an unscupulous owner with an opportunity to fire his staff and operate with two people. If that's what they want to do they don't need an excuse to do it. They have relatives who'll work cheaply or for free. The first station I worked for had the owner's wife doing the books, his daughter was the receptionist and one of his sons was the news director. When his other son got married and needed a job, I was out of work. And this was long before the days of automation and satellite radio. Satellite broadcasting is just one of many tools available to broadcasters to help them trim costs, not eliminate entire staffs. Under the above scenario, an owner could set up a bank of cd players, set them to continuous and get a kid off the street to run them. Network radio is not the culprit. Poor management is.

> He now has a two-man airstaff who now spend all their time babysitting the
> cheap automation equipment and doing rip and read production.

Chances are he already has that without the need for a network feed. If that's the route a station wants to take, and survive the local competition, they'll find a way to do it.

>
> The part-time receptionist/traffic director/public service director takes
> a phone call. The Mayor has just been arrested for DUI. She tells Chris,
> the new P.D., but since John let the News Director go, he just doesn't
> have the time or manpower to go out and cover the story.

The problem here is a lack of committment to news not satellite radio. In an all local operation, the chances are nobody covers local news since it takes money to have a separate staff to cover local issues. In most stations that are all local, some major markets included, the news staff consists of one person whose reason for existence is to be the assigned giggler for the

morning show. I don't think he or she would be covering city hall anyway. Blame the FCC, CNN, or the fact that people turn to other sources for news. Or blame radio for cutting news staffs at the first opportunity. This happened long before satellite radio was a factor.

> Tom Perry,
> the auto dealer, says he misses the All-Request Lunch Hour.

There's no reason not to continue it. But if Tom got into one of his cars and drove around the country, he could listen to thousands of all request lunch hours, none of which necessarily originate with any of the networks. So what's the big attraction?

> Jack Johnson,
> the dry-cleaner, openly admits he's switched to the cross-town 70's
> station because he feels a part of the audience.

Does he also feel a part of the 40 minute music sweeps and those superbly produced sweepers? People don't listen to the radio to feel a part of the audience, they listen to be entertained.

>Besides, they did a
> fundraiser for the kid with Leukemia and raised $35,000, and everyone he's
> talked to that gave money feels really good about it.

Doesn't take much to record a couple of psa's asking listeners to drop off their change, checks and donations at a local bank. Or better yet, at the station, even if it is staffed by the owner and his family.

For the second time in a decade WXTZ call letters will be retired from the Indianapolis market. Beginning at 12:00:01 a.m. on 2/27 93.9 FM (Noblesville/Indianapolis) will begin broadcasting under the new sign of WGLD.

The station, which has been under an LMA since January 15 of this year is broadcasting ABC's Solid Gold Soul format. Prior to Jan. 15 the station was easy listening.

It's amazing the technology now available to provide a local sound for a satellite station. I'd like to correspond with anyone who has experience in programming local elements into a satellite format.

Thanks!

It probably won't surprise anyone who reads my postings on this newsgroup that I've actually been to this array, at dusk, yet (somewhere north of Sikeston on Rt. 61/62, if I remember correctly), and it was quite a sight. I stopped there after a visit to KYMO-1080 in East Prairie, which had some towers of its own. The guy at KYMO suggested that perhaps the FCC had erred, or been too lenient, in the approval of nighttime service for KMPL on that frequency, even with 8 towers!

I know nothing of any such station in Illinois, but I believe the former WVOI-1520 in Toledo, Ohio, used such an array. 1,000 watts day and night, with six towers at different locations for each pattern. I heard that the night array was actually in Michigan!

Then Charles Hobbs (af660@freenet.carleton.ca) commented...

>1. Other entities besides religious stations have translators. I've }
>heard KOST-103.5 on 106.3 in Simi Valley, and KXEZ 100.3 on 100.1 in

True and untrue. Unless things have changed with the new telecom
bill, commercial stations cannot own translators, except when an area,
normally covered by the station's primary contour is shielded by
mountans or other obstructions. Any other translators for commercial
stations must be owned by someone other than the translated station's
licensee. Since translators can only originate 30 seconds of
programming an hour, that doesn't leave a lot of profit in the
translator business. It is also true that non-religious noncomms have
translators, but not anywhere near the number and not anywhere near
the number of 'satellite fed' translators that are really just low
budget affiliates, since in many cases these signals (Family Radio is
one of the biggest) originate from sources across the country.
Somehow I don't think that translators were intended for that sort of
service, even though regulations seem to allow it.

>2. I have no comment about specific programming activities of any }
>stations, since I don't believe that one class of format is
>necessarily morally better or worse than any other.

Agreed. I am a Christian myself, so I am certainly NOT anti religion.
But the fact remains that it is primarily so-called non-comm Christian
stations that operate these translators which are springing up
anyplace and everyplace where 20 - 200 watts can be sandwiched in,

even at the expense of co and first adjacent interference. After all, a translator license is WAY easier to get and cheaper to build than even a class-A. Also, since these are primarily non-comm network repeaters, ratings are not an issue. Getting the message out to the masses of 'contributors' is the issue. Translators are a cost-effective way of doing that.

The majority of these stations sell their airtime just like any other brokered station. In addition most solicit donations and are right on (or slightly over) the edge on underwriting 'commercials'.

>3. The issue of local community stations is good, but we need the }
>debate joined by more of the public. Radio enthusiasts alone won't do it. Radicals (e.g. Dunifer) hurt more than help.

OK, Charles, let's talk community radio.

I have gone on record many times saying that I am not a fan of Stephen Dunnifer's attitudes but let's face it. Who, but a radical, would openly defy the regulations which allow translators which repeat another station (even a thousand miles away via satellite) but prohibits ANY local programming on such stations (other than one 30 sec announcement an hour)?

Since there is a total prohibition on LPFM as a community resource, who is going to get involved? Radicals and children playing radio, that's who. There are obviously uses for these sorts of stations or there would not be so many of them. So when you talk about the negative sides of a Stephen Dunifer, remember this. He is putting his ass on the line for something he believes in. He is fighting a battle, he is a warrior. Warriors are not always the most polite and reasonable people. Civil rights demonstrators in the sixties were not always the nicest people either, but they paved the way for a LOT of nice people to have a better shake in the decades that followed.

I am a firm believer in LPFM as it relates to community involvement. Whether that community is a small town whose local station(s) have long ago abandoned them for the more lucrative city market 30 miles away, or gone satellite, or gone dark... OR whether that community is an unserved group in an urban area. Many rural areas could benefit from LPFM as a means to spread local information that is below the radar of the commercial stations who couldn't be bothered with that degree of service. I am sure that many of you consider ME a radical, just for entertaining the idea that LPFM might be a good thing. One esteemed colleague on this group has even told me I am wrong to allow Stephen Dunifer to post informational articles about his case and his station.

Anyway, there are countless uses for LPFM *other* than the 'Peoples Voice Of Liberation', but since there is NO legal avenue open for those who wish to pursue LPFM as a community service, only 'The Peoples Voice Of Liberation' or 'Joey's Sandbox Radio' are likely to

risk the penalties involved in violating the regulations (they are not laws, BTW, they are FCC regulations).

With commercial stations consolidating at breakneck speed, with the attacks on NPR (many location's ONLY source for long-form news on the radio band) and with mainstream radio moving away from community involvement because it 'costs too damned much', there is no valid reason in my book NOT to open up LPFM for local origination other than a desire on the part of higher powered broadcasters to have a lock on all radio listening and programming.

The new telecom bill basically throws open the doors for corporate group owners to buy as much as they can afford of important media. I don't have a problem with corporations owning stations. I have no problem with them making money. I do have a problem, though, with the notion that in the midst of all this mega-merger-mania, we can allow translator service to go nuts, yet not allow the people and communities who have fallen through the corporate cracks to have even the slightest access to these airwaves that we still laughingly claim are the property of these same people.

You say "Radio is a business". OK, sure it is. But unlike a newspaper, grocery store or other business, you are not able to just start a new radio station anyplace you might see an unfulfilled market or need. Also, people depend on radio and TV to inform them. LPFM would be a way for someone who doesn't have several million laying around to buy into a radio station, to have some access to that spectrum. It could be a way to serve those who the traditional stations cannot afford to cater to.

You say "LPFM would clog the bands and interfere"... Well Docket 80-90 has done more, with the blessing of the FCC, to clog the band, and create interference (not to mention the disastrous effects on ad revenues), than any LPFM service could do. Now we must allow nearly unlimited buying of stations (supposedly) to compensate for the disastrous effects of that ill-advised docket. Kinda like the doctor infecting you with a disease and then issuing an expensive prescription to cure that disease.

And we already have LPFM. They are called translators. The only difference between translator service and full-fledged LPFM is the origination of programming.

You say "LPFM would drain listeners from full power stations who are already struggling"... Maybe. But if properly administered, these services would likely be serving communities and interests that the full-power stations (with all their resources) are not interested in serving. Smaller communities, non-mainstream formats, local information, local school sports etc etc etc.... Plus if these 20 - 200 watt stations *DO* drain enough audience to be a threat, maybe these threatened stations would do well to reconsider that audience's value and serve them.

In addition, a legal, licensed LPFM service could help the future of radio by providing a venue for those who are our next generation of radio talent. Those who have fewer and fewer places to get started, since these small market stations are no longer as plentiful as they once were due to automation and satellite.

There are countless uses for such a service. And in today's world where the airwaves are up for grabs to the highest bidder, where real service is no longer a consideration, where entire markets are being swallowed up by a handful of huge owners, can't we find a way to spare a few watts to all of those who are not in the 25 - 54 professional, Caucasian money demographic? A few watts for all the unserved rural communities, for voices and views which are not seen as sufficiently profitable for "MegaMedia Inc." to air?

I would think that if Family Radio can satellite feed hundreds translators, as well as dozens of full-powered stations, that the answer to the above should be ... YES, we can find a way. But I am quite sure that the NAB and the FCC would not agree. They have a vested interest in keeping things locked up in the hands of the big boys. Too bad that we cannot be allowed to co-exist.

The NPR affiliate in Lexington, Ky broadcasts on 91.3 FM and translates on 92.1 FM. Just goes to the point that not all translators are repeating non-local programming.

My understanding of FM translators is that if anyone complains about a negative impact on their reception of ANY station no matter how far away, the translator owner must fix it or turn it off.

: Santa Clarita (both suburbs about 30 miles out of Los Angeles.) There
: are probably others.

A commercial station can only put up a translator if the translator's coverage area falls within the normal service contour of the station (1 mv/m for Class A & C, 0.5 mv/m for Class B). Simi Valley and Santa Clarita are within the normal service area for Los Angeles stations but are terrain shadowed from the transmitter sites.

Commercial translators outside of the normal service contour are only allowed if they serve an area that's presently unserved by any other FM station or are owned by an entity not connected with the licensee of the station they're re-broadcasting. In the second case the translator can conduct limited fund-raising over the air and the station can assist with technical expenses once they're on the air. This is the loophole that allows commercial religious translators to flourish - Joe Believer gets a group of his buddies together, fronts the money to establish the translator, then turns it's maintenance over to the religious station.

The restriction preventing commercial stations from having translators outside their own coverage areas stemmed from a situation in Arizona, where most of the Phoenix stations established translators in Tucson, a smaller market outside of their normal coverage area. The local Tucson stations petitioned the FCC for relief from this unfair competition and the translator rules were amended.

Non-commercial stations fall under an entirely different set of rules, and their translator regulations are considerably more liberal than the ones that govern commercial stations. Non-commercial translators can be established anywhere in the country, and don't even have to be able to hear the originating station. They can be fed via microwave or even satellite. Several organizations, primarily religious groups, have established networks of hundreds of translators clear across the country to spread their message.

Well Jed, some Technics sales reps around the LA area started this rumor
to spur some backstock sales. Prices shot up to around $550. Since then
(last summer) they've fallen back to the normal $400.

My station is FINALLY looking to move away from remotes and do
more jock appearances, where a jock comes out to a club or any type
business and does P.R. for the station and the client. The appearance is
promoted with liners and spots that the client buys.
I know these are done is lots of bigger markets. I'm in
Lafayette, La., #97 and we're ready to move that way as well. What is
expected of the jock while he's at an appearance? Does he help serve
pizza? Does he make in-store announcements on the store P.A.? What is a
reasonable talent fee?
Rather than have one of my air staffers standing around with
their thumb up their ass and us calling it an "appearance," I'd like to
know exactly what is expected from those of you that do them now.

>I noticed an old "AT40" phono set in a used record store once, but
>didn't pick it up.

What was the date. and where did you find it? (Inquiring collectors want to know!)

I was working at a small station in Colorado back in 1986. One day, I arrived at work to find a couple of guys hauling stuff out of the storage room and into their pickup truck. Spring cleaning time, you know. Included in the pile were a bunch of old American Top 40 programs that we had been saving. "Where are you going with those?", I asked. "To the dump", was the response. Time for action...I jumped in and rescued Casey! <g> I now have about 125 complete 4-record sets from 1983-85 in my possession. Fun to look at, and they make GREAT tapes for Walkman listening! <g>

> too much.

What I've sometimes observed is that analog components in digital systems (op-amps, for example) produce more audible side-effects than digital components. The Dolby DSTL is a case in point. Replacing some op-amps on the analog input and output boards dramatically improves the sound of the unit. This has been demonstrated not only here at WCRB, where we can hot-switch back and forth between the DSTL and an analog Moseley system, but also by Grady Moates at Kix-106 in Providence and Rick Levy at WHRB.

I've learned to take statements about the audible effect of this or that digital system with a grain of salt; more often than not the artifacts being complained of are analog in origin not digital.

Could it be true? No more dead air, whining feedback, or other varied technical flubs by KESZ technical personnel. Moving the Cardinals to a Manilow FM was a bad move from the start. Amazingly after TWO years, the broadcast got no better. I don't fault Tim Healey. I think he did a workmanlike job. I even think Gil Tyree did a good job. But I HATE, (hopefully hated), sound bytes or various interviews put over a bed of canned music. That, along with the aforementioned technical flubs, drove and drives me crazy. My hope is that Cardinals broadcasts end up either on KTAR, its future sister sports station, or on our current all-sports outlet KGME. Also, let's have Tom Dillon back as play-by-play announcer.

Look closer-its KRKD

They were around when I was a Kid. Transmitter was moved sometime in the forties or fifties I think, to a hilltop location just west of the pasadena freeway. I dont live in Southern California anymore, so I don't know the current call letters, but the frequency is 1150 AM.

I'm really surprised those two towers are sitll there on top of that building.

This is a self-generated P.S. to my prior post re KRKD. The two towers now atop the building are ornamental only; KIIS-AM's towers are in the Montecito Hts area of L.A. KRKD has an interesting history. It was originally a share-time outlet with KFSG ("Four Square Gospel"), the religious voice of the legendary Aimee Semple McPherson. KRKD was a modest MOR station in the 50's and 60's, chicken rock in the early '70s, hampered at the time by only 5 kw day, 1 kw nite, ND. After being acquired by whoever owned KIIS-FM at the time (either Pacific and Southern, Gannett, or someone else), they put up two additional towers, and are now 5 kw D and Nite, DA nite. KFSG's letters still exist on FM, where it is a religious station. KFSG's original towers were atop the Four Square Gospel Church on Glendale Blvd near downtown L.A.

2284. Potential of AM Radio

Newsgroup: rec.radio.broadcasting
Date: 1996-02-28 00:00:00 UTC
From: "Nickels, Bob" <RNickels@P16.IL50.micro.honeywell.com>
Message-ID: <4h1cek$4dr@vixen.cso.uiuc.edu>
Source record: 25263

I know that many radio professionals subscribe to this list, so I'd like to express my thoughts as a lifelong "radio listener and lover..."

As a "baby boomer", TV was considered the most important medium as I grew up, but radio was always nearest to my heart. Whether it was NBC Monitor (which was mentioned on this list not long ago) or local programming, radio was always *interesting*. You could spin the dial and eavesdrop on other parts of the country (or the world, on shortwave), hear different kinds of music, and choose from an almost endless variety of programming. There were only three TV networks, yet radio was filled with diversity and choices - it was personal, and captivating.

Think about how different things are today. The same satellite-delivered songs on the few AM stations that actually play music, and the same news, weather, and traffic in 10 minute increments. I can still choose *which* talk show I want to listen to, but that's about it for diversity in programming, and I'm a pretty dedicated listener that will scan the band in search of something different.

I know that radio is a business and that programming is expensive, but I can't help but think that the potential exists for radio to reclaim its heritage. Look at the success of "books on tape" - proof of a market for audio-only entertainment programming. Real Audio is one of the hottest things on the internet, yet it will be a long time before wireless computer networks can equal the portability and cost of broadcast radio. The ability to deliver incredible diversity in programming drives the cable and satellite companies to invest billions of dollars and fuels ongoing consumer investment in home entertainment systems. Yet the AM and shortwave broadcast bands, capable of providing nationwide - even worldwide coverage, fall short of fulfilling similar expectations.

I don't have the answers, but I hope this stimulates the thinking of those who might. Maybe it's time to "change the game"! Deregulation is opening up previously-locked doors. It's never been easier or cheaper to share information and create networks - but this isn't about technology, rather it is the ability to recapture the imagination and recreate the diversity of entertainment that allowed the radio broadcasting industry to thrive that is again needed.

As my first PD taught me to say "Thanks for listening"!

Hello Everyone...

We need your help. The National Broadcasting Society - Alpha Epsilon Rho will be holding its annual convention in Los Angeles in March. Since we have no active chapters in the L.A. area we are looking for help with our Career Focus session planned for Friday night, March 22nd. If you are in the L.A. area, or know someone that is, and can help our organization by sitting at a table and having future professional broadcasters come to you with questions, then please get in touch with me. Our Career Focus is always one of the most exciting sessions of our convention.

Participants need to arrive at the Gateway Sheraton at LAX Hotel (6101 W. Century Blvd.) between 4:15 pm and 4:45 pm. Career Focus begins at 5:00 pm and runs until 7:00 pm. There will be a reception for you following the event. If you are able to join us I will need to know who you work for; your title; and, your mailing address in order for Angie Riedel, our on-site coordinator, to do a follow-up. Last year in Atlanta we had over 100 tables set up with professionals. This year should be just as big.

Thanks for your help!

"SHOESTRING" & "MOVIE MAGAZINE" NOW AIRING ON THE INTERNET

PLAY NOMINATED FOR BEST RADIO DRAMA PRODUCTION

SAN FRANCISCO - The non-profit radio production company Shoestring Radio Theatre announced today that its two nationally-syndicated radio programs--"Movie Magazine International" and "Shoestring Radio Theatre"--will now air each week on the Internet via flagship station KUSF-FM in San Francisco, which recently began simulcasting 24 hours a day, 7 days a week on Audio.Net, a web site which transmits live radio programming in RealAudio format.

Anyone in the world with a compatible computer system can listen to the programs on the Internet as they air Wednesday nights on KUSF, 90.3 FM in San Francisco. "Movie Magazine International" airs from 9:00 - 9:30 PM (Pacific time); Internet listeners will hear the local edition of the show, which differs slightly from the national edition heard on satellite. "Shoestring Radio Theatre" airs from 9:30 - 10:00 PM (Pacific time).

In order to access KUSF's live RealAudio feed, listeners will need the RealAudio Player. Version 1.0 (which supports AM radio sound quality) requires a 14.4 Kbps modem or better and is available for Macintosh and Windows. Version 2.0 (which supports near FM mono sound quality) requires a 28.8 Kbps modem or better and currently is available for PowerMacintosh, Windows, and most Unix operating systems. Computer users can get more information about RealAudio, or download a free copy of the player, at the RealAudio home page on the World Wide Web (http://www.realaudio.com). KUSF's RealAudio live feed is located at Audio.Net and can be accessed from Shoestring Radio Theatre's web site (http://www.shoestring.org/), KUSF's web site (http://www.usfca.edu/usf/kusf/), or Audio.Net's web site (http://www.audionet.com/pub/kusf/kusf.htm).

"We are really excited about the shows airing on the Internet," exclaims Founding Producer MONICA SULLIVAN. "We will now be able to reach people who can't currently hear us because we don't have a radio affiliate in their market yet." "Many visitors to our web site have requested we make the shows available on the Internet," comments Webmaster RANDY PARKER. "Now with KUSF simulcasting on Audio.Net, it means that anyone in the world can listen to 'Shoestring Radio Theatre' or 'Movie Magazine International', if they have a compatible computer system."

"Movie Magazine International" is a 30-minute entertainment guide which covers the local and national film scene with movie reviews, special reports, weekly trivia contests, and interviews with directors and actors from yesterday and today. "Shoestring Radio Theatre"--a 30-minute radio drama program--draws on a pool of local talent to write, direct, and perform works which span an astonishing range of genres and styles: everything from classic murder mysteries to slapstick comedies to historical romances to contemporary dramas. The programs currently are heard on a confirmed station line-up of 93 radio stations in 25 states via the Public Radio Satellite System.

GOLDEN REEL NOMINATION FOR "THE WOMAN IN WHITE"

The National Federation Of Community Broadcasters held its annual Community Radio Program Awards ceremony on February 17th, and "The Woman In White"--produced by Shoestring Radio Theatre in 1995--was one of five final Golden Reel nominees for Best Radio Drama Production of 1995. The chilling gothic melodrama (produced by Monica Sullivan and directed by Randy Parker) is an adaptation of "The Woman In White" by Wilkie Collins. The play premiered locally on KUSF in March, 1995 and aired nationally on the Public Radio Satellite System in May 1995.

###

"Movie Magazine International" airs nationally on the Public Radio Satellite System every Friday morning from 1:00 - 1:30 Eastern time on channel A73.1 followed by "Shoestring Radio Theatre" from 1:30 - 1:59. "Movie Magazine International" and "Shoestring Radio Theatre" air locally in the San Francisco Bay Area on KUSF, 90.3 FM every Wednesday night from 9:00 - 10:00 Pacific time and can be heard simultaneously on the Internet on Audio.Net at "http://www.audionet.com/pub/kusf/kusf.htm".

2290. AM signal amplifier?

The Action Central "newsie-doos" was a private/public joke between Dan Ingram and Bob Hardt. Like with so many other things, Dan would try to break Bob up, and would rarely succeed. Sometimes Bob would even manage to get Dan back, like the time Dan made up a story about a lion that was about to eat Bob. "Even though there wasn't much, it was a very hungry lion." Bob got him, though: "In WABC News head-lions..."

I was thumbing through a copy of this week's Billboard magazine, when
I glanced upon an article that discusses the reasons why stations are
going alternative. I'll leave you all to gue$$ what tho$e rea$on$
might be. :)

Seriously, I know a fair # of people who swear by our local modern and
alternative rockers KOME and KITS. Perhaps not so coincidentally,
they're all college educated and many of them have good paying jobs in
the computer industry. I imagine there are strong fans of modern and
alternative rock who studied law, business, politics, medicine,
etc. in college, who are now making good money, in other parts of the
country as well as in the SF bay area. Advertisers are trying to get
their business, and radio's trying to get those advertisers.

Top 40 gets kids by default. Look at a station like CFTR in Toronto, a
legendary CHR that went from a 4 or 5 share CHR to a 1 or 2 share News
station. Apparently there is more money when pursuing an older demo.
CHR cannot live on teens alone, we NEED 18-34.

catch the buzz...pass it on.

Sorry Chris, but I'm gonna have to disagree with ya there,

I feel that radio is about as hyped-up as it's ever been. Not only are there as many loud and annoying DJs (although I understand that was the premise back in top-40 AM's "heyday" of the '60s and '70s, perhaps), but there are also morning "zoos" which was a trend that began in the 1980s. And now, thanks to such shows like "the Rocky Allen Showgram" and "Greaseman" shows, this is starting to take over in the afternoon as well. In the '70s, Harry Harrison did the AM drive on WABC and it was as cool and calm as his morning show is now on 'CBS-FM.

Forgive me, but I PREFER stations acting more like jukeboxes, because I turn on the radio to listen to music and nothing more. Stations such as U-107 in Longbranch, N.J., Rock 93.7 in Wilmington, Del., Rock 104 in Atlantic City, and Rock 102 in Buffalo were like this in the early '80s when they used to have a "taped" format; i.e., no live D.J.s. They just churned out the hits and a taped announcer would identify the new songs. That was the way I liked it, and that is no more. This latest station I just found, 96.7 in Hazlet, kind of reminds me of those.

Now, I'm not knocking the morning and afternoon comedy shows, because people like them and that's good. And I like comedy too, but I like music more. That's why another mystery to me is why VH1, a music video channel, has standup comedy shows when there's plenty enough of that around the cable dial.

You're probably saying, I should be listening to tapes if music is all I care about. That's why I do, especially in the mornings.

This comment has been posted several times. Again, I must debate this point. WCMF-AM 990, with six towers too far out of town at night, has a much worse nighttime signal than WHTK, especially south of town. Moreover, while WHTK has not been a resounding success in the ratings, the station still outranks the all-sports format on WCMF-AM, which had a 0.3 share in the Fall 1995 Arbitron.

> It also has a decision to make

> other format for 'VOR pursued and the option dropped...there are
> a lot of possibilities.

As the Operations Manager of WVOR, let me say that any such discussions at this point are premature, speculative, and, in a public forum, disrespectful of the people who have just gone through a sale, and are probably waiting to see what happens next. When the Lincoln Group bought WPXY, a decision was made to move WPXY and WVOR apart musically. It is possible that ARS may make an identical decision vis-a-vis WVOR and WRMM. Only time will tell.

However, WVOR has tremendous heritage in its call letters and format. It would be unwise for ARS to cast this aside without serious consideration. For ARS to divest itself of WVOR and purchase WNVE would make no sense, since WNVE has serious signal deficiencies. I would point out that WNVE is in a Joint Sales Agreement with ARS, not owned by them, and any transfer of the Nerve's format to WVOR would probably raise legal questions of ownership control.

> But the fate of his counterpart at WHAM, Jeff
> Howlett, is unknown.
> (snip)
> his tenure, while not with-
> out its successes, has also been marked by controversy over pro-
> gramming policies that gave WHAM a partisan (ultra-conservative
> Republican) image

Jeff Howlett is rightfully referred to in the hallways here as "the man who turned WHAM around," and I would again suggest that such speculation, in this public forum, is disrespectful. There is no question that programs like Rush Limbaugh are somewhat controversial. They also draw very large ratings. And as long as WHAM continues to be a market leader, I'd say Jeff Howlett's future is not quite so uncertain.

> And his efforts to build an audience
> for "Hot Talk1280" big enough to supplant WXXI-AM as the market's
> #2 talker were unsuccessful

There's no question that WHTK hasn't been the success we would have hoped, but this argument is nonsensical. WXXI-AM is a public radio station and is not even included in the Arbitron ratings.

> I've never worked for ARS, but I'm told it's regarded as a decent
> company to work for, and it allows the management of each of
> its stations a lot of local autonomy.

Thus, I'd like to suggest that those who would criticize or speculate on the future of these radio stations ought to wait and see what the new owners do, as we are doing ourselves.

2299. [FREE!] AIRWAVES RADIO JOB SERVICE

Newsgroup: rec.radio.broadcasting
Date: 1996-02-28 00:00:00 UTC
From: EDITOR@airwaves.com
Message-ID: <4h1fs1$6ka@vixen.cso.uiuc.edu>
Source record: 25278
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave,rec.radio.info,rec.radio.noncomm,alt.news.media,chi.media,ba.broadcast,alt.radio.networks.npr,alt.radio.college,misc.jobs.offered,misc.jobs.wanted

Rec.radio.broadcasting and AIRWAVES MEDIA WEB have begun a free job placement service on the World Wide Web. This service is open to anyone seriously seeking employment in radio broadcasting or anyone offering employment in radio broadcasting. This includes all facets of the industry from Air Talent and Board Ops to Programming, Management, Sales and Engineering Staff.

This new service is just another way that AIRWAVES and rec.radio.broadcasting remain committed to the art, business and science of broadcast radio and those who make it work.

For complete instructions on how to use this service, read the following information file carefully.

Best of luck in your search.

---------- Cut here and save ----------

Here is the deal...

1. Send email to EMPLOYMENT@AIRWAVES.COM.
2. Use a descriptive subject that says one of the following...

o A) Help Wanted: Brief Description of opening.
o B) Position Wanted: Brief Description.

Your post MUST begin with either 'Help Wanted' or 'Position Wanted' otherwise your mail will be returned. It is required for article sorting and threading. It is also *very* important that you describe the job you are offering or seeking in the *SUBJECT* of the post. Posts that do not describe the job you seek or are offering may not be approved.

Example...

- Help Wanted: Air Talent, New York City area
- Position Wanted: Engineer, 20 years Experience

3. Letter should be no more than 100 words
4. Include your....

o A) Full Real Name
o B) Postal Address
* Required for Help Wanted ads
* Optional for Positions Wanted ads
o C) Voice and/or Fax Phone (voice preferred)
o D) Email address

o E) If offering a job, your company name and title.

5. No resumes, but you can include a URL to your web or FTP site if there is material there (resume, picture, sound clips etc) that might be of assistance.
6. If and when you fill your request, write and have your listing removed. It will be removed in about 30 - 60 days anyway.
7. To look at the listings... point your Web Browser at..
http://radio.aiss.uiuc.edu/~rrb/job.html

Note: This service is *only* for QUALIFIED individuals who are SERIOUSLY seeking employment in radio broadcasting and bona-fide employers in need of qualified help. This is NOT a "Gee it would be cool to play Megadeth on the radio" list. any listings that don't appear serious and qualified will be discarded. However, I take no responsibility for the legitimacy or qualifications of any poster to this service, that is your job when contacting someone.

In case it needs saying, this is a publicly accessible database. Please use caution in all dealings with people who may contact you via this service. If this is too big a risk for you, don't use it. We take no responsibility for any contact made via this service.

To view ads already online Go to http://radio.aiss.uiuc.edu/~rrb/job.html

Happy Hunting.

to
>do it.
>I go to bed at 5PM and get eight hours' sleep every night.

To add to Gil's rule #1 (and it really is rule #1), here are a few things I've found to be helpful in doing mornings for most of the past 25 years.

I get up at 3 AM to get to work at about 3:50. (luckily, I live 5 minutes from the station). Besides making sure I get 8 hours of sleep a night, I also have learned that taking long naps in the afternoon is not helpful. Instead, if I get sleepy, I lie down for about a ten-minute cat nap. That's enough to refresh me without leaving me sluggish, or unable to sleep at night when I really need to.

I turn down all weeknight social invitations, and watch no prime-time TV unless time-shifted on tape. Once I've gone to bed, I refuse to answer the phone, leaving that to the machine. If the call is really important, my employer and my relatives have my pager number.

I also maintain my routine on weekends, and as much as possible, on vacation. I don't sleep in past 5 AM on my days off.

I drink in moderation (and never anything stronger than beer) and don't smoke or do drugs. I do take lots of vitamins, and I believe they help. I work lots of 12-14 hour days, chase lots of spot news stories, am in my late 40's, and I average about one cold every 2-3 years.

Our company has been using a music scheduler since last May,
that's just about as good as the ones that cost hundreds a month. THis
one's a buyout, for under $100. Tech support is quick and reliable at
any hour (in fact, I usually do my logs at 3 or 4AM CT -- we're an
overnight syndicagted show.) And upgrades are free the first year, and
$100 a year after that.

E-me for more details. (Don't be in too much of a rush, tho -- I'm gone
on business from Wednesday the 28th through Sunday March 3. So I'll be
away from the Internet.)

This must be the oldest gardening show in the country.
"The Green Thumb" with Doc and Katy Abraham on WHAM in
Rochester, N.Y. has been on the air for 45 years. I think the
show got the hook for a year or so back in the early 80s- but
quickly resurfaced when the station was bombarded with
complaints from irate listeners.

The show continues to attract a huge following.
The Abrahams remain very active, teaching young
schoolchildren in the Finger Lakes area about gardening
and enviromental matters. Great folks!

IT'S OFFICIAL.....

Dallas now has a new All-News station... The format just debuted less than 10 minutes ago, as I write this. The station that made the change is Sunny 95, KSNN.

I understand the new calls will be KEWS.

Segueing from Anne Murray's "A Little Good News" into a top of the hour id touting the fact that they are the first all news FM station in American, former "easy country" stationKSNN-94.9 is now All News 94.9. The top of the hour started with traffic and weather (always on the tens) then (what else) news. Upon FCC approval, the station will be known as KEWS. An aside.....the first all news FM's were those brave souls who programmed the ill-fated NBC/NIS service in the mid 70's. So I guess 20 years later, everything old is new again.

COULD A PERSON BE FIRED TWICE IN
12 DAYS FROM THE SAME LOCATION?
IT MAY BE HAPPENING AT KMOX

by Scott Simon

ST. LOUIS --- Former full-time KMOX sportscaster Randy Karraker, cut 12 days ago, was offered a part-time weekend position, but has apparently lost that as well.

A KMOX air personality tells me tonight that KMOX general manager Rod Zimmerman wasn't thrilled about Karraker's two appearances on rival station KSD-AM, the station that won the rights to broadcast the St. Louis Rams football games last year.

The summary? Both parties can't have it both ways. KMOX can't expect Karraker to bow down to them after kicking him off the full-time staff. Karraker can't rub it in KMOX's face by appearing so quickly on a hated rival.

At least it's more money saved by "The Voice of St. Louis."

2309. DENVER RADIO STATIONS SWITCH FORMATS YET AGAIN....

Newsgroup: rec.radio.broadcasting
Date: 1996-02-28 00:00:00 UTC
From: Patrick Cook <pcook@spieg.interealm.com>
Message-ID: <4h1cdj$4ak@vixen.cso.uiuc.edu>
Source record: 25288

Hello everyone:

This is my first post, so bear with me, please. :-)

KVOD & KZDG FM SWITCH SPOTS ON THE DIAL
=======================================

A long-time Denver favorite, Classical Radio KVOD-FM 99.5 will move to 92.5 effective March 4th. The move is intended to get a better audience for the 92.5 slot. At the same time, Denver radio station KZDG FM 92.5, currently in simulcast with KVOD as FCC approval is pending, will move to 99.5 _AND_, according to word of mouth, will carry an AC format similar to KOSI 101.1 FM.

Before the simulcast, KZDG carried the all too familiar "Z-Rock" format. All of the FABULOUS transmitter equipment which 99.5 currently uses will remain there so many people won't have too much trouble picking up on the new format, however classical music lovers will have to get used to the WEAK signal that 92.5 puts out (unless upgrades are in the works), or switch to NPR-affiliate KCFR-FM.

KYBG SPORTS TALK RADIO GOES TO RADIO HEAVEN
==

Yes, you heard correctly!! The station which NEARLY out sports-talked 50,000 watt blow torch KOA has indeed gone to radio heaven. Word has it that the station will revert back to the very format it entered the all sports talk format from. That format being spanish music.

The station has been in a ratings battle ever since KKFN-AM 950 took to the airwaves and took the radio rights to the NBA's Denver Nuggets and the NHL's Colorado Avalanche away from KYBG, which was vying for the rights while the Avalanche were known as the Quebec Nordiques.

And to think, this station is also a 50,000 watt station to boot. WHAT A WASTE OF RF!!!

At last listening, the station is currently in simulcast with KQKS-FM 104.3 as the fate of this station, whatever it is, is decided upon and approved by the FCC.

KLTT GETS NEW LIGHT
===================

Those of you here in the Denver Area may have noticed that there is a new station cropping up on AM 670. That station is really a re-location of an old one. Word from reliable sources have it that KLTT, which according to the Radio Directory, currently resides at 800 Khz., has been

testing their new equipment at 670 Khz. for an apparent move to that frequency.

The move, currently awaiting FCC approval, would wipe out any and all attempts to hear such stations as WMAQ in Chicago, and another station in San Francisco at night for those who are into broadcast DXing. (The call letters don't come to me right now) should this station be able to remain on the air 24 hours a day.

That's the news from the Denver radio scene.

Patrick Cook,
Denver

2310. Halifax Radio Watcher's Report (02/26/96)

Newsgroup: rec.radio.broadcasting
Date: 1996-02-28 00:00:00 UTC
From: Wayne Harrett <harrett@ra.isisnet.com>
Message-ID: <4h1cdk$4al@vixen.cso.uiuc.edu>
Source record: 25289

>From The Captial Of Nova Scotia, Canada.....This Is A Halifax's Radio Watcher's Report.....

-Harv Stwert who does morning sports, on Q104, & 780/KIXX/Country now does Sports on 96.5/SUN FM. The three stations are part of the Metro Radio Group. They joined forces earlier this year with Q104, and KIXX moving in with SUN FM in the SUN Tower Building.

-Mike Richard's Drive Home Show on SUN FM now has "Cartoons".....from 5 to 6 Mike plays requests from listeners in their cars off their car phones, while giving traffic conditions.

-The Metro Radio Group announce that Jim Trites has join their team as a senior marketing consulant.
Jim has an outstanding 19 years career in broadcasting throughout Canada. His experience as an on-air announcer, retail sales representative and retail sales manager gives him a unique perspective on the marketing of business through the radio medium.
-The Metro Radio Group's Sales Consulant Of The Month is Francine Hollohan. She consistently performs to high standards of excellence. her contributing clients for her sucess in January- Sunbway, Mic Mac Mall, Nubody's Fitness Centres, Sport Chek, O's Regan's Toyota, Worlwide Communications, The Halifax Mosseheads, Future Shops, and Blacks Photography.

-Another station is now on the Information Highway. Q104, (The Home of Rock & Roll) joined on. BJ, Herv,& Lisa, the Morning Team had a great time the first morning they went on-line, having listeners (140 in all) e-mail them with greetings. The Q104 e-mail address is...<qcrew@istar.ca>

*In TV land....ATV (The Atlantic Television System) has changed their NEWS look- adding new graphics, a
blue backdrop, new music, and a spinning globe, among other things. Live At Five has slowly begun to emphasize more newsy content. The 5p.m show is airing longer more in depth on issues of the day & the week. There has been them days when Live AT Five has spent 15 minutes examining one issue through four or five interconnected stories. They have done this in the past, BUT it's more noticeable. Bob McLaughlin ATV/ASN news director since last October states "We're constantly trying to improve and change."
The fall BBM ratings indicated the show was still the second most popular show in the Halifax extended market (behind the ATV Evening News) It will be interesting to see how these new changes have an effect on viewers.....

*Concert Update....Muchmusic (Cable's National Music Channel) presents..MELISSA ETHERIDGE, with special quest ASHLEY MacISAAC at the Halifax Metro Centre Sunday, March 24th.

THAT'S IT FOR NOW FROM HALIFAX!!!!!!

I had a similar experience recently using the AC-2 algorithm in
dubbing a radio station's music library to hard disk. This was done
at the 32 kHz sampling rate, which placed the Dolby method's sonic
anomalies well within the range of FM broadcast audio. An associate
got around this problem in his next project by recording at 44.1 kHz,
which shifted the anomalies upward to the point where they were much
less apparent to the human ear.

The APT-X algorithm is much more forgiving at the 32 kHz sampling
rate, but then the compression ratio is only 4:1. Despite the onward
march of technology, there is still no such thing as a free lunch in
BRR audio.

Take care,

Chris Beckwith
Armstrong Associates, Inc.

It would seem that you have discovered a new "euphonic distortion." Such effects are not at all unusual; they are why single-ended triode amplifiers (with very audible non-linear distortion) are the flavor of the week in "high-end" audiophile circles. They also may be the reason why some people continue to prefer LPs to CDs.

My understanding of the 74 minute limitation is that it's related to
the quality assurance of the CD manufacturing process. There is a part
of the disc which is difficult to write on with little error. The 74
min. limit is what can be achieved following a normal process, but as
the manufacturing equipment's quality and precision (and cost)
increase, so does the CD capacity limit, up to a theoretical limit
which I don't know off-hand.

CD's of more than 74 minutes will be commonplace soon, now that a blue light laser has been developed. CD's today use red-wavelength laser optics, but the blue-wavelength laser can read more closely spaced bits.

Cities and Towns for being there for me during the Country Music hiatus in the New York Area:

Stirling, New Jersey
1070 AM WKMB
The Best Little Country Music Station This Side Of Texas

Wheeling, West Virginia
1170 AM WWVA
Interfaith Radio

Buffalo, New York
1520 AM WKBW
Real Country (60's through the 90's)

Philadelphia, Pennsylvania
92.5 FM WXTU
Hot New Country

The above cities and towns host radio broadcasters who have embraced the country music format. Living on the Southern tip of Staten Island, I am extremely fortunate to be able to receive one or more of these stations at various times throughout the day and night. In spite of the loss of WYNY, there are enough neighbors to help tide me over until someone decides to tap this market once again. For any of you readers from these places, country fans or not, please accept my thanks on behalf of your towns for the joy they continue to bring to me every day.

Also, thanks to all the wonderful feedback that I've received from the participants in rec.radio.advertising. I've learned a lot about what makes radio broadcasting what it is, here, in my area, and all over the country.

I'll carry my signature until we have a suitable replacement for WYNY, but, I'll be far less expressive of my disappointment for the loss, because, as it turns out, I have "Friends In Low Places" (that's a Garth Brooks Song for any who aren't country fans), and I'm so glad they are there!

Ron

The answer is no!

Of course, blue-light lasers offer smaller light beams, but no one
will start producing CDs which require blue-light laser CD players.

What is likely to happen is that such higher quality lasers will be
used in the CD etching process to produce higher quality CDs that will
be read by our current CD players.

There's a guy who tours with a series of stunts that he "leases"
to stations/advertisers...goes by Dr. Silkini...has a Buried Alive
stunt...a Human Cannonball deal and a Frozen in a Block of Ice thing.

Don't know how to contact him off the top of my head...am home now...
contact your local booking agent or other similar show biz weasel type...
if no luck, lemme know via e-mail...can probably get his number or how
to contact him from files at work. We did the Frozen in Ice thing, and
though it was one of our guys who did it, I still do not know how, exactly,
it was accomplished. Our guy survived three days frozen inside a block of
ice at a car dealer...the "exhibit" was open to the public day and night...
makes for lotsa traffic!

Are you thinking of the new DVD? (Digital Versatile Disc) It'll
be the same size as the CD but will use two sides with two layers each to
achieve about 15 Giga-bytes (maybe 18, can't remember exactly) of storage
(a standard CD has a capacity of about 680 Mega-bytes). It'll also
contain video and may also contain a "super-audio" format at 24 bit 96kHz
audio. It's still in the development stage. A player will be out in
Sept. I believe. The new player will play the current CD, but the DVD
will not be playable on a standard CD player. Well, it is possible for
some of it to play. One layer from one of the sides could be recorded in
the current format, but the disk is only half as wide so some of the
current CD players may not be able to track it properly.

It is has two big things pushing it: a) Everyone agrees on the
format & b)it'll be recordable (although the capacity will be lower than
above). I guess the local AES section meetings come in handy every so
often!

As I understand it, existing CD won't be able to read the blue light
CDs. New players, designed to read the new CDs, will be able to read both
types --

Reply-To: sebert@bgnet.bgsu.edu

I am looking for information on CKYC Toranto Ontario. Are they still
on the air. I work for a station in Ohio that is on the same
frequency (1430) and we haven't heard their interferance for a while
in the evening. We were wondering if they were still on the air or
have moved to another spot on the dial.

There is a great deal of misinformation about Broadcast Architecture and the services we offer our client stations. Our single purpose as a company is to help our clients achieve ratings success by providing them with the finest research tools in the industry. Any recommendations provided by our company are firmly and solely based upon research. A group of "stuffed shirts" did not decide the direction for the new WKTU--the people of New York designed the format. Broadcast Architecture, like many reputable research and consultation firms, does not generate "loony theories." Our Smooth Jazz format, one of our most successful ventures, is firmly grounded upon the belief that the only way to maximize a radio station's potential is to ask the listeners, city by city, what they would like to hear, and to put that product on the air.

What you hear on the air will always, in the end, be the product of a station's Program Director and the talent of its staff. Placing "blame" upon consultants (and we are proud to be "blamed" for WKTU, by the way) for what you hear on the air is, at best, misguided. Our advice, deemed "laughable" by Larue, is welcomed at many fine stations across the country, including KTWV, Los Angeles, WASH, Washington D.C., KODA, Houston, and KIOI, San Francisco, among others.

Radio will always be, first and foremost, a form of entertainment. Good research can only help make radio more compelling for its listeners.

++
Media Management Survey, Bowling Green State University, OH
Technology: Does it pay to be the first with the latest technology?

If you are a station manager or station engineer, or have previously been in either of these two positions, I could use your help. (If not, you can still help!)

Below is a survey of questions to research how stations are keeping up to date with technological advances from the management perspective. Your participation will aid in research for a Media Management study at Bowling Green State University in Bowling Green, OH.

Please complete the following survey as soon as you can and return it to ceckste@opie.bgsu.edu. If you can not answer these questions, please forward this to someone who can. If you'd still like to help, I will also welcome opinions to the topic question at the top of this survey. Thank you in advance for participating.

1. Does your station try to keep up with technology by purchasing state-of-the-art equipment? Why or Why not?

2. In your opinion, do you think this is a good tactic?

3. In your station's opinion, is this a good tactic?

4. In what ways does your station keep up with technological advances (i.e. equipment rental, purchase through magazines, etc.)?

5. Where do you see the future of technology headed? Do you feel your station is doing well in heading this direction? If not, how should they change and why?

6. Any additional comments?

7. What is or was your position at your station?

Thank you for your participation!:)

>RKO pictures. Anyone know the frequency or any other history
>of the station?

No, the towers are labeled KRKD, and they stand on the roof of the Spring Arcade Building in downtown Los Angeles.

KRKD began life as KFSG, the radio voice of the Four Square Gospel ministry of Aimee Semple MacPherson. As I write this in a plane over Kansas, I am listening to the recorded voice of our dear departed Sister Aimee, transcribed.

Her early literature shows towers astride Angeles Temple, in Echo Park, emblazoned with KFSG on their flanks, with lightening bolts issuing from their caps. She sounds like Bette Midler in "For the Boys."

In those early years, our dear sister's transmitting apparatus shared a frequency with KGEF, radio's "Kind, Gentle, Emphatic Friend" owned by Reverend "Battling Bob" Shuler, (no relation to the Crystal Cathedral's "Smiling Bob" Shuler.)

Shuler, who a left-leaning paper of the era dubbed "the Cotton Mather of Flower Street" was an unrepentant pain in the ass to the corrupt administration of Los Angeles in the 30s, just about the time that the feds were asserting increasing control over radio broadcasting.

Aimee kept a good watch on her tongue, but let her frequency drift a bit more than the regulators liked, but when they shut her down, she dispatched a fiery telegram telling those heathen bureaucrats that she was fitting into the almighty's wavelength. "Order your minions of Satan to release my station at once!" They did.

Shuler was not so lucky. The Federal Radio Commission sent Battling Bob a collect telegram one day, telling him his broadcasting service was no longer needed, and Sister Aimee's KFSG no longer needed to share its precious ether. It ultimately wound up as KRKD at 1150 AM.

Aimee went to that great broadcasting station in the sky where all shows can be "sustaining," and KRKD moved to the Spring Arcade building, and operated from a longwire between the towers during the 40s. Today, the old KFSG AM is KIIS AM. Its transmitter was moved during the KRKD days to a hilltop near the Silver Lake Reservoir. Its one of the nicest transmitter sites in LA.

Today's KFSG FM is the original Four Square Gospel FM, owned by the church. 1150's new sister station, KIIS FM, is the former KKDJ, which before that was KRHM, one of the early privately owned "quality for the sake of quality" FM stations in Los Angeles.

The Spring Arcade building with its self-supporting towers, is a historic radio landmark for two reasons. It not only housed KRKD's studio during the days that program were "commercial" or "sustaining" and came in 1/4. 1/2, and full-hour sizes, it also was home to Radio Central.

This was a facility where all the major stations sent 24-hour broadcast loops, and there was a big patchbay where programs could be switched to and fro amongst LA's stations. You could buy an hour on KFWB, Hollywood, and then a half an hour on KFOX, Long Beach, and Radio Central would see that you could do both programs from one studio...from anyplace you could get a studio or broadcast line.

RKO did own a station in Los Angeles...KHJ, but that was in the days of RKO-General. Except for KFWB, which was owned by Fox &Warner Brothers, Los Angeles radio was pretty well dominated by new car dealers and preachers, with an occasional network, oil company and receiver manufacturer thrown in for good measure.

KHJ is a good example. It went on the air as the radio voice of the Los Angeles Times, during the days of Harry Chandler. Its three canaries, named Kindness, Happiness and Joy, lifted their voices in song during the breaks.

But Chandler got out of radio, probably in response to the increased government control that was silencing Shuler and cramping Aimee's errant frequency hopping. He sold KHJ to Don Lee.

Lee's Cadillac agency was not going to take a back seat to the Packard dealership owned by Earle C. Anthony, who put the jewel of the west coast, KFI, on the air in 1922.

Anthony was not just a fast-talking jalopy peddler, he was an engineer, and understood broadcasting as well as anyone in Los Angeles. He was also a thorn in the side of NBC, which tried many times to buy his 50K Class 1-A clear-channel powerhouse, but it was not for sale, and they could't bear to lose KFI-640 as their Los Angeles affiliate.

Anthony was even able to force NBC to put the Red network on his KECA, which today is known as KABC, 790--now in duopoly with KMPC-710, the radio voice of the marvelous "ring -free"oil from the MacMillan Petroleum Company. It started its life licensed to Beverly Hills, and had its own share of trouble with the Radio Commission.

NBC, in fact, never owned a radio station in Los Angeles. During the golden years, NBC programs came from the corner of Sunset and Vine, in a building that has given way to a Home Savings edifice. But an occasional program came from Anthony's KFI Theater on Vermont, which

still stands, but today is a Korean Newspaper.

But you asked about KRKO, and I'm sorry to tell you there never was such a station in Los Angeles. About the closest you'll get is at the corner of Melrose and Gower. You can get a greasy hamburger at the Astro, and look across the street at the southwest corner of the Paramount lot.

You'll see there, that the corner of the building is capped with a globe, now painted over. The careful observer will note that the continents are in relief upon it, hard to detect under the wash of paint. And the oldtimer will tell you that once, when that was the southwest corner of the RKO Radio Pictures lot, there was a model of a self supporting radio tower there, making complete the RKO Radio Pictures logo. So I suppose, in fact, there is a KRKO after all.

NOTE: I wrote this on a plane from memory, without access to any sources, so please forgive any inaccuracies, which I'm sure my good friend Stan, an excellent Los Angeles radio historian (who lurks on this group), will be more than happy to point out. Much of his research is in these paragraphs.

Andrew: If you look again, you'll see the calls are "KRKD"...it's been KIIS-AM(1150) since the early 1970's. It was KRKD's reporter who was closest to Robert Kennedy when he was assassinated at the Ambassador Hotel in 1968...the tape of the reporter(name, anyone?) repeating "Senator Kennedy has been shot...Senator Kennedy has been shot"...and then describing, live, the struggle as Rosey Grier and Rafter Johnson tried to take the gun from Sirhan Sirhan is in wide circulation even today...and was used in the late Tom Clay's hit single "What The World Needs Now/Abraham, Martin and John"(Mowest-1971).

From: mccaskey@polaris.net
Message-ID: <4h7tak$842@vixen.cso.uiuc.edu>
Source record: 25163

Anyone have any detailed info about the sale of WTNT/WNLS in
Tallahassee? Rumor has it that the stations were bought by a certain
rich person who is trying to make a "network" of stations across Florida.
Also rumor has it that this person also bought or already owns WSUN in
Tampa. Anyone confirm this?

2335. Detroit's Dick Purtan to Move

Newsgroup: rec.radio.broadcasting
Date: 1996-03-01 00:00:00 UTC
From: jeffdeck@aol.com
Message-ID: <4h7t9j$82g@vixen.cso.uiuc.edu>
Source record: 25164

Reply-To: jeffdeck@aol.com (Jeffdeck)

Detroit's popular morning drive radio host Paul "Dick"
Purtan announced his last day at WKQI-FM's "Q-95.5"
Hot AC format will be effective on March 15, according
to WXYZ-TV's local morning newscast this morning.
WOMC-FM's "Oldies 104.3" will formally announce
Dick's mid-April arrival on March 16. He will bring his
zany morning crew with him. His long-time friend, and
former CKLW-AM and WXYZ-AM co-host, Tom Ryan,
currently does morning-drive at WOMC-FM. Tom will
probably again provide his many fine voice simulations
of Detroit's "movers and shakers" on Dick's show.
50,000-watt super-station WJR-AM, "The Great Voice
of the Great Lakes," was courting Dick for many months
to fill the huge void left when J. P. McCarthy passed
away last year. J.P. was on the air at WJR-AM for more
than thirty years. Dick felt that WJR-AM's news-talk
format did not fit in with his show. Both WKQI and WOMC
play music between Dick's comedy bits, news, and
weather.
Dick will reportedly earn 1.5 million dollars per year in a
multi-year contract on Detroit's most powerful FM station,
190,000-watt WOMC. Tim Kiska with The Detroit News
wrote that Dick currently earns one million dollars annually
at WKQI.

> > What ever happened to morning man Ralph Lockwood?

Wow! There's a name from the History books of Montreal radio. I listened to the birdman on CKGM when I kid and you guys have brought back a lot of memories. I can't completely recall the name of the football player who got the call in the hotel room but it sounded something like Mike Wiggen or Wigget. Anyway the call did happen. Ralph returned for a brief stint at CKGM in the early 1980's, after he made a weekend appearance on a CJAD Montreal radio reunion. From all accounts he headed to Pennsylvaina and is still in that vincinity.

Oh yeah, who remembers the day he handed out one dollar bills on Greene Avenue one St.Patricks day?

Matt "Mauler" Cundill

Is this true even if the station(s) being interfered with are located in adjacent markets? Tampa and Jacksonville are each about 90 miles from Ocala, but 100Kw @ 1,000+ feet goes a long way down here in the flat swamplands of Florida. Even though distant by mileage standards, both WQIK and WQYK put decent signals into Ocala and attracted listeners here until BBN's translator began operation.

very interesting! I would hope this could be true. There is no reason I need to hear Family radio on 2 full power (50kw) and 3 translators all in one location, all with simulcast programming.

10>>does the WOR neetwork still have affiliates...
10>the WOR Network was actually the Mutual Broadcasting System,now
10>owned by the Westwood One outfit.

Eric,
Wrong! The WOR Radio Network has 340+ affiliates and is going very strong. You're thinking of one of the earlier networks started by WOR. There was Mutual, then the RKO Radio Network and now the WOR Radio Network. The WOR Radio Network feeds Talk programming 23 hours a day on Satcom C5, Transponder 23, SEDAT Channels 21 and 16.

The shows are:

Dr. Joy Browne, The Dolans, Jay Severin, Joey Reynolds, Dr. Ronald Hoffman, Arthur Frommer, Warren Eckstein, Ralph Snodsmith, Arthur Schwartz, Online Today and The Group Room.

The "Westwood One outfit" owns a lot of things, but we're not one of them. The WOR Radio Network has absolutely no association with Westwood One.

Rich

Speaking of Paul Barsky (who I worked with briefly at the late, lamented WAXC/1460 in Rochester in the late 70s), I hear he's in Chicago now...anyone able to confirm that?
Apropos of WCAU, they hung in with talk as long as they were delivering decent drivetime ratings, but the last straw for local talk back then was probably the death of their most visible personality, ex-Mayor Frank Rizzo. Rizzo was hardly laid to rest before the oldies simulcast began...if he were still around, they'd probably have hung on long enough to catch the big talk wave of the early 90s. I've heard WWDB on a couple of recent visits to Philly and Atlantic City...they still do some good stuff, but it can definitely be beaten, especially now that morning man Paul Smith (no relation) is packing up and moving to WJR in Detroit.
'DB's new owner Charlie Banta is a genius at programming rock format stations, but he's had a couple of failures already in talk programming in Buffalo and Washington. He tends to tilt it too far right, too sensational and/or too fluffy for the markets' tastes. Result...in each case a latecomer to the format (WBEN in Buffalo, WMAL and WAMU in Washington) stole away format dominance. So CBS/Westinghouse has an opportunity...wonder if they'll sieze it?
Bob Smith, middays WXXI-AM 1370 Rochester NY

2350. ADMINISTRIVIA: Seeking more 'news and information'

Newsgroup: rec.radio.broadcasting
Date: 1996-03-01 00:00:00 UTC
From: Bill P <rrb@clm.aiss.uiuc.edu>
Message-ID: <4h7t8s$812@vixen.cso.uiuc.edu>
Source record: 25237

Greetings all:

>From time to time I like to churn the pot a little here on r.r.b / AIRWAVES and remind everyone that this is primarily a forum for professional-level discussion of news and information related to the art, business and science of radio broadcasting. We welcome the input of serious non-pros and listeners as well, but our main focus is the radio professional, para-professional, ex-professional and future professional.

While we get quite a bit of news and information (thanks to everyone, especially our fine RadioWatchers) I would like to make a public plea and encourage everyone reading these forums, who hears of radio-related news and happenings to post it here first. Rec.radio.broadcasting has broken many stories long before other more traditional trade publications have gotten ahold of the info.

Unlike traditional trade pubs, here on r.r.b, we are all reporters. We all are authors and columnists. Please, if you have information that can be of interest to broadcast pros and others in the industry, do not feel shy about posting it here. The more information we get the more service can be rendered to our business.

I do ask that if you are posting copyrighted material, that you indicate on your post that you have gotten permission to post it. I don't have the time to check on that, so I am relying on you, the poster, to be straightforward in crediting the source.

You should also know that we have a 'headline news' version of AIRWAVES called 'AIRWAVES-SELECT'. In A-S, we don't publish threads and discussion, just news and other items of informational interest. If you are interested in subscribing to that, drop me a line.

Also, you may read the articles in AIRWAVES via the web. On this page you can 'point and click' to read specific articles. All email addresses and web URL's in these pages are live hyperlinks, which means that you can instantly look at someone's page just by clicking on the URL they post. The address for that page is... http://radio.aiss.uiuc.edu/~rrb/online.html .

In short, I appreciate all the effort of the fine posters on this group. However I ask those who may be lurking to 'unlurk' and get involved. Your contribution is irreplaceable.

Thanks

2351. Burlington - Plattsburgh Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1996-03-01 00:00:00 UTC
From: jt@together.net
Message-ID: <4h7t8t$815@vixen.cso.uiuc.edu>
Source record: 25238

Burlington, VT - Plattsburg, NY Radio Watch Update

WEZF, no doubt in response to the fall arbs, took a major shift down yesterday. At 3:00 p.m. Wednesday afternoon (2/28) they stopped using "The Best Songs on the Radio, 93 FM, WEZF" and started using "Soft Rock 92.9, WEZF." The music has gone from third down to first gear, so to speak, moving away from a hotter back to a straight AC sound that contains alot of down tempo 'soft rock' tunes (like Another Day in Paradise by Phil Collins and Songbird by Kenny G).

Several Stations are smarting after last falls book. Champ 101.3 was heard last week running a liner that went like..."Classic Rock and Roll...Champ 101.3 - Arbitron Rated NUMBER 7 !!!"...at least they have kept their sense of humor.

Word of a CP granted in Westport NY on 102.5 FM. Yes, that's directly across the lake Champlain from Burlington. This will be one channel up from WLFE (102.3) in St. Albans so it may make both stations unlistenable in Burlington. This situation exists right now with WMNM, Oldies 92 (92.1), WCFE, Public Radio (91.9), WCMK, Religious (91.7). Depending on where you are and what kind of car radio you have, you cannot listen to either one!

Regards, Joe Tymecki

Just in case you thought we didn't have enough Class A FMs with bad signals in this town...

It looks like Memphis is about to see its final 80-90 class A hit the air. Over the past few days I have been hearing WHLE-94.9 (licensed to Byhalia, MS) test. These tests have consisted of long sets of AC music clearly being run on some sort of automation with occasional E-95/Memphis mentions.

The signal is unforgivably bad... I live out East (the side of town closest to the site), and I had a lot of trouble with it. My opinion is that the signal is a fatal flaw... only time will tell.

Rumors of sales continue for nearly every station in town.... Stay tuned.

See 'ya at CRS...

NEW PD/MD AT KEDJ: Shellie Hart, APD/MD at CHR KUBE, Seattle, is the new PD at Alternative KEDJ(106.3-The Edge). Chris "Curly" Patyk signs on as MD. He'd been PD at Alternative KKND("The End") in Tucson.

A KINDER, GENTLER KSLX?: Classic Rock KSLX(100.7) PD John Sebastian acknowledges that his station is adjusting its musical texture in the direction of the old AAA approach at KZON(101.5). The Zone is now all-out alternative. Sebastian says classic rock is not limited by years like oldies formats and newer songs are now being added.

NEW PD AT KVRY: Dan Persigehl is bolting WKEE, Huntington, West Virginia for the PD gig at Hot AC KVRY(104.7). Rumors continue that a switch back to the original format and calls of Top 40 KZZP are imminent. Perisgehl was runner-up for the PD gig at Nationwide's sister CHR station, WNCI, Columbus, Ohio.

GEE THANKS, BUT...A trio of turndowns in the past few weeks...Country KNIX(102.5) PM Drive talent Steve Goddard was offered mucho money to move to another Phoenix station(rumor has it it's the upcoming reincarnation of KZZP, where Goddard reigned from 1981-1988)...but he's way too happy at KNIX. 30-year-plus market legend Bill Heywood, now doing mornings on Talk KFYI(910) was pitched a deal to move to a music station...he'll pass. And Heywood's boss, Fred Weber, just turned down a $50 million offer for KFYI and sister CHR KKFR(92.3-Power 92).

WINTER '96 TRENDS: Arbitron hates it when we get numbers-specific, so: News/Talk KTAR(620) down; KKFR , KNIX and Country KMLE(107.9) all up ; KFYI down; Adult Standards KOY(550) down slightly; AOR KUPD(97.9), Oldies KOOL(94.5), Smooth Jazz KYOT(95.5), AOR KDKB(93.3) and AC KESZ(99.9) all up; AC KKLT(98.7)flat; Classic Rock KSLX down slightly; Alternative competitors KEDJ and KZON both up slightly and tied; KVRY up slightly, 70's KHTC(96.9) down slightly; MOR KTWC(103.5)down slightly; Sportstalk KGME (1360) up slightly; Spanish KVVA(860) down slightly; and CHR/Rock KBZR(103.9-The Blaze) down slightly.

2355. New Talk Radio Network set to launch in March

Newsgroup: rec.radio.broadcasting
Date: 1996-03-01 00:00:00 UTC
From: Kent Phillips <talklink@lc.gulfnet.com>
Message-ID: <4h7t90$81e@vixen.cso.uiuc.edu>
Source record: 25242

A new talk radio network will be starting in March with a line-up of names you know and some fresh newcomers to the talk radio scene. March 8th Orbit Seven will release the new weekday line-up with a weekend line-up to follow in June. Based in Vancouver Washington Orbit Seven is a consortium of companys providing all the services of the major networks to independently syndicated talkers. The all new master control facilities are state of the art with digital technology and fully automation friendly. Satellite homes for Orbit Seven will be Satcom C-5, Transponder 15 (11-1) and analogue on Satcom C-1 Trans 14 7.5 audio.

The network will be headed by Jamison White, himself a talk host and head of Jamison White Productions, parent company to the network. Technical Director for the network is Mike Ezzell of SpringSoft Labs. Program Director is Brian Jennings of Super Talk Radio Consultants. Dan McDade and Kent Phillips of Talk-Link Services will handle affiliate/host/media relations. Bill Wilson and Ballyhoo Promotions will handle advertising sales for the network and most of the independent syndicators.

The network program clock provides for 11 minutes of local avails with automation tones for full walkaway operation on the station end. All programing is total barter to the stations. All production for custom ID's, liners, etc., will be handled by Orbit Seven's in-house production staff and sent to affiliates on closed-circuit feeds daily.

With only day's to start-up Orbit Seven is close to filling the full weekday line-up and beginning to fill a strong weekend line of shows, not even scheduled to premier until June. For the independent syndicator Orbit Seven's approach puts them in the position of only having to do their show and being assured the other details of the business are capably handled.

On a similar note, is there a device that would enable the "adjustment" of
FM (or AM for that matter) frequencies? I am able to receive a decent
signal on a couple of frequencies, BUT, other neighboring frequencies
disrupt it. Is there any way to fine tune the desired frequency and squelch
the offending one?

Thanks.

Source record: 25245

Nickels, Bob wrote the quoted material below:

" information and create networks - but this isn't about technology, rather it
" is the ability to recapture the imagination and recreate the diversity of
" entertainment that allowed the radio broadcasting industry to thrive that is
" again needed.

I think that the people who want to save AM radio aren't looking at it in
a rational way. In the old days, people looked around and tried to see
what needs they could fill. "Oh, nobody's doing classical music; let's
do classical." "We've got two competitors doing MOR, so let's do rock."

There are plenty of niches to get into. Look at the underserved markets.
In the SF Bay Area, 4 AMs and 1 FM do various Spanish language formats.
In San Jose, one AM station appears to be fulltime Vietnamese. In SF, one
FM station has a fulltime Cantonese SCA, while another FM has two SCAs,
one with fulltime Russian and the other fulltime Portuguese. There are
PLENTY of people who are underserved in various radio markets, but it
takes someone willing to throw out ALL the assumptions to look at who is
really out there to be served.

> What is
>expected of the jock while he's at an appearance? Does he help serve
>pizza? Does he make in-store announcements on the store P.A.?

Instead of asking what the jock should be doing, why don't you turn the question around and ask how you as a station can benefit most from the appearance.

Make sure the jock is active, walking around shaking hands and introducing him/herself - "Hi, I'm John Smith and I do mornings at K100." Put stickers, newsletters, keychains, etc. in the jock's hands to give out when talking to listeners. If you're at a club or a store with a PA, make sure the jock gets on the mic in front of the crowd and welcomes everyone, pushing your call letters along with what's happening at the event (register to win, free pizza, etc.). Press the flesh and get as much out of the event as possible. I guarantee you that the client will see an active jock interacting with his/her customers and be quite pleased. It works everytime.

Message-ID: <4h7t94$81n@vixen.cso.uiuc.edu>
Source record: 25247

[Bill, there's another message I accidently sent with a subject line of "huh?" which is a duplicate of Charles' original. Please disregard it.]

Charles Graves asked:

> are there any stations out there running automation, if so, what type
> and what are the stremghths and weaknesses. I have seen several
> systems but am not convinced

WCRB is running a system consisting of a Broadcast Electronics CORE 2000, a DigiCart, and three NSM CD jukeboxes between midnight and 6 am nightly.

The system has been reasonably trouble-free but very hard to set up. I invested about two months of my time adding code to my music scheduler ("Maestro!") to create the files that the CORE needs and stuff them with the right pieces of information. Because we are a classical station we have to load the jukeboxes every day. One CD in the wrong slot can screw everything up, as can a cut with an incorrect "end-of-message" indication.

We tried to use this system in the daytime a few times. It proved almost impossible for our people to make last minute changes to the schedule without screwing up on the air. There's also a firmware problem in some of BE's controller cards that surfaces from time to time which is very troublesome.

The bottom line is we've decided to jettison the BE system. We've bought a Scott System which we hope to put on the air by mid April.

I have had this same answer from US West here in Denver for service in
downtown Denver. I kept calling and finally got a hold of someone who
knew what they were talking about and we got the service installed.

The basic issue is that that CO didn't have a digital switch. US West had
to FX the ISDN service from a CO that had a digital switch via fractional
T-1 serice and convert it to ISDN at the local office. It all work and we
did a 200 station braodcast on New Years Eve without a hitch.

Just keep calling and don't take no for an answer.

2367. Clear Channel Expands

Newsgroup: rec.radio.broadcasting
Date: 1996-03-07 00:00:00 UTC
From: Linwood A Hagin <lahagin@cc.ysu.edu>
Message-ID: <4hl9pq$71g@vixen.cso.uiuc.edu>
Source record: 25183

Clear Channel Communications just announced Sunday (3/3) that they will be purchasing another radio group. Here's the info from a Clear Channel insider:

In case you haven't heard, Clear Channel announced the purchase of Ragan Henry's group (US Radio) this morning. That's 13 FMs and 5 AMs either owned or through JSAs and LMAs. Clear Channel has also bought WOOD AM/FM and WBZT in Grand Rapids. That's 21 stations since dereg and we're not even up to the level of Infinity, Jacor, or SFX.

Can others post on how this affects particular markets? Thanks.

I was just following up on news that Infinity bought WVEE/Atlanta as part of a 12-station deal. Does anyone have any info on that? I assume they won't be changing much, since VEE tops the Atlanta arbitrons. I guess they won't be putting Stern on a mostly black station.

Source record: 25186

As for the fee requested we generally go with what the talent gets for a regular remote. $50 bucks an hour is our set price. As for what the talent should be doing....Look at it as a chance for a group of your listeners to interact with the people that they listen to on the air everyday. Also another thought is that you don't want the jock burdened with serving food, or handling the technical crap....Get yourself a good part-time tech to sell station merchandise and the bucks roll in from that too.

" I'm a 16-year-old high school senior who was a DJ for a local college
" station for about three months, and am really interested in becoming a paid
" professional after I graduate from college or during my college years.

Hi. If you want some real advice, I'd advise you just to do this as a
hobby or in a dance club. You'd have a much better chance doing this than
working in the field. It's an extremely competitive field where the jobs
have shrunk at least 25% in the past 5 years. Also, in all but the
largest cities it doesn't pay very well. Meanwhile, if you want to put
an audition tape together, I'd suggest you go back to that college
station and try to get some production time to make. All most program
directors are looking for in a tape is a sample of how you sound, how you
read, and whether you can get in and out of a record okay.

Source record: 25188

JM>Reply-To: jmglavin@aol.com (JMGlavin)

JM>In asking around the country I have discovered the installation and
JM>monthly costs of ISDN lines varies widely. For example, I've heard
in
JM>Nashville an ISDN install and monthly charge are basically the same
as a
JM>conventional residential phone line, while here in Atlanta I'm
hearing
JM>that ISDN is $100/installation and $100/mo.
JM>Are any of you hearing the same/different?

John,
In New York City I've been quoted $300 installation, $45 per month and 1 cent a minute after the first three minutes at 3 cents. I ordered a line 4 weeks ago and have yet to receive an installation date from NYNEX. I had a NYNEX representative visit to discuss other matters and he promised to look into it. It's now been four business days and not a word.

One arm doesn't know what the other is doing. I received a mailing at home from the NYNEX ISDN division (if that's what they call it) touting the benefits of ISDN and telling me I can have it now. I guess their concept of now is different from mine.

Message-ID: <4hl9qj$72i@vixen.cso.uiuc.edu>
Source record: 25189

I've been reading through my latest issue of M-Street, and, being a beginning radio-professional, not knowing tons about the business yet, I have a question.

I know (in M-Street) they use 314, 315, and 316. How can a station be a 315 (transfer of control) between the same ownership group.
i.e. WTIQ-1490 am Manistique, MI 315 from WSHN, Inc. (S. Noordyk Trust) to WSHN, Inc. (Helene Noordyk, et al.)? There has to be a better example...

What is a sales marketing agreement? (I've heard of LMA's, but not this)...

I think this will cover it. I appreciate all assistance...you're helping a new radio "professional" crack into the business and learn :) Thanks again.

I can strongly reccommend the Aphex Compellor (~$950 new).

While temporarily having one for a live recording, I hooked it up at
home (using appropriate adapters and transformers, of course) and made a
few "custom" tapes for myself. The result was terrific! The Compellor
does an outstanding job of controlling the level through a combination
of compression (fast) and "leveling" (relatively slow - 2.2 sec attack
time)while *not* "coloring" the audio. A subtle stereo enhancement
is also an option. The sound is clean, louder, and slightly "magical!"

Here's an idea - tell him to visit a "music store" in any
reasonably sized city - preferably one that does a lot of
business with local bands - guitars, amplifiers, microphones,
sound equipment. When these bands fold, they often take
their gear back to the music stores (or the stores get them
back) and nice semi-pro audio equipment can be found for a
fraction of the original cost.

I found a number of very nice 19" rack mount type semi-pro
used processing devices at "Skip's Music" in Sacramento.

>
>
I think I have the solution: as the Mod noted, there's built-in limiters
in many cassette decks. The Marantz unit that everyone in radio is
familiar with is probably the best combo of price/reliability/sound out
there that has this feature. About $300, it's a portable cassette deck
that accepts RCA inputs. Ummm, it's about the size of small hardcover
Stephen King book. You'll have to get it from a radio supply company
(Broadcast Supply West, etc) or perhaps a radio specialty company, if
you're in a large-enough city. Wish I could remember the exact
make/model....maybe the Moderater can lend a clue.

I was heavily involved in the design and tuning of the dbx 266 "Project 1-series" compressor/gate. When you operate the release time towards slow, it can be fairly smooht, though it certainly doesn't do everything that a true broadcast compressor/limit will. I've seen these for sale new for about $230.

From: ronkr@pipeline.com
Message-ID: <4hpv00$bf@vixen.cso.uiuc.edu>
Source record: 25055

Last night for more than an hour I was listening to country music on 89.3 FM, WCNJ. Being a country fan who has been saddened by the loss of a good FM broadcast in the NY area, I thought I'd stumbled onto something. However, a couple of hours later the format changed to another style of music.

Does anyone know anything about this station? If they have a nightly, or even weekly, country music segment, I'd certainly like to know if it's a regularly scheduled thing.

They were advertising local businesses from Sayreville, NJ. This is right on the other side of the bridge where I live on Staten Island. I thought I'd found a really "local" signal that I can receive quite well.

Thanks for any information on this radio frequency.

2380. Boadcast delay Question

Newsgroup: rec.radio.broadcasting
Date: 1996-03-08 00:00:00 UTC
From: wyndav@primenet.com
Message-ID: <4hpv00$bi@vixen.cso.uiuc.edu>
Source record: 25056

Greetings Broadcasters,

I am an audio engineer in the recording field. After long days in the studio listening to music I often listen to talk radio on my way home. One evening show I listen to often has a need to use the kill button regularly. I understand the basic principle of delaying the broadcast signal but I have not been able to fathom out how it is that there is no apparent interruption in the broadcast signal at my end. For instance, the host takes a call and the caller says something the host does not want on the air. At my end all I hear is a "sniped off" bit of what the caller was about to say and the host saying something to the effect of, "Ahhhh... sorry, can't have that here." Why is it, if there is an interruption in the signal, a KILL, that I don't hear any dead air. Even a fairly quick button push would result in 50 or so milliseconds of dead air. Would someone be kind enough to explain to me how this works?

Thanks...

Longtime broadcast engineer Don Coulter has died of cancer at the age of 40. Don was a staff engineer at the old WGAR-AM in Cleveland from 1976 to 1985. He was a Systems Engineer at Pacific Recorders and Engineering in Encinitas, CA for several years before moving to Disney Imagineering, where he designed audio applications for Disney theme parks. Most recently Don was the Customer Support Engineer for Telos Systems in Cleveland. He literally talked scores of engineers through the brave new world of ISDN setup for the Zephyr. Don is survived by his wife, Jane and their three children. Don was one in a million ! Memorial Services will be held in Berea, OH Monday March 11. If you need further information E-mail Jack at CallaghanJ@AOL.com or 72260,572@CIS

It is always difficult to share sad news, but we felt that many of you would want to know.

Don Coulter died of cancer today at his home in Cleveland, Ohio. He was 40 years old.

He joined Telos Systems in 1993 as a Customer Support Engineer, becoming an indispensable resource for customers. Don prided himself on being able to demystify technology for those new to broadcasting. No question was too basic for him to answer. And, he also loved the challenge of working with seasoned engineers to solve their thorniest problems. For many of us, Don's middle initials could have been "ISDN." When it came to Integrated Services Digital Network lines, Don often coached phone company representatives about their own service. No matter the problem, Don always went the distance.

Before coming to Telos, Don worked for Walt Disney Imagineering where he helped design audio and video systems for attractions at the Walt Disney Theme Parks worldwide.

For seven years before that, he worked at Pacific Recorders & Engineering, where he was Systems Project Engineer/Telecommunications Manager.

He got his start in radio in his hometown of Cleveland, where he began as a staff engineer at WLTF-FM, then moved on to Midwest Corporation, eventually becoming Chief Engineer at WGAR-AM/FM.

A member of the SBE and the AES, Don also held a FCC First Class Radiotelephone license in the days when that really meant something.

Don is survived by his wife Jane and three children, Meredith, Anna, and Paul. Expressions of sympathy may be sent to the family care of Telos Systems.

Don held the light so the rest of us could follow the path to new technologies. We shall miss him.

DX AUDIO SERVICE MARCH 1996

Informational Press Release

Hey kids... Jerry's back with another edition of the AM Switch. It appears that the FCC is back to work, however in checking out the files in their web page, apparently they have other things to do.

I know that this is late getting out. I've been installing some new equipment here, and getting some construction done while there is a break in the weather. It's been cold in Ohio, and the heavy snows put us off the job site. One of the projects is to get ISDN facilities in the studio. At the present time our local telco is saying 6-9 months.

Our Web Page is still attracting a lot of people. By working with several people that are blind and use speech programs for their computers, we have been able to solve the graphics problem. In the near future I hope to fix up the Web page with pictures, information, and hypertext links for better management of the material we have. I've taken the opportunity to add an Aircheck page for people that are interested in recording of radio stations. If you would like to check out the page in it's old for the URL for it is... http://wcoil.com/~gnbc/

>I need some (actually, I need quite a few) information on the history of
>radio broadcasting on America. To be more specific 'HOW IT BECAME A MAJOR
>INDUSTRY IN AMERICA'. Anyway, any info is really appreciated (ANY--AT&T,
>Marconi, De Forest, FCC, etc.....). Please E-Mail (if possible).

I hope this helps - and maybe it'll prompt some correspondence:

I believe that the start of Radio in America was directly responsible for its inception in Britain. Apparently several British industrialists visited the US sometime around the beginning of the 1920s and saw the proliferation of small stations. They recognised a commercial opportunity and about 600 of them formed a company which aimed to make money out of this new medium in Britain.

They rather astutely realised that while they might make money out of manufacturing and selling radio receivers, the buyers might be disappointed to find that there was nothing to listen to. The company was called the British Broadcasting Company, and they eventually persuaded the government to allow them to broadcast programmes, subject to some interesting conditions: for example, broadcast of the news (supplied from agencies) was forbidden before 7pm so as not to compete with newspapers; similarly, anything politically controversial was forbidden. Controversy was never defined, which must have made a lot of lawyers salivate! This was also the beginning of the rather uneasy relationship between broadcasters, government and printed media in this country - something that has not gone away to this day.

When they opened the first studios, at Savoy Hill in the centre of London, John Reith, the company's chairman gave a speech, of which I have a recording. In part of it he said, "...it was obvious that broadcasting should be under the control of one company, one broadcasting authority, if the chaos which today reigns in America were to be repeated here."

Clearly there were advantages to this "chaos" - at least listeners had a choice in America, whereas in Britain they had the BBC or nothing.

I would be interested to know what the state of the industry was in America at this time, and lots of other things: did they call their audience, "listeners"? (In Britain they were called "listeners-in"). And were programmes sponsored, or were there individual commercials, or both? Were commercial charges split up into bands depending on the time of day as they are now? When did they start doing "soap operas"?

If anyone has info on any of the above I would be interested, too.

Please note my views don't represent those of the BBC but are based on a skim of the vast archives which the BBC holds, of pictures, documents, recordings, and early film & TV. It's a bit frustrating in a way because there is so much material it would take several lifetimes to see it all....

There are probably 50 different textbooks that could give you
that information. I'll sum it up, though. PROCTOR & GAMBLE. Nuff
said. Keep selling that soap.

Seriously, if you would like, I will check with a friendly prof.
at the university I attended, and see what the current textbook
they uses in broadcasting 101. Let me know.

2395. Early Radio in America - a British perspective

Newsgroup: rec.radio.broadcasting
Date: 1996-03-08 00:00:00 UTC
From: mark.harmer@bbc.co.uk
Message-ID: <4hpv0f$c9@vixen.cso.uiuc.edu>
Source record: 25071

I hope this helps - and maybe it'll prompt some correspondence:

I believe that the start of Radio in America was directly responsible for its inception in Britain. Apparently several British industrialists visited the US sometime around the beginning of the 1920s and saw the proliferation of small stations. They recognised a commercial opportunity and about 600 of them formed a company which aimed to make money out of this new medium in Britain.

They rather astutely realised that while they might make money out of manufacturing and selling radio receivers, the buyers might be disappointed to find that there was nothing to listen to. The company was called the British Broadcasting Company, and they eventually persuaded the government to allow them to broadcast programmes, subject to some interesting conditions: for example, broadcast of the news (supplied from agencies) was forbidden before 7pm so as not to compete with newspapers; similarly, anything politically controversial was forbidden. Controversy was never defined, which must have made a lot of lawyers salivate! This was also the beginning of the rather uneasy relationship between broadcasters, government and printed media in this country - something that has not gone away to this day.

When they opened the first studios, at Savoy Hill in the centre of London, John Reith, the company's chairman gave a speech, of which I have a recording. In part of it he said, "...it was obvious that broadcasting should be under the control of one company, one broadcasting authority, if the chaos which today reigns in America were to be repeated here."

Clearly there were advantages to this "chaos" - at least listeners had a choice in America, whereas in Britain they had the BBC or nothing.

I would be interested to know what the state of the industry was in America at this time, and lots of other things: did they call their audience, "listeners"? 2396. Radio broadcasting in America

Newsgroup: rec.radio.broadcasting
Date: 1996-03-08 00:00:00 UTC
From: MH@bbc.co.uk
Message-ID: <4hpv0g$ca@vixen.cso.uiuc.edu>
Source record: 25072

Not sure this will help but I'll throw it in anyway...

I understand that several bosses of British companies came over to America just before the beginning of the 1920's, and were made aware of the unregulated but nevertheless active nature of Radio broadcasting there. They then returned to Britain and a group of about 600 such companies got together to make Radio receivers, as they thought it would be a commercially viable idea. It also occurred to them that it would be a good idea for people to have something to listen to if they started buying radios, and they persuaded the British government to let them start broadcasting - the company they formed to do this was the BBC (British Broadcasting Company) which was later wound up (in 1926) but led to the formation of the British Broadcasting Corporation, set up under a renewable 10-year charter (provided they behaved themselves!).

Incidentally, they were spot-on commercially - when the BBC (company) was dissolved at the end of 1926 there were 2-1/2 million households listening to the programmes - a phenomenal growth for a new medium.

In one of the archive tapes I have, John Reith addresses his staff at Savoy Hill on the opening of the Studios in London, in 1922. He says: "...it was clear that there would have to be one broadcasting authority f the chaos which today is so obvious in America were to be avoided here..." - the "chaos" refers to the unregulated, individual stations operating at that time.

So America gave us radio (as far as I can find out). I would be interested to know exactly what was going on (programme-wise) at the beginning of the 1920s, and when things like the early soap operas started up. Also, was American radio sponsored or did it carry discrete commercials, or both?

This doesn't exactly respond to the *Info needed on Radio Broadcasting in America* but I hope it fills in a few gaps from a different perspective, and I would be interested to know about the few questions I've set out above.

Is there a literature of interviews that went really bad?

I remember a J.P.McCarthy Focus show on WJR, during the Detroit Auto Show, when they got a world-famous Japanese auto designer to stop by for a chat, and you could tell that the F.J.A.Designer felt he spoke English, but neither J.P. nor anybody else could tell what he was saying. This ran about ten wonderfully awkward minutes.

One of their women reporters (Ann Thomas? not sure) interviewed a canoeist who paddled the great lakes, and the paddler's point was pretty consistently that this was the dumbest thing he'd ever done, and the reporter's questions never strayed from the heroic exploit line, so it turned into a classic Bob and Ray interview.

For your info, here in Britain ISDN connection charges are twice that for a standard phone, but rental and call charges are the same. (Approx 200 pounds connection, 180 pounds pa rental.) BUT you have to buy two lines at a time, which effectively doubles your installation and rental costs if you only really want one.

Here in Denver the installation cost is $65 and the month service charge
for unlimited local connect time is $65. BTW US West is trying to
increase these costs with the public utilites commission.

>
At this time, most of the 56K limitations are created by the long
distance carrier. You may have 64K between you and your central office and
the person in DC may have the same situation - but the long distance
carrier is not connected to one or the other of you at 64K. Sometimes,
this problem is solved by changing long distance carriers. You can try
this by dialling with the standard five-digit prefix (e.g., ATT is 10288)
to see if it makes a difference.

And, yes, their are a few local phone office still at 56K.

Sounds like we're afraid of a little competition. Yeah, the industry has shrunk a bit, but at the same time, it's made the personalities that are left, better.

My advice to the young man in the original post is to work hard, maybe go to college and get on with a communications program that will allow him to work an internship at a radio property and continue on that path to employment. That's almost what happened to me, but I latched on to a station part time, and that eventually went full time middays. My school allowed me to count my actual work experience as my internship so I got the credit anyway.

There are other stories of how some of us backdoored our way into radio. Maybe if you share your stories, you could help the young men and women who are the future. Plus some of us old guys like to hear those stories. I can't help it. I'm a radio junkie with tracks on my ears.

My 2 cents

Actually, the FM was country TWICE under Park! When it changed calls to
KJJO-FM from KRSI-FM (formerly KFMX, then KRSI-FM again before that) in
1980, then after dumping Modern Rock/Alternative ("KJ-104") a few years
ago. As KJJO...let's see if I can get this right...it was Country, then
Oldies, Classic Rock, Hard Rock, Rock, Alternative, Country (those goofy
jingles..."Thunder 104 --- Thunder One-Oh-Four---ONE!"), Classic Country,
and Jazz/NAC. Hope I didn't miss anything!

> Some details: Price was $22 million....It's Nationwide's debut in the Twin
> Cities....Stations were once country (under Park) as KJJO. Tom Taylor/
> Inside Radio

That doesn't even begin to describe what these stations were under Park... Let's see if we can trace this back:

Current: Smooth Jazz
1992?-1995: Country (First, contemporary country, then classic country)
1990?-1992?: Modern Rock KJ104 (Nobody wanted to see this format go)
1985?-1990?: Heavy Metal Hot Rockin' 104 FM (Their longest-lasting format)
1983?-1985?: Classic Rock/Oldies "20 Years of Rock n' Roll" K-JO 104 FM
(My personal favorite of all the formats; the perfect combination of classic rock and oldies, unfortunately, it came five years too early for the classic rock craze)
1981?-1983?: Country K-JO 104FM

I think this is as far back as Park goes; before that the station was KRSI with a different owner, I believe.

This is the legacy that Park left us with. Any time the station got too popular, they would quickly change the format and sink back into mediocrity. The only format they were successful with was heavy metal.

So, what kind of owner is Nationwide? Can we expect a game of "musical chairs" with formats, or will we perhaps get a musical format we might actually want to listen to?

2412. Paxson adds 2 more in S. Florida

Newsgroup: rec.radio.broadcasting
Date: 1996-03-08 00:00:00 UTC
From: sdl1@freenet.tlh.fl.us
Message-ID: <4hpv13$df@vixen.cso.uiuc.edu>
Source record: 25088

On Tuesday, March 5, Paxson Communications announced it is purchasing
Adult Alternative outlet WSHE (103-5 SHE)) and sister station WSRF from
TK Communications for a reported $57.5 million. This follows the heels
of paxson's purchase last week of Spanish outlets WRMA (Radio Romance)
and WXDJ (Radio El Zol) for $115 million. Paxson already owns Rock
outlet WZTA (94.9 ZETA), All news WINZ, Jazz WLVE (Love 94), Spanish
talk WACC, and Ft. Lauderdale talker WFTL in S. Florida, as well as
stations in Orlando, Tampa/St. Pete, and Jacksonville. With Zeta and SHE
basically running the same format (Zeta plays a few Classics,
maintaining a 70/30 New/Classic mix), talk is that there may be a
format switch, with SHE as the one likely to change. Since SHE changed
from a Rock to Alternative format last June, numbers have slipped, and
rumors are that SHE will either go Country, Talk or Classic Rock, with
the latter being a interesting option, since that was the format ZETA
abandoned last year for it's current New/Alternative with a few
Classics thrown in. With Beasley's WKIS as the only country outlet, A
move to country might make sense, although Lowell "Bud" Paxson has
said he wants to keep both stations Rock, keeping both formats intact.
With Aventura's WPBZ (The Buzz) ready to upgrade their signal
southward this summer, that
could slide SHE's number's even further,
so a switch is still likely.

I found out yesterday that She 103.5 here in Miami/Ft. L market was sold to Paxon Broadcasting for like 60 Million. And earlier Paxon bought WXDJ-FM (El Zol 95-Salsa/Merengue) and WRMA-FM (Romance 106.7-Spanish AC) from New Age Broadcasting(?) Which makes it 8 station which Paxon owns in South Florida (Zeta 94.9, 940 WINZ, Love 94, WFTL-AM, WSRF-AM [She's sister AM] and the three previously mentioned)My questions are these...

1. Will there be some changes at any of the newly acquired stations. My guess is that She and WSRF may, but not Romance and El Zol.

2. Will those 4 stations join the others at the Paxon building in North Miami. Where will they fit in? ;)

That's my update and speculation. God I've been in TV too long. ;)

Several top hit songs now use the f-word and the s-word, and many commercial stations around here are playing them unedited. Have the rules changed, or is the envelope being pushed a bit farther than it should? Can't these folks get in trouble for this practice any more? Thanks, ---Dan

Our college modern rock station, WICB, did this one for
Valentine's Day: we had listeners write love poems to the station. They
were to send their "Ode to ICB" via e- or snail-mail, and we got quite a
few. The best one got dinner for two at a local restaurant, and a
serenade by an a cappella group from Cornell. Cost to us: nothing. We
got the dinner for two in exchange for a series of gratis announcements
(yup, we're non-com) on our Beatles specialty show.

Don't know how new, interesting, or innovative it was, but it worked and
it was cheap. I'd love to see this thread get started...new ideas are
always a good thing.

We are a noncommercial college station that sells grants. One of our
sponsors has asked if we can do a live remote from the store. We have
done live remotes from such places as the Humane Society, but it seems to
me that doing this from a commercial establishment would violated the
noncommercial rules. Do others have thoughts on this?

Correction to make. Heller will be at WVIA-TV, not FM. Heller has
hosted "The News Directors", a monthly show on 'VIA-TV. This show is a
round-table with the ND's of WBRE-TV and WYOU-TV, discussing current
local/nat'l events and how they are covered, plus viewer phone calls.
Heller will also host the monthly show, "Issue Line". There, he replaces
WBRE-TV's Dia Wallace.

> advance!

For the AM band, just take your telephone cord that goes to the wall
outlet and drape it next to the loop. Orient the line for best signal.
The telephone line is a huge antenna, and what you pickup from the
line is the re-radiated signal.
Just for fun take one of the little transisor am radios and tune to
a weak station and then place it near any wiring, even your lamp
cord and hear the improvement.
Direct connections are not needed anyway and are (as the emergency
room doctors would say) "contraindicated".

As for the distant FM a beam antenna up as high as possible is the only
real cure. Good luck.

Happenings in the #40 market:

*Clear some space in the nursery...

Janet Snyder,half of WKSE(Kiss 98.5)'s morning drive show,is expecting
her third child. The new bundle of joy is expected sometime around August.
How did Snyder take the news? In today's Buzz column in the Buffalo News,she
was quoted as saying,"This is definitely a 'whoops'-a happy 'whoops'. I mean,
who plans their labor for August? I came out holding the(pregnancy)test stick,
and said to Will:'I can't _believe_ you! Look at this!'" How did her husband,
Will Kelly,take the news? "Oh,please. He's Irish. He's totally psyched." The
couple have 2 other kids-4-year-old Willy and 2-year-old Kristen.
After the baby arrives,Snyder is expected to do her half of the show from
a home studio(which,it notes,was the kids playroom the last time)for a few
months.

*Vince Richards,program director at WEDG(103.3 the Edge;modern AOR),has
jumped to the same post at Milwaukee's WLUM-FM(102.1;New Rock 102 One),
according to AllAccess. Richards arrived at what was WUFX(103.3 the Fox)
in mid-1994 from a station in Illinois.
Speaking of the Edge,to correct a previous item,Kit Missile _is_ from the
Chicago area,but she arrives at WEDG from Albuquerque. She replaces Rich Wall,
who remains the music director and host of its local show on Sunday nights.
Richards was quoted in the News as saying that the sattion wanted Wall "to
concentrate on his off-air duties." So,the lineup looks like this:

6-10am:Ted Shredd/Tom Ragan
10am-2pm:Kit Missile
2-7pm:Rod Ryan
7pm-mid.:Jason Ginty

*Chris Douglas,who had handled 7pm-midnight duties at WMJQ(102.5,hot AC;
Q 102)left 'MJQ on Friday. Stepping into that shift(which includes the request
show Q After Dark)is Tim White,who had been doing AM drive at WECK(1230;
adult standards)in addition to doing theater acting in his spare time(he's a
regular at the Theater of Youth company)-no doubt,the latter will have to be
cut down a bit.

*Cy Buckley,who moved from radio to public relations for the IRS locally,
died on Sunday in his East Amherst home after a lenghty illness. He was 76.
Buckley stated his radio career at New York's WINS in 1943,then moved on
to WNJR in Newark,N.J.,returning to his hometown of Buffalo in 1952 to work
with WBEN. He produced and announced live stereo broadcasts for the Buffalo
Philharmonic(which leads me to think that he was on the FM side as well as

the AM,as the FM did do classicaal music in its early days). He also worked with WBEN(now WIVB)-TV and WGR(now WGRZ)-TV,as well as spending 8 years with WGR-AM doing an open-line telephone show and doing TV sportscasting. He left Channel 2 in 1965.
In 1970,he became a revenue officer for the IRS locally-moving up to the public affairs officer post in 1974,where he stayed until he retired in 1990.
WBEN's managing editor/reporter Brian Meyer was quoted as saying that "legendary names like Cy Buckley ring larger than life for those of us who have followed in his footsteps. It's sad to see radio's history fade away."
No argument here.

TTYL...

From: JJB92@aol.com
Message-ID: <4hpuvg$ag@vixen.cso.uiuc.edu>
Source record: 25191

As noted in an earlier post which contained the press release, radio legend Steve Dahl has resigned from sports talker WMVP-AM. Steve had been handling the morning drive at WMVP his infamous split with long time sidekick Garry Meier. Steve cited differences with Evergreen management regarding the content of his show. Management wanted Steve to concentrate on sports talk. Steve felt the sports angle was limited and preferred more leeway in show content.

At this time, there is no word regarding future employment for Steve. Additionally, according to Fox Thing in the Morning host Bob Sirott, current cohost Bruce Wolf has parted ways with WMVP.

I would suspect that Steve will return to the airwaves on the FM band within the near future and will keep you posted if anything develops.

JOHN CARNEY LEAVES KSD & MAKES WAY FOR BRUCE BRADLEY

KSD AM radio talk show host John Carney has departed from his 9:30-1 spot, to, supposedly as I reported earlier to fill the post that his father, the late Jack Carney filled on KMOX during the mid 60s to the mid 80s. In the meatime, on KSD, PD Steve Moore, and Traffic Repoter/Producer Dan Strauss are filling the void left by Carney, until Bruce Bradley's contract at WIBV expires, then, Bradley will reportedly step in to fill the Carney spot.

MORE FORMER KMOX HOSTS REPORTEDLY GOING TO WIBV

Sources have said that soon to be WIBV owner Tim Dorsey, is close to reaching an agrement to acquire the services of earstwhile Total Information PM host Barbara Whitesides. Whitesides will reportedly anchor the afternoon drive show with former KMOX newsman Darrell Lloyd(who an agreement has not been reached with yet). The two will reportedly do a news, sports, weather, and information show, ala Total PM.

More on WIBV/KMOX situation as it unravels

Source record: 25193

Hello from the Halifax Metro Area Of Nova Scotia!!!!

Here's an update.....

-There's a NEW campaign in Metro for those who are fed up with automated radio. Doug Barron who is a local record producer and studio owner has started a grass-roots campaign to ease the city's radio stations off their heavy diet of canned programming. Barron was in private radio for 25-years. Over the years he has been with 4 local stations: CJCH, C100, Q104, and SUN-FM. He spent 5 years at Toronto's CFNY.
A similar movement in Northern Ontario- they called themselves "Concerned Canadians for Local Radio"- recently stared down stations in Sudbury, and Thunder Bay, and after a well planned campaign the group manged to convince the stations they shouldn't be dependent upon programming pumped in by satellite.
Buttons reading "I'M FED UP WITH AUTOMATTED RADIO" are now being seen around Metro.

-One of the Country's most respected country disc jockeys, PAUL KENNDY will soon be back on the airwaves. Kennedy- who has won several national awards and citations from the Canadian Country Music Association, a Daily News Columnist, and a host of a local Cable TV show, has been off the air since the beginning of the year when he was laid off from "Country 101" (CHFX), the station where he worked for almost 20 years.
Country 101's main competitor 780/KIXX COUNTRY is in the final stages of putting Kennedy back on the air, MAYBE as soon as this weekend. His broadcast of his show will be LIVE!!!!
A series of small advertisements ran in a local newspaper encouraging country music fans to call KIXX asking the station to hire Kennedy. "The response has just been phenomenal," says Eric Stafford, Newcaps's operation manager for KIXX and it's sister station Q104 "The Home Of Rock & Roll".

_In TV land....There's a BIG shake-up coming to the Metro Cable scene. There's a good chance that several BOSTON based affilates will soon be offered by the Metro's cable companies. At this time Metro recieves ABC/Detroit, CBS/Toledo, Ohio, and NBC & PBS from Maine. The local cable companies have been trying for years to bring Boston to the area at a cost reasonable to the cable companies and subsequently subscribers. When and IF the Boston Stations come here, they will replace existing affiliates.
Details on what channels are coming and going are still being negotiated.

THAT'S IT FOR NOW!!!!!!
Wayne Harrett....Halifax Metro's Radio Watcher

Source record: 25194

On Tuesday, legendary Indianapolis disc jockey Jay Reynolds passed away.

Reynolds died of a massive heart attack at about 3:30 p.m. Tuesday while driving on Indianapolis's Northside. He was unconscious when paramedics arrived, and could not be revived after being taken to a nearby hospital. Reynolds had visited his doctor that morning for a regular checkup that revealed no problems, but by early afternoon at a voiceover recording session at WTPI-FM (107.9), Reynolds was complaining of stomach pains.

Reynolds was best known in Indianapolis for his work at the wildly popular WIFE-AM (1310) in the early 1960s. Reynolds also worked the overnight shift at WABC-AM in New York during the early and middle 1970s. He worked on the air or in sales at several other Indianapolis radio and TV stations: WFMS-FM, WTPI-FM, the former WMCC-TV, and (most recently) the former WGGR-FM. He also worked in Nashville; Minneapolis; Des Moines; Omaha; Louisville; and Marion, IL. He once owned radio stations in Ohio and West Virginia.

Reynolds is remembered as down to earth but, at the same time, larger than life. Jay Reynolds was 59.

2427. ST LOUIS RADIO WATCH 3/7: CARNEY TO LEAVE KSD FOR WIBV

Newsgroup: rec.radio.broadcasting
Date: 1996-03-08 00:00:00 UTC
From: ssimon9@ix.netcom.com
Message-ID: <4hpuvm$as@vixen.cso.uiuc.edu>
Source record: 25195

JOHN CARNEY, SON OF FORMER KMOX ICON JOHN CARNEY,
RESIGNS AT KSD-AM TO GO TO NEW WIBV RADIO

by Scott Simon
copyright, March 7, 1996 *

ST. LOUIS, March 7, 1996 --- The chess game of big names in St. Louis radio moving to other addresses in the market has developed a new chapter, as it has been learned by AIRWAVES RADIO JOURNAL that KSD-AM mid-day host John Carney, son of Jack Carney, one of the greatest broadcasters in St. Louis history, will leave KSD-AM for WIBV-AM, when it is finally under the control of new owner Tim Dorsey.

Details haven't been revealed by the management of WIBV or KSD, but in the last three days, Carney was approached by both Dorsey, a former KMOX executive, and KMOX itself, after it was learned on March 2 that WIBV was being sold to Dorsey.

WIBV won out, because it had a place for Carney, whereas KMOX, with a disciplined and tight format, did not have a place on its weekday schedule.

Although not confirmed by Dorsey, it is believed that Carney will co-host a show with former KMOX radio personality Kevin Horrigan, with a show similar in time and content to Horrigan's previous show at KMOX with Charles Brennan, who yesterday announced he would would not relocate with Horrigan, and stay at KMOX.

All of this activity in St. Louis among radio personalities was precipitated last weekend. On the same day it was leaked that WIBV was being sold to Dorsey, it also was announced that current KMOX staffers Bill Wilkerson and Wendy Wiese were moving to WIBV. When it was also disclosed that Horrigan was also moving, he was subsequently dismissed by KMOX management.

Carney has been at KSD for just over a year, first as the 6-11 a.m. host, then moved to 9:30 a.m. to 1 p.m. after the station went to an all-talk format in December of last year.

His father, Jack Carney, was perhaps the greatest broadcaster in KMOX history. The elder Carney commanded high midday audience ratings and advertising revenues, and brought national entertainment prestige to the "Voice of St. Louis."

Jack Carney died unexpectedly of heart failure during an underwater diving accident in November, 1984, at the age of 52.

John Carney received his first exposure in St. Louis a year later, as the morning sidekick to the late Mort Crowley on KXOK-AM. It was a short-lived marriage. After being out of the business for a brief time, Carney later resurfaced in the late 1980's at album oriented rock WTAO-FM, Murphysboro, Illinois.

It was there that he established his own identity, talent, and style, separate from his famous father, and blossomed into a very good broadcaster.

In 1991, he returned to St. Louis to work at nostalgia formatted WEW-AM, as the morning drive host. Carney refined his skills so much, that many felt he was quickly becoming an established radio entertainer in St. Louis for many years to come.

Carney's work was noticed by Karen Carroll, general manager of KSD-AM, and eventually she lured him to her station in January of 1995 to host a variety type program.

In December of last year, after KSD-AM has established itself as a personality station based on its exclusive contract to carry St. Louis Rams football broadcasts, the station went exclusively all-talk, separating itself from its nostaglia format, and put Carney in the 9:30 a.m. to 1 p.m. slot, almost the same time period his father dominated for years at KMOX, from 9 a.m. to 1 p.m.

There is no reaction from KSD about Carney's defection, or who will replace him.

2428. Bubba Gets The Boot....

Newsgroup: rec.radio.broadcasting
Date: 1996-03-08 00:00:00 UTC
From: Patrick Cook <pcook@spieg.interealm.com>
Message-ID: <4hpuvn$at@vixen.cso.uiuc.edu>
Source record: 25196

Hi everyone:

Bill, I know you're going to probably see this in the AIRWAVES JOURNAL anyway, but this just can't wait. (Note: the source of this information is a paraphrased excerpt of Rocky Mountain News Broadcasting Critic Dusty Saunders' Column. If this isn't an appropriate post, my humble apologies, and such future posts won't be made if deemed inappropriate by the Moderator).

FILL-IN SYNDICATED JOCK GETS THE BOOT:
==========

There are few things that are certain in the wacky (if not strange) world known as Denver radio, but there's one thing you can bet the ranch on. That being a syndicated jock, brought in as a fill in, won't be working (much less heard) here anymore.

The reason being that a syndicated jock known as Bubba "The Love Sponge", who was brought in as a fill in for the vacationing Rick Lewis and Michael Floorwax of KRFX "The Fox" FM's "Lewis & Floorwax" morning drive time show, was given the boot after only a day and a half of work.

Why was he booted??

On Monday, station executives considered Bubba's humor a bit raunchy, and was warned after the show. However, it didn't stop there. On Tuesday, Bubba returned with what was considered as nasty talk about body parts and unsavory humor about gays and women. At about 8:30 a.m., Bubba's stint at the station came to an abrupt end when he was personally escorted out of the studio by KRFX Operations Manager Jack Evans.

His shift was finished by Music Programmer Beau Bennett, and the rest of the week (which concludes tomorrow, 3/8) will be filled in by afternoon drive time personality Alan Roach.

KRFX General Manager Don Howe told Dusty Saunders "We sometimes push the envelope on ``The Fox'', but Bubba went way, way over the line."

There's no word as to what action, if any, the FCC will take either against KRFX-FM, a Classic Rock station, or Bubba "The Love Sponge", whose home is WFLZ-FM in Tampa, FL. Also, it's still unknown and uncertain as to how many advertisers and listeners were lost as a result of this catastrophe.

Anyone with any additional information please feel free to post it for all to see. (Note: I don't know about Dusty Saunders, but THIS cyberspace reporter did NOT hear the offending broadcasts, BTW).

That's the latest scoop in Denver radio....

Patrick Cook,
NOT a Radio pro, but an avid fan of the new "Hawk 99.5 FM", and listener
of KIMN, KWMX, and KOSI-FM stations

To the best of my knowledge, there are only two Christian radio stations
on the air in Canada

1. "The Light" (CJCA) in Edmonton
2. "The Bridge" (CJOR) in Vancouver.

Further, it is my understanding that the operators of "The Light" (Touch
Canada Broadcasting Inc) are in the process of applying for a license to
operate a Christian station in Calgary.

>WUWM Milwaukee Public Radio is one of them.

>See homepage at www.uwm.edu/Dept/WUWM

Hiya, Dave! <waving>

Dave is correct in pointing out that all-news or news-driven-talk has found a place on FM, and in public radio. A look at the "hidden" (unpublished) ARBITRON ratings for commercian *and* public radio stations shows that for news, public radio stations in places like San Francisco, Boston, and Washington are consistently out-performing commercial all-news stations, and have been for some time.

And...as a matter of historical perspective...let's see, in the Baltimore market, what was WBAL-FM (and is now WIYY-FM, "98 Rock") was all-news during the days of NBC's News and Information service (a.k.a. "This is your jingle and dumpcue station..." <giggle>). In D.C., as has already been pointed out, WAVA-AM-FM was all-news for many years before turning to music. Some will debate NBC's move back then to make a very successful CHR WRC-AM ("The Rock of the Capital") into
an NBC/NIS all-news, and turning the FM into disco (shoulda moved that rock format to what became WKYS-FM).

<stepping up to soapbox> The recent tragic train crash in which an AMTRAK train and a Maryland commuter train collided in Silver Spring, Maryland underscores my point that Washington, D.C. is *ripe* for someone who knows how to program an all-news/no-talk/no-sports radio station in the Nation's Capital. A colleague monitoring one of the side satellite feeds for CBS Radio told me that, as per their usual practice, in the event of a big story like this, CBS began to feed to affiliates the air signal of the local station closest to the story...in this case, WTOP-AM. One problem: as reported before, after 6pm, the majority of the station's newshour is programmed from the AP "all-news" feed...and not readily excerptable by other CBS affiliates. The only local presence on this story was the studio anchor/board op gamely reading wirecopy about the train collision, and switching back to AP...again and again. The first real "on scene" report that either WTOP or CBS had on this story was several hours into the evening (around 9pm, three hours after the crash happened), when CBS excerpted the voice

track of a CBS-TV network reporter filing from the scene. (NOTE: All this is from a very reliable source, working in a radio station newsroom that evening.)

I'll say again: its a travesty that Washington, D.C. does not have a full-time,

all-news/*no-talk*/*no sports* radio station of some sort. A station I can turn on any time of the day, and find out what the news is. A station that sends its own reporters into the field to *cover* the news, no matter where it happens, and when it happens. What we have now is a pale, pale excuse for the WTOP of old. There's a golden opportunity in the D.C. market for someone to come in and eat WTOP's lunch...because its clear that they don't care. Not when an AP all-news feed fills the overnight and weekend hours. Not when a big, national story like this happens...and all they have is wire copy and a satellite feed.

In a small to medium market, sure. In a top-ten market...that's ridiculous.

<stepping gingerly off the soapbox>

Cheers,
Max

> noncommercial rules. Do others have thoughts on this?

We're a non-com college station as well. We do remotes all the
time (well, not *ALL* the time) from outside theaters where bands are
playing, at station events & such. (We do a huge '80s Dance Party every
year at a local bar and broadcast from there....similar events too.) As
far as I know (and caveat: I'm not Promotions so I don't know the exact
rules), as long as you don't include a "call to action" (e.g. "Come on
down!"), you're okay.

Anyone else want to add or correct?

Anyone who buys radio should consider why the listener is tuned into the
station.

>
>You should buy WWL because it's a great radio station with a great
>signal, not because someone has told you they "reach 40 states."

You should consider WWL if it has great programming, where listeners will
strain to hear it, even though static, fades and noise. They will listen
to your message.

>Only DX'ers get excited about faint, distant signals they wouldn't listen to
>for pleasure.
>
There are radio DX-Collectors. There are also a lot of people
who search out distant stations because they are current, pleasurable and
exciting to listen to. And they buy.

2437. KZZP-Phoenix, AZ

Newsgroup: rec.radio.broadcasting
Date: 1996-03-10 00:00:00 UTC
From: "John C. Musselman" <john@primenet.com>
Message-ID: <4ht68i$lh2@vixen.cso.uiuc.edu>
Source record: 25005

Well... Michael Hagerty was right. Nationwide Communications has reincarnated KZZP 104.7 FM in Phoenix. Although there are currently no jocks talking on the air, the lineup is pretty much known to people who have followed this issue...

AM: Jonothan Brandmeier
Midday: Ginny Harman
Afternoons: Cary Edwards
6-10: BJ Shea
Overnight: position not yet filled

In my opinion... Brandmeier is about the only good thing in this whole picture. The rest of the talent lineup really disappoints me. Jocks like Kevin Ryder and Gene Baxter (now Kevin and Bean at KROQ in LA), Doug Roberts (Sluggo at KROQ in LA), Clarke Ingram, Valerie Knight, etc... These people were what made KZZP in the 'good ole days'. I think based on what the NEW KZZP will be offering... JB is about the only good thing. Keeping talent from the previous station (KVRY) and only a minor modification of the music lineup did not impress me. In fact, I would predict they match the ratings of KVRY.

I strongly believe that the only way this station could be successful is to truly do what they said their intent is to do... bring back the sound and talent of the OLD KZZP. I am thoroughly unimpressed with their current proposed lineup (with the exception of Brandmeier) and I think they will see in their first few books that they made a mistake!

I could be wrong after they actually put people on the air, but I am extremely disappointed at the moment...

Michael: your thoughts? :)

>address is atc@npr.org

Um, small correction, Brian. Harry Shearer's "Le Show" is *not* produced by
NPR.
It is an independent production of public radio station KCRW-FM in Santa Monica,
California (which *happens* to be an NPR member station); the show is
distributed via the Public Radio Satellite System. The Web page for KCRW can
be found at http://www.kcrw.org, with a bunch of "mailto" links, one of which, I
believe, goes to Harry Shearer's show. If not, e-mail to webprod@kcrw.org, and
I'm certain they can get the message to Shearer's attention. The address you
noted is that of "All Things Considered" on NPR....*not* Harry's show.

I have written about this in the past, but since the topic has come up again, Ill briefly recap.

I got a book from B Eric Rhodes, president of Radio Ink, called "Radio's First 75 Years" and I love it. It is not your typical radio history 'encyclopedia' and i won't explain everything in excruciating detail (thank god) but it is certainly the most unique book on the topic I have ever seen.

I say *seen* rather than *read* because about 80% of the book is pictures. Yes, pictures.. and not the usual run-of-the-mill stuff either, many of these pictures are very unusual and span from early radio experiments through the modern age. It even has Forwards by such notables as Rush Limbaugh and Paul Harvey..

There are like, 900 or more, photos in this great book and I love it.. It is hard-covered, coffee-table sized and a fascinating read.

Eric reads this group from time to time. The book

I ordered mine by calling 1-800-226-7857. And no, I am not getting paid to say this....

>Is there anyone out there who can help me as far as coming up with an
audio
>sample and a resume?

Hey, Matt:

Here are a couple of ideas: Find a station in your area with a PD that will let you talk to him for a couple minutes. Ask him if you can have some of the old resumes and airchecks he's received from applicants so you can see/hear what these beasts are like. You'll get some great ideas listening to those. You might also ask him/her what they look for. But be sure not to just copy these T&Rs. YOUR tape and resume has to reflect your character. It is a statement by and about you.

Good luck!

>cohost Bruce Wolf has parted ways with WMVP.

Rumors are a-flying on Steves web page (http://dahl.com) that he will
resurface on WCKG - the most obvious choice. I bet he pulls in better
ratings than Stern there!

Also, Bruce Wolf aired the show on Friday by himself and it sounded like
he was under contract with MVP for quite a while and his future was with
MVP in some role or another. Could Harry Teinowitz (sp?) be in line for
the MVP morning show now?

It is a strange turn of events to have Garry Meier broadcasting in town
and Steve Dahl out of a job!

>> NYNEX. I had a NYNEX representative visit to discuss other matters and
>> he promised to look into it. It's now been four business days and not a
>> word.

In Boston Nynex is charging me over $400 for installation and
sixty-something per month. The line was ordered in mid-January and still
isn't in. It was originally scheduled for Feb. 28, then March 4, and
then they said even though all the engineering paperwork had been filed
showing an available pair there wasn't one so they'd have to go back to
the drawing board.

NYNEX seems to behave as though it doesn't really want to sell ISDN
service. Getting pricing information from NYNEX (at least in the Boston
area) is like pulling teeth.

WVKS, 92.5, KISS-FM

Last summer's nude volleyball caper on the city's International park volleyball court was resolved yesterday in Toledo Municipal Court. Charges of public indecency were dismissed against David Echelberger and Peggy Hunt, the two people who showed up to spike in the buff in order to gain two tickets to the Rock and Roll Hall Of Fame concert. Three personnel from radio station KISS-FM-Denny Schaffer, Tricia Courtney, and junior producer Susie, who dreamed up the radio stunt pleaded no contest to complicity to commit public indecency. The judge (Francis Gorman) withheld a verdict, saying he would dismiss the charges in about two weeks if KISS-FM carries out its promise of a community service project.
Since the case involved nudity, there is a certain irony that the project is a clothing drive for the Salvation Army.

So Bubba the Love Sponge was escorted out of the studio in Denver for going "way over the line?"

Question: When the station management brought Bubba into Denver, did they know who they were hiring? This guy has been around for more than five years. He's been on in a lot of markets. He's syndicated. His act is even featured on the Friday Morning Quarterback CD.

Seems to me, when you put a guy on your air, and he does the same act he's become famous for, it's YOUR OWN DAMN FAULT if you don't like what comes out of the speakers.

BTW- If you don't mind raunchy, Bubba's awfully funny at times.

Happenings in the #40 market:

*Palm Beach Broadcasting will officially become the new owners of WBLK (93.7;urban)next Friday(3/15),as noted by Tony Violanti in today's Buffalo News. Ross Elder,the CEO of Palm Beach,was quoted as saying that the company was "aware of the tradition of WBLK and it's going to stay exactly as it is." Frank Lorenz(son of 'BLK's founder,George "Hound Dog" Lorenz)said that he was pleased that WBLK's tradition would continue. IMO:I'm pleased that 'BLK is returning to the more urban sound it had,after taking 18 months to ease in an urban AC format that went nowhere. Palm Beach has a financial relationship with American Radio Systems(which already owns WECK/1230(adult standards), WJYE/96.1(AC) & WYRK/106.5(country).)

*Speaking of WJYE,it now has a new set of commercials running,playing on the new morning team of Joe Chille & Nancy Barrow,as well as their music. (No,Joe & Nancy don't appear in it;and no,one of them isn't on a motorcycle-if you remember 'JYE's last commercial. :) It uses a woman working at home,saying how well the music fits into her day-and dealing with her kids. WBEN(NewsTalk 930)also has a new ad out,featuring mid-morning talker Gary McNamara(in front of a microphone)talking about the callers to his show. (http://www.wben.com/)

*WJJL(1440,Niagara Falls;oldies)has had some personnel shifts. Chuck Vicario(better known as "Big Wheelie",head man for the local musical group The Hubcaps)has left his noon-1pm shift,where he played rare & vintage rock as well as R & B from the '50's. Violanti's column said that Wheelie hopes to land another post playing gospel music from that era,quoting him as saying that "there's so much good gospel music from artists like Elvis & Sam Cooke that most people have never heard before. I'd like to give it some exposure." Meanwhile,Danny McBride-whose local radio stints stretch back to the 50's-is on Sundays at noon.

*Cyber-file:CIDC(103.5,Orangeville/Toronto,dance/CHR;Hot 103.5)is now up and running with their own site on the Web. Not much exists on the page as yet;what is there includes their live-to-air schedule,top 30 list,features, and e-mail to some of the jocks including Jesse Dylan(_the_ Jesse Dylan of Jesse & Gene fame?). Try it out at: http://www.bramnet.com/hot.htm .
-CFTR(680 News)has a Web site complete with Streamworks,with which you can listen to 680 News. It's located at: http://www.canoe.ca/680News/home.html
-WCMF(96.5,Rochester,AOR;96 WCMF)has its site on-line-with profiles of the jocks,cool sites,etc.(but no e-mail as yet)at: http://www.wcmf.com/ .
-Warning!:The address Violanti mentions for WGR(550)isn't correct. The right address is: http://www.moran.com/htmld/wgr55 . Also,even though-with RealAudio-you can listen to the station,nowhere in the article does it say

that you need at least a 14.4 modem to listen to it(28.8 gives you the best results,however). There's also a chat area at the site.

TTYL...

2450. Promoting a book via radio

Newsgroup: rec.radio.broadcasting
Date: 1996-03-10 00:00:00 UTC
From: drmaier@wam.umd.edu
Message-ID: <4ht67o$ld7@vixen.cso.uiuc.edu>
Source record: 25102

My father recently had a book published. The publisher is a small university press (Ide House) and has done next to nothing to promote the book. My father has been doing personal appearances and readings with a good deal of success, as he usually sells several books (e.g. in his last appearance, he sold 16 books in a audience of 25 people) and is often invited by audience members to give presentations to other groups. However, when it comes to radio and TV, he has had difficulties getting interviews. So far, he has managed to get interviews at a couple stations in our local (Washington DC) market, a 30 minute interview on WGTS FM's program Generations, and a 30 minute interview on Cable TV 21 (the Montgomery County Channel). I assume that these interviews went well, since members of the productions crews asked about getting copies of the books.

In attempting to arrange radio interviews, several questions come to mind:

1) How can he find out which radio stations in a given market produce programs suited to his subject matter?

2) Assuming that such stations have multiple programs where his material fits, should he be contacting producers for all the shows simultaniously, one at a time, or should he be contanting someone else (i.e. the station's program manager)?

3) How persistent should he be? Once contacted, should he be calling producers every few days/weekly until he gets a difinitive answer from them, or does this just alienate the producer?

4) What should he send to producers? Presently, he sends a publicity flyer with a cover letter, and if the producer expresses further interest, he sends out a copy of his book. Would he do better sending lists of interview questions (and answers?), video/audio tapes from his previous interviews or other materials?

5) Any other suggestions?

Any assistance is appreciated.

--Martin Maier

********** ABOUT THE BOOK **********
Just in case this is the Ideal place to inform radio producers about the book, below is some information.

IN LIEU OF FLOWERS by Dr. Louis Maier, is a collection of 28 true stories about his life as a German Jew growing up in the village of Malsch

during Hitlers rise to power.

There is a web page at http://www.wam.umd.edu/~drmaier/inlieu.html
with further details.

2451. Bumper Sticker Record Update (3-8/96)

Newsgroup: rec.radio.broadcasting
Date: 1996-03-10 00:00:00 UTC
From: tonysant66@aol.com
Message-ID: <4ht67p$ld9@vixen.cso.uiuc.edu>
Source record: 25103

Reply-To: tonysant66@aol.com (TonySant66)

So far, things are going slowly but surely. I am trying to set a Guinness record for most radio bumper stickers. I am asking each radio station out there (US, Canada, The World) to mail out ONE bumper sticker (or some other premium item if that cannot be supplied.). If need be, I will send out a self-addressed stamped envelope if you e-mail me your station's address (send all e-mail correspondence to...tonysant@pipeline.com..not my AOL account).

Otherwise send your bumper sticker to:

Tony Santiago
5800 Arlington Avenue - 18N
Riverdale, NY 10471

I will try to post every three weeks or so in order to let everyone know how I am doing. But special thanks go to!

Northants 96.6 (England)
WPXY - FM (Rochester, NY)
CHEZ - FM (Ottawa, ON - Canada)
KevDil@aol.com (who sent a couple of items from Phoenix radio!)

and WICU (Ithaca...the SASE is on the way!)

Thanks again!
Tony Santiago

2452. Mid-America Radio Watch (8-Mar-1996)

Newsgroup: rec.radio.broadcasting
Date: 1996-03-10 00:00:00 UTC
From: transvox@crl.com
Message-ID: <4ht67l$lc6@vixen.cso.uiuc.edu>
Source record: 25104

Fallout from the successful application to curtail WOWO's nighttime
coverage in Fort Wayne, Indiana has reached Kansas City.
This week, the FCC reported that KFEZ(AM), also on 1190 KHZ,
filed an application to increase its nighttime power from 250 to 4000 watts.
KFEZ, a stereo station broadcasting a traditional MOR format, is
also asking to decrease its daytime power from 5000 to 4200 watts, and
remove its present restriction to 1000 watts during critical hours
shortly after sunrise and shortly before sunset.
The station's present nighttime signal is aimed due west from its
transmitting site in the Blue Valley. That site flooded in 1990, knocking
the station off the air for a couple of years after the phasor for
the antenna system caught fire during the floods. KFEZ is not seeking
to move.
KFEZ is proposing a change to its pattern to curtail its coverage to
the west somewhat, with slight improvements to the southwest, south,
and east, and a huge lobe to the east-northeast with an equivalent
power of 25000 watts.
While KFEZ's coverage would be greatly improved over the rapidly
growing northern suburbs of Kansas City, Missouri, there's not much
else in that lobe, which shoots up Interstate 35 (more or less) toward
the Iowa border.
It is extremely unlikely that KFEZ could have successfully made the
proposal while WOWO still had clear-channel coverage privileges in the
northeastern, mid-Atlantic, and eastern-Midwestern parts of the
United States.
KFEZ is one of two stereo broadcasters in Kansas City, and is a
locally owned standalone station.
****
Yet more AM action north of the river: once again, WREN(AM), which
wants to move to a Kansas City, North site from its present nest in
Topeka, Kansas, has amended its application.
WREN, which originally proposed a nighttime power of 3500 watts, and
then 4100 watts, now is asking for 3700 from the proposed site near the
Worlds of Fun amusement park.
WREN, at 1250 KHz, is asking for a daytime power of 15,000 watts with
its move. The proposed site is some 65 miles away from WREN's present site.
****
All is not well in the family at EZ Communications' country duopoly,
judging by the bickering between the morning teams at KFKF(FM) and KBEQ-FM
that's shown up in the Kansas City _Star's_ gossip column.
The sniper fire between KFKF's Mary McKenna and Dan Roberts and
KBEQ-FM's Randy Miller has been going on for weeks. I've preferred to
ignore it. Most of it's been about which morning show has been doing better
in the Arbitrends. KFKF has had some ups and downs recently in the numbers,

while KBEQ-FM has continued steady growth.
However, morning bad-boy wanna-be Miller took the war of
wits (??) to new depths this week, according to the _Star_'s gossip
column. Miller brought his two-year-old daughter on the air to "review"
the movie "Muppet Treasure Island". According to the column, Miller asked
the girl, "And who was the scary old witch?"
And, reported the newspaper, Miller's daughter replied, "That was
Mary from KFKF".
****
A happier note has long been struck by public broadcaster KANU(FM)
in Lawrence, Kansas, whose bluegrass program "The Flint Hills Special"
celebrates its 25th anniversary this Sunday (March 10).
Hosts Bob McWilliams and Dick Powers will present this week's show live
from the Liberty Hall in Lawrence. The original host of the show, Dan Crary,
will return to perform. Crary is recognized as one of the pioneers
of flatpicking: playing fiddle or banjo music with a pick on a guitar.
According to KANU, the "Flint Hills Special" is one of the longest-running
bluegrass programs on public radio. It has also received two awards
from the Society for the Preservation of Bluegrass Music.
****
Lawrence's commercial broadcaster, KLZR(FM), the "Lazer", has opened
up a web site. The address is http://www.lazer.com -- with content reflecting
the station's modern rock format.
****
According to the _M Street Journal_, one feature of the FCC rules being
proposed to comply with the new Communications Act would automatically
revoke the licenses of stations that are off the air for more than one
year.
This means that KZTO, 95.7 MHz, licensed to Ottawa, Kansas, had
better get to work on its new transmitter site, intended to be a
Kansas City rimshot. KZTO has been off the air for 26 months.

From: rueger@netaccess.on.ca
Message-ID: <4ht67q$ldc@vixen.cso.uiuc.edu>
Source record: 25105

It is only recently that the CRTC have begun to licence "Christian" stations in Canada. There are fairly specific requirements for balance - meaning that alternate points of view must be presented. It would be very difficult to start a single faith station.

A number of applications have been turned down, and the current number of "Christian" stations probably numbers ten or less.

Barry

In article <4hpuvg$ag@vixen.cso.uiuc.edu> , JJB92@aol.com writes:
>As noted in an earlier post which contained the press release, radio legend
>Steve Dahl has resigned from sports talker WMVP-AM. Steve had been handling

If you've got Netscape 2.0 and RealAudio 2.0, you can hear Steve Dahl at his Web site (www.dahl.com). He was on live Friday night (and you can listen to a recording of that netcast, too) and will be on live again Monday night at 7:30 CST.

This guy has paved the way for a lot of other personalities in this market, and in this country, and I can't help but think that he's breaking new ground once again. He might not be the first radio personality to start a Web page or to use live Internet audio to communicate with his listeners, but I'll bet the fact that he has done it will hasten others to try it.

Clear Channel is the best of groups.

Their impact on any market they are in has traditionally been to raise the level of broadcasting in the market because you can't make money in sick markets.

They treat me very well in Tulsa and Oklahoma City where my small state network is the largest affiliate they have for their Oklahoma News Network.

The biggest challange they are going to have in their latest acquisition is to get the Henry culture out of his group. Henry got where he is by becoming a professional person of color and Clear Channel got where it is by being good broadcasters. This is where the rubber will meet the road.

2456. Cape Cod Radio Report

Newsgroup: rec.radio.broadcasting
Date: 1996-03-10 00:00:00 UTC
From: Aaron_Schatz@brown.edu
Message-ID: <4ht67i$lbu@vixen.cso.uiuc.edu>
Source record: 25108

Thought I'd file a report from my new market, Cape Cod. Yeah, number #183. Wanna make something of it?

*** WRZE 96.3 has changed formats from Hot A/C to Top 40/Dance. The new morning team on "The New Rose" is "Damian and Dan."

*** The rock wars continue. For years and years, WPXC "Pixy 103" was Cape Cod's only rock station. In the last year its classic rock-based dominance has been challenged by two more modern-looking stations. First is my employer, WKPE. WKPE was Top 40 for years, then switched briefly to oldies. About a year ago, it became "Rock 104.7 The Cape," a modern-leaning AOR mixing Nirvana, STP,Pearl Jam with Aerosmith and Stevie Ray Vaughn. WKPE has now surpassed Pixy 103 in the ratings, and in order to catch up Pixy 103 has gone from classic rock to AOR in a search for a more focused 18-34 male appeal. There is also rcok competition from "The UN" WUNX/WUNZ, two simulcast 3,00 watt stations affiliated with WDRE/Long Island's "Underground Network." Though they have signal problems, they are the Cape's only home-based source for the alternative format, although many folks on the Cape can listen to my other employer, modern rock WBRU Providence. The UN is run by Steve Binder, who used to be PD at WKPE during its Top 40 heyday.

*** WOCN, Cape Cod's new nostalgia station, got a much needed push from a Cape Cod Times story on the ratings for Fall 95. The Times reported that "Ocean 104" (WOCN was #2 with adults 12+. True, but they didn't explain that 75% of WOCN's audience is over 65. The station has been able to capitalize with advertisers not savvy to the limited audiance appeal of an older demographic station.

*** FM talker WXTK took a major downturn in the fall book. It was ranked #2 with Adults 25-54 in fall '94 but was #8 in fall '95. Another example of how the nation's hunger for all Rush-clone radio is diminishing.

*** WCOD (A/C) has a new morning team, with ex-PM driver Tighe Jensen joining newcomer Cheryl Park and veteran newsguy Bill Lowell. Boston radio vet Sean Casey replaces Jensen in the PM.

A guide to the Cape Cod FM dial:

WCIB "Cool 102" 101.9 50,000w Falmouth Lite classic rock
WCOD 106.1 50,000w Hyannis A/C
WFCC 107.5 50,000w Chatham Classical
WKPE "Rock 104.7" 50,000w Orleans AOR
WMVY 92.7 3,000w Martha's Vineyard AAA
WOCN "Ocean 104" 103.9 3,000w S. Yarmouth Nostalgia
WPXC "Pixy 103" 102.9 6,000w Hyannis AOR
WQRC 99.9 50,000w Hyannis A/C

WRZE "the Rose" 96.3 50,000w Nantucket Hot A/C
WUNX "the U.N."/ 93.5 3,000w Harwich Alternative
WUNZ 101.1 3,000w Falmouth
WXTK 94.9 50,000w W. Yarmouth Talk

Well, that's some news from the Cape. I'd say something on Providence, but given the intense battle between my station WBRU and corporate slime-kings 99.7 "The Edge" WDGE I guess I should stay quiet.

Still looking for a full-time job come June...

[posted to rec.radio.broadcasting, with a carbon copy to Lee Zapis]

Interesting observation:

Jammin 92.3 FM in Cleveland has been turning to a new playlist with much less rap and more "upbeat hits" (yuck). Today they ran a promo with a female voice -- which I suspect to be that of PD Lisa Rudman (sp?) -- describing the research they have done. They are crowing about how they've surveyed a bunch of women, 18-35, and they all like the new format.

I know that 18-35 year old women are becoming an increasingly important demo... but I still can't see just surveying *women*. Does anyone else have a problem with this?

I'd challenge the station to reply to this, but they won't. I know they won't. I left a rather longish voice mail message to Rudman a month or so ago saying that I was displeased with the format change and I was taking the station off my car radio button, and could she please call me back if she wanted to keep me as a listener (she didn't call back). Also e-mailed to Lee Zapis (who is operations manager if I'm not mistaken) -- apparently the only person who has an e-mail address @jammin.com -- to which I got the reply "I'm forwarding this to Lisa Rudman and Kevin Eubanks" (I don't remember what position Eubanks holds). No reply from either Kevin or Lisa, of course. Today one of my friends from work called her. She was quite rude to him.

If I have time, I may call next week. I'll keep you guys posted. My opinion is that I'm not sure 92 gives a damn about their listeners at this point, but hopefully that opinion will be proved false. Meanwhile, I will continue to hold my opinion that the management of Jammin' 92.3 should take a little money out of one of their expense accounts and go buy themselves a clue.

Update on Steve and WMVP

Reports of Bruce Wolf's demise were in fact premature. Sports talker WMVP has tapped Bruce Wolf to take over the morning radio slot he cohosted the now departed Steve Dahl. The show will feature a rotating cohost and will continue to feature sports talk. The promotion of Bruce leaves Steve in a difficult position. Although the team of Steve and Bruce did not enjoy the ratings success of the Steve Dahl/Garry Meier tandem, there was a chemistry between the two. Steve struggled without a formidable cohost. The loss of Bruce as a partner will probably make Steve a much less desirable player as a radio free agent.

Still no rumors regarding Steve's next move. Dinosaur rocker WCKG-FM may be a logical home. The station focuses mainly on lousy music that everyone with a functioning brain cell is really sick of and could use an infusion of life.

News at the sports talk stations......

Midday host Jim Kozimor has left sports talker WMVP-AM to join the Houston Rockets radio broadcast where he will host a pregame and post game show. Jim's cohost, ex-Bear Tom Waddle, is being reassigned at the station. Harry Teinowitz and Spike Manton take over the midday 10 am to 1 pm slot on a daily basis.

At rival sports talker WSCR-AM, lead reporter Rob Price has decided to leave not only the station, but the industry as well. The station promoted Fred Huebner to the position of lead reporter.

Published reports claim that infotaining WGN-AM has landed the rights to broadcast Northwestern football and basketball. Despite the fact that until late last season, nobody in Chicago much cared about Northwestern football, GN outbid news radio WBBM-AM (football) and hot talker WJJD-AM (basketball) for the rights.

New jobs.......

Dawn DeSart of Metro Traffic has landed a job weekends at all news WMAQ-AM.

"Duhhhh" award of the century.....

All news WMAQ has decided to drop the syndicated Laura Schlessinger which had been airing only on Sunday evenings in Chicago. Station management claimed thee show "didn't fit what we're doing." Now, follow this demented logic, if you can. The station added the Dr. Laura show during the Chicago Bear football season. Since WSCR is a daytime only station, and WMVP carried the Sunday night football game, WMAQ's "Sports Huddle" was the only outlet to discuss the Bears game on most Sundays. The braintrust at MAQ squandered the

advantage which fell into their lap. Now that football season is over, MAQ has reinstated the lame Sports Huddle on Sunday evenings.

We have a leading contender for the winner of the Duhhhh award.

One gimmick that might work would be to record the tapes using Dolby
"noise reduction," which is a compression scheme, then play them back in
the truck with the Dolby scheme turned off.

2460. Nashville RadioWatch 3/9/96

Newsgroup: rec.radio.broadcasting
Date: 1996-03-10 00:00:00 UTC
From: mdonegan@edge.net
Message-ID: <4ht67l$lcp@vixen.cso.uiuc.edu>
Source record: 25112

Yet another country radio signal has surfaced in the Nashville market, bringing to well over six the number of country music stations in the Music City. The latest is WBOZ-FM licensed to Woodbury and broadcasting from Murfreesboro. WBOZ is calling itself alternatively BOZ Country (I expected to hear Boz Scaggs mixed in with Lester Flatt), Z 104.9, and Z-105. The station is at 104.9.
It has a show called The Bozo Show (I suppose they spent big bucks getting permission to use this name?)

Danny Wright and Brian Shook, recently fired from Y-107, say the want to stay in Nashville. Their newswoman/sidekick Lisa Manning has been hired to do afternoons at classic rock Arrow 104.5 (WGFX), a gig she had before going to Y-107. Y-107, now called The River, starts airing former Arrow newswoman Mary Glen Lassiter as its morning dj Monday.

WKDF-FM morning personality Big Dave Chandler of Big Dave and The Dook was ordered to leave Beech High School during a protest over a school dress code. Dave went to Wal-Mart and purchased every banned item on the school's new dress code list, put them on, and showed up at the school. Two days later he ran nude through the Murfreesboro City Hall, which has banned the display of nude art work.

Just three months after open-heart surgery, radio talk show host Les Jameson is back in the hospital. Just two days after starting a new morning show at WIZO-AM in surburban Franklin, Jameson developed a blood clot in his leg.

WRLT-FM has fired well known local music king Peter Rodman, who's Sunday Night With Peter Rodman was one of the best known venues for local music acts. His show had just been featured in a front page, full color article in the local paper praising his work in showcasing local music acts. Why was he fired? New p-d Judy McNutt says his show failed to showcase local music. Go figure.

I just have to say that I was very much influenced by Steve Dahl when I was in the military in the late 1970's. If it weren't for Steve, Garry, and the Inane Coho Lips I probably would've gone mad in that man's Army. Steve Dahl deserves plenty of respect for what he's done in radio, and I for one wouldn't be where I am today if it weren't for listening to him.

Thanks Steve. I hope you catch on someplace that appreciates what you can and have done. More importantly, someplace that will let you DO it. Do it the way few others can or every will.

Take care,

Wes Johnson

Greetings, Airwavers! We're back after a hiatus prompted as much by a busy schedule, and the on-going effort to find permanent employment...more on the latter in just a few moments...first, these radio biz headlines from the Nation's Capital:

Item First: The March 1996 "Washingtonian" magazine has an article with further details on traffic reporter Brooke Stevens ascendency to WMAL-AM (630) and a future role as co-host of the afternoon drive show. The magazine says Stevens is set to become Chris Core's partner when Bill Trumbull retires at the end of this year from the ABC o&o newstalk station. This September marks 20 years behind the mics for the popular pair of Trumbull and Core, dating back to the days when the station played a MOR/AC music presentation, spiced with excellent news, and Washington Redskins football. Trumbull is expected to relocate to North Carolina, where he's built a retirement home near a golf course! Stevens becomes a "swing" announcer for the station. "Washingtonian" says Stevens is a native of Germany, and her real name is Antje Krause. A University of Md. grad with degrees in journalism and German lit, she also has her own company that handles advertising jobs. She started her career at WMET-AM (1050) in Gaithersburg, Md., and also worked at WINX-AM (1600) in Rockville. She joined Metro Traffic in 1992, replacing Andy Parks who now co-hosts the morning show on WMAL.

The Washington Post, meanwhile, reports Stevens has been diagnosed as having Hodgkins disease, a form of cancer. After discovering the disease back in October, she has been undergoing treatment, and the disease is now in remission.

Item Second -- That's a stretch... -- Speaking of WINX...does anyone know how long this station, based in Rockville, Md., (a suburb of Washington, D.C.) has been simulcasting on 94.3 FM? Last I checked, 94.3 is WQRA in Warrenton, Va., which at one point was a "rinshot" beautiful music station covering most of Northern Virginia.
You still hear the WQRA ID at the top of the hour, but the rest of the time, its "WINX AM-FM". Punching back and forth between 1600 and 94.3 verifies the simulcast.
Is this an LMA, or a brokered time arrangement? (Thanks to Ed Jones at NPR Telecom for this contribution.)

Also... The University of Md.'s alumni magazine has an article about the Eaton Foundation's endoment of a chair in Broadcast Journalism at Maryland's College of Journalism. The article goes on to relate the life of broadcaster Richard Eaton, a newspaperman who went on to establish United Broadcasting. A feature of the article is a photo of a 1974 painting of the late Mr. Eaton, apparently commissioned by the employees at XEWG in Ciudad Juarez, Mexico. Surrounding Eaton's picture in a ring are the names of United's stations at the time: WSID-AM/WLPL-FM/WMET-TV in Baltimore; WJMQ/WCUY-FM Cleveland;

KIKU-TV Honolulu; KALI Los Angeles; WMUR-TV Manchester, NH; WFAB Miami;
WBNX New York; WINX Rockville, Md.; KVEZ-FM San Francisco;
WOOK-AM/WFAN-FM/WFAN-TV Washington, D.C.; and KECC-TV Yuma Az.
I thought some of you might get a kick out of seeing some of these long-lost calls again! <smile>

Item Third: To Save A Life -- The Washington Post's "On the Dial" (radio) column reports that last month, WPGC-FM (95.5) Saturday morning jock Christina Kelly kept caller on the line for more than 30 minutes while talking a woman out of committing suicide. Kelley spoke to the woman off-the-air, and got her home address, while sales assistant Adrienne Mallard called rescue personnel. The lady was taken to the hospital, where they pumped 30 pills from her stomach. She said she called the station because "its my favorite radio station, and they are my favorite people."
This is why so many of us got into this business!

Item Fourth: Smooth Jazz changes -- The Post reports that Viacom's WJZW-FM ("Smooth Jazz 105.9") has hired Al Santos full time to host the early-evening "Lights Out Washington", replacing Kim Stevens (formerly from WKYS-FM), who wants back in an urban contemp. station. Santos, formerly with the old AC WLTT-FM, and WBIG-FM ("Oldies 100"), has in recent months been hosting WJZW's "Smooth Jazz Sunday Brunch".

Item Fifth : Unrest at the Ranch -- The Post reports that staffers at Greater Media's WWRC-AM (980) and WEBR-FM ("Bright 99.5") are chafing at a memo forbidding them from speaking to the media without prior approval from management. Air staffers who did not want to be identified for fear of losing their jobs say they may bring the issue to the attention of the American Civil Liberties Union because they say the company policy infringes on their right to free speech.

Item Sixth : Hooray for the good guys -- Meanwhile, veteran talk show host Joel A. Spivak, who was unceremoniously dumped from the lineup at WWRC last fall, subbed recently (Thursday, Feb. 29th) for Airwaver (and former WWRCer) Mark Davis, who rules afternoons at WBAP-AM in Dallas. The Post says Joel's still looking for a permanent gig at this writing.

Item Seventh: Promotions -- Also in the big brown radio tower in Silver Spring, Md...
"Radio Zone" morning host Kenny Curtis has added "Program Director" to his business card at the kid-formatted station. "The Zone", which also airs the programming of kid-net "Radio Aahs", can be heard on WKDL-AM (1050) in Md./D.C., 1460 in Northern Va., and 1570 in Baltimore.

Item Eighth: Changes at the 'TOP -- the Post reports that Evergreen has replaced Tom McKinley as VP/GM of sometimes-news WTOP-AM (1500). Steve Swinson joins the station from no less than top-rated Westinghouse/CBS all-news station WINS-AM in New York, where he's been since 1985. He went from News Director to PD, and is credited with helping to raise WINS' ratings and revenues over the years. The Post notes that Swinson, at 40, will be one of the youngest GMs in the D.C. market, and, unlike others, will be one of the few who has risen to that spot from the news/programming side *instead* of the sales side. (YES!)

McKinley resigned last week after nearly 3 1/2 years at WTOP, and also its sister AC station, WASH. In that time, WTOP has slid below the top ten in the ratings; has replaced live newscasters in late evening/overnight/weekend dayparts with the satellite newsfeed of the Associated Press; cut back sportscasts to a minute twice an hour at the behest of some "consutant"; jettisoned many popular anchors and reporters; and seen good News Directors enter and exit the station with a frequency surpassed only by the PD-go-round at WWRC. McKinley, for his part, says he'll have some word on his next gig next week.

AUTHOR'S SOAPBOX: Let's hope Steve Swinson will be given the resources by Evergreen to return *genuine* all-news radio to the Nation's Capital. It is entirely encouraging to this radio newsman to see a successful broadcast journalist being given the reins of this station, which used to be one of the best all-news stations in the country. Its also encouraging that a newsman and programmer was picked to fix what's wrong with this station -- the news and programming -- rather than some bean-counting sales guy....or, god forbid, another "consultant". <stepping off soapbox>

Item Ninth: And now on a personal note... -- One of the reasons I've been away for a while is that I've been working on a story that finally got me back on the air again after too many years behind the scenes. On Feb. 20th, I got a very nice story concerning what a number of states are doing to utilize the Internet to deliver services to citizens on NPR's "All Things Considered". If you're at all net-savvy, have the "Real Audio" player, and disk space to burn <g> , you can download a copy of my story at http://www.realaudio.com, in the NPR archive area, under the ATC index. Look for my story at the February 20th, 1996 link. Approx. 6 megs, "RealAudio2" format. (NOTE: This means you need the RealAudio player software, a free doanload from the RealAudio site, loaded and running on your sound-board equipped PC or Mac to listen to this file.) Meanwhile, like the legendary Joel A. Spivak, I, too, continue the search for permanent employment.

Item Ninth -- It's great! -- Finally...for those who haven't done so already...check out "440 Satisfaction" on the World Wide Web. A must for all Airwavers trying to track down long-lost co-workers at stations, or to tell the world how you're doing!
(No, I don't have the link at hand, but someone here must...)

And so it goes! More next week!

Cheers,
}+{ Max Cacas
}+{ Freelance Broadcast Journalist * Washington, D.C.

2463. Re: Boadcast delay Question

Newsgroup: rec.radio.broadcasting
Date: 1996-03-10 00:00:00 UTC
From: Andrew Paul Dickens <apd2c@virginia.edu>
Message-ID: <4ht680$leh@vixen.cso.uiuc.edu>
Source record: 25115

The new digital broadcast delays can do what you're talking about. They sample the incoming audio and place it into a buffer before spitting it back out, like you might expect.

The real magic comes when the buffer is empty. Instead of just spitting out dead air like a tape delay, the unit spits out the audio that is coming in, but at an ever-so-slightly lower rate. Since the audio is coming in slightly faster than the audio is going out, the buffer fills. When the buffer is full, the output returns to full speed. If you do it carefully, I guess you can avoid to much of a pitch change.

When you hit the kill button, everything in the buffer is lost. The output switches back to relaying the input, with a very slight speed difference until the buffer refills. That's why you don't hear dead air - there's always audio going out.

Hope this helps!

Andrew Dickens

2464. PHOENIX:KZZP REBORN! BRANDMEIER AM DRIVE!

Newsgroup: rec.radio.broadcasting
Date: 1996-03-10 00:00:00 UTC

Friday(3/8) at 3PM, Nationwide's Hot AC KVRY(104.7) flipped to
Adult CHR KZZP, resurrecting the legendary call letters that station
held as Phoenix's dominant CHR from 1981-1991.
Except for hourly legal IDs, KVRY actually ceased to exist at
9AM...with a tape loop
"heartbeat" and beeping monitor running for 6 hours. At 2:59:50, PD
Dan Persigehl gave the board op the signal to switch to a continuous
tone...indicating that the patient(KVRY) had died. The tone lasted
about 7 seconds, followed by three seconds of dead air...and then the
following produced announcement:
"Sixteen years ago this weekend, in a ramshackle collection of
studios deep within the innards of the Thomas Mall, a radio station
signed on the air. It was the soundtrack for hit music in Phoenix.
For a decade, this station shared with its listeners a sense of
excitement...a celebration of everything that's magical about hit
music. We can't bring back the old KZZP, but we can bring back those
fabled call letters, the spirit , the love of Phoenix, and a sense
of true musical adventure. We are bringing you back the music, and
the exhilaration nobody else on the dial has been able to give you.
KZZP...back with the passion. Back with Johnathon Brandmeier starting
Monday morning. And back with your hit music right now. The new
KZZP...104.7 FM...your hit music station."
First song...The Cure's "Friday I'm In Love With You".
Other songs in the first couple of hours: Oasis' "Wonderwall";
Alanis Morrisette's "You Oughta Know";
TLC's "Waterfalls"; Simple Minds' "Head Over Heels";
Deep Blue Something's "Breakfast At Tiffany's...Persigehl and GM Paul
Talbot say this is the new mainstream pop...and is where KZZP would be
now had it not been
sidelined for 5 years by the KVRY attempt.
As rumored for months, Johnathon Brandmeier will
do mornings via satellite from WLUP, Chicago. Ginny Harmon survives
the format change to do middays. Cary Edwards moves over from
KKFR(92.3) for afternoons and
recent KVRY morning drive hire B.J. Shea moves to evenings.
The station will run jockless...only sweepers, music and one
great jingle package...all weekend until Brandmeier
at 6AM Monday(3/11).
Staff morale is amazing...one account exec told me that
my TV report on the format change should include the
"Dallas" clip of Bobby Ewing coming out of the shower...
"It(KVRY)was all a dream...we are still KZZP!"

KARRAKER MOVES TO KSD-AM AS SPORTS DIRECTOR
ENDS TEN-YEAR RELATIONSHIP AT KMOX

by Scott Simon

ST. LOUIS, March 8, 1996 --- Long-time KMOX sportscaster Randy Karraker, cut from full to part-time duties at KMOX last month, has agreed to become the Sports Director at KSD-AM.

There is no word on the status of Steve Schlanger, who has been with the station since 1994, and has handled most of the administrative functions and some on-air work.

According to sources at KSD, they will be adding full forum sports call-in shows with Karraker's arrival, but have not announced when they would be scheduled. Currently, the station airs sports talk shows on Sunday mornings with Post-Dispatch sports writer Tom Wheatley, and Sunday evenings, with Schlanger and Post-Dispatch sports writer Jeff Gordon. During the week, Kevin Slaten holds fort daily with his sports show, "Hardball" from 4 to 7 p.m.

He'll be busy during the football season --- the station is the home of the St. Louis Rams.

It had been heavily rumored for weeks that Karraker would join the station after KMOX cut his hours on Feb. 15. Twice in the past three weeks, he had substituted for Slaten, while continuing to work weekends as a part-time sportscaster at KMOX.

No word from KMOX who will replace Karraker.

: I am an audio engineer in the recording field. After long days in the studio
: listening to music I often listen to talk radio on my way home. One evening
: show I listen to often has a need to use the kill button regularly. I
: understand the basic principle of delaying the broadcast signal but I have not
: been able to fathom out how it is that there is no apparent interruption in
: the broadcast signal at my end. For instance, the host takes a call and the
: caller says something the host does not want on the air. At my end all I hear
: is a "sniped off" bit of what the caller was about to say and the host saying
: something to the effect of, "Ahhhh... sorry, can't have that here." Why is it,
: if there is an interruption in the signal, a KILL, that I don't hear any dead
: air. Even a fairly quick button push would result in 50 or so milliseconds of
: dead air. Would someone be kind enough to explain to me how this works?

On some stations, what they do is go back to real-time as soon as the offender is knocked off the air. Lets say Joe Caller says a cuss word. The producer listens to the delayed broadcast and right before the cuss word is to go on the air, he switches back to real-time. Then the announcer starts in by introducing the caller, i.e. giving a seven second intro to the next caller. This re-primes the delay. Then they switch back to putting the delay over the air. The audience hears the intro to the caller repeated a second time. The few times I've heard this, it doesn't sound that unusual. The hosts, of course, try to make everything sound normal, they sometimes intimate that the caller's phone line went dead. The don't want to reward the caller by giving out any kind of reaction on the air.

I'm sure that the hosts and producers practice this a few times.

"Ultimately, it is the marketplace that drives management decisions."

If Fred Weinberg's comments were being made in the perfect rational-market world of Adam Smith, I'd agree, and feel perfectly comfortable about it. He's known for running his own stations with very careful concern for the needs of his target markets. But I'm not so sure he has very much company in that realm any more...because we've created a mindset in corporate ranks that immediate gratification (thru the bottom line, and the high dividends, salaries and options it can bring) is more important than long term strategic planning to serve a market's needs and build a station's long term value. The result is often disaster.

We see more and more stations cutting back on information services for the listener, firing popular personalities when they get too expensive to suit the boss's plans, and firing up the satellite dish even when the Arbitrons, and revenues, plummet as a result. (I've seen at least one Class I 50 kW clear-channel AM in our region destroy a successful personality format, go with satellite crap, and drop from a 9 share to a 1 share and no local billing within 12 months. Everyone saw it coming but the owner, which eventually went Chapter 11 and had to sell to a duopoly competitor.)

This is happening all across the country, and we need to be alarmed, because it's killing our business. Tally up the total usage of radio in the top 50 markets, which will eventually determine the total billing for those markets. You know what? Radio listenership for all stations peaked in 1993, and the medium has been losing audience ever since. Just looking at shares won't show you that...and not too many of the ad agencies have figured out yet that the radio-listening universe is shrinking, and the value of the medium as an ad venue is shrinking along with it. But they will soon, just as they've caught up with the decline in the value of network-affiliated TV stations as an ad medium.

People are turning off their radios, and getting out of the habit of heavy listenership, because it's just not offering them as much of what they need and expect any more. They expect local news and community coverage, they want personalities they can relate to, and entertainment and conversation that reflects their local tastes. The trimmed down, satellite-driven stations of today don't give them as much of a reason for turning on the radio instead of the cassette player or CD changer, where you never hear a song you don't like. Talk was a helpful alternative for a while. But when it got too partisan and extreme, and too distant

and remote (because it largely comes from NYC and DC) for most folks to relate too, its growth curve slowed drastically as well and now seems to have plateaued.
Everything I'm talking about was done to save money. But stations that do this, forget that diminishing the quality of the product also diminishes listenership and revenue, often much more drastically than it diminishes cost. Fred, I know your stations aren't run that way...but unfortunately, you don't have as much company in this business as you used to, and the whole business is going to be hurting more and more in the years to come as a result.
Bob Smith, middays WXXI-AM 1370 Rochester NY

Matt,

Don't let anyone discourage you from pursuing your dream of getting into this business. Not to sound cheesy, but having the opportunity to try, even if you fail, is one of the last great things left about this country.

One bit of advice, though. Don't major in a broadcast-related field in college. If you've already gained some experience, then you're ahead of the game. Major in something you can use until you find full-time work in radio.

As far as an audition tape is concerned, heck, if you're ever in town, I'll let you cut one on the air some weekend!

Good Luck

This is from a wonderful FAQ by Barry Mishkind and friends:
2) OK, so which station was the first to "broadcast"?

This is a difficult question to answer, even when one defines "broadcast." The stations normally considered among the first to "broadcast" in the sense of "regular programs transmitted for reception by the general public" are KCBS, WHA, WWJ, and KDKA.

KCBS, San Francisco, CA

KCBS, originally "San Jose Calling", FN, 6XE, 6FX, SJN, then KQW, was built by Charles David "Doc" Herrold in 1909 in San Jose, California. Broadcasts of music from Herrold's School of Radio could be be heard every Wednesday evening. Lee de Forest proclaimed Herrold's station as "the oldest broadcasting station in the whole world." While it can trace itself as "the longest continuously broadcasting station in the world," by a factor of at least a decade, there were, however, transmissions of music via radio by the Belgian Post Office in the same time period.

WHA, Madison, WI

WHA, originally 9XM, Madison Wisconsin was constructed by Earle Terry. The University of Wisconsin claims WHA "the Oldest Station in the Nation ... in existence longer than any other." It certainly rivals KCBS.

WWJ, Detroit, MI

WWJ, originally 8MK, began operation on 8/20/20. The next night it broadcast the results of an election. The station was owned and operated by the Detroit News. It promotes itself as "WWJ Radio One, Where it All Began, August 20, 1920."

KDKA, Pittsburgh, PA

And then there is KDKA, originally 8XK. Built by Dr. Frank Conrad of Westinghouse in 1916, it began playing music after the wartime ban on entertainment was lifted. Awarded the first license to broadcast, on October 27, 1920, as KDKA, (Interestingly Broadcasting Magazine claims the date to be 11/7/21) the station made its first splash with the Harding-Cox election on 11/2/20. The plaque in Wilkinsburg, PA says "Here radio broadcasting was born ..."

This FAQ is much longer and gives some of the most commonly asked questions about early broadcasting. To contact Barry and ask him about some of the many interesting pieces of research he has about early radio, e-mail him at <barry@azstarnet.com> He and I and a number of other folks have a research forum where we share the latest research

about the history of broadcasting, so if you have specific questions, we may be able to help. Good luck! (The best history of broadcasting I know of is by Sterling & Kittross, "Stay Tuned"-- it was last updated in 1989, but is still widely respected...)

You ask about the early 1920s in American radio broadcasting, and you're right, it was technically absolute chaos. Only one frequency (833 kHz) was initially allocated for radio broadcasting, and it was far from enough to accomodate one city's needs let alone an entire country. Stations moved around at will on the medium wave band, license or no license, until first the Commerce Dept. and later the Federal Radio Commission and (after 1934) the FCC came in to establish order, spread stations out over about 95 different medium wave channels, and assign them specific powers to minimize interference.

In terms of programming, the earliest stuff was purely institutional, goodwill-building efforts by station owners (usually newspapers, retail outlets, or radio manufacturers) to subtly promote their services. It sounded a lot like today's noncommercial public radio and TV. The first advertising was actually a 10 minute talk for a real estate outfit aired by what's now WFAN in New York, and thus it was more of an infomercial than an actual spot announcement. (Spot ads gradually came along in the mid-20s, and dominated radio advertising by the time NBC formed as the first national network in 1926.)

The programs themselves were in some respects a lot like today's news/talk radio, heavy on news and commentary, some sports reporting and play-by-play, and commentaries and interviews. Live music worked its way gradually into the mix as the audio processing technology grew a little more sophisticated in the 1922-24 period. Drama, both daytime soap opera and nighttime dramatic adventure, came a little later, as stations moved away from magazine-style program blocks to longer form shows of 15, 30 and 60 minutes in the mid-1920s. Comedy was something that really came into its own on radio late in the 1920s as the networks, able to attract star performers, reached most American homes. Oddly enough, as radio became more of an entertainment medium, it did less and less on news and public affairs until the late 1930s, when the clouds of war started gathering and men like Edward R. Murrow, Eric Sevareid and William L. Shirer became stars with their reports from Europe.

Of course, most of what you heard on network radio in the 1930s...dramas, situation comedies, variety and sketch shows, and big dinner-hour newscasts...are now the staples of national TV networks, not only in America but in most industrial nations. Radio's a different medium, a lot more like the intimate medium it was at the beginning.

>am aware of that has the 56k bit rate in California.

Not true. First of all, as of last year, Southern California
is now all 64K, as is most of the San Francisco area - Pac Bell
territory only. Who knows what GTE is up to. Many parts of the U.S.
are still 56K.

I work for a company that has ISDN going out across the U.S.
Wheras a local telco may be running at 64K, a piece of the route may
be 56K causing call failures.

The conclusion to be drawn from this is that you can always
run 56K to anywhere in the country and you can sometimes run 64K
across the country.

Also some routes work better with different long distance
companies, so if you are having call set up problems, try calling via
another carrier - 10XXX dialing works on ISDN too.

|: which stations/nets? What products are out there, how much do they cost,
|: and who sells 'em?
|: Also, what transmission methods are used? Realtime feeds, dial-in
|: systems, or ftp??

There is no standard.

Commercials are distributed over proprietary networks from DCI or DG (MPEG or Dolby codecs), overnight, automated.

Most realtime audio is encoded in one of these standards:

G.722 (also known as Switched56, even though that's the name of the line and not the algorithm)

MPEG Layer II (also known as Musicam -- they're the same standard, in most applications)

MPEG Layer III (also known as Zephyr, for reasons that'll become obvious).

G.722 is supported by almost every box. LII is suppored by Comrex, CCS, and the Telos Zephyr. LIII is supported by the Zephyr only. Quality increases in the order I've listed, is inversly proportional to coding delay, and is directly proportional to hardware cost.

A few systems use Apt-X or Dolby for realtime feeds. I don't know of anybody using ftp for broadcast, other than folks grabbing clips for show prep.

If you go to my web page, you can jump to a public database I keep (the AudioBahn) listing about 250 US sites that have realtime isdn transfers. Check it for broadcasters in your area you can call for war stories... you can also scan the list to see which systems are popular. The list has links to a couple of reliable equipment manufacturers.

Hi Tom!

You might be able to through the network that carries my show "The Kim Komando Komputer Klinic," -- WestStar, headquartered in Phoenix. They have it all and perhaps can do a S-56 at the track and feed to the bird via the studio link-ups. ISDN is Phoenix is a little catch-it-if-you-can.... :(

Email is Barry910@aol.com and phone for WestStar is 602-912-9458. Barry Young owns it.

Hope this helps,
Kim Komando
Fox TV Host, TalkRadio Host, FamilyPC Editor and a nice gal :)

<<It looks like Memphis is about to see its final 80-90 class A hit the air. Over the past few days I have been hearing WHLE-94.9 (licensed to Byhalia, MS) test. These tests have consisted of long sets of AC music clearly being run on some sort of automation with occasional E-95/Memphis mentions.

The signal is unforgivably bad... I live out East (the side of town closest to the site), and I had a lot of trouble with it. My opinion is that the signal is a fatal flaw... only time will tell.

Rumors of sales continue for nearly every station in>>

Not only are they a class A, but also Directional. I think they are protecting to the North and West which would explain the poor signal in Memphis. I installed his transmitter and listened to him most of the way back to Tupelo on the way home. I guess time will tell what his plans are. I suspect he will do some sort of Urban Gold or Country format. Let me know if you hear.

The station was an affiliate of the Drake-Chenault AC automated service from about 1976 to 1978, as KFMX. In mid 1978, PD Gary DeMaroney started programming Disco on weekend overnights, gradually expanding the disco programming until the station was fulltime "Disco 104 KFMX" by late '78. By late '79, the station began adding more mainstream Top 40 titles, and began evolving toward Top 40, as KDWB-AM contined to erode. But, alas, KS95 was created by Chuck Knapp, and scored a 12.0 share first book out Park changed the format to Al Ham's "Music of your Life" in February of 1980, under PD Don Shore, and with the new format, reintroduced the KRSI-FM calls. I was the only fulltimer they kept, probably because I was being paid $600/month to do 7-midnight. I held on 'til I went over to WLOL...(thank you forever, Doyle Rose). MOYL was programmed on the station, until the first go-round with country about 1982.

Now, KRSI-AM.....

1978...automated country
1979...New Wave (MusicRadio I-95)...MD Gregg Swedberg now at K102)...morning guy was Craig Ashwood, now PD at WARW/Washington and the voice of Outback Steakhouse.
1980...MOYL

I lose track there...since then, they've done business, all request, Urban...what else...anyone? anyone?

> Thanks, ---Dan
> --

Depends on how tolerant your audience is. On an AOR or Modern Rock/Alternative format, its probably ok. Stations only tend to get into trouble when folks complain. When I used to work at a campus station, we regularly got called to the CRTC (MUCH worse, I think, than the FCC!) to explain why we played a song that had explicit lyrics in it (Try explaining to commissioners why the "Yeasty Girls" is artistic :) and we often could justify it by explainting who it is we were programming to and the context of the song (EG explicit lyrics in a song played as a bridge during the feminist talk show that dealt with rape/abuse). On the otherhand, about a year ago, CFNY (102.1,Modern Rock/Alternative,Toronto) was running a promo on air for themselves that featured a bunch of clips of people saying "theres no good music on the radio in this city" etc.. that was interupted with the morning drive announcer in a deadpan voice saying "BULLSHIT - CFNY 102.1 THE EDGE". I'm all for "cool" radio but I remember thinking that this was just unnecessary.

"Can't these folks get in trouble (for playing songs with the
'f-word')?"
This is an interesting question. Fellow radio salary slaves,
tell me if you agree with this...Isn't there an unwritten rule
that says if the announcer at the station says a cuss word
live, it's a no-no, but if it's buried in a piece of popular music
that the station had nothing to do with producing, it's essent-
ially a free pass, especially if the song is a hit? (Thou shalt
not, of course, allow ANY no-nos on the air if you're a talk
station, because you then are supposed to have full control of
content...)
Seems to me we've been talking a lot about this ever since
Alanis Morrisette clicked with"You Oughtta Know," haven't we?
And with her four Grammys, a lot of stations will be putting
that one back in the recurrent bin...

Check with the National Association of College
Broadcasters. I know that a lot of college non comm stations
do remotes at store openings and events that just happen to be
in front of the sponser's store. There is a way to do it
legally... something like the radio station draws people to the
event while receiving underwriting credit from the store. I'm
afraid I'm not really up on non comm legal issues (one good
thing about being a commercial college station!)

-Andrew

P.S. I believe the NACB can be reached at nacb@aol.com,

RE: Radio Equivalent to VCR.

I use a VCR. With programability, I can get my VCR to turn on and
record the "Line In" which is connected to the tuner (on a timer). The VHS
recorder is also set to record at EP or the slowest head to tape speed (longest
record time). This set up allows me to record eight hours of weekend programing
that is broadcast locally in the wee hours of the morning. Then I can listen to
these programs at my leasure.
By the by, my recorder is a VHS Hi-Fi, so the recording is as good as
the original broadcast. And I can stop it, go to the store, start it up again,
and not miss a thing!
I hope this helps.

For those of us on the beach (sans "connections") and at the mercy of the R&R Opportunities section, can some PD's answer this question?

I and many of my friends in the industry are consistently incredulous driving through medium and major markets listening to semi-talented "personalities" (and LOTS of card-readers!) wondering WHAT they did to get that gig.

There's rumors of stations placing ads in the trades for jobs already filled just to satisfy their EEO requirements. Killer tapes that come "over the transom" that are ignored because a friend of a friend's consultant owes someone a favor.

I've been in radio close to 15 years, have what I've been told is a pretty witty, amusing and original CHR personality, yet probably less than 5 rejection letters from over 50 tapes sent out in reply to ads.

So here's the $1.98 question (apologies to Minnie Pearl):

Do you PD's listen to EVERY qualified tape in reply to an ad -- or at least those with a resume than show the guy is not an overnight board-op or fresh broadcasting school graduate? Are the really fresh new talents going unheard and passed over for those who spend their time at NAB and Gavin networking?

How DO you find your new talent? Thanks for your comments.

Going to buy more blank cassettes and postage,

Dan McKay

While you probably would want to check the actual legality wordings from the FCC, I know it is possible. My old college station would do them all the time. I remember that one of the keys to the live call-in's was to make sure that you were inviting listeners to come see the station at the client's location, rather than a call-to-action to come see the client. Of course, all rules for non-commercial sponsorships (factual in nature, etc.) apply.

You can't do the remote. However, there are ways you can work around the current rules so that everyone is happy. Turn it into a charity fundraiser that happens to be broadcasting from the establishment. Do not read prices, do not plug products. The most you can promise the "sponsor" is some traffic in the store.

I think it was late '86 when this started. They had been Oldies, and went
Classic Rock for all of a few days, before deciding on the Hard Rock
approach.

> 1983?-1985?: Classic Rock/Oldies "20 Years of Rock n' Roll" K-JO 104 FM

Started late '82.
> (My personal favorite of all the formats; the perfect combination of

> the classic rock craze)
> 1981?-1983?: Country K-JO 104FM

Started early '80. Before that, MOYL, AC, Disco, AC, "Gold 104", and
Request Radio (getting back to the era of the late Tac Hammer.

> I think this is as far back as Park goes; before that the station was
> KRSI with a different owner, I believe.

Nope. Park bought it in '65 or so, from a subsidiary of the Red Owl
grocery store chain, popular in the Twin Cities. (The last GM, before
Park bought it, was Dale Weber, who went on to WDGY for what seemed like
forever!)

> This is the legacy that Park left us with. Any time the station got too
> popular, they would quickly change the format and sink back into
> mediocrity. The only format they were successful with was heavy metal.

Yes, but how many stations pull this off today? Witness the recent decline of WXTB/Tampa, and the evolution of Z-Rock to a more Alternative-leaning format. I, too, loved Hot Rockin' 104; I just question whether it could be pulled off today.

> So, what kind of owner is Nationwide? Can we expect a game of "musical
> chairs" with formats, or will we perhaps get a musical format we might
> actually want to listen to?

Nationwide plays somewhat conservatively with formatics, but spends $$ on its stations. Look for KMJZ (or any future incarnation) to be MUCH more competitive under Nationwide than it ever was under Park. Nationwide will spend the needed bucks on research, as well as marketing. The only question is whether it will continue in the Jazz/NAC niche, or go to something more mainstream, and take on KDWB, KS95, or KQ. Watch this one!

OK , Joe that's Steve's side of the story. How about this: He was
making a lot of money and his numbers sucked. I think that would be
closer to the truth.

I totally concur. And I recommend that interested persons act quickly,
because I can't see it as staying on the market much longer, in view of
the changes heading our way in radio in the near future (i.e., the
conversion to DAB--the mfrs won't be puring further R&D funds into
analog tuners).

Does anyone have any information on the beginnings of the crazy dragstrip spots that used to be so prevalent on air? You know - the ones with the nutty little chipmunk voices ("Raceway Park!") and the announcer screaming "Sunday, Sunday, Sunday!"

I'd be interested to know if any one person actually "invented" the genre, which production houses were responsible (i.e.; did one house/announcer handle ads for the entire country?), and any other information I can get.

Thanks very much.

>been losing audience ever since.

On what data do you draw this conclusion? I heard Gary Fries (of the RAB) say recently that the average American listens to radio for about three hours a day, and that statistic has remained the same since the 1930's. I also heard him say that radio revenues had been rising 8 or 9% for the last two or three years and that was expected to continue.

At WCRB our local sales this year to date are up more than 30% from the same period in 1995.

If radio's appeal is declining, I sure can't see it. But then the effects of that telecommunications "reform" bill (on which subject my opinions are well known) have yet to be felt, so who knows what may happen.

: trouble when folks complain....

Is it really true that the f-word was craftily embedded in a live Beatles recording of "Sgt. Pepper's Lonely Hearts Club Band". At one point in the song the singer counts one-two-three-f***. The person listening is pretty much going to expect (and probably hear) the word "four" there, not it's four-letter replacement. And the Who's "Who the f*** are you", this one seems to have been played unedited for quite some time.

KRAM-AM TO DROP TALK SHOWS
FOR SIMULCAST OF WKBQ-FM,
CALL LETTERS WILL CHANGE

by Scott Simon

ST. LOUIS ---- Zimmer Broadcasting's KRAM-AM (1380) will drop all of its talk shows on March 21 and return to simulcasting its FM station, CHR formatted WKBQ.

Also, the call letters will be changed to WKBQ-AM.

That means "The Fabulous Sports Babe" and "The Ken Hamblin Show" are out, and there is no word if anyone else in the market will pick them up.

Last November, KRAM lost Roger Fredenberg and Art Bell to KSD-AM (550), where the pair had aired until January, 1995 when KSD dropped CNN and talk for Stardust nostalgia. KSD went back to an all-talk format last December.

The KRAM call sign was an interesting move by Zimmer, made early last year when it was known the Los Angeles Rams of the National Football League was moving to St. Louis. Zimmer changed the call letter from WKBQ-AM, hoping it would be a marketing tool if the station won the rights to broadcast Rams football. But it failed quickly, when the bidding was narrowed to KSD and KMOX, which KSD eventually won with a seven-year deal, secured for three years, optional by the team in years four through seven.

An odd move by the station about the changes was to put on an on-air promo that thanks people for listening to "Straight Talk 1380 KRAM", thanks the on-air shows they are dumping, even thanking Fredenberg and Bell, who left the station months ago.

It's a good move for the station, which has a poor signal both day and night (5KW-day, 1KW-night, DA-3), especially when the competition heats up later this year when WIBV begins talk and news programming under new ownership, using many former KMOX air personalities at the start up.

ZIELONKO TO WIBV --- Fred Zielonko, long-time show producer at KMOX, has been named the program director for WIBV when it finally becomes acquired by his former colleague Tim Dorsey.

In the circle of irony, Zielonko will be overseeing John Carney, who left KSD last week to join the new WIBV --- he's the son of the late KMOX great Jack Carney, who Zielonko worked for up until his death in 1984.

Although it has not been confirmed at press time, word is that Dorsey has made overtures to buy children-formatted WFUN-FM (95.5), license to suburban Bethalto, Illinois, but listenable in areas of St. Louis that directional-pattern WIBV doesn't reach.

The reported asking price by owner Robert Howe of Wood River, Illinois is $1.2 million, considerably higher than the $300,000 that he wanted for it in 1992.

It would be a good move for Dorsey and WIBV, because with talk/news programming, he could take the stereo carrier off for a mono signal that will increase it's coverage into St. Charles county and far reaches of St. Louis county, where most of the area's population is relocating.

Although Dorsey has said he would like to increase WIBV's power and reduce its directional pattern, consulting engineers who specialize in AM directional work say it's very unlikely that could ever happen, unless a 1260 AM co-channel station would reduce it's power and change pattern for WIBV's benefit, which also is unlikely.

Go to your area library, and look for a publication called The Billboard Annual, or SRDS (if memory serves). These publications will list virtually every radio and television station in North America.

Often, format information is included that will give you a lead here.

There are also several tout sheets that go out to radio producers. As a former talk show host (Houston, San Antonio, Austin, Texas), I never got many guests from these sheets, but I did look through them, and occasionally we booked a guest or two from them.

> 2) Assuming that such stations have multiple programs where his material

That's probably about right. The major publishers send out books the
first time around, but independent writers usually can't afford to do
that, so a letter is probably a good idea.

> 5) Any other suggestions?
>

Yeah. Find a publicist. It could well be worth the money.

You might want to consider the FieldFone, a new device from MUSICAM USA
(formerly CCS). FieldFone is a POTS Codec, capable of delivering 20 Hz
to 6.7 kHz mono audio over a single analog dial-up telephone line. Audio
is bi-directional, so separate cue lines are not needed. Signal-to-noise
ratio is 75 dB or better, and distortion is 0.08 percent.

If you would like more information about FieldFone, or any of our MUSICAM
digital audio codecs, please contact me.

2512. Re: Question: Broadcast Delay

Newsgroup: rec.radio.broadcasting
Date: 1996-03-12 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <4i37sq$lav@vixen.cso.uiuc.edu>
Source record: 24964

What usually happens, is that the un-delayed broadcast is
being carried on the audition channel of the board (so the
host and guest can hear what's going on in real time) but the
audition output gets sent into a digital delay loop, and back into
the master control board (after delay) in main program channel,
and out through the audio chain and over the air.
When delay gets invoked...the board engineer dumps the feed
going out of the delay loop and into the program channel with
a "dump" button that cuts that feed, goes very briefly to live un-
delayed audio, then starts the electronic delay cycle going all
over again at a point past the offensive comment. It sounds like
an abrupt jump-cut in the audio feed, and in a sense, that's what
it is, created digitally by simply splicing a few seconds of pro-
gram stored in the delay unit's memory banks out of the feed to
the audio chain, purging that no-no stored in the delay system's
RAM chips. That's how our delay system works and I think most
stations use something similar (I hope no one's using that old tape
loop system these days...)
Hope that helps...

I volunteer my time for a non-commercial station in Atlanta.
We occasionally get complaints from people who claim that our signal does not reach them in the suburbs. I've seen propagation maps for other stations (on the web, in fact), and I'd like to track down one for my station.

Does anyone know where I can get such a map for my station?
Does the FCC keep one on file? I've already talked to the other station engineers, so don't tell me to ask them :)

From: fybush@world.std.com
Message-ID: <4i37va$lcu@vixen.cso.uiuc.edu>
Source record: 25016

I'm sure Adam is doing fine work at WBGL...but his point about American Family Association/WAFR is, if anything, understated. Each week, "M Street Journal"'s list of translator application seems to contain anywhere from 20 to 35 applications, not just from WAFR, but also from the Twin Falls Calvary Chapel (KAWZ Twin Falls ID), Pensacola Christian Church (WPCS Pensacola FL), et al. KAWZ and WPCS seem to be the big offenders. Many of the applications are just plain ridiculous, like the one for 97.9 in Fitchburg MA filed by KAWZ (Fitchburg is about 20 miles from Winchendon MA, home to WINQ on first-adjacent 97.7).

There's something painfully wrong with the regulatory system when it says that I can't start a local 10-watt radio station, but the Pensacola Christian Church can come in and build a 10-watt station -- and ONLY if it rebroadcasts something from out of town!

I'd be happy to work with other r.r.b. readers to see if we can find a way to put an end to this egregious abuse of FCC rules. As I understand it, the original idea behind allowing satellite-fed noncomm translators was to allow public broadcasters in spread-out areas like Utah or Wyoming to serve remote areas, *not* to allow one or two religious broadcasters to blanket the nation with transmitters in every community. I'm not a fan of Christian radio, but I'd still much rather see it done through local stations, or regional networks like those of WBGL, or Mars Hill/WMHR in Upstate NY, or WGLY/WGLV in Northern New England, than to see it done by satellite from Florida and Idaho.

-=Scott Fybush - fybush@world.std.com=-

I've received a bunch of e-mail replies about this post, and I want to clarify what happened. First, someone (who I tried replying to, but the mail bounced) said "with an attitude like that, it's no wonder they didn't get back to you." I was unhappy with them, but I didn't call looking to start a fight. I indicated my displeasure with no uncertainty, but I didn't yell or call names. The "buy themselves a clue" remark comes from the fact that they haven't really said a word about this in over three weeks, and also because of certain circumstances... which are outlined below.

I wouldn't even care what is going on there, except that they are changing from what is basically a completely unique format in Northern Ohio to a very common one. Six stations either offer AC or a top-40 format which plays a lot of the adult hits. Those would be WQAL and WLTF (Cleveland), WZOO (Ashtabula),
WYHT (Mansfield), WKDD (Akron), and WCPZ (Sandusky). Jammin' 92.3's signal overlaps the signals of all except WYHT and WCPZ, and is in direct competition with all except those two and WZOO (WQAL and WLTF are in the same city, and while WKDD is not a Cleveland station, its signal is strong all across the Northeast corner of the state). That is the gist of my irritation... I know their ratings stink. I can't fault them for changing formats. I have a problem with them totally ignoring 18-34 year old males and going with the women only (even though I know that is the high-income demo) and I have a bigger problem with them switching from something unique to something that is going to sound exactly the same as everyone else.

I guess it's all a matter of perspective.... I think they are doing it for the money; my friend, a sound engineer who is African-American, says it's part of a move in the music industry to keep rap off radio because it's too controversial. So maybe I'm wrong. But I can't see

them doing any better as an AC. We have too many of those in Cleveland already. Reminds me of the two dozen modern-rock stations in New York City.

In response to "Bruce Slutsky, Van Houten Library 2/13/96

During the 70's WKTU-FM was one of nine stations in the old San Juan Racing radio group. The owners also owned the San Juan Race track in Porto Rico, thus the name SJR Radio.
WKTU was the FM and WJIT was it's am sister station at the time. The other stations in the group were WKLS AM/FM in Atlanta, WJMD FM & WUST AM in Maryland/D.C., WQAL FM in Cleveland, KRLY FM in Houston and KNUS FM in Dallas. I served as the Chief Engineer at KRLY in 1978 & 1979 then I was transferred to D.C. as Chief Engineer of WJMD which later became the first of the Lite Rock stations under the ownership of Combined Communications which in the early 90's became the ARROW under CBS.

Bill,
From an advertising standpoint they're too few to seriously
consider and impossible to measure. Unless I'm selling DX equipment
those listeners and I'm sure the target audience is correct, it's simply
too small to do much more than tease the client with some extra
coverage.

I'm flattered to be mentioned and remembered in connection with KZZP.
Those were great times. As for this new reincarnation, I'm not sure what
to make of it. Quoting from a post I wrote yesterday in reply to a
similar question on America Online's message boards:

> Aside from the fact that I have a 13-page contract written by the
Pyramid
> lawyers that not even Johnnie Cochran could get me out of, there is a
simple

being
> able to bring back" the old KZZP. No one even tried.

I've since heard that former KZZP afternoon driver Steve Goddard, now at
KNIX, was apparently made an offer (or at least a "feeler") and declined.
Regardless, there seems to have been little effort to bring back the old
staff or sound of the legendary days of KZZP. I guess they have their own
agenda.

Anyway...thanks for remembering!

>I could be wrong after they actually put people on the air, but I am
>extremely disappointed at the moment...
>
>Michael: your thoughts? :)

John: I respectfully disagree. I think they've found the sweet spot
in the market...realizing that the near-6 share in alternative(split
evenly between KZON and KEDJ)has a lot of folks who like much, but not
all of the music, and who, given a choice, would just as soon not
deal with the attitude.
I edited out(by mistake) your comment about
only subtly changing the music...they've traded Phil
Collins, Elton John and Celene Dion for Alanis Morrisette,
Oasis, Goo Goo Dolls and Deep Blue Something. That's a big
change...and an acknowledgement that this is now
(young)adult music.
As for the talent, I don't know whether Valerie or Clarke were
approached...Steve Goddard was and chose to stay at KNIX...but Kevin,
Gene and Doug aren't likely to bolt KROQ to come back to KZZP. I

think all those people are tremendous, too...now,let's see
if it's possible to create another great air staff. Give
Ginny, B.J. and Cary a chance to actually get on the air playing
something other than the non-prescription sleep aid that
Variety 104.7 had become. If it works(and (GM)Paul Talbot,
(PD)Dan Persigehl, (Consultant)Guy Zapolean and (researcher)
Steve Casey are deeply committed to seeing that it does),
then KZZP creates yet another great air staff that raises
the expectations for everyone else on the air here.
Best Regards,
Michael

Last year we went to Radio Shack and got a stereo system with a timer.
We set the timer every morning to record Duffy and Company while we're
at work and listen to it at our leisure. The only problem we have is
getting both hours on one tape. The label on the unit is Optimus and
it's been great. It's important to us to have a tape that's compatible
with all our other tape players - unlike what's being advertised on
Rush's show.

>
>You pays your money, you takes your choice!

I think the relation people have of KYW News Radio with the 1060 frequency
far outweighs the increased coverage. KYW 1060 does not need increased
coverage IMHO the cover enough of the Greater Philadelphia Region as it
is.

However, something definately needs to be done with 1210 WGMP. It is a
very powerful station, but the programming stinks. Maybe just clear
everyone out of there and start out fresh. (If it is Sports programming,
there'll be competition with 610, but I think 1210 could pull in the
listeners if things are done well.)

>to get that gig.

Sometimes they're people whose origins are local to that market, and they have some appeal there that you, as an outsider, don't understand. They may just be people who are willing to work cheap. And crazy as it seems, some people in radio are hired for their looks, either through unconscious bias or a deliberate policy to hire only those who will present the desired image at outside events.

>There's rumors of stations placing ads in the trades for jobs already
>filled just to satisfy their EEO requirements.

I'm not a PD but I've been one, and I've been around a long time, and I know this is quite common.

Radio is, relatively speaking, a very small industry. It has always been a business in which "everybody knows everybody," or at least seems to. A PD might think, "I'd like to hire Joe if an opening comes up," and then somebody quits--but he can't just hire Joe without creating the paper trail that keeps the government happy. The PD may have heard Joe in another market and thinks he's just what the station needs. Or he may be trying to steal the competition's best talent. Or Joe may just be his buddy. Or maybe he _is_ a minority and the station is under EEO pressure. Whatever the case, you're not going to get a shot at that job.

> Killer tapes that come
>"over the transom" that are ignored because a friend of a friend's
>consultant owes someone a favor.

No doubt, people do get hired in return for past favors. On the other hand, it's stupid to ignore a "killer tape," and successful PD's are not stupid. I doubt that it happens as often as some job seekers think. People who really are good get hired. But the "killer tape" has to fit the opening, and timing is often everything. I can't tell you how many times a really talented person has expressed interest in working for me, right after I filled an opening I'd been trying to fill for weeks, even months. At that point all I can say is, "where were you when I needed you?"

Fall of 1983. I had just returned to the Twin Cities looking for a radio job and remember the time quite well-- that, plus a meeting with Dave Hamilton, now PD at KQRS but PD of Doubleday KDWB back then, who told me in a rather confidential tone what KJJO's new format would be a month before the change. (He'd spied the new billboards being constructed at Naegle.)

> Urban...what else...anyone? anyone?
>
> Jay Philpott

I remember that, for awhile around '83 and/or '84, KRSI-AM was on a satellite CHR service. (I worked with the CE, Bill Robinson, who told me about a particular "dumb jock," who mistook the MASTER pot for the MONITOR pot, and turned it 'just about' all the way down. Bill was driving to the station, when it suddenly had gone just about all the way off...he kept turning up his radio, trying to think of what might have gone wrong!

After that, at whatever point, they went to a seperately-programmed-from-KJJO Oldies format, with the "request radio" idea of years ago (call in, and leave your request at the tone...). (WWTC had gone Urban by that time, before going back to Oldies, prior to Radio AAHS.)

KRSI went to the automated country format sometime around '72-ish, '73-ish. Before that, Tac Hammer programmed Request Radio.

This was the last paragraph of an article posted to Airwaves
Journal #1916 3/9/96 regarding the Clear Channel purchase of the US
Radio group led by Ragan Henry.

> The biggest challange they are going to have in their latest
>acquisition is to get the Henry culture out of his group. Henry got
>where he is by becoming a professional person of color and Clear
>Channel got where it is by being good broadcasters. This is where
>the rubber will meet the road.

You know, I had no intention of responding to this article because
I
thought, if ignorance is bliss, this guy is in nirvana and he
couldn't read my response anyway...but I feel obliged.
Ever since US Radio bought my station several years ago, (actually
at that time it was still one of the very early names of the group,
whatever came before Seven Chiefs I believe, but memory fails me.) we
have been a top station in the group. We have achieved phenomenal
ratings success, our billing for the station is well over 500,000 a
month, our promotions are outstanding, we have musical artists from
around the world flying in to do interviews and performances for us,
and our staff is absolutely top-notch. Yet through all this, I don't
think the fact that Mr.Henry is a "person of color" has entered into
our decisions, or the decisions of our clients or record companies,
even once.
Mr.Henry has established an organization that runs the affairs of
the business like any good business. He hires the appropriate people
for the appropriate position, and lets them do their job without
interference.
If it wouldn't be for the fact that I've met and spoken with the
man several times, I would have no reason to believe he was any
color...hell, for the most part - at my end of the chain, the day to
day operations of the station - he's invisible.
And one more little note. You are not only insulting the entire
staff of each of the US Radio stations with your remark, but I guess
you just took a shot at Clear Channel as well. If the "Henry culture"
should be removed...why would Clear Channel not only buy these
stations...but also keep Mr.Henry on as the head of the US
Radio, which will remain, more or less, a wholly owned subsidiary of
Clear Channel.
OOPS...you're in trouble now.

Matt Mauler wrote:

>You can't do the remote.

NOT TRUE. I work for a noncomm that FREQUENTLY does remotes from commercial businesses. Our FCC law-guy gave us a list of do's and don'ts, but you CAN do a remote from a commercial business!

First of all, what they pay you has to be designated as a "grant". If you don't show up - or whatever - too bad. They can't EXPECT anything from you for it.

Second of all, you have to abide by the usual "call to action" rules.

The way we approach this at my station is simply by stating facts. FOr example, if we're at a bookstore who's having a book signing, we say (over a 30-second remote bed): "Hi! This is so-and-so from rock-91, and this afternoon we're set up outside Barnes and Noble booksellers just behind centennial mall, two blocks off the interstate. We'll be here until 3-o-clock today handing out prizes and broadcasting live. Also, Barnes and Noble is having a book signing with Yana YaYa. She's here autographing copies of her new book 'How to make it big in broadcasting'. It's a beautiful afternoon, and we'd love to meet you today. You still have plenty of time, because, like I said, we'll be here till about 3:00 this afternoon! Tive in front of Barnes and Noble Booksellers on ROCK-91!".

See, there were no calls to action, and the sponsor/grantor got plenty of plugs. Listener's don't realize that you didn't invite them in or mention any special sales.

It CAN be done, but you have abide by some STRICT ground rules.

Hope that helps.

2537. Re: Noncommercial remote?

Newsgroup: rec.radio.broadcasting
Date: 1996-03-12 00:00:00 UTC
From: Tom Davis <tdavis@mpr.org>
Message-ID: <4i37vd$ldm@vixen.cso.uiuc.edu>
Source record: 25038

We've done many remote broadcasts. Some have been at public sites such as parks, others have been at commercial sites such as local shopping malls. We've even made the purchase of underwriting as part of the deal for the commercial site owner. The point is that when you invite listeners to come to the site, you are inviting them to hear and see the broadcast, not to "come on down" to buy a car or a widget at "Bob's Best Buys." IMHO, these types of braodcasts are not at all illegal for a noncom...just keep in mind YOUR purpose of doing the remote -- as another way to serve your listeners by giving them a chance to see your people as they produce a slightly different version of your regular broadcast(s). Also, try to use these event as a way to collecet names of listeners to prospect for new members. Perhaps a give-away or some other promotion at the site.

Good luck!

2538. Non-commercial Remotes

Newsgroup: rec.radio.broadcasting
Date: 1996-03-12 00:00:00 UTC
From: "MICHAEL BLACK....WEOS-FM" <MBLACK@hws.edu>
Message-ID: <4i37vf$ldn@vixen.cso.uiuc.edu>
Source record: 25039

The FCC has a great packet concerning underwriting and questions related to situations like live remtoes. The Packet consists of FCC documents, letters to stations, and violation notices. THe packet is dated April 20, 1993 from the Mass Media Complaints and Investigations Branch. Here are some gleanings related to non-commercial remotes at commercial venues:

The Communciations Act under section 399B, a non-commercial station cannot promote an individual's or entity's good, services, or activities where the broadcaster receives or reasonably anticipates the receipt of consideration from such an individual or entity. Live remote broadcasts are permited by noncommercial under the act. As, long as the programming is based on the licensee's PUBLIC INTEREST judgement, rather than an exchange of consideration, and announcement identifying the orgionation point of the broadcast would raise no question. However, the Commission has also stated that teh "obvious promotion of an event/and or establishment" could raise factual questions as to consideration between the establishment and the licensee. In this context, the contribution of programming funds for the remote broadcast IS consideration.

Announcements that do not merely identify, but actually urges listeners to patronize or attend the commercial entity where the remote is taking place constitutes a call to action, which is prohibited.

Therefore, non-commercial stations must be VERY wary of live remotes at any commercial establishment. I remember seeing a note where a station was broadcasting live at business, and asked people to stop and see them at "joe's Pizza" and come in and register for a free drawing and get the latest station bumper sticker. The Commission stated this was a call to action, and thus, illegal, as it invited listeners to the commercial establishment, and that there was the potential for consideration in the future.

Hope that is more useful to you. When in doubt, it would not hurt to ask the FCC BEFORE you do the remote, rather than get sanctioned after it. They are very helpful in answering questions in this area.

2539. WBFH-FM reunion

Newsgroup: rec.radio.broadcasting
Date: 1996-03-12 00:00:00 UTC
From: pgaba@mhs-server.bloomfield.k12.mi.us
Message-ID: <4i37vg$ldo@vixen.cso.uiuc.edu>
Source record: 25040

WBFH-FM, metro Detroit's most powerful high school radio station, celebrates its 20th anniversary on October
1, 1996. As part of this event, WBFH is planning a 20th anniversary reunion for all former staff members who
have graduated from Bloomfield Hills Andover or Bloomfield Hills Lahser high schools (The party is Saturday,
October 12).
But ... as with any reunion alumni search, we have lost touch with a lot of graduates; in fact, we have 40 times
more difficulties facing us than the "normal" reunion search, because our alums are spread over two high
schools, and cover the classes of 1977 through 1996.
If you are a former WBFH staffer, or know someone who was, there are several ways of sending management
updated addresses, phone numbers, etc. They are as follows:
* e-mail Assistant Station Manager Paul Gaba at: pgaba@mhs-server.bloomfield.k12.mi.us OR AT
wbfhradio@aol.com
* use da phone: (810) 645-4740
* use da fax: (810) 645-4744
* snail mail: 4200 Andover Road, Bloomfield Hills MI 48302
* web site: http://www.bloomfield.k12.mi.us/wbfh/wbfh.html
Thank you for your assistance!

Hi,

I used to listen to this syndicated program every Sunday night on WKBQ 106.5 FM St. Louis in the late 80's... Just wondered if it was still available, or if anyone had any of the shows (or if it is still available, if anyone could tape me one of the current shows...)?

Maybe somebody out there has some of the original vinyl/CD/whatever they were shipped on...?

I've got one in fuzzy mono sound (taped from a clock radio... what can I say? I was younger...) if anyone wants it for any reason... Got a lot of things from radio's past I could trade including the year end AT40 shows & a variety of other stuff...

Thanks in advance,
Jason (jkonarz@ix.netcom.com)

Dear Jerry,

Sorry to FAX you again, but my packet node is still down. From a DX Audio Service listener, he writes the following question.

From Bill Shaffer (N8WPH) in Toledo, OH: "Who is the station on 1120 kHz that has been on the air on Sunday's only? For the past ten Sundays from morning to Sunset, somebody has been on 1120 kHz playing a tape of Oldies music. The same tape each week, there are a few seconds of silence between songs. There are no voice announcements or station ID's at any time. Who is this? Is Nelsonville running some kind of tests? The signal is steady all day but fades a bit near sunset until it disappears under KMOX. The signal in Toledo is about 10 dB over S9.

Signed, Bill Shaffer

The product Sean is asking about is an AVCR made by Arrakis Systems
Inc. It is a brand new product on the market. It is used as a store
and forward system as well as some other very special features that
will be displayed at NAB this year.

If you would like more info on the AVCR you can contact a deal such as
Harris Allied or BSW or call Arrakis Systems directly (970)224-2248
and ask for John Young.

>There's rumors of stations placing ads in the trades for jobs already
>filled just to satisfy their EEO requirements.

I am quite sure this is true. The current federal regulations appear
to require discrimination on the basis of race and gender while
simultaneously forbidding it. It therefore appears to be impossible
to comply with the law. I've heard of stations going to great
lengths to recruit people for positions whose future occupants they
have already chosen, just so they can appear to comply with the rules.

Someone I know told me he was recently asked to apply for a job he
didn't want. The person actually being hired invited him to apply,
in fact, saying the station needed to recruit aditional qualified
candidates before it could make the hire.

Source record: 25045

DA>There's rumors of stations placing ads in the trades for jobs already

DA>filled just to satisfy their EEO requirements. Killer tapes that come

DA>"over the transom" that are ignored because a friend of a friend's
DA>consultant owes someone a favor.

Dan,
Any station that falsifies their EEO efforts is asking for some
very serious trouble.

DA>Do you PD's listen to EVERY qualified tape in reply to an ad -- or at

DA>least those with a resume than show the guy is not an overnight
board-op
DA>or fresh broadcasting school graduate? Are the really fresh new
talents
DA>going unheard and passed over for those who spend their time at NAB
and
DA>Gavin networking?

In our business, networking is the single best way to get a job. A
single audition tape will never give me the insight into a talent I need
to make the best decision. Come to think of it, networking in any
business is the best way.

If a "fresh new talent" isn't willing to get out and beat the bushes to
get what he/she wants, then they're probably not the people I'd want to
hire. By its nature, "fresh new talent" is wet behind the ears and has
to work doubly hard to convince a PD that they're something worth
investing in.

In a market as competitive as mine, I need someone who's hungry to
succeed, not just someone trying to escape boredom.

I have to keep telling folks that, once you're on the air, you cease to
be a person. You're now a product. Either that product finds a market or
it's history. Any personality has to look at himself that way and fight
for "shelf space" just like a box of cereal in a supermarket.

Any PD who hires a personality just to pay back a favor is risking
everything. It's far too high a price to pay.

Rich

2545. Shelly Hart and Phoenix

Deja-Vu - We have KZZP back in Phoenix.

They are using the Thompson Creative "More Memphis" jingle package.
(Sorry Jon and Fred, I tried)

They are using the (temporary) slogan "The Hit Music Station", their old
slogan when they were KZZP before was "The number 1 Hit Music Station".

We are getting Johnny B in the morning (from Chicago)>

Sounds good so far.

Looks like KMLE's Tim and Willy (I think Willy was one of Johnny B's
sidekicks at one time) are going to Chicago. WLS-FM Talk No Worky.

KTWC is still boring.

While I don't understand the station's refusal to communicate with you, I do understand their pursuit of 18-35 Women. That's the group everyone in CHR wants. It's the women who control the money and spend the money. They're the most prized demo for advertisers, it makes cents (and dollars) to me.

Source record: 24965

Hi...
I'm not surprised that WCRB is doing well, it performs a unique and respected service in its market. Stations that do that will always do well...but they will find other stations falling further and further behind them.
My comment has to do with just the raw numbers of people listening to all stations at any given time, and the total raw cume for all stations in major markets during a given week. The numbers were crunched from Arbitron diaries for Fall 1995 (and year-to-year compared with prior fall books) and findings presented to us by Radio Research Consortium...and confirmed as well by the trades.
Gary Fries may be right in saying the typical American radio listener is using the medium for three hours a day...and I'm sure radio is still an attractive medium for those who are scared off by the high (and frankly inflated) price of local TV even in fringe times, resulting in solid revenue growth for now. But this can't last forever. In fact, there's a report in a recent R&R showing spot business growth leveling off to a 5% growth rate for the current quarter. This may be just a temporary bump, or it could be the first signs that some major accounts are re-assessing, and scaling down, their radio buys---either trimming overall spending or booking flights on fewer stations for their next campaign.
I don't say this is an irreversible trend, in fact it's easily turned around at this stage. But let's not get complacent...there are some yellow lights flashing now, and we'd best work harder on the quality of our product NOW if we want to maintain growth for the future.

2558. WAVC Duluth changes name but not format

Newsgroup: rec.radio.broadcasting
Date: 1996-03-13 00:00:00 UTC
From: jellis@student.uwsuper.edu
Message-ID: <4i5g5l$kk7@vixen.cso.uiuc.edu>
Source record: 24974

WAVC has flipped to KKCB, B105, Today's Best Country. They have dropped the WAVC call letters, which gave them the status of being the oldest country station in Duluth (about 10 years). This is in response to the country ratings war going on between 105, Kat Country 98.9 KTCO, and USA Radio 107.7. The changeover appears to me to have been poorly executed: no jingles or music beds (except for the old weather music bed), Paul Harvey is still heard 4 times daily, long newscasts are still carried in the morning, the jocks aren't allowed to say any more than the song & station names, weather, and concert info, and there is very little promotion. There were still ads for WAVC appearing in print just days before the change! (When people using the Superior Daily Telegram's TV Pilot get to Friday they will see an ad for WAVC). Somehow I don't think it'll work.

>>(WWTC had gone Urban by that time, before going back to Oldies, prior to Radio
AAHS.)

WWTC being "urban," at least in the conventional sense, seems to be a common misconception. While the "Metro Radio" format included elements of urban, other core elements were alternative (Smiths, etc.), reggae and a regular dose of local music. I left when the format's demise was obvious: instead of making a clean break in the late summer of '85, the new GM, Sam Sherwood (mastermind of the impending - and to be short-lived - "WeatherRadio" format), reactivated the remaining 70's music library and told the jocks to begin inserting a 70's song every third song. Can you say "exit, stage left"?

Source record: 24977

BURKE OUT AT KHTC: Bonneville 70's KHTC(96.9-K-Hits) morning guy Shaun Burke has been told to look elsewhere...In April, at the end of one year there, his contract won't be renewed. PD Joel Grey is again in search of a morning show(the fifth in five years and three formats...Glenn Boychuck, Charlie Van Dyke, Danny Davis and now Burke have all come and gone since 1991)...and with the clock ticking, will probably do the job himself until he finds the right act.

KZZP; DAY TWO: A brief review: Brandmeier sounds great...very entertaining...rest of the airstaff still being very, very careful. Midday music too downtempo...a casual "punch-in-for-one-song" listener could, on some tracks, still think it's KVRY(When PM drive starts at 2:00,it almost sounds like someone changed stations).
Irony: It IS still KVRY. What nobody mentioned at the preview on Friday is that while Nationwide has purchased the KZZP calls, the FCC hasn't given its
final approval(just a formality, but they've gotta). So, buried in the :50 stop-set just seconds away from jocks and jingles proclaiming "The New KZZP, 104.7 FM...Your Hit Music Station"...is a female voice saying softly(and quickly) "KVRY, Mesa-Phoenix".

KMLE CORRECTION: As I approach 40 this month, I'm not sure which is older...me or my rolodex. Shaun Holly was a midday jock at KMLE once upon a time. He's been PD for some time now. My earlier post on Shaun's firing did not reflect the previous promotion. I regret the error.

>

Not to deter your search for the ultimate connection, but ISDN doesn't mean a whole lot if you're trying to pull stuff from remote servers (like over the Internet.) Most of the popular servers are so overloaded that the transfer rates you get aren't any better than 28.8. Plus, here in California, Pac Bell went back to the PUC on the follow-up plan for their "bait and switch" low-cost "home" ISDN. It wasn't very expensive here, but it will be, and the question is: Is the cost worth the performance? If the Internet is already neck-deep in traffic, a higher-speed line to your location doesn't necessarily guarantee transfer speeds commensurate with the costs.

Dan Hughes wrote the quoted material below:

" Several top hit songs now use the f-word and the s-word, and many
" commercial stations around here are playing them unedited. Have the
" rules changed, or is the envelope being pushed a bit farther [....]

At Disney/ABC's KGO, top talk host Ronn Owens regularly uses words like "bullshit" and on sister "hot-talk" station, KSFO, another veteran broadcaster, Lee Rodgers, uses words like "God damned" and "piece of crap". I believe this is Disney's attempt to become hip, since I only remember the uses of theses invectives coming since the purchase of ABC by Disney interests. The situation has gotten so bad that op-ed pieces and letters to the editor are appearing in the local press asking when this will stop. Will it? KGO is #1 and KSFO is about #20 or so. I don't think it shows any sign of letting up.

Needless to say, I've tempered my listening with the local NPR stations. Much more informative and much less irritating.

2567. Attn PD's: Demo Tape advice?

Newsgroup: rec.radio.broadcasting
Date: 1996-03-13 00:00:00 UTC
From: danielcase@aol.com
Message-ID: <4i5g4m$kj6@vixen.cso.uiuc.edu>
Source record: 24983

I'm a 23-year veteran radio guy who is hopelessly addicted to the medium. Most of my last 23 years has been spent in Engineering, ranging from contracting to Director of Engineering for a 9-station group. I've also done a fair amount of on-air and production work... and at the risk of sounding a bit vain, I'm actually pretty doggone good at both. Aside from the usual patter, I can do a lot of character voices, and I'm regularly called upon to provide them for the production guys where I am now.

After serving for over a year as OM/CE for a new startup, I have, for the last several months, been in sales... it was supposed to be a move up the ladder for me... and yes, I'm miserable. I really want to get back into _making_ radio, instead of marketing it. I've got some resumes out for Engineering openings, but lately I've been thinking about trying to get a PT on-air gig just to make the wait a bit more bearable (no opportunity where I am -- but I could do PT accross town and they wouldn't care much).

Now... getting back to the subject... I haven't done a regular on-air shift on a music station for about 3 years. I do a daily :90 commentary on my current station, and an occasional spot or two... but that's it. As a PD, with piles of demo tapes in your mailbox, what would you advise me to do in the way of a voice demo? I've got a great digital 8-track studio at my disposal... and I _do_ know what to do with it. Should I put together something creative that shows my range, or should I just send a dub of my daily commentary and a spot or two? I've heard a LOT of really lame demo tapes in my time... and I _don't_ want to put my name on one.

Suggestions?

D.

2568. Re: Denver's 92.5/AM 1090

From: richwood@commspec.com
Message-ID: <4i5g4n$kj7@vixen.cso.uiuc.edu>
Source record: 24984

PC>Well, for one, we already have two stations here in the Denver Area
PC>locally that play Spanish music, so the LAST thing we need is ANOTHER

PC>spanish speaking station like KBNO.

PC>Also, along those same lines, we really don't need one that can cover
30+
PC>states at night. Mexico can provide this if someone wants to do so.

Patrick,
Why should Mexico be the source? Just because it's Spanish doesn't
necessarily mean listeners are longing for Mexican news. They're
probably American citizens who are simply more comfortable with Spanish.
Mexican programming might be just as foreign to them as French
programming would be. They're still concerned with local issues.

PC>Reason #2: KYBG has also been the home of Larry King and Jim
Bohanan.
PC>If anything, I would've loved to see KYBG change to more of a
NEWS-talk
PC>station (They could've done this with very little effort), and Rush
PC>Limbaugh has always been looking for a decent radio home anyway.
KYBG
PC>could've plucked stuff off of the satellites much like what KHOW does

PC>now, AND been successful at it.

Being the Bohanan affiliate isn't exactly what puts a station on the
map. I was also under the impression that KOA was the Limbaugh station
in Denver. Not too shabby.

Gag me.

1. The FieldFone costs as much as a Zephyr and only delivers G.722 performance.

2. A user is not able bank on getting a 28.8K connection at the stadium;
sometimes the lines in an area won't support a bit rate over 1200.

3. When your bit rate degrades, the audio quality goes to Hell.

Then I can tell you about the CDQ Prima, which doesn't stand up to a
Zephyr at all.

No thanks, CCS..

Well, Bob, your memory and mine seem to be recalling our days at WVBR, when we would regularly get complaints about language, including a few forwarded from the FCC. At that time, virtually anything said in song lyrics was defensible on "artistic freedom" grounds.

Now, I get the feeling that it's a double-edged sword. The law on language over radio and television(18 USC 1464) is, supposedly, strictly enforced 24 hours a day(with the exceptions the courts have made for indecency, which has been defined as protected speech), but enforcement only happens when a complaint is made. The FCC simply doesn't have the manpower to monitor stations for programming content(and, increasingly, for technical standards), so unless there's a complaint made, I think the "free pass" is still the rule.

James Olson wrote:
>
> If you are trying to evaluate the worth of an AM station, what do you consider?
>
> 1. Where do you get rating for small town stations?

If you're lucky, the small town is close enough to be included in the ratings book of a nearby city. If not, you're pretty much on your own, although a research firm might help by doing a survey for you. Check also with the "big gun" station in town, or nearby - they may already have some research data of their own.

> 2. What is the appropriate price to pay for a station?

That's the $64 question! There's no right answer, but generally speaking, it has to be low enough that you can reasonably expect to make some money from ad revenues, after expenses are met. In some markets, spot rates are close to the "dollar a holler" level, making it really tough to make ends meet if you pay a lot for the station.

> 3. What is the future of AM radio in small markets?

Anyone's guess. With new ownership rules, digital broadcasting, expanded band operation, stereo, and competing technologies, AM radio in small markets can be seen as either a) a complete waste of time, b) the smartest investment in a long time, or c) pretty much anything in between.

> I have daydreamed about owning a radio station.

If you've been daydreaming, don't go too much further! Reality can be very disturbing. However, if you're really serious, do a LOT of homework before plunging in. In a small market, be prepared to LIVE at the station, clean the floors, tend the transmitter, cut spots, sell time, program, and answer the phone.

I really enjoy radio, particularly in smaller markets. The business DOES have a lot of appeal - the people are almost universally laid back and helpful, and there is a great deal of fun to be had, too. I don't think anyone's getting rich doing it, though.

>Billboard's or R&R's for the Pop/Rock Singles from April 12,1986?

I don't have the actual charts, but I can tell you what was being played back then. I was at a small CHR in Garden City, Kansas (KWKR/99.9), and we were playing songs like:

Addicted to Love/Robert Palmer
Manic Monday/Bangles
Bad Boy/Miami Sound Machine
No Easy Way Out/Robert Tepper
Burning Heart/Survivor
Rough Boy/ZZ Top
Rock Me Amadeus/Falco
Kiss/Prince
These Dreams/Heart
West End Girls/Pet Shop Boys
Secret Lovers/Atlantic Starr
ROCK in the USA/John Cougar Mellencamp
Sara/Starship
Kyrie/Mr. Mister
Living in America/James Brown
Why Can't this be Love/Van Halen
Harlem Shuffle/Rolling Stones
What Have You Done For Me Lately/Janet Jackson

Okay, fellow 80's music enthusiasts...what have I forgotten?

| sending this to the journal as well...)
| > Second: In Airwaves #1885, you state, if I read your words correctly,
| > that using AM-1090 as a 50kw Spanish facility is a "waste of RF". Why?
| > Just curious...

| Well, for one, we already have two stations here in the Denver Area
| locally that play Spanish music, so the LAST thing we need is ANOTHER
| spanish speaking station like KBNO.

If the market is there, listeners and advertisers will support it, which defines the need right there.

| Also, along those same lines, we really don't need one that can cover 30+
| states at night. Mexico can provide this if someone wants to do so.

One could reasonably assume that the majority of Spanish-speaking listeners are just as loath to DX as are the majority of English-speaking listeners in the United States.

The term "Hispanic" or "Spanish-speaking", as misused by those of us in the United States who speak English, covers a vast range of cultures, viewpoints, interests, and musical styles. Lumping them all together is, at the very least, a display of ignorance.

Just a note to say thanks for all the responses I got regarding my attempt to start a training program for people with disabilities here in Canada. Who know maybe further down the road I will be going stateside with the idea. For now the project is expanding.

I have decided to include our friends in TV, if anyone knows where the group for TV folks is at please drop me a line at ctooher@netaccess.on.ca. The project is on hold for a while, I need to do some reserach, and I figure on at least six to ten months for that to be done. By the way, the way the projects name has changed, it's now the Disabled Broadcasters Training Program. One final note I am looking for other radio work because a contract I am on will end soon, the job comes first, the project a very close second. I am committed to the idea, but I need to know it will work, and I need money like everyone els.

Send all personal mail to ctooher@netaccess.on.ca. ctooher@freenet.hamilton.on.ca is for listserv use only. Sounds starnge, but I figure what the heck I gave a donation to the local freenet here in Hamilton, so I may as well keep the e-mail address. The other prvider is Netaccess, a good group indeed. See you down the log.

....
|: I have been told by station engineers, when trying to
|: arrange for studio guests, that their Codec won't talk to a Zephyr, because it
|: is Musicam. When I asked the source, they told us it was from CCS. We have not
|: found any problems when doing a Zephyr to CCS codec, or COmerex to CCS, or RE
|: to Zephyr, as long as the right setups are selected. I hope that both CCS,
|: Telos, Comerex, and the other Codec manufactures will be more upfront with
|: their purchasers. I hope the comparative advertising does not extend over to
|: the net, as it has in the magazine.

A) _Early_ CCS units might not talk to a Zephyr or Comrex, because they didn't quite match the MPEG spec. Current ones do -- I connect my Zeph to CCS Musicam frequently.

B) At least Telos and Comrex have been very upfront with information. They'll spend time with you on the phone, forward you official MPEG documents, and send you information on cross-manufacturer interconnects. And, since the things they say generally agree, it's easy to belive they're telling the truth.

|:
|: And Lastly.... I know that Jay started out with a Zephyr list, and now, he is
|: adding everyone. ...
|: If I need to have a
|: call-in show guest in Austin, I would like to know if they have layer III, II,
|: or G.722. Then we can go from there as to Musicam II or not. A list that lists
|: ISDN or SW56, and Codec types (II, G.722, III, APTX, etc) is much more useful
|: "yes".

We now have 250+ US sites on the list -- not an exhaustive listing of everyone with a codec, but just those who have agreed to be available on an ad-hoc basis when somebody from out of town needs a transfer. (Availability, schedules, and charges are strictly between the parties involved.)

Since January, the list has included half a dozen general categories for codec type with a key that says which ones support which formats. However, I can afford only one byte for that data (and I'm not into bit-masking on a text file): stations with more than one codec are just listed as 'multiple'.

For those new to this concept, the list lives at

There's an ad in R&R this week for "Tucson's new K-HIT 107.5" They're looking for Middays/Production Director. Never heard of these guys before; I assume they're new, and also modeled after Bonneville's K-HITS in Phoenix.

Is this a decent operation? Do they do the 70's RIGHT (personality, fun, energy, phones, etc.), or is it just another faceless "jukebox?" In other words, is it worth my time to send a tape?

Message-ID: <4i7p7n$ikb@vixen.cso.uiuc.edu>
Source record: 24860

If you, like me, thought it would be awhile before you heard
a new station above 1610 kHz, good news--especiallly if
you live on the West Coast. KXBT, formerly just a daytimer
on 1190, is now testing on 1640. They apparently haven't
mentioned these tests on 1190 at all. And they're making
"a major announcement" 'on Tuesday, March 19, at 7:05 AM".
If that's when they annouce their fuul-time status, listeners
won't get the routine jabber from THIS station that quite
often passes for a "major announcement"!
KXBT's format is soul oldies--at times live and at times
via satellite. They come in quite well here in Phoenix, \
especially after 10 P.M. MST.
Jay Arnold and Marty Rimpau from the Bay Area get the
credit for tipping me off on this one.

From: Andrew Paul Dickens <apd2c@virginia.edu>
Message-ID: <4i7p7o$ikm@vixen.cso.uiuc.edu>
Source record: 24861

When you applied for your license, you were required by
the FCC to submit a coverage map that marks out you 1uV/m at
0.5uV/m contours. If you look in your public inspection files
for your license application, or call up the consulting
engineer that performed the study for you originally, you
should find it.

If not, the FCC may have a copy with your original
application, but I don't know how receptive they would be to
tracking down, photocopying, and mailing a piece of paper you
should have anyway.

Be warned that the maps are not terribly accurate. A
substantial fudge factor is used for "Terrain roughness", which
is generally taken from averaging the countour variations.
Also be aware that most radios will pick up stations clearly
even beyond the countours - in fact we are received (w/fuzz) more than
50 miles out of our eastern contour because the land is on a
gentle downward slope in that direction.

The code of federal regulations has a section on
calculating the coverage area. Look it up and you can ballpark
a figure if you know roughly what your antenna pattern (you
should have it on file) and terrain look like.

Hope this helps,
Andrew

I've heard that you can't do more than 4 songs, or parts thereof.
It's apparently a copyright issue, with the mix becoming "your"
work at that point, and subject to infringment.

I'd like to argue that an album (side) is a single piece of work--
Sometime I'd like to play the entire uninterrupted "Dakr Side of
The Moon"
but I'll probably have to find room for a couple of drop ID's...

Claus:
If you want to contact me via e-mail for pricing, please do so.
Regarding sound, that is always a very subjective question!
The 8100-series Optimod is an analog unit and still quite popular in
the US.
However, the ability to fine-tune the sound is much greater with the
8200-series as the processing occurs in the digital domain. As a
result, Orban has given great flexibility with adjusting the
8200-series.
The 8200-series is available in two versions, a two-band unit and a
multi-band unit. There is about a 30% price differential, with the
multi-band unit being more expensive.
Your on-air sound with the multi-band 8200 can be adjusted for a very
agressive or conservative sound. The two-band unit cannot be as
agressive.
The 8200's are also available with an AES/EBU digital input and output
interface.
Orban has also recently announced a two-band 2200-series Optimod. A
true digital processor (two-band) at about 1/2 the price of the
8200-series. It is available with either digital or analog/digital
input and output (not field upgradeable).
I have seen several 8100-series units available on the used US market.
They are typically advertised in the "Radio World" newspaper. I cannot

recall noticing any 8200 units on the used market.

We have a smaller market station in our chain. And a limited budget.

The station uses an ancient Optimod 8000. The Optimod is located at the transmitter. The transmitter is hardlined to the studio without an STL.

What can be done on a limited budget to improve the quality of the sound?? Would a compressor help?

Any information would helpful??

As a consultant, what I always advise my stations is "when in doubt, don't". Some classic rock anthems do indeed have the F word buried or mixed in somewhere, and custom in many places seems to now say hands off on a classic, but in some cities, the song was never played or was played in edited form-- the record company did provide an edit for "Who Are You", for example. As with the definition for obscenity, the issue is 'prevailing community standards'-- in some places, Howard Stern can discuss his penis with no problem, while in other cities, any station airing him is going to get deluged with complaints. It depends on how strong the conservative factions in your town are. It also depends on how strongly the 'dirty word' is flaunted. Many stations stayed away from Jill Sobule's "I Kissed a Girl" because they felt that a pro-lesbian song would offend their market. Some stations avoid the Guns & Roses song with the line about 'niggers and gags'. I've always believed that unless your image is to be nasty and rude, you're never hurt by what you don't play. I'd rather be entertaining and adventuresome in ways that are not an invitation for some right-wing group to go after my license... donna

Interestingly, 20 years ago, this kind of langauge and the daily profanity practiced by Howard Stern would have been muzzled immediately according to prevailing community standards. Since the same First Amendment that protects these transgressions also protects political speech, we're stuck with the smut. The shame of it all is that it causes people who earnestly want intelligent, respectful language to call for censorship. Once any one becomes successful, it would be a matter of time until the slippery slope allows the government to control what we say. So, speaking from an opinionated group of 1, I wish they would quit insulting the audience and exercise restraint. In the long run, the self-restraint will strenghten the First Amendment. I agree with David -- as a one-time listener -- I now rarely tune to KGO.

> it. Hope Jerry Thomas is doing OK with Jacor. Anybody know anything about
> the Queen City and the northern neighbor?

Cincy's easy...Jacor owns or controls roughly half the metro, after the
takeover of Citicasters is complete! WOFX-the Fox -- 92.5 Classic Rock +
Bob & Tom
WEBN -- 102.7 -- Rock
WLW -- 700 -- Talk, Sports, FS
WCKY -- 550 -- Talk
plus SMAs: WSAI -- 1530 -- Nostalgia
WAQZ -- 107.1 -- Alternative
WAOZ -- 1360 -- Radio Aahs
pending acqusitions: WKRQ -- 101.9 -- CHR/Q102
WWNK -- 94.1 --AC/Wink 94.1

As for Dayton, WYMJ is now WXEG, "103.9 the Edge," in an SMA w/WTUE, WMMX,
and WONE. Started out with a strong first book, but the trends are down.
Not much has changed with WHIO/WHKO lately. WING(am) is CNN and Talk;
WING-FM (102.9, formerly WAZU) is Classic Hits, expanding beyond just the
70's (their format of late having been all-70's rock-based), with Bob &
Tom in the morning (but rumors are flying of them having to drop it, with
WOFX/Cincy carrying it, though the Fox doesn't exactly get into Dayton
very well).

Hope this helps! E-mail if I can answer any more...

Best,

Todd
aka Party Boy Floyd, WLLD/Country 98.9, Columbus

WING-AM and WGTZ-FM were owned by Great Trails Broadcasting a couple
years ago when I was there. Whoever owns them now also bought the old
WAZU-FM (Springfield) and is broadcasting a 70's format, and the
station shares WING-AM's calls. WHIO-AM and TV were owned by Cox...

as far as I know ownership is still the same, but I'm a little behind
the times.... I live up North now...

| I'd be happy to work with other r.r.b. readers to see if we can find
| a way to put an end to this egregious abuse of FCC rules. As I understand
| it, the original idea behind allowing satellite-fed noncomm translators
| was to allow public broadcasters in spread-out areas like Utah or
| Wyoming to serve remote areas, *not* to allow one or two religious
| broadcasters to blanket the nation with transmitters in every
| community. I'm not a fan of Christian radio, but I'd still much
| rather see it done through local stations, or regional networks like
| those of WBGL, or Mars Hill/WMHR in Upstate NY, or WGLY/WGLV in
| Northern New England, than to see it done by satellite from Florida
| and Idaho.

A possible, simple solution:

Disallow satellite translator feeds. *Permit* microwave feeds over distances up to, say, 300 km (just to start discussion).

Allow neither for *any* translator outside the 19 noncommercial reservations, regardless of the status of the originating station.

These steps would at least regionalize these operations.

} conversation on the merits of LPFM and translators...
}

Anyone else with a comment is highly encouraged to 'jump in', as it were.

#} # It is also true that non-religious noncomms have
#} #translators, but not anywhere near the number and not anywhere near
#}
#} So, is this an inherently unfair situation, or is this just a matter of
#} one group being more motivated than another?

#It is both, IMHO. It is a case of a well organized, well-heeled
#group(s) who have found a loophole that permits satellite-fed
#'translators' to be used, on the assumption that they are being fed
#from a non-commercial source.

This might be partly true, partly more akin to the 'new immigrants' who
embarrass the 'native citizens' with superior economic/academic
performance. They're not necessarily doing anything *wrong*, as much
as walking onto someone else's turf, and showing them up.

#} If they interfere with other stations, they should be reduced in power
#} or shut down. This may be a matter of lax FCC enforcement.
#
#It depends on what you call 'interfering' with another station.
#Docket 80-90, which even the most staunch believers in the "Diety
#of the FCC" agree was a disaster to exiting stations, both through
#interference and the dilution of ad revenues. [...]

#All this with the blessing of the FCC. It was part of re-defining
#a station's protected contour and the furthering of the notion that
#'service = sales' and that if a station was not actively selling
#spots, say, 40 miles away, that they clearly were not being of
#'service'.

Agreed, the FCC has allowed too many stations, not only on FM, but
on AM, and has made many other mistakes.

80-90 is kind of like communism.... Looks great on
#paper, but fails in the real world to deliver. The notion of local
#service was great, but sadly many (although certainly not all) 80-90
#allocations became satellite-fed network repeaters with the only local
#input being their spot sales departments.

That's why I have guarded enthusiasm for implementing
yet another class of station, with the intent to "improve local service";
they may end up being "abused" in much the same way as the translators,
and the 80-90'ers.

#So when you say "They should be shut down if they interfere", you have
#to define interference. Yes I know that translators are secondary
#services and are therefore entitled to less protection, but the
#reality is, IMHO that the FCC has not the manpower or really the
#concern to do much about them, especially if they are part of a
#powerful, politically active group. Much easier to shut down some kid
#with 5 watts with no financial backing. What is allowed, today, as
#interference would never have been allowed 10 or 15 years ago.

Of course, the FCC is underfunded; they seem unwilling or unable to
even handle certain ham repeaters or CB stations doing out-and-out
illegal things.

#} #The majority of these stations sell their airtime just like any other
#} #brokered station. In addition most solicit donations and are right on
#I don't know of any that broker entire networks, do you? As for

There are some individual programs that are bad apples in this regard.
I remember one particular religious talk show host (btw. not on, to
my knowledge, any of the translator networks described here) whose show
would constitute almost 90% solicitation.

But I also am familiar with the "pledge breaks" on certain secular
non comm stations, particularly those with extreme political views;
some of these are just about as strident as anything I've heard from
the religious stations.

#after all we both agree that "one format is no more
#[or less] moral than another",

Of course, although certain programs and formats often are held up
as examples (not by either you or me, incidentally) as "what's
wrong with radio today"

#I am merely saying that if huge networks
#can be built using the, much more lax, non-comm translator rules, by
#organizations that are clearly pitching for funds at every turn, then
#these frequencies should also be open for local origination of
#community-based programming.

Generally, I agree, although I'd like to see some of the overcrowding
removed, not merely replaced with yet another type of program.

#} #I have gone on record many times saying that I am not a fan of Stephen
#} #Dunnifer's attitudes but let's face it. Who, but a radical, would
#} #openly defy the regulations which prohibit ANY local programming on
#} #[translators] (other than one 30 sec announcement an hour)?
#} As to signal stability and quality, however, I must disagree.
#} Dunnifer *does* care about matters of stability and signal

#} cleanliness.

Smart move. If any *real* public safety problems ever arose from one
of these transmitters, it would be "Game Over, Player One" as far as
any further progress in this area is concerned . . .

But I'm also concerned about the next radio pirate, who's gung ho
out to save the world from commercial radio, or whatever, but has
little regard for such technical niceties. And the next one .. .

#I would venture t guess that much more stringent
#standards of what it means to 'interfere' are being applied to
#operations like his, than would be applied to, say, translators or
#'80-90 drop-ins' that happen to interfere with a distant FM.

This may vary from place to place. I live in Los Angeles, and the FM
band is very crowded here. We have at least one 80-90 type station;
there may be others, I don't know. We have a few commercial and
noncommercial translators in the distant suburbs; but all of our
religious stations (with the exception of one AM station) are full
powered commercial stations.

If we ever have translator origination of programs, the standards for
non-interference ought to be the same as for the existing translators
(after all, they are the same type of signal)

#Don't forget, LPFM'ers don't want to compete with co-channel
#interference, so they would naturally (if only in their own interest)
#try to locate on the clearest channel possible.

Possible in a rural or deep suburban area; metro areas loaded with
stations may not really have any channels left.

#} #Since there is a total prohibition on LPFM as a community resource,
#} #who is going to get involved? Radicals and children playing radio,
#}
#} But this is 1996, not 1966. Back then, someone could stand up against
#} the status quo and get noticed. Ill treated, definitely, but noticed.
#
#I dunno, the Republicans are claiming that they are standing up
#against the status-quo. Buchanon certainly is standing up against
#virtually everyone <g> and he is definitely getting noticed..
#I guess it just depends on what you consider the 'status-quo' <g>.

Buchanan had his day, but most of his supporters are now voting for
Dole, the more 'mainstream' candidate. They may feel that Buchanan
has too many political liabilities to win against Clinton.

(This was about the same in '92, when Clinton got some flack for
distancing himself from Jesse Jackson, after Jackson supported some
outrageous, racist rap singer)

#And just because we have become a more jaded, callous, uncaring and
#de-sensitized world, does that mean that we should stop trying to

#effect change?

I don't think we should just give up, but we should try to be both
open minded to all the possible ways to implement change, as well as being
realistic as to what can be done in the current social system.

There's a world full of people frustrated that the world isn't
what they think it should be. A few do extremely outrageous acts,
but the great majority just internalizes it all, and goes through
life angry at the world, until their anger destroys them, while
the world goes on.

There have been too few people that can actually channel this anger
into real action to bring about the desired social changes.

#} If we want to move ahead on this issue, we can't afford to be
#} weighed down with too many of these types.
#
#Whenever I hear someone talking about "These types" or "That ilk" I
#immediately lose some of my respect for their views.

I'm not here to demonize Dunifer, or anyone else, for having certain
political beliefs. The big problem I have with him, really has nothing
to do whether you or I think he's good or bad.

The decision to support this new service is ultimately going to be
made by the general public. But the information needed to make this
decision will (as it usually is) be presented by some group of
extremely interested and motivated people. This is otherwise known as
an activist group.

Now every activist group, from the NRA to the NAACP, must struggle
between including all the extremists' ideas that are in the group,
and presenting their message to a general public. While the extremists
are often the group's best supporters, the objective (usually some
legal or social change) lies with the general public, a general
public increasingly growing disenchanted with extremists in particular,
and, unfortunately, activist groups in general.

While knowing changes need to be made, the public is resistant to
"revolutions". They may be convinced by the NRA, for example, that
the right to bear arms may be a good thing. They're less convinced,
that everyone 'needs' to own an AK-47.

Back to the issue at hand. Eventually, the public may come around
to deciding that community radio is needed. I tend to think, however,
that they would support a government-regulated service, more than
an unregulated, and possibly undisciplined free-for-all.

} #I am a firm believer in LPFM as it relates to community
} #involvement. Whether that community is a small town whose local
} #station(s) have long ago abandoned them for the more lucrative city

#} I support the development of a legal, low powered radio service to
#} meet these needs. I don't particularly care whether it's AM or FM.
#
#I don't specifically care either, but the AM band is already such a
#mess, and even full-powered stations are having a hard time covering
#at night, the obvious choice is FM, with more predictable coverage,
#more compact antennas and easier directionalization.

In rural areas, FM might make more sense. I'm not quite sure it can
support many more stations in urban areas, even if all the translators
were taken out . . .

On the other hand, the TIS stations don't seem to have trouble covering
their immediate areas, even though there may be distant skywave at
night. (I may be envisioning smaller coverage areas per station,
especially in urban areas where the demand for stations might be
very high)

#I am not interested in convincing you, or anyone else, that Dunnifer
#is a wonderful human being. But the more I see of the direction radio
#is headed, the more I think he is needed. If for no other reason than
#that he has (excuse the term) 'balls'. He *is* succeeding in bringing
#this debate out of the idea of 'pirate' radio and into the light of
#day. I mean how many so-called pirates have won even a single court
#battle against the FCC?

Who knows what will happen in court anymore? In light of several
recent high profile cases, I wouldn't even try to speculate. . .

I'm just holding out for a more *discliplined* radio service.

#I am sure that Dunnifer's ideal of 'let a thousand transmitters bloom'
#is not going to come to pass. At least I hope not. But in a world
#where there is literally nothing to stand in the way of a near-total
#media domination by a handful of companies, and all that implies as to
#access to the airwaves, in a world where translators can be satellite
#fed by the hundreds, from a single network, I believe that LPFM is a
#necessity.

I believe that low-power *radio* is a necessity, regardless of all
these other events.

#No, I am not anti-corporation. No I am not opposed to stations making
#money (even lots of money). But I am afraid that we have not even
#begun to see what radio will become when all this has shaken out and
#your entire city's media is owned and controlled by two or three
#absentee conglomerates. When the idea of independent media is just a
#chapter in some radio history book. When NPR (such as it is) is forced
#into direct commercial competition along side of Zrock and Hot
#Country. No, I am not anti-corporation, but I am more than a little
#concerned about what will pass for information when everything is
#under one, two or three (similarly run) roofs. Make no mistake, boys
#and girls, that is *exactly* where all of this is heading.

An aside: What would happen if *one* entity, whether private or government, owned all the radio stations. This is not really novel, it's how radio had been managed in most of the world until rather recently.

Of course, I'm not saying this *should* happen in the US (and it probably won't, given that there is at least *some* anti-trust law).

But one is compelled to ask, did having more separate owners of stations, as in years past, really consistently ensure diverse opinions on the air (assuming that's the main concern)? Or did they still play mostly similar programming?

What I'm getting at is; even with more players than there are today, there was still not an intense committment to local community oriented programming (save for a few isolated rural examples).

#} Again, I'm not against LPFM. I just want to see it done *right*
#
#I am very interested in discussing real plans for such a service.
#A service that would create something similar to translators, but with
#much more streamlined licensing, no group ownership, requirement of at
#at least 50% locally originated programming (or more), with no

How would one define "locally" originated programming? Could you play taped programming? If someone's spinning records all day long, does that count? What if someone loaded up 100 CDs in a jukebox, put it on random play and walked away from it?

Prohibitions on group ownership. I suppose this is to discourage more "translator networks", but what if some ethnic group, whose members are scattered throughout an urban area, demands extra transmitters for its needs.

These, and other questions, need to be thrown around, discussed, answered, discussed some more, etc.

#I would start by telling all these satellite-fed translators that,
#unless they can actually receive the station they are translating (by
#over-the-air means) they can no longer be considered translators.

You know, I think we both want the same basic thing, but our agendas are slightly different . . .

You seem to be saying, "Community radio is important. And, because of 80-90, and translators, and translator networks, and mass ownership, we should have LPFM as a matter of basic fairness"

I lean more toward "Community radio is important. And, we should get it anyway we can, whether AM, FM, or other means. And whatever we get (within reason), is much more than we have now, which is nothing"

I'm not saying one of us must be right or wrong; these are differences in our life philosophies.

} #You say "LPFM would drain listeners from full power stations who are
} #already struggling"... Maybe. But if properly administered, these
} #services would likely be serving communities and interests that the
} #full-power stations (with all their resources) are not interested in

#Keep in mind that today's formats are fairly narrow anyway, I mean we
#now are programming to a single decade, and a fraction of a decade at
#that...

I'm talking about much more narrow than that. Foreign language services, programs of interests to very small interest groups, local civic, sport, school and church group programs, garage sale ads. More like a throwaway newspaper or public access cable, than the New York Times or ABC.

Of course, some "community" stations might spend their time aping the big boys, and spinning records all day. But that brings us back around to ask "what are we fighting for"? Is this about allowing people access to the airwaves for some real purpose, or is this about providing some people a new hobby?

#} Remember, the "real" stations are all playing "satellite
#} rock", which, in their immense wisdom, is what "everyone wants". If a few
#} hundred people would rather listen to some narrow format, it's not
#} going to hurt them too much, if at all.
#
#I'll bet you won't convince MegaMedia Inc of that. I truly believe
#that the worst nightmare of MegaMedia Inc. is *not* the rival
#corporation, with a similar structure and goal, I truly believe that
#the worst nightmare of MegaMedia is a well-run, shrewdly programmed
#independent operation that can feel the pulse of its community and act
#immediately to fill a need.

With the reduced power of the community radio, how much competition could it realistically be?

#MegaMedia (a fictitious name) is bogged
#down in consultants, focus groups and shareholders. The local
#operator has no such fetters (unless (s)he chooses that route) and can
#turn on a dime, respond to changes in a heartbeat and deliver a (IMHO)
#superior product.

I'd imaging they'd probably go on with broadcasting to the lowest common denominator, and

} #I would think that if Family Radio can satellite feed hundreds
} #translators, as well as dozens of full-powered stations, that the
} #answer to the above should be ... YES, we can find a way. But I am
}
} So, why don't they squawk about the TIS stations at the airport? They're
} low powered stations too, with programming designed for a very narrow
} audience. Do they drain away listeners from other stations? To some extent,
}
#Glad you mentioned TIS. First of all TIS is a 'government' radio

#service. As far as I know it cannot be owned privately. Also there
#are strict restrictions on programming (no music, no brand names) and
#a severe limit on frequency response (a brick-wall low-pass filter at
#3Khz). They are designed and restricted to serve as public safety
#beacons and tourist information.

And, ostensibly, these legal restrictions on TIS can be removed, much
the same way as restrictions on translators can. Again, let's keep all
our doors open.

#} And, the translators get about 30 seconds of local programming. What if
#} this was raised to two or three hours per day? Would the world end?
#
#If we are going to change the rules, do it right.

I'm willing to consider an evolutionary change, if a revolutionary
change seems too far off.

#} Have we really heard the NAB's side of the story, as it relates to
#
#All I know for sure about the NAB is that they have joined the FCC as
#a 'friend of the court' in fighting Stephen Dunnifer.

I would guess that they're more concerned with the interference from
'a thousand [unlicensed, unregulated] transmitters blooming' then
programming per se. But, I cannot speak for them.

#} Have we really though about how a low power radio service might be
#} implemented? how channels would be allocated? in the case of limited
#
#Minimum operation? Definitely. If this service was (as I would hope
#it would be) designed to create community radio opportunities, there

How does that reconcile with "no restrictions on programming content . . ."
(Maybe there should be clear cut standards on programming types. That
just might get the 'big boys' off our back)

#I also support an expanded part 15 that would allow unlicensed,
#secondary operation at power levels that could actually be used.

This might be of more interest to 'amateur broadcasters' who just
want to have some fun, without the serious commitment that a
community radio station, by definition, ought to have.

#} My point is: debating this stuff on here is great. But the debate needs
#} to be taken out to a rather unknowing public
#
#Any ideas on how to do that? It is the ever decreasing access to mass
#media that is prompting the very need for LPFM. How many full-power
#stations would carry such a message? Maybe the Internet is the way,

Another resource might be the various free community newspapers. There
are probably other things I haven't thought of yet.

#That is why oddballs like Dunnifer are important. While his ideas are
#too far out to be taken seriously, he does raise the issue to the
#point where intelligent people (such as us, I hope) can, while

I'm not saying he should crawl under a rock somewhere, but the
debate needs to move on to a broader sense. And, I fear that someone
like him, but with less concern about technical standards, may lose
the war for us in the public's eye.

#} But think of all the schools, churches, city halls, and social organizations
#} that may have naively applied to the FCC for a broadcasting license
#} and were turned down. That probably happens a lot.
#
#Yep! And think of all the uses 10 watts of FM could have in smaller
#towns. TIS is available to city halls, and is used in many
[...]
#amateur radio is. In fact, an amateur broadcasting service would be a
#good start... but I digress..

Amateur broadcasting is much less of a priority, in my opinion, than
community radio.

#} To sum up: I believe there is a place for low powered radio in the
#} U.S.
#
#Actually I cannot, for the life of me, see the traditional,
#full-powered radio establishment standing for such a rule-change
#unless there are some very vocal and well thought out people (not to
#mention well-heeled) pushing very hard.

We're hardly there yet. It'll take a while to build the necessary
support. The "radio establishment" might call for certain
restrictions before they would support community radio. And quite
frankly, some restrictions might be appropriate. While assuaging any
insecurities (real or imagined) the existing stations might have, it
would force community radio supporters to define their goals as to
exactly what "community radio" means; do we just let anyone just grab
a transmitter and broadcast simply because they have a right to public
airwaves? Or do we expect more out of this service.

I think it will eventually boil down to a negotiation-type affair with
these entities. As with any negotiation, no-one ever walks out with
everything they wanted. But, if done right, we will walk out with more
than we came in with.

Hey, Jon, thanks for the info!

I remember interviewing at WEBC, when WAVC was #1 in the market...FULLTIME SATELLITE!!! GEEZ did it sound like sh*t (this was in early '86, I think). The B105 handle might be good, if they use the Bee mascot ala B105/Cincinatti (and a bazillion other B-stations).

How does Kat Country do against them? I hear USA Country hasn't been much of a factor. True?

And what's up with Tim Michaels? He offered me a job at WDSM about ten years ago, but I was making MUCH more money already. But he was just about the nicest guy I've ever met (or interviewed with), before or since. (I always loved the old Marlboro logo that WDSM used...)

Thanks again!

Best,

Todd
aka Party Boy Floyd, WLLD/Columbus, OH (Country 98.9)

2605. Re: Is it really WHO you know?

Hi Dan. Being out of work is absolutely frustrating, and you have my sympathy. But finding somebody to blame isn't useful. First, let's discuss the 'women & minorities are getting all the jobs' story. If eeoc rules are taking away so many jobs, why are 98% of the PD's and about 85% of the talent still white males? When I was jocking and people didn't want to hire me, they would say 'oh we have to hire a minority because of eeoc'. I later found out that blacks were told 'oh we'd love to hire you but we have to hire a woman.' The truth is that hiring in our business has often been arbitrary and based on desperation-- oh my gawd, the mid-day guy just quit, what tapes do we have around??? Often, in my many years in the industry, I have seen people hired because they were five miles away and would work cheap, not because they had incredible talent. But the fact that duopoly has shrunk the industry is more to blame for your status than any eeoc... And then there's consultants, another easy target. I've been a consutant for almost 16 years (my anniversary is next month). Anybody I hire, be they male or female, cat or dog, has to fit the sound of the station and be someone I feel would be an asset to the team. Sadly, I often have more tapes than openings. Perhaps people think I'm swine because I can't get back to everyone, but when some weeks I get 50 unsolicited tapes (some of which are very good), and I have nothing available, I don't know what to say. I try to answer via a phone call or a letter every tape I get, but being on the road a lot, it just isn't always possible. Believe me, Dan, you WILL get another job, and please don't give up or get bitter. The industry can be very unfair sometimes and I could tell you stories (it even happens to consultants-- there are many stations whose ratings I raised dramatically and my reward was that I was fired-- "we're doing fine now, so we don't need you anymore". I find a sense of humour and a refusal to give up are valuable qualities for a radio person to have. I wish you well. donna h

Clarke PXY (clarkepxy@aol.com) wrote:
: On 25 Feb 1996, talk1370@aol.com (Talk1370) wrote:

: As the Operations Manager of WVOR, let me say that any such discussions at
: this point are premature, speculative, and, in a public forum,
: disrespectful of the people who have just gone through a sale, and are
: probably waiting to see what happens next. When the Lincoln Group bought
: WPXY, a decision was made to move WPXY and WVOR apart musically. It is
: possible that ARS may make an identical decision vis-a-vis WVOR and WRMM.
: Only time will tell.

Such a change does often occurr, a similar situation occurred in the
Binghamton, NY area where AC station WMXW-FM and AC WMRV-AM-FM were
bought by Enterprise Media. Of this deal, WMRV-AM went to an all talk
format, and WMRV-FM began a Top-40 format while `MXW retained it's AC
format. The test of time is the key, this change came about 3 months
after the actaual transaction and 6 months after the announcement.

: However, WVOR has tremendous heritage in its call letters and format. It
: would be unwise for ARS to cast this aside without serious consideration.
: For ARS to divest itself of WVOR and purchase WNVE would make no sense,
: since WNVE has serious signal deficiencies. I would point out that WNVE
: is in a Joint Sales Agreement with ARS, not owned by them, and any
: transfer of the Nerve's format to WVOR would probably raise legal
: questions of ownership control.

WVOR pulls lower numbers in the arbitrons then `NVE although it has
become a consistant station where people have become loyal to over the
years such as WHAM. It is a tough situation to predict the outcome for
both the public and those involved in the transaction. I would imagine
some format adjustments betweem WVOR and/or WRMM to diversify their
demographics. We'll just wait and see.

2607. Is KSDO/KKBH for $ale??????

Newsgroup: rec.radio.broadcasting
Date: 1996-03-14 00:00:00 UTC
From: San Diego Radio Watcher! <sdradio@znet.com>
Message-ID: <4i7p7d$iir@vixen.cso.uiuc.edu>
Source record: 24994

Dateline San Diego, California . . . this report compiled from independent sources deemed reliable.

The San Diego Radio Watcher has learned that "a strong possiblity" of new owners of News/Talk 1130, KSDO, and San Diego's Beach, KKBH.

What has been reported in "Inside Radio," is lookin more "true:" The Gannett Corporation might be selling its string of stations for an undisclosed sum. The name mentioned most is Jacor, the new mega-giant in the hemisphere.

Four days of talks last week was to lead to an announcement on Monday; but as of press time Tuesday, no official word was announced. However, reports e.mail to me indicate that the agreement and annoucement could come "by Friday."

It's been no secret that Nobel radio, was looking for a "quality" AM station in the county. KSDO, is a 10kw DA-II. It does suffer in the evening time to the north, but has a solid signal from the site in Santee/El Cajon covering the SD metro area.

Station officials would not comment on these reports; one staffer saying that the "parent company" put the word out that there is no deal. However, other reports outside of the market to me indicate that Gannett is "looking at a possibility" of either selling -- or pursuing. It is, however, in some opionion, that the mega-giant Gannett wants to be may have past with the recent flury of mergers and buys by three companies: Jacor, Clear Channel, and Nationwide. Also mentioned was SFX, locally owners for KyXy, and Rock Mix 103 [KMKX].

[It's also my view that the FCC has secretly changed to the "Federal Cash Commission, but I'll stop further editorial comments!]

More news as it happens . . . . .

2608. Re: Questions on buying an AM station

Newsgroup: rec.radio.broadcasting
Date: 1996-03-14 00:00:00 UTC
From: Fred Weinberg <fred@ktrt.com>
Message-ID: <4i7p7d$ij3@vixen.cso.uiuc.edu>
Source record: 24995

1) You don't. It doesn't matter.
2) Whatever you can get it for (and don't be afraid of an off-the-air daytimer. Most money is booked between 6a-6p anyway)
3) There is always a future for a mass medium and everybody has an am receiver.

Don't be a whiner like so many readers of this newsgroup. Be a doer. There are over 130 stations off the air. there's a start.

The Federal Censorship Commission

inside job at a big city library

library content:
fundamentalists v. the First Amendment

artist's rights:
multinationals, judge v. the First Amendment

upcoming Ray Bradbury interview

Internet censorship, V-chip mess:
John Frohnmeyer speaks at Carthage College

WHAT TV COLUMNISTS HAVE NOT TOLD READERS...

In January 1996, the US Supreme Court declined to hear a challenge to the FCC's antiindecency scheme. In effect, the refusal upheld the FCC's newly-expanded 6:00 AM-to-10:00 PM "unsafe harbor" period.

One week later, the Supremes again damaged the First Amendment. This time, they refused to hear a challenge to the FCC's censor-'em-by-finin'-'em-and-let's-drag-our-feet-for-a-long-time process.

First Amendment defenders tried to complain that the FCC's process is too lengthy. Some cases have moved through the Commission for years, with no quick decisions.

Both Supreme Court events restrict the First Amendment rights of:

* anyone who appears on broadcast TV or radio
* the First Amendment rights of anyone who creates broadcast content
* the First Amendment rights of broadcasters
* the First Amendment rights of viewers and listeners

Readers should note that the broadcasting industry constructs the issue as a violation of the rights of the third group listed above.

Here's what's going on.

PR tricksters representing stations, group owners, and state and national broadcasting associations routinely exclude the first, second, and fourth categories in statements to reporters.
Sadly, this narrow, distorted view is then diffused as the complete truth (see the "omission" section of Professor Hugh Rank's "Schema for Propaganda Analysis") in news reports by TV and radio stations. (Why should a journalist risk her career by publicly contradicting a PR functionary who is also a coworker and is usually closer to--or is--management?)

What about the fourth entry? Fact: citizens are not without a First Amendment right to receive communications, the January decisions notwithstanding. That part of the 8-0 1969 Red Lion precedent has never been overturned.

Who's been fined for providing indecent (whatever that means) content to receiver users? Infinity Broadcasting, America's largest group owner of radio outlets, is one victim. In September of 1995, Infinity, Howard Stern's employer, paid a frightening $1.7 million to the US government. In one instance, Stern's employer was fined for speech that included the following sentence:

(begin excerpt)

Here's a guy who plays the piano with his penis.

(end excerpt)

Another fine was for:

(begin excerpt)

There's a big black lesbian out of her mind with lust.

(end excerpt)

Note that neither sentence included any of the words from George Carlin's proverbial seven words list. (A common error made by journalists--especially media workers not employed at

national outlets--is reporting that the FCC's antiindecency rules are confined to punishment of the words shit, piss, fuck, cunt, cocksucker, motherfucker, and tits. False.) In fact, as indicated in the previous paragraph, Infinity Broadcasting was fined for speech that merely included the words black, lesbian, and lust.

An attorney for the National Association of Broadcasters (NAB) was quoted in the 15 January 1996 ish of _Broadcasting & Cable_:

(begin excerpt)

the two decisions "leave us with a very vague definition of indecency and a great deal of discretion with the commission."

(end excerpt)

INSIDE STORY

The FCC's definition of indecency suffers from vagueness and overbreadth. It fails to present anyone with a clear dividing line between what's allowed and what's disallowed. As such, it is inherently subjective.

Alert readers have noted that these same flaws are present in every let's-censor-arts-and-entertainment proposal. The task of crafting a definition of what would be disallowed without inclusion of vagueness and overbreadth is impossible. These twin deficiencies are inherent in any proposed or preexisting scheme involving "violent" content, obscene content, indecent content, and government-coerced labels (including Ed Markey's V-chip mess signed into law this year by President Clinton as part of the historic telecommunications act).

SOLUTION

The solution to all of this is simple. The US Supreme Court, in a future ruling, should overturn the 1978 FCC v. Pacifica Foundation precedent. The High Court should declare that indecency is centrally protected under the First Amendment.

Such a decision need not address obscenity. It could include two supporting declarations. First, the Court could recognize that citizens have sufficient means of avoiding indecent broadcast content. Second, the Supreme Court could forcefully add that captive audience scenarios can be disallowed. That is to say, it's constitutional for the government to pass laws that disallow a citizen or any entity (private or governmental) from forcing an unwilling citizen to read, view, or listen to unwanted media content. (Of course, this would undermine, quite properly, the disastrous 1990 Rust v. Sullivan precedent and a proposed state antiabortion law now being debated in Madison WI. It might also strengthen the rights of teenagers forced to attend indoctrination sessions at churches.)

The good news is that this would require only five votes. The bad news is that such an outcome is highly unlikely, given the disturbing number of rightists on the High Court.

* * *

IN OLD MILWAUKEE

In early March 1996, a few part-time employees of Milwaukee's central library were caught stealing approximately 800 items. The employees were all under age 21. All were promptly fired.

The 800 items included books, CD's, and videocassettes, and were found at area residences. Censorship was apparently not a motivation in any of the heists. Local media outlets reported that the ex-staffers were expected to face fines from the local government.

Thanks to the Milwaukee police and library professionals, the missing content will be returned to library shelves.

* * *

FLIRTING WITH CENSORSHIP?
CONSEQUENCES...

Like many major American cities, Milwaukee has any number of fundamentalists angered by words like carbon dating, condoms, contraception, and cockawee. Sadly, the Religious Right is not alone. Procensorship sentiment eminates from many parts of the political spectrum. Nevertheless, a disproportionate number of demands for censorship are issued from the right portion of the political spectrum. Especially from conservative religious leaders.

----------CUT HERE----------

This is a warning to any self-appointed community censors. You will be nailed for defacing, destroying, or stealing any book shelved at the Milwaukee Central Library on Wisconsin Avenue.

You may not like certain ideas, words, images, and sounds.
But it is arrogant of you to even attempt to deny Milwaukeeans the right to read, view, or listen to constitutionally-protected content through legal or illegal means.

Here is what you will face if you aren't civilized enough to refrain from breaking the law.

There is a municipal ordinance, 110-15,
titled "Vandalism." Deface a library book and you could be fined up to $500. If you fail to pay, you could face up to 60 days in jail. And there's municipal ordinance 106.21: "Unlawful Library Acts." This ordinance disallows unlawful use of a library card, failure to return library materials, theft of library materials, fraudulant registration for a library card, and unauthorized alteration of ID markings on library materials such as books, CD's, periodicals, and paintings.

MULTINATIONALS AND MIRIAM CEDARBAUM
SPREAD NONSENSE, ATTACK
FIRST AMENDMENT

Below, a press release received on 5 March 1996 from an artist's rights group.

(begin excerpt)

For immediate release:

Big Business v. Art:
City's Business Improvement Districts
Claim Sidewalk Art Sales Offend Their
Quality of Life

On Wednesday 2/28/96 six of New York's City's most powerful business associations filed a brief attempting to convince a Federal Appeals Court that artists have no First Amendment right to sell their paintings in parks and on public streets. The amicus brief was filed on behalf of The Fifth Avenue Association, The Alliance for Downtown New York, The Grand Central Partnership, The 34th Street Partnership the Madison Avenue Business Improvement District and The SoHo Alliance.

The business associations' brief characterizes the artist/plaintiffs as, "...purveyors of arts and crafts..." despite them being accomplished painters with works in many private collections and compares sidewalk displays of fine art generally with, "...graffiti, litter and petty street crime...". "First Amendment protection should not depend on whether the merchandise can, by some stretch of the imagination, be characterized as art or an art form," it concludes.

This exposes a developing conflict between the arts communities commitment to free expression, and the business communities interest in banning independent artistic expression from public spaces. The brief claims that art has only incidental expressive content and that selling art, as compared to selling books, is not protected by the First Amendment at all.

Using Jackson Pollock as an example, the brief states, "While Pollock's right to create his art is virtually absolute under the First Amendment, his right to market, sell or distribute his art must be subject to reasonable regulation for the public health and

welfare", and further states, "An artists' freedom of expression is not compromised by regulating his ability to merchandise his artwork." This view directly contradicts Supreme Court and Appellate precedents concerning visual expression and its sale, beginning in 1952 with Joseph Burstyn Inc. v. Wilson 343 U.S. 495. "That books newspapers and magazines are published and sold for profit does not prevent them from being a form of expression whose liberty is safeguarded by the First Amendment. We fail to see why operation for profit should have any different effect in the case of motion pictures."

Printed matter, including baseball cards, art books and pornographic magazines may be sold on New York City streets without a license, based on a First Amendment licensing exemption in the N.Y.C. Vending Ordinance. The brief takes the position that visual art has less meaningful content, less communicative value and therefore less constitutional protection than the written word. Statements in the brief such as, "The sale of printed material is inseparably and characteristically intertwined with informative speech [or] particular views...the sale of artwork is not." and, "...the sale of paintings and other artwork does not reach this high level of expression (guaranteeing First Amendment protection) even though the items sold may have something of the personality of their creators", will come as a surprise to New York's 100,000 artists, world famous art museums and 500 art galleries.

In their appeal motion filed on 12/29/95 [Lederman v. City of New York 94 CIV. 7216 (MGC)], artists claimed Federal Judge Miriam Cedarbaum's 10/24/95 ruling denying them First Amendment protection, contradicted 50 years of Supreme Court precedents concerning visual expression's First Amendment status. In her controversial ruling Judge Cedarbaum wrote, "...art is farther from the core than the written word...plaintiffs' art does not carry either words or the particularized social and political messages upon which the First Amendment places special value...".

The artists' appeal motion, filed on 12/29/95, was supported by amicus briefs filed by The Museum of Modern Art, the Whitney Museum, the ACLU, the NYCLU, Volunteer Lawyers for the Arts, The College Arts Association, the N.Y.C. Arts Coalition, the N.Y. Foundation for the Arts, SoHo art dealer Ron Feldman art critics Irving Sandler and Simon Schama and

artists Clae Oldenburg, Chuck Close, Jenny Holzer, Hans Hackke and David Hammons. David Ross, the Director of the Whitney Museum of American Art, stated in connection with this lawsuit, "We stand firmly behind the idea that art is equal to other forms of expression and is as protected as speech".

Since 1993, more than 250 fine artists (painters, photographers, printmakers and sculptors) have been arrested and have had their art confiscated by the police while displaying it on New York city streets. To date, the City has not prosecuted a single criminal case against a street artist. Confiscated art is destroyed or sold at a monthly NYPD auction.

For information: contact A.R.T.I.S.T. (Artists' Response To Illegal State Tactics) at (718) 369-2111. E-mail ARTISTpres@aol.com or visit our web site at: http://homepage.interaccess.com/~mar/nyc.html Photos and videos of artists being arrested and A.R.T.I.S.T. demonstrations are available. Recent articles on this issue include: N.Y. Times letters to the editor 2/23/96 and 2/28/96; N.Y. Times 1/24/96 B1 "Street Art; Free Speech Or Just Stuff" and Christian Science Monitor 2/14/96 pg. 11, "Conflict On the Streets: Artists v. N.Y.C."

(end excerpt)
* * *

COMING TO NEWSSTANDS

The May issue of _PLAYBOY_ will include Ken Kelley's interview with Ray Bradbury, author of _Fahrenheit 451_. Bradbury's novel is perhaps the most prominent anticensorship book of any kind.

In 1966, _Fahrenheit 451_ was made into a major motion picture. Francois Truffaut and cinematographer Nicholas Roeg lensed the evocative, dreamlike film in Europe. Although the film is available on 12-inch laserdisc and VHS, no widescreen versions are available to consumers.

Fahrenheit 451 is the temperature at which paper catches fire and burns. _Fahrenheit 451_ was based on a 1950 short story titled "The Fireman." That story appeared in _Galaxy Science Fiction_. Bradbury's literary classic depicts a dystopia where firemen burn books and citizens are distracted by gadgetry, hobbies, and an antipolitics mood.

Ray Bradbury grew up in Waukegan IL.

* * *

JOHN FROHNMAYER APPEARS AT CARTHAGE COLLEGE

Former National Endowment for the Arts (NEA) chairman John Frohnmayer just completed a three-day visit to Carthage College. Frohnmayer spoke out against censorship while at the scenic campus, located on Lake Michigan in Kenosha WI. The First Amendment defender's _Out of Tune: Listening to the First Amendment_ was recently published.

>From Michael Burke's article on the 5 March 1996 _Journal Times_:

(begin excerpt)

I went in as a First Amendment moderate and came out as a First Amendment radical.

(content deleted)

After I tried to play it up the middle and got shot by both sides.

(end excerpt)

John Frohnmayer also criticized the V-chip provision of the new telecommunications law.

(begin excerpt)

If you're worried about violence, how do you show a documentary about the Battle of Antietam? ... What rating does it get?

And there could be no nudity, but tremendous degradation. How do you rate that?

(content deleted)

I think we're in an era of great danger to the notion of free expression.

(end excerpt)

Below, excerpts from Bill Guida's article in the 6 March 1996 _Kenosha News_:

(begin excerpt)

Because the Internet is powerful is not a reason to license or restrain it. It is an opportunity for the exercise of democracy.

(content deleted)

Not every problem in our society is susceptible to a legal solution.

(content deleted)

Ethics, that is, principles of self-control and self-determination, are a part of what makes our society function and function well.

(content deleted)

Congress has once again fallen into the irresistable trap of analyzing the technology, rather than the underlying principle of the United

States, which is that we protect the ability to communicate--no matter what the form of communication.

(content deleted)

That is really the genius of American society. That we can use speech to counter speech. That we use speech to move forward the community of understanding that allows us to be cohesive as a society.

(end excerpt)

I am developing a part-time career in radio at 50, interning 2 hours a week at a small time country music station about 45 miles from where I live. I am a Canadian government employee who briefly worked in radio at 18, but always enjoyed it and all times of verbal communication. I also to sharpen my skills am an obituary reader on a touchline service for the Canadian National Institute for the Blind and read nationally for the visually impaired on Voiceprint which is the National Broadcast Readers Service in Canada for the visually impaired.

You can do anything you want in life if you are positive, enthusiastic and stop listening to the naysayers who will always be there to tell you what you can't do. It's not have far you get in life (i.e. we might not all reach the stature of Peter Jennings on ABC, a local person from my area) but enjoy the journey

Thank you

Erwin Frazer

Okay.... ready, kids????

WAXQ sold today for $90 million. Vinnie Marino (MD) to head out to Buffalo to their modern rock outlet. (Hell... had I known it was only $90 million, perhaps I could have made a deal.... yah.)

Andy Shane (Z100) to WKTU.

Stu Kingston to WXRK (KRock)

It'll be interesting to see how Mr. Kingston and Mr. Stern get along. It won't be long until Mr. Muller, aka Mancow, is in town, either. That NY Times report that the state of radio in New York is sorry is getting more and more reason to be, perhaps, recanted!!!!!!

2615. New England Radio Watcher 3/14

Newsgroup: rec.radio.broadcasting
Date: 1996-03-16 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <4idksb$9gq@vixen.cso.uiuc.edu>
Source record: 24881

*The mega-opolizing continues in northern New England. Saga Communications has agreed to pay $10 million for Ocean Coast Properties' WPOR AM-FM. The AM is a 1kw fulltimer on 1490, the FM is a full B on 101.9, and they simulcast country except when the AM breaks away for local sports play-by-play. Saga already owns news-talk WGAN 560, hot talk WZAN 970, classic rock WMGX 93.1, and oldies WYNZ 100.9 in the Portland market, so this deal makes it far and away the dominant owner up there. Only Fuller-Jeffrey comes close, with modern rock WCYY 94.3/WCYI 93.9, AOR (and blowtorch grandfathered-100kw) WBLM 102.9, and pending acquisition of hot AC WZPK 103.7.

*A few new sets of calls: WBLQ 99.3 on Block Island RI has applied for WERI-FM, to match the calls of new owner Philip Urso's WERI 1230 in nearby Westerly RI. Urso's southern-RI holdings now include WERI, WERI-FM, Newport's WADK 1540 (which is not off the air, despite reports to that effect in one hobby periodical) and WOTB 100.3, and modern-rocker WDGE 99.7 Wakefield-Peace Dale, which is a Providence rimshotter. Meanwhile up in southern Vermont, the WSSH calls that recently vanished from the Boston area have reappeared, on the CP for 101.5 Marlboro VT (formerly WAIG). This station looks like it might actually be on the air soon; it's applied for a slight power increase as well.

*More from FCC-land: It may be a while longer before Boston's WBCS makes the move from the "FM128" tower in Newton to the Prudential Tower in Boston's Back Bay. WBCS has applied for an extension of time on its CP to move to the 22.5kw, 735' AAT facilities there. WJMN 94.5 has a similar CP, as yet unbuilt. Providence's WALE 990 wants a replacement for its expired CP to change city of license to Greenville (a wide frost heave in the road somewhere in northwest Rhode Island) and increase to 5kw at night. Light of Life Ministries has applied for 95.3 up in Winslow, Maine, replacing a never-built CP for a WJBI, which expired in 1993. And the Green Mountain Education Fellowship wants 88.7 in East Berkshire, VT. On the translator front, the Monroe Board of Education in Connecticut wants to expand further east. It's applied for both 88.1 and 94.5 in New London for translators of its fine-arts network, based at WMNR 88.1 Monroe and also heard on WGSK 90.1 South Kent, WRXC 90.1 Shelton, and WGRS 91.5 Guilford. No apps this week for New England translators for WPCS, KAWZ, or the other pests.

*A few more station sales: WHOU-FM in Houlton ME, a class a on 100.1, goes from a bankruptcy trustee to local County Communications for $31,500. WHOU had been co-owned with dark

WTOX 1450 and WHMX 105.7 Lincoln. And Biddeford, Maine's WIDE 1400 goes from Witham-Rhodes Communications to Saco Bay Communications group for $80K.

*And finally, Cape Cod's WCIB 101.9 Falmouth has shifted direction slightly, keeping its AC playlist but turning off "Lite 102" in favor of "Cool 102 FM."

> --gregbo

Certainly possible, though the last I heard, Glenn Boychuck and KSAN were
happy with each other. The "Top 5" reference narrows it...no country station
in NYC to go to....KZLA in Los Angeles is also Chancellor and home of
their former GM, J.D. Freeman, so that's within the realm of reason...KSAN...
whoever's doing country in Philly....and Chicago.
Smart money here in Phoenix is that it is, in fact, the former WLS-FM(Kicks 106).

Beware the Ides of March, intrepid Airwavers...its the D.C.R.W., with the top of the radio biz news from the Nation's Capital for this week...

Item First -- "...one of the *great* athlethic supporters of all time..." -- The Washington Post "On the Dial" (radio) column reports that WTEM-AM (570), Washington's all-sports station, has renewed Don Imus' syndication contract for another 3 years. The Post says the station will pay $500,000/year for the morning show, a raise of $100,000/year. (Imus' show originates from WFAN-AM (660) in New York). Imus has been getting lots of other publicity of late, appearing recently on CNN's "Larry King Live", and sitting with Mike Wallace of CBS for a future segment on "60 Minutes". And this March 21st, Imus is expected to be the featured speaker, along with President Clinton, at the annual White House Radio & TV Correspondents Dinner here in Washington.

Elsewhere, WTEM has also renewed for another three years the contract of Post sports columnist Tony Kornheiser, whose 10am-1pm show is also repeated on tape between 4pm and 7pm. The Post reports that former WUSA-TV sportscaster Warner Wolf, now a journalism professor at American University in Washington, occasionally fills in for Kornheiser, apparently when he's on deadline for his Post sports column.

Item Second -- Pull the plug -- The Post says that ABC o&o WMAL-AM (630) is citing poor ratings for the station's decision to cancel "Evening", a one-hour news magazine. The program has been hosted by Chris Core, who also co-hosts more conventional talk fare with Bill Trumbull and Brooke Stevens . The show's been part of 'MAL's lineup for about 6 1/2 years. The hour will become part of the Trumbull/Core/Stevens show.

Item Third -- Taking a Hike -- Diana Silman, producer of the sundicated "Don (Geronimo) & Mike (O'Meara)" show over the past 9 years last weekend abruptly called it quits. The Post says she's been with the show for more than 9 years, starting as an assistant. She says she had no problems working with the guys, and says leaving was strictly her decision. She is looking for a producer's job in local tv or radio. They can be heard in D.C. on WJFK-FM (106.7), and in Baltimore on WJFK-AM.

Item Fourth -- On the Tube -- Here's an item, e-mailed by Airwaver and morning man at 70's "oldies" XTRA-104 (WXTR-FM/WXVR-FM) Wes Johnson [wildwesxtr@aol.com (WildWesXTR)]:

>>Hey Max! Just wanted to let you know that I'll be appearing on the March
>>15th episode of Unsolved Mysteries as a man who sees a Ghost in
>>Gettysburg. Even though I anticipate it being horrid (the fake beard will
>>be the worst) I still wish my Dad were around to see it.

>>Check it out, and let me know how bad the beard is :-)

We'll do it, Wes, we'll do it! You gotta wonder, tho, if Wes tried it out on partner Marilyn Thompson at some point... <g>

Item Fifth -- We Stand Corrected -- As already posted on Airwaves, but worth repeating for the sake of accuracy...from our friend, Tom Taylor <totaylor@delphi.com>:

> New WTOP GM spells his name"SWENSON." Not "swinson." Very promising >hire for 'TOP. (BTW: Anybody else hear rumors of a country challenger to >WMZQ?) Tom Taylor/Inside Radio

Thanks, Tom. Nope, the ol' ear to the ground has heard nada about a new country challenger to WMZQ. Closest thing right now to competition for 'MZQ are either rimshots from Fredrick, Md. (WFRE-FM), or Baltimore's WPOC. Oh, and there's rock-flavored country at "Thunder 107.7", a Northern Va. rimshot. If anything ends up happening in this regard, my guess is that it will be yet another rimshot, maybe a big group putting two suburban rimshots with decent signals into the metro together to try to "flank" WMZQ...similar to what Liberty did with WXTR (a southern Maryland rimshot from Charles County), and the former WZYQ, now WXVR, which covers Fredrick County, and northern Montgomery County, Md.

Finally, a "tip" of the ol' dipole to WRQX-FM ('Mix 107.3") morning guy Bert Weiss, D.C. area news guy Ron Rubin, and Matt Anthony, former WARW-FM ("Arrow 94.7") jock, now in Akron, Ohio for dropping us a line! And many, many thanks to the good folks at "440 Satisfaction" on the Internet's WorldWideWeb (http://www.440int.com) for posting my job-wanted item recently. If you haven't checked it out, do so! (They even included the URL for the RealAudio version of the story I recently did!)

More next week!

Cheers,

BZ>I've heard that you can't do more than 4 songs, or parts thereof.
BZ>It's apparently a copyright issue, with the mix becoming "your"
BZ>work at that point, and subject to infringment.

BZ>I'd like to argue that an album (side) is a single piece of work--
BZ>Sometime I'd like to play the entire uninterrupted "Dakr Side of
BZ>The Moon"
BZ>but I'll probably have to find room for a couple of drop ID's...

BZ>[Moderator's Note: IS this true? It seems ridiculous, but that
BZ>makes it seem more potentially true. What about dance mixes? Anyone
BZ>have authorative answer to this? Bill]

I've never heard of such a thing! The closest might be a record company's objection to a station playing a complete album that allows listeners to tape it. Still, there's no legal prohibition that I know of.

This is a sticky area with the FCC. (We were admonished once for doing a remote at a bookstore where a local author was signing -- for saying "We'd love to see you". This was interperted as a call to action. (And we did not receive any compensation from the store owner -- we were, in the eyes of mgmt, covering it from a news angle.) The FCC cited that, in the future, we MIGHT take underwriting from the biz, and therefore, there was a nexus, and therefore illegal.

The real crux of the issue is whether someone in your audience (i.e., another broadcaster -- noncomm or otherwise) or merchant will "drop the dime" on the Feds.

It took me more than a year & about 30 hours of attorney time to resolve the issue with the commission. Caveat Broadcaster!

2620. Transmitter Engineer wanted

Newsgroup: rec.radio.broadcasting
Date: 1996-03-16 00:00:00 UTC
From: gene_heskett@wvlink.mpl.com
Message-ID: <4idku2$9ig@vixen.cso.uiuc.edu>
Source record: 24886
Cross-posted to: rec.radio.broadcasting,sci.engr.television.broadcast

Help Wanted, television transmitter operator/engineer.

This position would be a good one for an older broadcast engineer/operator who is looking for a place to stay a while, like till retirement or ?? A "GOM" in the business.

This is a semi-rural area, our city of license being Weston WV, with approximately 120,000 in our grade B contour. If you like to watch deer and other wildlife out your window, this is the area for you. It is a bit "hilly", so much so that we do occasionally brag about West Virginia being bigger than Texas if it was all stomped out flat, one fellow I know says that out of his 160 acres, he farms both sides of 3 or 4 of them, and hopes the tax assessor doesn't catch on.

Yeah, sure :-)

WDTV is now in its 37th year of operation, and is a CBS affiliate of long standing. We are on channel 5 at 100k ERP. We are usually #1 in a 3 station market, the second station being an NBC outlet on channel 12, and the third being a religious UHF. We must be easy to work for as we still have one of our original employees. Quite a few are over the 10 year mark, which I think speaks highly of our stability.

Applicant should be familiar with older tv transmitters such as our elderly GE TT-40/TF-3A with its water cooled finals. This site is *still* manned during operating hours, not remote controlled. This means the position would involve about 3 duty shifts a week of approximately 10.5-11 hrs/day, and one "tour the place with a sideband analyzer, tube tester and a grease gun" overnighter per week. My current staff runs in 2 groups of 2, with one group doing Sunday-Wednesday morning and the second from Wednesday afternoon-Saturday night.

Our current broadcast day is from about (for the working people) 5:15 am to anyplace after 12:30 am as determined by programming for that day, and our present staff splits this up into a 2 shift/day schedule that seems to have everybody but our one "part timer" doing right at or slightly more than 40 hrs. We do a bit of delay recording there from a satellite in addition to the meter and scope watching normally associated with a position of this type. It helps break the boredom.

Applicant should have a current lifetime FCC ticket, hopefully derived from grandfathering an FCC 1st Class from 20+ years back. A C.E.T. registration would be a definite plus also.

We are located in north central West Virginia, with studios located at 5 Television Drive, Bridgeport WV, and transmit from Fisher Hill, 16.5 air miles south of Bridgeport, all on interstate or state paved roads to the last 1/2+ mile up the hill. A company furnished, fueled and maintained 4WD vehicle is there for reduced wear and tear on personal vehicles. Interstate 79 runs thru here, and connects to I-80 2 hours north, and I-64 2 hours south, just in case you just have to "get outta Dodge" for the weekend.

We rather euphamisticly call the hill "Television Park" in our signon/signoff video because we try to keep about 3 acres of the site mowed and neat. A 16 hp Gravely tracter/mower becomes part of the "job description", alltho you won't be responsible for all of it, the rest of the staff also helps with weed eating and other trimming as required. Another member of the staff there does most of the maintainance on the tractor.

We are, of course, an EOE. I have been so all my working life of nearly 50 years. If you can do the job is what counts with me. However, I am not fluent in languages other than english.

One other comment. I am not the least allergic to a drink when offered at the *right* time and place. However, I will not long tolerate someone who abuses it to the point of effecting their job performance or their drivers license.

This position became open quite suddenly with the death of a 30 year employee who was also a commercial/instructor rated pilot in a plane crash this past Monday, 10 March 1996. Cause is as yet unk.

If you would like to see if these shoes "fit you", email me at the address in the tag, or call 304-623-5555, preferably afternoons. You could also send a resume to:

Gene Heskett, CE
WDTV
P.O.Box 480
Bridgeport WV 26330

I haven't mentioned dollars because what I can offer will depend on the individual, his qualifications and history.

Lets talk!

/* Gene Heskett | These opinions are NOT to be */
/* CE @ WDTV Weston/Clarksburg WV | confused with the official */
/* <gene_heskett@wvlink.mpl.com> | WDTV managment views */

Message-ID: <4idkt9$9hu@vixen.cso.uiuc.edu>
Source record: 24887

In article <4i37uk$lbu@vixen.cso.uiuc.edu> Tony Calguire <calguire@freenet.msp.mn.us> writes:
>After that, it's a blur. They spent most of their time simulcasting FM.
>Didn't they run that satellite-delivered heavy metal format for a while?
>(I think it was called "Z-Rock?) Or am I thinking of 980 AM?

Z-Rock was on 950 for a while (as KZOW) before they became the Business Radio Network. Z-Rock moved to KMZZ-980 and stayed there until a year after sister station 93X (now The Edge) was started with a Hard Rock format.

>Incidentally, I've heard from a friend of mine who says that people he> knows are actually listening to and liking the satellite-delivered>"Solid-Gold Soul" that 950 AM is currently running. I find it hard to>believe that twenty-somethings in 1996 are listening to AM radio! Perhaps>there's hope yet for AM.

It seems to be popular in the alternative newspapers. I like it but I wish it wasn't satellite driven most of the time.

2622. ISDN rate comparisons

Newsgroup: rec.radio.broadcasting
Date: 1996-03-16 00:00:00 UTC
From: Marty Kuhrt <marty@symark.com>
Message-ID: <4idkst$9hg@vixen.cso.uiuc.edu>
Source record: 24888

Hi,

I just recently received this ISDN rate comparison summary. Having seen
the posts in RRB about ISDN rates I thought your 'listeners' might be
interested.

This might be a bit large for posting, so I leave it up to your discretion
as to what to do with it. You might just want to post a pointer to the
URL (if the information is posted there, I don't know, I haven't looked).

Regards,
Marty

Selected ISDN Tariffs

Version 1.0
March 8, 1996
James Love, Consumer Project on Technology [1]
http://www.essential.org/cpt
love@tap.org / 202/387-8030

Executive Summary

This is a list of selected residential ISDN tariffs. It is not
complete, and we will expand and update the list from time to
time. The list compares tariffs among various local exchange
telephone companies, based upon a purchase of 100 hours of 2B + D
service, or a line which is in service full time, such as would
be used for a Web server.[2] The full time connection is
referred to as a "nailed down" line. Future enhancements will
include more states, an executive summary of installation and
distance charges, and a little fine tuning of the results.
Comments or corrections are welcome. Here are the results:

Company/State 100 hours 2B+D Nailed Down

Michigan

Installation fee $122

Distance Charges For homes more than 3 miles from the local telephone exchange office location, there is a repeater charge of $20.25 per month.

Fixed Monthly fee $33.51.

Usage Charges After the first 50 calls, a charge of 6.2 cents per call.

Cost to Consumer [2]

100 Hours of 2B+D $36.61
Nailed Down Line $33.51

Ohio

Installation fee $116.50

Distance Charges For homes more than 3 miles from the local telephone exchange office location, there is a repeater charge of $26.00 per month.

Fixed Monthly fee $26.00

Usage Charges None.

Cost to Consumer [2]

100 Hours of 2B+D $26.00
Nailed Down Line $26.00

Wisconsin

Installation fee $113.05

Distance Charges For homes more than 3 miles from the local telephone exchange office location, there is a repeater charge of $20.75 per month.

Fixed Monthly fee $30.90

Usage Charges No per minute charges. Usage charges based upon number of calls:

1-60 6 cents
61- 90 5
151-300 4
301-400 3

401-1200 2
>1200 5

Cost to Consumer [2]

100 Hours of 2B+D $36.56
Nailed Down Line $30.90

Illinois

Installation fee $113.05

Distance Charges For homes more than 3 miles from the local telephone exchange office location, there is a repeater charge of $22.50 per month.

Fixed Monthly fee $28.05 to $34.50, depending upon area of state.

Usage Charges Within local area, no per minute charges. Each call is 5 cents. For distances greater than 8 miles per minute charges apply.

Cost to Consumer [2]

100 Hours of 2B+D $33.05 to $39.50
Nailed Down Line $28.05 to $34.50

Indiana

Installation fee $127.00

Distance Charges For homes more than 3 miles from the local telephone exchange office location, there is a repeater charge of $22.50 per month.

Fixed Monthly fee $94.83

Usage Charges Per minute charges apply. Nine cents for first ten minutes and 9 cents for each additional 5 minutes, per channel.

Cost to Consumer [2]

100 Hours of 2B+D $94.83 + $220 = 314.83
Nailed Down Line $94.83 + $1,733.76 = $1,828.59

PacBell

1-800-4PB-ISDN
http://www.pacbell.com
http://www.pacbell.com/Products/SDS-ISDN/sds-isdn.htm

California

Installation $34.75 for conversion of POTS line, plus
$125 for a new line. Under current
tariff, PacBell waves installation fees
with 24 month service commitment. Under
proposed tariff, the $125 new line
charge will no longer be waived.

Fixed Monthly fee $24.50 per month.

Usage Charges Under present tariff, PacBell meters
usage from 8 am to 5 pm weekdays, at
3.33 cents for first minute and 1.05
cents for each additional minute. These
charges are per B channel. Usage after
5 pm on weekdays and on weekends is
unmetered.

Under proposed new tariff, PacBell seeks
to double additional per minute charge
in prime time, to 2.1 cents per minute,
and to impose a per minute charge of
2.33 cents for first minute and 1.46
cents for additional minutes from 5 pm
to 11 pm, and 1.33 cents for first
minute and .84 cents per additional
minute for late night and on weekends.
These charges are per B channel. There
will be a 20 hour allowance for off-peak
usage.

Cost to Consumer [2]

PRESENT TARIFF
100 Hours of 2B+D $24.50 + $39.12 = $ 63.62
Nailed Down Line $24.50 + $243.82 = $ 268.32

PROPOSED TARIFF
100 Hours of 2B+D $24.50 + $179.4 - $30.02 = $ 173.88
Nailed Down Line $24.50 + $1,116.71 - $35.04 = $ 1,106.17

US WEST

Utah

Installation fee $110

Distance Charges Installation where loop is greater than 18
kilofeet (three miles from central office) is
an additional $100.

Fixed Monthly fee There are three options. The fixed monthly fee for the fully metered option is $39 per month. The option that includes 200 hours of B channel use (100 hours of 2B + D) is $68. The flat rate option is $184 per month.

Usage Charges The usage charge is three cents per minute per B channel.

Cost to Consumer [2]

100 Hours of 2B+D $68
Nailed Down Line $184

Oregon

Installation fee $110

Distance Charges

Fixed Monthly fee $69

Usage Charges The first 200 hours of B channel use (or 100 hours of 2B + D) is covered by the $69 fee. Thereafter there will be a charge of three cents per minute per B channel in the local change area, and 5 cents per minute per B channel for calls outside the local exchange boundary.

Cost to Consumer [2]

100 Hours of 2B+D $69
Nailed Down Line $69 + $ 1,880.64 = $1,949.64

SBC - Southwestern Bell

1-800-792-4736
(for Texas, 713-567-4736)
http://www.sbc.com/
http://www.sbc.com/kc/isdncost.html

Kansas and Missouri

Installation fee $457.40 for Kansas and $452.25 for Missouri. SBC will waive $400 of the installation fee with a 24 month committment for service.

Distance Charges

Fixed Monthly fee There are three options. The two metered options include a $57.30 rate with 10 hours included, and a $75.30 option with 80 hours included. The flat rate option is $104.30 per month.

Usage Charges Additonal usage for the 10 hour plan is four
cents per minute. Additional usage for the
80 hour plan is two cents per minute.
According to SBC staff, this rate applies to
2B+D service.

Cost to Consumer [2]

100 Hours of 2B+D $104.30
Nailed Down Line $104.30

Bellsouth

1-800-858-9413
http://www.bellsouth.com

The Bellsouth Web page has some information on tariffs available,
but it was out of date when I checked on March 8, 1996. All
Bellsouth residential ISDN tariffs are flat rate.

Installation Fixed Monthly Charge

Alabama 190 68.60
Florida 190 57.15
Georgia 197.50 63.75
Kentucky 213 60.05
Louisiana 193 71.66
Mississippi 196 65.51
N Carolina 192.75 75.10
S. Carolina 212.50 60.40
Tennessee 41 29.50

Bell Atlantic
http://www.ba.com

Basic Bell Atlantic residential ISDN Tariff for Delaware,
District of Columbia, Maryland, New Jersey, Pennsylvania,
Virginia and West Virginia. In the District of Columbia, the PSC
is considering an Office of People's Counsel (OPC) proposal for a
$32 flat rate tariff, with a $34 fee for installation.

Installation Fee $125

Fixed Monthly fee $19.50 plus local measured service POTS, for
an approximate $30 to $34 per month.

Usage Charges Per minute charges apply. Two cents per B
Channel from 7 am to 7 pm, and one cent per B
channel from 7 pm to 7 am and on weekends.

Notes: The tariff is designed to discourage use,
first by charging by the minute, and then by
basing the charge on the number of B channels
being used. Consumers who can afford this
service will have incentives to use the

service at half its possible speed.

Cost to Consumer [2]

100 Hours of 2B+D $168 usage plus $30 = $198

Nailed Down Line $1,176.48 usage plus $30 =
$1,206.48

NYNEX
http://www.nynex.com
http://www.nynex.com/iixxxpg1.html
1-800-438-4736

New York

Installation fee $225 for new line. Upgrade of POTS line is
$24.05 + 35 = $ 59.05

Distance Charges The service is only available within 18
kilofeet from a central office. If that
central office isn't equipped for ISDN, you
must pay for "Virtual Service." This will
add $75 for a residential installation, plus
a fixed fee of $10 per month.

Fixed Monthly fee $10.10 for POTS plus $14.00 for 2B + D, for a
total of $24.10.

Usage Charges Both per message and per minute charges
apply. The NYNEX "Circuit Switched Data"
charge is one cent per minute per B channel.
Per call charges also apply. The per call
charge is 10.6 per call, with a discount of
40 percent from 9 pm to 11 pm and a discount
of 65 percent from 11 pm to 8 am on weekdays.
On weekends the per call discount is 65
percent, except for 5 pm to 11 pm on Sunday.

Cost to Consumer [2]

100 Hours of 2B+D $24.10 + $9.48 + $120 = $ 153.58
Nailed Down Line $24.10 + $866.88 = $890.98

Massachusetts

Installation fee $67.07

Distance Charges The service is only available within 18
kilofeet from a central office. If that
central office isn't equipped for ISDN, you
must pay for "Virtual Service." This will
add $190 for a residential installation, plus
a fixed fee of $32 per month.

Fixed Monthly fee $14.39 for line charges plus $18 for BRI ISDN, for a total of $32.39.

Usage Charges Voice calls are the same as the local POTS rates. Per minute charges apply for data. For data calls, in the 617 and 508 area codes, it is a one cent per "message" charge, which is applied to each B channel. Usage is also subject to a 1.6 cents per minute per B channel charge. A higher per minute per B channel charge of 5.5 cents per applies to "Zone 2" calls. In the 413 area code, calls are one cent per "message" plus 1.6 cents from 8 am to 5 pm week days and .8 cents in the off peak hours.

Cost to Consumer [2]

100 Hours of 2B+D Area Codes 617/508
$32.39 + $2 + $192 = $226.39

Area Code 413
$32.39 + $2 + $124.80 = $159.19

Nailed Down Line Area Codes 617/508
$32.39 + $1387.01 = $1,419.40

Area Code 413
$32.39 + $879.26 = $ 911.65

---

[1] Thanks to Janice Shields of the Center for Study of Responsive Law for research on this topic.

[2] The consumer's cost of 100 hours of 2B + D service is based upon the following assumptions. The time online is divided as follows: from 8 am to 5 pm 30 percent, from 5 pm to 7 pm 10 percent, from 7 pm to 11 pm 35 percent and from 11 pm to 7 am and weekends, 25 percent. This works out to 30 percent peak for the PacBell tariff, or 40 percent peak for the Bell Atlantic Tariff. Number of calls is 100. In practice, the number of calls will depend upon the pricing incentives, but generally this isn't a very large number, compared to the cost of the per minute charges.

2623. what to teach kids radio class

Newsgroup: rec.radio.broadcasting
Date: 1996-03-16 00:00:00 UTC
From: Tamera Postles <tpostles@outland.dtcc.edu>
Message-ID: <4idksu$9hh@vixen.cso.uiuc.edu>
Source record: 24889

HELP!

I just agreed (!?) to teach a Kids Kamp radio class this summer - they will be one week courses, from 8:30 to 11:30 am, age range of students 10-15 years [they'll probably be 12/13-year-olds].

Obviously I'm not going to cover an awful lot - not in that time frame or age group. I'd thought a brief history of radio [when, where started, etc.], format types, some hands-on -- enough to record themselves reading news/PSAs and announcing/playing music. Also a touch of news and commercial copywriting [by taking something from the newspaper and rewriting].

Oh, yes -- and a glossary of terms.

Any suggestions - specific or general - are welcome.

>KXBT, Vallejo, CA testing on 1640

Received it at 6:30 p.m., March 13, in Oceanside. The signal does
fade in and out, but is audible.

Also, can still get something at 1660, but nothing to confirm if it's
the east coast making the trans-continental hop.

While the FCC has approved MACAmerica(owners of AC KESZ(99.9) and
my employer, KTVK-TV)'s purchase of KTWC(103.5), escrow hasn't closed yet.
MACAmerica has no intention of continuing KTWC's format(sets
including Luther Vandross, Peter Paul and Mary, Bobby Sherman, Johnny
Cash and The Moody Blues...back to back...in that order...are not uncommon),
but has yet to announce what the new format will be.

I've never encountered such a law. Might have been some BS Jeff got from an over-zealous PD.

On the other hand, it *does* make sense, from a ratings standpoint, to ID your station as often as possible -- you can't drill your call letters into a listener's mind too often. As a PD, my rule would be ... some kind of ID after every two songs.

> Andrew
>
As a broadcast consultant, I typically agree with Andrew. However, in
order to have a detailed picture of service for a station, you will
need a signal propagation study which determines signal attenuation due
to the detailed terrain features of the area. These detailed studies
typically use various propagation models and characteristics (i.e.
knife-edge diffraction, ground cover attenuation) in order to provide
accurate predictions of signal strength in an area.

These detailed studies will typically not be found in the FCC station
file of a station. We provide the studies for aprox. $200 to $500 per
transmitter facility, depending on the desired exhibit size.

Let me know if I can help further.

A couple of notes:

NYC Vet Jim Lowe returned to the airwaves last Sunday at WVNJ. Lowe, for many years at WNEW-AM, will do a weekly show on the nostalgia station in Oakland, NJ. The station will be upping it's power and cover most of the NYC metro area. The station is also trying to come to terms with another ex-WNEW-AMer Ted Brown.

According to sources, Z-100 Program Director Steve Kingston has told the station he will not re-sign when his contract runs out later this month. Rumors are he's headed to K-ROCK.

2632. San Diego Radiio Watcher 3.16.96

Newsgroup: rec.radio.broadcasting
Date: 1996-03-17 00:00:00 UTC
From: San Diego Radio Watcher! <sdradio@znet.com>
Message-ID: <4ig7n4$8d6@vixen.cso.uiuc.edu>
Source record: 24898

Here's the latest from San Diego, the radio home of the 15th market in the U.S.!
3.16.96

**PINK SLIPS: Four people were FIRED from news/talk 1130 KSDO today.
Gone are: Kevin Olias, field reporter; Scott Morrissey, afternoon news
editor; Darrell Fong, board operator and production specialist; and
Linda Zweig, talk show screener and assistant for the Roger Hedgecock
show. The reasons for the cuts: budget.

Also from the Gannett outlet: reports of a sale are apparently NOT TRUE.
Quoting sources, "Jacor started the rumours to shake things up." It did,
as all staff was nervous about the rumored change. However, insiders tell
me that the station manger, Susan Hoffman, was told by Gannett that a sale
was not going to happen.

**KMKX, RockMix 103: This from a seasoned veteran of the station:
"San Diego has a history of stations (102.9, KCBQ, others) changing
formats much too soon in their developement. The numbers for Rock Mix aren't
where management would like--and so they are to be expected to do
research to try and fix things." These crazy times in the radio industry has
everything turning over with the tel-com bill.

**SET 'em UP: KCBQ-AM has a full plate of local sports; and women's basketball
until the change of ownership later this month. See the schedule at:
http://www.kcbq.com/ Plus, get the SETS-FM 105.3 icon before it's too late!

**A CRUMMEY HOST: Excuse me if I mis-type his name, but veteran talk - show
host, Joe Crummey, is filling in for the vacationing Ted Leitner. The fast-
paced show can be heard Monday through Wednesday of next week. He has a reg-
ular gig on LA's KMPC.

**IMUS ALERT: Imus will be featured on an upcoming 60 Minutes [which mean
that regular listeners will have to cringe on how items "just can't suck
enough." Plus, Imus will be on C-SPAN this week during a dinner for White
House correspondents. [I was laughing too hard when he belly-ached about
the bill, so if others know the time -- and the proper name, please post.]

**VACATION: The San Diego Radio Watcher, for the first time in two years,
will be taking some time off. My next regularly schedule posts will be in
mid-April during NAB. However, if conditions warrant, I'll pop in.

> broadcasting programs, our business is in BIG trouble.

I think you are talking about two different generations of performers
who developed similar skills in different venues.

George Burns was the last of the great performers whose origins were
in vaudeville-- six shows a day and a move every couple of weeks
around the circuit.

Dean Martin's show biz school was the old style night club. He met
Jerry Lewis at the 500 Club in Atlantic City in the 50's. Henny
Youngman belongs to this generation although much of his early night
club experience was largely borscht belt.

You will note that both venues are nearly extinct and with their
extinction the need for extremely versatile performers diminishes.

Today, specialists reign and their educational venue is largely comedy
clubs.

I wonder if Jerry Seinfeld can sing.

Rich,

There's a saying among Country Music fans that Country is in our hearts. I know this sounds rather abstract, but, the point is that it isn't necessarily a property of where we live and work geographically. WYNY, when it was the only Country Station here in NY had the largest country music audience in the entire nation, and, although, relative to the rest of the local population (which is rather large) the percentage was small, there are an awful lot of country music fans in the area. I admit, the main appeal originates in the more suburban areas of NY, Long Island, and Connecticut (not to leave out Staten Island where I live), but, that is not an audience to be overlooked.

Thanks.

Ron

I was wondering if someone could help me with some terms used in licensing data for stations...

> Class: 2B | Nominal power: 50.00 kw | RMS: 2333.55 | Antenna: DA2
> This mode uses 04 towers. Pattern is Augmented.
> Tower #1: Electrical height: 135.5 degrees
> Tower is top loaded (0).
> Tower #2: Electrical height: 135.5 degrees | Spacing: 0180.0 |
> Orientation: 238.00
> Tower is top loaded (0).
> Tower #3: Electrical height: 135.5 degrees | Spacing: 0090.0 |
> Orientation: 148.00 referenced to
> previous tower.
> Tower is top loaded (0).

What's RMS? What is an Augmented pattern? Electrical height? Spacing? Orientation? Top loaded? Does this data let you see what direction the station broadcasts in?

Thanks very much,
John

```
|:
|: F.C.C. Refuses to License Low Power Broadcasters
|:
|: Radio Police Raid Small Broadcaster Instead
|:
|: Prepared to use force if necessary, federal police arrived at
8 AM on
|: March 7, 1996, to remove a small radio transmitter from the home of
|: A.L. Kobres, a long-time radio enthusiast. The transmitter had been
|: in use for about one year on 96.7 FM and served the community of Lutz,
|: Florida. It was being used to provide information on topics such as
|: home schooling, natural medicine, organic gardening, constitutional
|: law, politics.... power level was less than 50 watts.
|: The range was about 6 miles. ...
|: The FCC will not license a station to operate with less than 100
|: watts. The cost to obtain a license can run well over $100,000.
|: ... On 12/1/95 Kobres wrote to Ralph M.
|: Barlow, the Engineer in Charge of the Tampa FCC office in an effort to
|: inform Barlow that the Communications Act of 1934, which created the
|: FCC, was actually founded upon an economic emergency declared on March
|: 9, 1933, and that the justification for the emergency (economics)
|: cannot be found in the Constitution....
```

The FCC was doing its job, enforcing the laws of the congress. It's not their place to select which laws to enforce; that's why we have a congress and courts.

When bureaucrats start arbitrarily enforcing some laws and not others... _then_ they're out of control.

Mr Kobres apparently has a different interpretation of the validity of the FCC itself. Fine. We have a legal system, established by the same constitution Korbes relies upon, to test these things.

As the moderator points out, Kobres chose to broadcast material that called attention to his activities. He also apparently is something of a legal scholar, so he knew what to expect. I'm sure he's also enough of a realist to understand that somebody's got to regulate the technical side of broadcasting; being a historian, he probably knows of the absolute chaos in the ether before the Communications Act.

Obviously, he's not planning to quietly disappear until he can save up for another transmitter. I wish him luck in the next step of his challenge.

The Quotable Wisdom of Virginia Mc Carthy, afternoon talk show host at WGNU, St. Louis, now in her 20th year at the tender age of 76.

Voted "worst talk show host" in St. Louis by the St. Louis Business Journal.
>
>Our latest gem was heard on Thurday during the 5:00PM hour.
>Some caller voiced his dismay over the recent killings of 2 women who
>were returning from Church Services in the St. Louis area.
>
CALLER: "Those kids should be thrown off the Bridge into the River for this violent crime"
>
McCARTHY: "We can't do that--It will Pollute the River".

And never is heard a discouraging word.

Art,

A couple of general questions ...

. are you able to put a number on the delay for Layer III ?

. Can you point me to published information on effects of cascading of
similar/dissimilar coding schemes. I am trying to decide on a strategy
to keep out of trouble at my radio station when (if?) DAB starts up -
I think all (most) DAB schemes use MPEG Layer II. I guess if Layer II
is top-of-the-heap re quality/lack of artifacts at the bandwidth
required(>64k) then it would be better to avoid using other coding
schemes in the production/delivery systems and stick with Layer II.
How many stages of cascade would it stand before the golden-ear DAB
listener says "Hey this is _not_ CD quality"?

In article <4i37ts$lbi@vixen.cso.uiuc.edu>, aconstantine@musicamusa.com wrote:

|: With all due respect to Jay Rose, I'd like to offer an answer from
|: our perspective.
|: For the transmission of real time audio, there is more equipment using
|: the Layer II bit stream protocol than all other methods combined.

This is true. Mr. Constantine should point out, however, that his persepective is that of a manufacturer offering only that algorithm. Mine is as a user and journalist who has talked to a large number of other users and manufacturers.

|: Although Jay would like you to believe that Layer II and "Musicam" are
|: the same, they most definitely are not. Layer II describes the 1990-
|: style compression algorithm invented by the IRT, Philips and the CCETT.
|: It is known as MUSICAM in Europe, although this usage is declining
|: because of our work in the US. MUSICAM(r) in the US is the registered
|: trademark of Corporate Computer Systems. Inc., better known as CCS.

In other words, Layer II is the algorithm. Musicam is CCS's name for it (in the US only).

Quoting from the IRT/CCETT/Phillips docs:

"The licensors initially dubbed their ISO/MPEG Layer II audio coding scheme MUSICAM. The three used the name before the algorithm was selected by the ISO/MPEG as Layer II of the MEPG-1 audio standard.

"Throughout much of the world, the protected name MUSICAM is held by the French broadcasting organization TDF and Thomson Brandt. However, in the US the trademark Musicam is protected by CCS, a licensee of Layer II."

|: ...MUSICAM encoding allows superior sounding audio to be
|: sent in a Layer II bitstream format. This is important, because of
|: the huge number of installed Layer II decoders.

The way Comrex (who also makes Layer II equipment) explained it to me, every manufacturer has to make certain choices in how they encode the LII signal... and these definitely affect the audio quality. But the signal itself either _is_ or _isn't_ LII. There's no such thing as a "Layer II Plus". When I called the president of Telos, he said essentially the same thing.

Now CCS might, indeed, make a better-sounding Layer II encoder. These things are entirely up to the listener -- we still have no way of objectively testing lossy compression.

But you have to remember that RE, Telos, and Comrex have also made _their_ choices on how to encode Layer II. I'd love to see one of the technical societies set up a shootout.

It's also a little disingenious to suggest that because there are more Layer II boxes in the world, that Musicam -- or even Layer II -- is necessarily the best format. Layer III is a lot younger.

|: Because the decoder is slaved to the encoder, the MUSICAM-
|: encoded codec improves the sound of the Layer II decoder.

There's the rub of it. The CCS codec _changes_ the sound of the decoder. So does the RE, and the Comrex, and the Zephyr. They all sound slightly different, because the audio quality is dependent on the encoding process.

Perhaps CCS would like to explain how their system actually improves the sound, in standard language of response or distortion or noise.

|: We applaud Jay Rose's attempts to provide a Web Site listing codec
|: users, and Jay's original "Zephyspace" list started with Telos Zephyr
|: sites. I believe, however, that it is misleading to represent the
|: current "AudioBahn" list as representative of popular codec types,
|: since the original basis of the list was 100 percent Telos Zephyr
|: units.

Please retract that statement, and refrain from making it in public forums any more. I changed the name to make it less misleading.

The original list was, indeed, started with Zephyr sites. However, since the first of the year it's been open to all MPEG-compliant codecs.

Right now:

* Anyone can scan the list and see a number of other codec types -- including Musicam. About 50% of the list is non-Zephyr. The proportion constantly changes, as more people log on.

* Comrex has been very helpful in enlarging the base to include Layer II installations (even those from non-Comrex users). They also keep the entire list in their fax-on-demand system, for people who don't have web access.

* CCS is the only company that has ever challenged my right to maintain a public access, free database of MPEG users. They didn't want me using listing "Musicam" sites, without a long legally-worded disclaimer that implied it was a better system. I refused.

Everybody else has been highly supportive.

And by "support", I mean freely willing to supply information and technical documents. The AudioBahn is not a commercial enterprise, and I receive no money from any of the manufacturers.

There was a recent thread on this topic. I don't know what the lowest reported power was, but my NRC Radio Log shows WSER in Elkton MD as having one watt of power at night.

Why bother to operate? Who would pay for advertising? How far could one watt go (not to DXers with big antennas, but to the radio-listening public)?

John

[Moderator's Note: WMIR in Lake Geneva Wi. not only goes from 1Kw to 1watt, but (get this) they change patterns too!!! Bill]

> have authorative answer to this? Bill]

Bill & Jeff: No, it is not true. Stations can and do play more than 4 in a
row without IDs...though in a competitve environment, you can argue
whether that's wise...remember, it 's not enough that they LISTENED
to you for an hour....they have to remember[and write down] that
they listened to YOU for an hour.
In the past few months, John Sebastian,
PD at Citicasters'(soon to be Jacor)Classic Rock KSLX(100.7), has chosen
to risk it every few weekends by playing a classic CD in its entirety each hour(including
ALL of "Dark Side Of The Moon"). Not that big a risk, really...the music is familiar...if
you
tighten up the presentation by segueing between 2 copies of the CD to eliminate dead
spots between tracks, someone who just punched in will probably stay longer
just to figure out what you're really doing...and since most of these
CDs from the 70's run about 40 minutes, your ID comes at :00, the CD starts,
and you ID again and break for commercials where you usually do...at :40.
It's a good way to get more TSL out of a lower weekend cume. Would
John do it on weekdays? I haven't asked him...but I doubt it. The value of
the call letters is way too high. Again, that's in Phoenix...one of the most competitve
radio markets in the country. I've heard dozens of small rural stations (probably
on the verge of going dark from lack of revenue) let the automation system
or board op segue music for hours on end with the only interruption being
the top of the hour legal ID.

2651. Profanity on the Air

Newsgroup: rec.radio.broadcasting
Date: 1996-03-17 00:00:00 UTC
From: "Julian H. Breen" <breen@ix.netcom.com>
Message-ID: <4ig7nj$8e5@vixen.cso.uiuc.edu>
Source record: 24917

To show you the evolution of what constitutes acceptable language...

In December of 1971 Bob Dylan released an a single titled "George Jackson" which contained the lyric: "Don't take no shit from no one." The song was clearly directed to an AOR audience, but many top 40 stations felt they had to play it in order to be cool.

The controversy was over the concept of acceptable language vs. the artist's right to speak, or in this case, to sort of sing.

At the time I was programming KYA, an AM top 40 station in San Francisco, and resolved the problem by taking the offending word out and reinserting it reversed. To the casual listener the song rolled by with no interruption in the rhythm pattern. Dylan just seemed to swallow the word, as he did with so many others.

Only one listener noticed and called... a teenybopper who taped the song and played it backwards. He thought it *was* cool-- a sort of secret code only he had discovered.

I wonder how other broadcasters handled this one.

Depends on where you worked. I was at KSLY, San Luis Obispo, California
and we said it...if memory serves, KFRC, San Francisco and KHJ, Los
Angeles did, too.
I'm sure other stations did censor their jocks on that
one....and many stations either held off on playing it until it peaked
...or didn't play it at all.
Checking my Joel Whitburn books, "The Bitch Is Back" was, at that time,
Elton John's lowest charting single in 2 years. It peaked at #4, was the #56 record of
the year and spent roughly half the time in the top 10 that "Bennie and The Jets",
"Daniel" and "Crocodile Rock" did. It also did not go Gold. This was arguably
the hottest phase of Elton John's career...it seems likely that airplay(or lack of
it)played a part. Different times...although...nobody else has gone top 5
with a record that has "Bitch" in the title in the 22 years since.

Wow! I used to work for these guys on morning drive back in 1990. Tough company to work for. They don't treat their employees well at all. So I left that company.

I understand, Pat Puchella and long time afternoon driver Tim Michaels also left... not by their choice. I hear Tim has filed a Million dollar law suit against WAVC. He was let go because he was "too old." The station wants to take a "younger sounding" approach.

What have you heard... I'm Interested.

D rew: This used to be KCRZ(107.5), which simulcast KCUB-AM(no, not the
other way around)'s Country format. It is not related in a corporate
sense to K-Hits in Phoenix, but they've "coincidentally" hired the same
sweeper voice...use the same effects package...you get the idea.
They're spotty in Phoenix, but I have heard them...and haven't
heard personality, fun and phones.
If you want to do that, and do it in Arizona, K-Hits is looking for
a new morning drive show. Street talk is Shaun Burke is being let go for not doing
enough of that. T&R to Joel Grey @ KHTC (see their web
page for mailing address).

Cross-posted to: rec.radio.broadcasting,alt.dcom.telecom,rec.audio

This past week, my technician (at the electronics company I work for) inquired about putting some music on the company's phone system "music on hold" system. I had a "piece of junk" old AM\FM 1970's vintage portable AC/battery radio in my office. Took it to the storage room where the phone switching equipment (AT&T Merlin?) is mounted, next to the Sun computer workstation network wiring hub. Too much computer RFI, coupled with being in one of those company "glass box" kind of office buildings, meant I couldn't get ANY stations back there. But could get several stations when using the radio next to my desk (which is next to a window, lovely view of the parking lot). The phone system has an input RJ11 jack for the music signal for the "music on hold", and there was an interface box that converts from single ended RCA jack to balanced RJ11 phone level audio. Initially, I used an extra pair of phone wires running along side my desk phone's lines to pipe the audio from the radio (next to the window) to this interface jack next to the phone system. Too much crosstalk to my phone line, so I moved the interface to my desk, and now convert the radio's audio to phone line levels and then pipe it to the phone system equipment in the back room, no more crosstalk.
Then I took the steps to be sure that the music as head by someone placed on hold would sound decent. I used my desk phone and dialed thru the outside world and ran over to the operator's position and put myself on hold, and I adjusted the level to get clean sounding music at a listenable and compatable level of sound. I suspect most companies skip this step, as I've heard lots of distorted music on hold.

Last, but certianly not least: selecting which station to have heard by someone on hold. Sorry rap fans, I don't think management would want rap music (I didn't eighter!). AM reception is not good enough, FM got several stations decently. I don't think I could get away with Howard Stern on hold! :-) Not that I'd do it. Modern music may be too new for some of our customers (25 to 55 years) and I couldn't get any classical stations. So, I settled on an oldies station, strong clean signal, and (I think) an in-offensive format of music. You know, the kind of oldies station that play the usual playlist of 800 songs.

The big boss's out of town, wonder if he'll notice when he gets back. :-)

[Moderator's Note: I have heard that using broadcast music such as this for either customer background music OR music on hold, is not permitted by ASCAP and BMI. That is why background music services charge so much, they are paying additional BMI/ASCAP fees for the use. Any other observations? Bill]

I can confirm the station here in Eureka, CA (about 300 miles north).

At 12:27 AM, Sunday, March 17, I received a relatively STRONG mono AM
signal, with Motown music being played. This is with the Sony SRF-42 AM
stereo radio *without* the Select-A-Tenna... It appears by their on-air
statement, they're moving their 102.9 FM programming to 1640 AM as of
March 19, at which time they'll go to 10kW... If they're only 1kW *now*,
I'm impressed at just how strong the station is coming through! :)

Interested in Broadcasting? Interested in Technology?

The "Into Tomorrow" Radio Network is offering a unique position to a college student with a drive to succeed, and a will to learn. This opportunity is available to reliable, hard-working, intelligent individuals looking to boost a career in the Radio and Television industry, or who have an interest in technological advances.

The weekly radio show focuses on the latest in technology for all kinds of products and services. The show is broadcast on the Florida Radio Network throughout the state of Florida. A student would be involved in the inner workings of the show and all that is involved with producing a network radio program.

If you meet the following requirements please give us a call:

Interested in Technology
Want to Learn More About the Broadcasting Industry
Reliable
Responsible
Eager to Work and Work Hard

We are looking for students who preferably have a computer and access to the Internet. The meetings are Wednesday evenings beginning at 6pm in Miami Lakes, and the show is Saturday mornings 10am until noon, broadcast locally on WFTL-AM 1400.

To schedule an interview please call Jamie at (305) 824-9000 or E-Mail jamie@graveline.com.

Joe Cassara
joec@graveline.com

Go "Into Tomorrow" with Dave Graveline! It's the hot network radio program covering the latest in high technology. Check out --> http://www.graveline.com

2665. FM translator. What's it worth?

Reply-To: buch@exis.net

I own a Robert A. Jones type FM translator made by VersaCount in the mid 1970's. I am contemplating donating the unit to my local NPR affiliate but I have no idea what the fair market value is for tax deduction purposes.

The unit was licensed and used for about six months as K232AB in Barstow, CA during 1975. It runs one watt output and contains a local modulator and solid state timer for insertion of local spots or support acknowledgements. The IF amplifier uses phase-linear filtering borrowed from the MacIntosh tuners of that era. At the present time it is configured to receive 107.5 MHz and retransmit on 94.3 MHz but this can be easily changed by swapping two crystals and re-tweaking some slugs. The unit is in like new condition, has all documentation, and is in its original box.

It seems to me that the unit cost about $1800 when new. Any guesses as to what it might be worth today?

>possible format change, but, I guess we'll soon know whether or not the
>stories of its going to COUNTRY are true or not!

This would be a pretty good bet to take. Bill Figenshu and Viacom have a lot of experience in country (i.e., WMZQ AM-FM in Washington), and they have a lot of folks they can tap to make a country station a success in an urban environment. In my humble opinion, NY has far too many "alternative/modern rock" stations for any of them to be truly successful, and of the lot, a format flip for WAXQ would be no big loss. On the other hand, the previous audience estimates showed the country audience to be fairly significant...the late WYNY showed the best numbers of any country station in the nation...enough that it would be a niche that a group like Viacom would be foolish not to try to fill.

Matter of fact...what do you want to bet Viacom isn't looking for a way to pick up the WYNY calls?

Cheers,
Max

2668. Grant Vs. Dershowitz

Newsgroup: rec.radio.broadcasting
Date: 1996-03-20 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <4iob27$8dd@vixen.cso.uiuc.edu>
Source record: 24754

Reply-To: talk1370@aol.com (Talk1370)

WABC has dropped Alan Dershowitz' show because he criticized another WABC host, the controversial and much-reviled Bob Grant, calling Grant a racist. Dershowitz is not the world's greatest talk show host, in fact his air performance is marginal at best and he's riding on his reputation...but this wasn't a wise move in a market where Grant's radical-right politics only play to a limited slice of the community, and a station risks its life by being
typecast on the margins.
WABC PD Phil Boyce claimed Grant was more important to the station than Dershowitz, so he had to go. So much for the idea of talk radio as a forum for exchange of ideas. Grant's comments on the air about blacks and hispanics, which have been so frequently quoted here that they need not be repeated again, certainly give Dershowitz plenty of legitimate cause to question Mr. Grant's commitment to American values of equality and fair play. And evidently Boyce doesn't read his own Arbitrons...based on R&R's accounts of the fall numbers, Grant's listenership is disproportionately old and downscale. His morning man, Lionel, is far more important to the station's future than Grant will ever be, if only because he's giving Stern and Imus a real battle for younger listeners and he's showing most of the growth the station's been enjoying.
A station's image with the public (and also, equally important, with the
ad agencies and major accounts) can often be made, or broken, by one or two hosts the station chooses to emphasize. Ask any station manager if he'd rather have his image shaped by Lionel (or Ed Koch, who's an entertaining maverick in his own right, or even Limbaugh, who occasionally still deigns
to show flashes of his old humor) or by Bob Grant...from a purely business point of view, seems to me to be a no-brainer.
And that makes Boyce's decision a puzzler....not so much the decision to dump Dershowitz (you could justify it for poor performance) but the decision to couch it in terms of a strong defense of the divisive Bob Grant. In Detroit at WJR, Boyce programmed a station that projected the ultimate warm-and-fuzzy image, making radio a unifying and inclusive community service rather than a wedge to divide a community, and it was a big winner. True, J.P. McCarthy is (sadly) gone, but have his values and approach to the broadcast profession been that quickly forgotten, even by people who used to work closely with him?
WABC could have been a hip fusion of contemporary humor and WJR-style service, and filled a major void that hasn't been addressed in the market in 20 years. This ain't the way to do it...

>Or, better yet, won't return phone calls after ASKING for a tape. Or
>after an INTERVIEW! There are some less-than-considerate types out
>there, THAT'S for sure!

Been there, seen that. Once upon-a-time, a PD called me in response to a tape that I had sent. After an extensive phone conversation, he requested that I come up for a personal interview. I traveled 400 miles, round-trip, in a beat-up old car with nearly 200,000 miles on the odometer (at my own expense, of course) for an interview at a small-market station in Hibbing, Minnesota. Since we seemed to "hit it off" well and ended up spending most of the day together, I assumed the interview had gone well. As we said goodbye, he assured me that "I'll call you in a few days and let you know, either way." The phone never rang. A few days later, I made my follow-up call, and was unable to get through to the PD ("He's in a meeting, he's gone for the day, etc.") Never returned my call, or even bothered to send a form letter.

What a @#$%% jerk!!

As far as flea-power night operations...
They are probably more marketing strategies (to say you're full-time) than anything else. Some stations which still keep 100 or 250 watts at night may actually have some coverage of their city of license (there are a couple like that in the Western NY area, and without them Niagara Falls would have no nighttime radio service of its own).
But let's face it...these days, with the rising amount of interference coming from sources as diverse as arcing street-lamps, PCs and home appliance electrical noise, a station running less than about 5,000 watts at any time of the day has no hope of adequately covering a decent-size metro with a listenable signal. The 500 and even 1000 watt signals just can't do it any more. We'd best start working on ways to reduce the noise, and trim the interference...or give up and let stations jack up their power to their prime coverage area (at the expense of greater in-terference on the fringe) the way the Canadians have. Or both.
Bob Smith, middays WXXI-AM 1370 Rochester NY

You're exactly right. "Re-broadcasting" such audio is not permitted by ASCAP/BMI. Even new computer owners are finding this out; multimedia computers that offer a music-on-hold feature with their voice/data/fax modems (like the Compaq Presario line and some Packard Bell Pentiums) even include a warning sheet that says something along the lines that you may have to license the rights to music you play while on hold.

Hi there.

I am a night-time weekend DJ on South Africa's biggest national radio station 5FM.

There is alway's a huge debate as to whether or not one should have an "on-air dedication session". On the one hand, it is boring for many listeners as they don't want to hear Mary saying hi to Bob. On the other hand, it promotes the perception of "interactiveness", ie, this is your radio and we are listening to you.

I would like to hear views from other jocks, especially late night ones.

Thanks.

Does anybody remember the radio organist Rosa Rio? I believe she was staff organist for NBC radio in the 1940's. I recall in a radio show she appeared in with Dick Bertel on WTIC AM 1080 radio in Hartford 10-15 years ago and she played some of the themes from radio soaps on a Hammond organ which she lovingly called a "plug-in". Anyone ever hear of that term?? Thanks to all in advance! Bill

At the risk of being "commercial," let me suggest that you look at our new Optimod-FM 2200, which was just announced and which will be publicly shown in the U.S. for the first time at NAB. It has all-digital processing and a built-in stereo generator. There are two basic "sounds": Classical/Protect, which is a very pure phase-linear sound that is a bit like an "idealized 8000." (The HF limiter is _much_ better than the 8000's, and the G/R range is 25dB instead of the 8000's 15dB). The second sound is Two-Band with High-Frequency Enhancement. This is like an 8100 preceded by a slow single-band AGC (like our 464 "Co-Operator") and also includes a program-adaptive HF equalizer. List price for an analog in/out unit is $3850 in the U.S., so it appears that it might be within your price range.

I agree with the suggestion of re-chipping the Optimod 8000. The improvements you will see are well worth the effort. I run the 8000 on my back-up STL audio chain. If you come across a pair of old Texars, pop them in front of the 8000 after you re-chip it and you'll get a pretty respectable on air sound. Just make sure to set the 8000 in the limit only mode (no compression). Our competition is still running this combination with their MOR format and sounding pretty good even in comparison to the major market stations.

>Check out our brand new Orban 2200 OPTIMOD-FM DIGITAL, just
>announced last week.
>Howard Mullinack
>Vice President, Orban
>
Howard,
Just wondering if the 2200 is now the best of both. The first digital Optimods did not get quite the shining reviews from the field as they did in the company literature-- namely, it took a lot more tweaking and then not getting as good a sound as the 8100. Is this new unit the best of the new technology with the simplicity of the old analog?
Dough@citynet.net

(stations I work for still happily using 8100s.)

2683. S. American Radio Network?

Newsgroup: rec.radio.broadcasting

>
>
There were two, "A Pause in the Disaster" and "Welcome to Conceptionland". A lot of it is drug humor which has dated badly. However, there are a few great cuts like the drag racing parody and "Top 40 Education", a takeoff combining the worst of top 40 radio and high school, including an editorial from the principal warning, "any student caught without a hall pass will be shot".

Anyone buy a Telefunken Opus radio new? Is it still in use? What were the beginning and ending production dates for the Telefunken Opus? My uncle bought his in Farmington Ct. in 1957 and it is still going strong today in Fla. My brother bought one in a junk shop in Danielson, Ct. about 10 years ago for $35 and it is the best radio we ever had! The Bosse may be good but the old Telefunkens are better!! I recently found a Telefunken Allegro. When were they made? Thanks to all in advance... Bill

>heard "backwards" talk on several cassette singles . . .)

Tell me about it. In order to play some songs, some stations take
"backmasking" to ridiculous levels. WPGC in Washington played a version
of "Everyday Thang" by Bone Thugs-N-Harmony that was altered so much it
sounded like they were rapping in a foreign language.

Usually, though, the artists and/or labels take care of it themselves.
Other ways of covering up profanity include dropping the words entirely
from the vocal track (cf. "Doin' It" by LL Cool J, or "You Oughta Know",
"Closer" etc.) or -- my favorite -- substituting funny/cool sound effects
(cf. "Freaks of the Industry" by Digital Underground, or several recent
Wu-Tang Clan singles).

BTW, I'm surprised that they didn't press a radio-clean version of "George
Jackson" in 1971, if they wanted it played!

2689. Ronald Reagan on First Am. rights of licensees

Newsgroup: rec.radio.broadcasting
Date: 1996-03-20 00:00:00 UTC
From: croth@omnifest.uwm.edu
Message-ID: <4iob1t$8cp@vixen.cso.uiuc.edu>
Source record: 24775

* * *

SELF-CONTRADICTION OR ALZHEIMER'S SYMPTOM?

Below, what President Ronald Wilson Reagan said when he vetoed
a children's TV bill on 6 November 1988 (presumably, one of his
speechwriters, not Reagan, penned the copy).

Many citizens would find
Reagan's statements supporting the First Amendment rights of
broadcasters inconsistent with the Reagan/Bush antiindecency crusade
(during that time, the employers of radio stars Steve Dahl
and Howard Stern were fined by the FCC).

(begin excerpt)

While I applaud efforts to increase the amount and quality of
children's television programming, the Constitution simply does not
empower the Federal Government to oversee the programming decisions
of broadcasters in the manner provided by this bill.

(content deleted)

Conditioning license renewals upon the Federal Government's
determination as to the adequacy of a licensee's programming would
violate the First Amendment. It would inhibit broadcasters from offering
innovative programs that do not fit neatly into regulatory categories
and discourage the creation of programs that might not satisfy the
tastes of agency officials responsible for considering license
renewals.

(end excerpt)

>coverage.

When one multiplies the "too few" by all in the large swath covered
by a clear-channel station at night, seems like there might be some
potential for special-interest niche programming. I suppose
this is already happening with religious and truckdrivers programs,
plus Grand Ol' Opry. But maybe more of this could happen in the
future as 50 kW AM stations lose local audience share to local
FM stations.

2691. Telefunken Opus radios?

>of sharing one. More revenue is the game.

I agree with you in principle. Although... technically, it's Zebra Broadcasting (run by WZAK's PD Lynn Tolliver and MD Bobby Rush) that owns WMJO/1490 and WZJM. Tolliver and Rush have been involved with Zapis Communications so long that I often say Zapis owns all three... but technically that's not true.

However, with the both of them still working for Zapis, I can definitely see some merit in your argument. But there has to be a better direction for them than what they are taking. The market is super-saturated already. Oh... to the list of six stations that play similar music in this area, you may add one I forgot. WHBC-FM 94.1 in Canton plays a lot of the same stuff, and they come in real strong here on the East Side.

I think it's permissible as long as ASCAP, BMI or whoever licenses the
music is paid. I think that's why so many phone systems with synthesized
music on hold use Greensleeves, written, I understand, by King Henry
VIII, whose copyright has probably expired...

Incredible.... all the cool stuff happens on my days off...
OK, check it out, loyal subjects of King Lassiter... The Mad Dog is back on Newsradio 970 WFLA in Tampa!! I, for one, am absoulutely thrilled with the prospect of his return, as he is one of the MAJOR reasons I got into radio in the first place; now I get to work with him!! The only downside is that he'll be replacing Johnny Cappuccino. It's my understanding that Lassiter's show will start in two weeks, and he'll be on 7-10 PM, bumping Bruce Williams into Johnny's old slot, 10-1. I'm really going to miss Johnny though- he's a great guy to work with, a great talent, and an all around nice guy. I really hope he sticks around to do some weekend shows like he says he will. Tune in and welcome Bob back! Frog!!

I concur with Bill's observations. Several companies that have attempted to play my station on hold or on paging systems have been visited by BMI(they seem to be the most agressive of the licensing organizations), and ordered to pay extortionate royalties or cease their "public performance" of the radio station. By their logic playing the radio station in a closed environment such as an office, or on hold to callers, constitutes a "public performance" for which royalty payments are due.

If you'd like, I'll dig up a series I did for a neighborhood cafe years ago, the "Restaurant Minute Lady." Couldn't do the Doctor Ruth voice they'd proposed, but came up with a mad southern belle who explained that packing peanuts are a vegetable, like giblets.
Sold 'em :60's...she'd go on for almost half a minute with some insanely funny topic, then plug the restaurants's strong points; became so famous, I designed the restaurant some table-tents (placards) with a cartoon portrait of her, and a blank for sending in customers' own "Questions to the Restaurant Minute Lady"
That kept new copy ideas coming in, made diners tune to the station to hear their questions answered, and showed the client how strong the response was to their radio ads.

>monitors?

Unfortunately, the technology is still not available to make usable flat panel
LCD technology possible on an economically affordable basis. Most of the
available LCD technology is now tied up in laptop production, and, from what
I've heard, laptops/notebooks will claim most of that screen production for the
forseeable future.

I know that at WAMU-FM in Washington, they chose to go *with* laptops in studio
environments where space is at a premium in their new facility (host displays
for talk shows, etc.). In some cases, with a networked PC environment, the
laptop would only display the output of a server. When I was involved with
relocating National Public Radio to new/renovated facilities, our crack
engineering staff found a bracket/window combination that allowed a DEC VAX
VT420 terminal or a VGA monitor to be mounted below the surface of a table, but
still visible to talent. This can be a big space saver in a studio, or control
room environment. If it will help, drop me a line in e-mail, and I'll try to
get the info from the NPR folks.

Regarding WAVC in Duluth changing its call letters to KKCB, how does a station that has a "W" as the first letter in its calls get new call letters starting with a "K"?

I assume that if KDKA in Pittsburgh changed its calls, they would probably have to conform and get letters beginning with "W". WOW in Omaha would have to recieve a "K".

It seems to me that stations in Duluth would be considered east of the Mississippi and could only recieve a "W"

Maybe it isn't as big a deal as I make it. Just asking.

Playing music on hold does require an ASCAP, BMI, and SESAC License. If you use a music service such as Digital Music Express, AEI, 3M or Muzak they are responsible for paying the ASCAP, BMI, and SESAC fees. Several sound contractors can provide digital messages on hold. They can provide the services listed above or a generic music service that doesn't require a fee.

*After a too-short weekend in Philadelphia, I'm back, and so far the biggest news is that the lights are finally back on at the WMEX-1150 tower site along route 2 in Lexington, Mass. Since just before Christmas, the lights on the ~500-foot FM tower at the site (currently used only as a backup for WMJX 106.7) had been off. That tower is pretty much the highest point between Boston and Hanscom Air Force Base in Bedford, so I was a bit worried about what might have happened. Fortunately, the lights are now back on.

*A clarification about the status of folk station WADN 1120 Concord MA: A pair of trailers are in place at the transmitter site off Rt. 62 in South Acton, but they are NOT yet being used as studios and offices. WADN is planning to move out of its current studios in Concord's Damonmill Square complex, but has not done so yet.

*A reshuffling of the schedule at WABU-TV 68 in Boston means that Charles Adler's "Adler On Line" talk show is now radio-only on WRKO 680 from 7 to 10pm weeknights. The 8-9pm hour had previously been simulcast on TV 68. Now Adler is on TV from 4-5pm daily.

*More consolidation down in southwest Connecticut, as Commodore Broadcasting buys WSTC 1400-WKHL 96.7 Stamford. Commodore already owns WNLK 1350-WEFX 95.9 Norwalk, WRKI 95.1-WINE 940 Brookfield, and several stations in nearby Westchester County, NY.

*More information on the demise of WDIS 1170 Norfolk, MA. Reports in the local weekly indicate the station had its power cut off after failing to pay an electric bill in the neighborhood of $2,000. Owner Albert Grady is reportedly working on getting it back on.

*And that's about all I've noticed when it comes to radio hereabouts... but if you're interested in tapes of Philadelphia, Allentown-Bethlehem-Easton, Wilmington, Reading, or South Jersey radio, please contact me for a comprehensive aircheck list from this past weekend.

Best April Fools stunt I ever heard of was pulled off beautifully in Toronto in the Mid-70's.

CHUM-AM jock Mike Cooper had been airing calls all morning from an obscene caller who just kept calling and hanging up. Later, his calls included the word "You're dead." After about 7 or 8 of these calls, Cooper remarked to his producer "What did he say? I'm dead? I'd like to see him come on down here."

Later, in the middle of reading a grocery store tag, you hear the studio door open. Cooper, one of the smoothest jocks I've ever heard, started stumbling through the tag, as if distracted. He stops reading the tag, the jingle runs out, and you can hear Coop saying "Hello? Are you supposed to be in here? Can I help you? We're trying to do a show here."

Here's a rough transcript of the rest (mostly from memory, but this is also the most treasured tape in my aircheck collection)

Male voice: You know who I am.

Cooper: (worried) You're the guy from -- from the phone?

Man: You know it.

Coop: How did you get in here?

Man: I have no problems getting where I want to go.

Coop: Well, you're gonna have to get out, 'cuz we're --
I, uh....I've seen starter pistols before, that doesn't scare me.

Man: This is it, pal.

(long silence, during which the Metro Toronto Police have sent their SWAT teams down to the station to block off the streets around the station, with a police sniper on the roof of the building across the street)

Cooper: (voice trembling in fear) That doesn't scare me.

Man: I told you, this is it.

Coop: (summoning courage) Okay, that's enough. (Chair scrapes across floor) You're gonna have to leave.

In the sounds that followed, a scuffle breaks out between Cooper and the man. A gun goes off twice. Cooper is heard screaming in agony. His

producer runs in and fights off the attacker, briefly. Then there is about 15 seconds of what was the most deafening silence in Canadian radio history, followed by Cooper's cheery "April Fool!" into a high-energy CHUM jingle.

It's been tried since, and BADLY. I've heard three other airchecks of jocks who've tried to pull it off, including one from Rob Christie, mornings at MIX 99.9 in Toronto, attempted while he worked at CHED in Edmonton. None of the pretenders have done the original any justice.

As for us? We're trying to swap places for the day with our biggest competitor. (We're #1 as a Classic Rock outlet, they're a VERY close #2 as a liner-card AC. So far, they haven't said yes OR no.)

Regards,

Neil Hedley

Several years ago, WGRX (Baltimore, 100.7) had a great joke, but not April Fools Day. Over a weekend, they ran the "Livestock" special (coinciding with the anniversary of Woodstock). They made it appear to be a live show, with a great lineup (The Beatles, Rolling Stones, etc.), dubbing in the sounds of crowds, live reports by DJs at the show, etc.

Well, there actually is a small (very small) town in Maryland called Livestock. Guess what? People started showing up there, looking for the concert.

Chris

P.S. Anyone know when WGRX will tire of their "new format" and change back to Classic Rock?

The best April Fool radio joke of all time was a couple of years ago here in San Diego. Dave Rickards of the KGB Dawn Patrol announced the Space Shuttle was going to do an emergency landing at a local airfield. Several thousand listeners fell for the gag and went to the field only to hear Dave and the rest of the show spill the beans it was an April fool joke. It went off so well it made national news. Too funny!

I've just subscribed to Airwaves, and, as suggested by the owner of the list, I'll introduce myself.

My name is Bob Scherago. I've been in the radio broadcast industry for - wow! - 36 years! After attending RCA Institutes in New York (1958-1960) and working part-time as an usher in the CBS New York studios, I worked as a radio engineer for WGLI-AM and FM in Babylon, New York. During that time I helped to move the FM station to Fresh Meadows, where it became WTFM (later WAPP, now, something else) and put WQMF on the air. I moved (in 1963) to WTIC-AM-FM-TV in Hartford, CT, then, to the Voice of America in Washington, DC, in 1978 (after a short 3-month stay at Connecticut Public Radio). At VOA, I am presently a technical program manager in Broadcast Operations. I've been a subscriber to Mr. Pfeiffer's other mail enterprise, the OTR listing, and look forward to the exchange of information and ideas on this forum as well.

I'd be interested in hearing from any RCA Institutes alums from that time, as well as other people from the stations listed who might have worked there at the same time. In the future, I'll try not to be so long-winded.

one of my favorite ideas is to pan the station to the left (or right depending on your taste) and tell your listeners that you are sorry about the station being off balance but a police helicoptor hit your tower and it is leaning. "Our engineers are trying to fix the problem as we speak".

Hey

My best on-air response EVER came from April Fools last year. We tied it into a topical news story on user pay services. The deal was that radio stations lost a TON of money in the previous year and needed a way to recoup the losses. I had the news department go on at 6 am with a story that the CRTC (Canadian Broad. Regulator) had now approved Radio stations charge people for listening to the radio. The idea was that there was equipment in place to measure the amount of time that people listened to their radio. They would be charged anywhere they listened in the entire country...no matter where they were and no matter what station they listend to. Not only that...it was retroactive to March 1st so people could expect a bill in the mail at any time. The phone lines were jammed for three straight hours. People were REALLY REALLY MAD. I used a couple of phony interviews and had prepared a few listener responses that were just unreal. I even had one guy say it was ok to charge and that he was looking forward to getting his bill. People ate it up...I'd say 1 in 5 callers were believers!!!! This was the most fun I have ever had on-air and if you think it's to far-out....think again. It was the BEST. If you want more info just call or e-mail. And if you try it out...let me know how it went.

My favorite is the Fantasy Concert. All day long, you're 'broadcasting live' from one humongous concert featuring pretty much everybody. People could only get in by winning tickets on your radio station over the past week. (It helps to air 'winners' exclaiming how great it is to have won these special tickets and be at the event.)

Of course, nobody won tickets. The concert is just a series of live albums by anyone and everyone you can think of. The air staff really has to sell this one to make it work, and constant crowd noise, 'interviews' with 'winners' and such really help. If you've got some old artist interviews you can use, that makes it even better. You may even get a few real callers who wise up to it and play along. That's when you know it's a success. Go ahead...put them on the air, too. It's a hoot.

The plus is, your audience is getting a real treat hearing these big bands 'live.' There's still enough time to go hunt down the EPs and Maxi-Singles that have extra live stuff on them so that you can include Pearl Jam, Alanis and other current stars of your format.

Have fun!

I don't have anything original at the moment, but I do remember a few from Washington, D.C. radio past:

1) Back in the 70s, MOR/AC formatted WWDC AM-FM swapped staffs with R&B/Soul station WOL-AM for the one April Fools Day. Not too many listeners realized what happened on WWDC, but lots of folks knew right off the bat what happened at WOL! (Curious: could this be pulled off today? Maybe between stations that have been 'opolized under the new order?)

2) This wasn't tied specifically to April Fools Day per se, but I remember when legacy Top40 station WPGC AM-FM, under the helm of the legendary Harv Moore, did a "missing W" contest, in which a nefarious fictional character was alleged to have "stolen" the "W" in the station's call sign. Since the mysterious character had the "W", only he could "say" the station ID every hour. Listeners were asked to help find where in town the W was being "hidden". It finally ended up on a street sign in downtown D.C.

Hey, I just thought of something...how about a station that carries either Stern or Limbaugh creating a tape of their shows that played "backwards" except for jingles, spots and the news. I'll bet no one notices the difference! <grin>

Cheers,
Max

David A. Kaye wrote the quoted material below:

" [Moderator's Note: David, how does San Francisco, a city known for its
" diverse cuisine, feel about 'Rice-A-Roni' being classified as "The
" San Francisco Treat"? Bill]

We call it the San Leandro treat, since it's made there, and is the more typical cuisine of that suburban bedroom town. Funny how an instant version of a French dish (rice pilaf) came to be associated with a city which is largely Chinese, Mexican, and Italian. Actually, truth be told, we don't think about it much.

Hello,

I am Kevin Strom, producer and host of American Dissident Voices, a controversial politically-oriented talk program devoted to the interests of European-Americans.

We are interested in expanding our radio network.

Since we often deal with the taboo subject of race, our stations _do_ receive static from the Politically Correct who would like to get us off the air. But the stations who believe in freedom of speech have stuck with us and reaped the reward of our VERY reliable payment record. In fact, we ALWAYS pay our airtime bills in advance.

We are currently on:

KSEY Wichita Falls TX
KGOL Houston
KMTL Little Rock
WAJF/WYAM Huntsville/Decatur AL
WTIS Tampa
WALE Providence
KXEL Waterloo IA
WRNO Worldwide New Orleans

Please feel free to contact any of these stations to confirm our payment record.

The program comes on cassette, is weekly and one half hour in length (though we might buy 5 days/wk if the price is right) and has been on the air since 1991.

We are looking for stations that have a good price/coverage area ratio.

If you have questions, please email me at ka_strom@ix.netcom.com

If you are seriously interested in selling us time, fax your coverage map, time avails, and rates to 304-653-4690.

Thanks very much,

Kevin Strom

>and now they don't have ANY??

Overkill, I guess. Two '70s stations would be crowding it in ANY market, let alone one the size of Charleston. Both of 'em probably got a look at the same book, realized they couldn't go on losing _this_ much money, and got out as fast as they got in, not bothering to wait for each other to blink...

Sounds like the radio production class I took in college about a year and a half ago...wihtout the exams. But I think you have everything covered. It's most important to get kids that young used to their voice and how it sounds recorded/broadcast. I'm 20 and I'm still getting used to mine...I wish someone had helped me when I was younger. Where I would run into trouble is trying to decide if I wanted to also instruct the young ones on what a tough life radio can be. (As though I have a lot of experience 8-])

>> We have (...) an Optimod 8000.
>> What can be done (...) to improve the quality?

EASY! Get rid of the optimod unit, fit a wideband limiter (ok, a comprssor will do providing it has a fast attack and SLOW decay times, and fairly low gain), and make sure all the preseenters/producers know how high the studio meters can go (stick a label on them if necessary). If you want to adjust the frequency response fit a multiband graphic equaliser before the limiter.

I know this can't be followeed totally in broadcasting, but I've always thougfht the best form of audio processing is none at all! (Apart from the limiter on the TX input).

Well, perhaps Viacom will take the lead from 92.5 FM WXTU in Philadelphia and, should they choose to adopt the Country format, do so in a very mainstream manner designed to increase the appeal. I agree with the article that said to promote this in a large metropolitan area requires a mainstream approach, and, from what I can tell, WXTU is seeing a lot of success in Philadelphia. I think it could also work here in New York.

I finally got to hear the latest foray into the expanded band, 1640, KXBT in Vallejo. The night I heard them, (3/16) they sounded as if they had a VERY loose automation system on. (ie: Aint too proud to beg/6 seconds of silence/Love is here and now your gone). This sounds like it is in the testing phase still. Nonetheless, It still was nice to hear "the birth of a station" and to have something on the expanded band down here other than splatter from KFI and KNX both at 1670...

P.S. I caught them to and from work, within 5 1/2 hours, they played "Love is here and now you're gone" by the Supremes TWICE!! Love that rotation! :)

Lance Ballance
Overnight Clinique Counter Saleslady
KOST 103.5 FM, Los Angeles.

PPS. Met Gary Owens this morning at the Museum Of TV and Radio in Beverly Hills. Interesting since he left KFI ONE week before I got to KOST on the FM side of the building in 1989. VERY NICE MAN!!! Check out the museum, LA radio studlings!!

2727. (Fwd) NY Newspaper Account Of WAXQ Sale

'ronkr@nyc.pipeline.com (Ron Krause)' wrote:
Viacom buys WAXQ

By David Hinckley
Daily News Staff Writer

New York radio rocked and rolled again Friday, with WAXQ (104.3 FM)
gettinga new owner - meaning quite possibly a new format - and WHTZ (100.3
FM) replacing its long-time programmer Steve Kingsten.

GAF Corp. sold WAXQ to Entertainment Communications Inc. for $90 million,
the most ever for a city FM.

Entertainment Communications then announced it will trade WAXQ to Viacom
for three Seattle FM's. Viacom, whose holdings include Blockbuster Video
and MTV, thus becomes the latest two-
FM owner in New York, adding WAXQ to WLTW (106.7 FM).

While the deals must be approved by the FCC and Viacom has not announced
any plans, one major question is whether it will take WAXQ out of the
crowded modern rock field.

Since two-station owners favor formats which compliment each other - like
Emmis' WRKS and WQHT or SBS' WSKQ and WPAT-FM - WYNY orphans hope Viacom
sees country music as a nice match for Lite-FM. But there are also
advocates of classic rock, top-40 and a younger, FM- oriented talk format.
Right now it's all speculation.

Chris--
Probably got the transcontinental hop! In La Mesa, (about 50 miles Southeast of you) I have received WJDM's Radio AAHS signal (albeit very weak) 3 or 4 times already--not great, but enough to make out some of the music and a few words--sounds very similar to a shortwave broadcast that is very weak-- a lot of fading that occasionally gets loud but never for more than 7-8 seconds at a time.

>sdradio@sd.znet.com

KXBT is pretty much full time now, covering much more of the Bay Area than it did on 1190 with 1000d. Its now running 10000 day and 1000 night. Vallejo is about 30 miles or so NE of San Francisco, and the signal is quite listenable as far south as San Jose, which is about 70 miles south of Vallejo.

2730. Re: 50kw day/night MW stations in N. America

I'm curious as to the Canadian stations at 50kw rated as Class 3
stations...

> Freq Class Call City St Antenna
> 550 3 CFNB Fredericton NB DA2
> 580 3 CKY Winnipeg MB DA2
> 590 3 CJCL Toronto ON DA1
> 630 3 CHED Edmonton AB DA2
> 790 3 CFCW Camrose AB DA2
> 790 3 CIGM Sudbury ON DA2
> 910 3 CKDQ Drumheller AB DA2
> 930 3 CFBC St. John NB DA2
> 930 3 CJCA Edmonton AB DA2
> 960 3 CFAC Calgary AB DAN
> 980 3 CBV Quebec PQ DA1
> 980 3 CKNW New Westminster BC DA1
> 1260 3 CFRN Edmonton AB DAN
> 1280 3 CJMS Montreal PQ DA2
> 1310 3 CIWW Ottawa ON DA2
> 1320 3 CHMB Vancouver BC DA2
> 1410 3 CFUN Vancouver BC DA2
> 1430 3 CKYC Toronto ON DA2
> 1470 3 CJVB Vancouver BC DA2

I can't find any US or Mexican stations rated Class 3 at 50kw; aren't
Class 3 stations limited to 5 kw maximum?

IMHO, and after being in radio since 1981 at some major AMers in Milwaukee and Texas...I have to say that you are about ten to fifteen years late for getting into radio. I would spend some time checking out the new digital delivery formats, unless you find a good station that is

A: full service
B: not automated with one employer
C: doesn't require you to run the AM and FM at the same time.

In my rural community there is a company that owns three "stations" one FM country, one FM rock, one FM MOR. They run everything off of a computer bank with token offices in the cities of record. (One is literally a desk in a Radio Shack!)

The so-called Program Director does do a live assist shift and cuts spots. That's it. No sports guy, not even a Saturday AM call in buy-sell-trade show.

The year I left radio my morning news team got the award for the best newscast in Texas. So I know what good radio can be...and it is fun. But this highly automated, downsized crap that passes itself for radio is just not my cup of tea. I know the money problems are there, etc., etc. I guess as long as the listeners don't care, it's gonna stay that way.

So don't expect much from your radio career if you limit yourself to AM or FM broacasting. It's still the only way to drop a box in your shirt pocket and tune in the world, and you can't get on the net in your car....today.

But five years from now...watchout. Even Linda Ellerbee is broadcasting on the net now.

Message-ID: <4iob14$8ag@vixen.cso.uiuc.edu>
Source record: 24839

Whom does one report static interference on the am radio band? It sounds like a fence charger buzz used on farms to keep cattle in. It is very annoying and has been invading the am dial on and off for over a year. Talked to our city code enforcement about it and they said that we had a cheap radio. It happens to be a 45 year old Telefunken Opus and those weren't cheap!! It still works like a dream... Thanks in advance...

Bill

Has this claim ever been tested in careful, independent subjective listening tests by organizations such as Swedish Radio, the BBC, or CRC in Canada? If so, where can I read reports of the results of such tests showing that U.S. MUSICAM has a consistently higher score than other Layer II implementations? I am not interested in any proprietary tests by CCS.

> . are you able to put a number on the delay for Layer III ?

Here are the delay figures for Zephyr in its various modes. We cite Layer III at both the 32 and 48kHz sampling rates.

L3-DUAL, 32kHz: 275 ms
L3-STEREO, 32kHz: 390 ms
L3-JSTEREO, 32kHz: 390 ms

L3-DUAL, 48kHz: 225 ms
L3-STEREO, 48kHz: 270 ms
L3-JSTEREO, 48kHz: 270 ms

L2-MONO, 48kHz: 160 ms
L2-MONO128, 48kHz: 220 ms
L2-DUAL, 48kHz: 220 ms
L2-JSTEREO, 48kHz: 220 ms

G.722 : 45 ms

Most people use G.722 for the return audio, regardless of whether they use Layer III or Layer II, to reduce the time of the total round trip.

This is Telos® view of cascading:

It appears that, in the near future, most broadcast audio signals will be subject to multiple encode/ decode cycles before they reach the listener. Unfortunately, there is no completed research into the effects of cascading using ®real-world® broadcast audio chain configurations.

Our view is that one should code only where the bits are unavailable or expensive ® and then use the most bits and the most powerful coding method. For ISDN at 64kbps a channel, this recommends Layer III. Layer II is currently the accepted coding scheme for applications with bit rates of

128kbps per audio channel. There is no logic, however, in concluding that because Layer II is preferred for satellite and DAB, it should be used for ISDN. Nor is it true that if you use Layer II in one part of your audio chain it is the best choice for all parts of the system.

Granted, we are a manufacturer of codecs, so this is not totally unbiased. There are, on the other hand, many stations using Layer III for ISDN contributions and Layer II on their satellite system who are very, very happy with the resulting audio.

The question I always have when I encounter a radio station used as
music on hold:

Is it really good business to have your potential customers listening
to someone else's commercials while waiting to talk to you?
Especially when it could be your competitor's commercials?

These could loosely be defined as the Western Cities KZZP and the
Nationwide KZZP. Putting aside Brandmeier, the Nationwide KZZP was more
successful in the ratings.

> And, it should be noted that KZZP is taking a 90's attitude about all

> with hit music to a new station that plays it.

I think this is exactly right. There is more interest in bringing back
the name of KZZP than there is in re-creating the sound of the previous
eras of KZZP, nor is there any guarantee that such a re-creation would
work in the Nineties anyway. "Branding", however, is an old concept in
terms of radio marketing strategy.

The down side of this is that you have an entirely new radio station with
the "old" call letters, which may or may not meet the expectations of the
audience. I am reminded of a Japanese manufacturer that bought the name
and started making DuMont television sets. Of course, it just wasn't the
same.

Well...it HAS to do better than KVRY <grin>

True, but two possibilities present themselves:
1.) The recording in question might have been an outtake from the
Sgt. Pepper sessions. Thousands of Beatles bootlegs are out there, and
it might have happened.

2.) It could be a live recording from after the Beatles broke up. I
know that Paul has performed the song live (at least in his "Flowers in
the Dirt" tour...any others?), and any of the others might have as well.

Anybody with more knowledge care to speak up?

Jean Shepherd- FAQ

Here is a modest beginning to a Jean Shepherd FAQ.
Please feel free to contact me with any additions
or corrections.

1) Where can I obtain recordings of Shepherd?
2) What books has he written?
3) Where is he now?
4) Where can I see Shep perform (maybe)?

1) Where can I obtain recording of Shepherd?

Audio cassettes of Shep reading some of his stories are available
>from Barnes and Noble (1-800-242-6657). This set has a catalog number
of 1838614 and sells for $50. Individual tapes are $7.95.

Shepherd's Pie (seven cassettes in all)

Slice One
Red Ryder Nails The Cleveland Street Kid

Slice Two
Wanda Hickey's Night Of Golden Memories
And Other Disasters

Slice Three
Ludlow Kissel And The Dago Bomb That Struck Back
and Little Orphan Annie Or The Counterfeit Secret Circle Member

Slice Four
Leopold Doppler And The Great Orpheum Gravy Boat Riot

Slice Five
Ollie Hopnoodle's Haven Of Bliss

Slice Six
County Fair

Slice Seven
Scut Farkas And The Murderous Mariah

2) What books has he written?

His books include: In God We Trust, All Others Pay Cash;
Wanda Hickey's Night of Golden Memories And Other Disasters;
The Phantom Of The Open Hearth; A Fistful of Fig Newtons; and
A Ferarri In The Bedroom.

There is also "The America of George Ade" edited and introduced
by Jean Shepherd. Printed in hard cover by G.P. Putnam's Sons,
1961. It's mostly a collection of humorous fables- sort of what
you might expect if Aesop had Shep as a ghost writer. :-)

Shep also made at least five LP recordings that I know of:

Jean Shepherd And Other Foibles, Electra 172 (1959)
Will Failure Spoil Jean Shepherd, Electra 195 (1960)
The Declassified Jean Shepherd, Mercury SRM 1615 ( )
Jean Shepherd "Live" At The Limelight, Quote Q-4 (1964)
Jean Shepherd Reads Poems Of Robert Service, Folkways FL 9754 (1975)

3) Where is he now?

Here, once again, is the info listed in the online Ham Radio Callbook for
Jean Shepard (and it IS the same Jean Shepard who worked at WOR):

Call-Sign: K2ORS Class: ADVANCED
Real Name: JEAN P SHEPHERD Birthday: JUL 26, 1921
Mailing Address: POB 1186, SANIBEL, FL 33957
Valid From: DEC 28, 1984 To: DEC 28, 1994

Hope he remembered to renew his license!

[From: Bruce Schiller at WCBS-TV.... and ham radio operator WA2ZST]

4) Where can I see Shep perform (maybe)?

>>From: gbrook@pipeline.com (George Fiala)
>Date: Wed, 24 May 1995

Just an update on Jean Shepard. Got a call today from another Jean
Shepard fan Barry Farber who let me know that Shep will be at Princeton
University this Friday May 26th at 8PM for a "concert". Tickets can be
bought from WPRB-FM by calling (603) 258 3655.

I went to this show. It was his 30th annual show there - but my first,
although I spent I don't know how many countless nights listening to
him on the transistor under the covers.

He was fabulous, although a little rotund and not politically correct
enough for my girlfriend.

I hope he does another one this year.

***

Yours in Liberation,

Roy

Source record: 24930

Greetings, Airwavers! Here's the top of the radio news biz headlines from *your* Nation's Capital for this week!

Item First: Whose tab is it? -- The Washington Post's "On the Dial" (radio) column reports that the FCC has levied a $38,000 fine on alternative/modern rock station
WHFS-FM (99.1). The Post, quoting Radio & Records, says the fines are for violations dating back to the early 90s, when the station was owned by Duchossois
Broadcasting. Violations include operating a studio-transmitter link (STL) without FCC clearance; misidentifying the station's location in the ID; airing phoners without first notifying callers ahead of time; and several violations related to promotions and prizes. R&R says the allegations were brought to the attention of the FCC by
WHFS' former Sales Manaer, Patricia Ebbert. WHFS' current owner, Liberty Broadcasting, maintains the fines are the responsibility of Duchossis.

Item Second: Reunion -- The Post reports that because of a local D.C. area radio station, a Falls Church, Virginia man has been reunited with the sister he hasn't seen in decades. Jim London over at 50s-60s WBIG-FM ("Oldies 100") gave one listener last Christmas the gift of the services of the William Haig agency, an Alexandria, Va. firm that tracks down missing family members. Listener Tim Rose was recently re-united with a sister he hasn't seen since his family was divided when his father died, and his mother was unable to care for all six kids. The Post also reports Rose and his sister have since found another younger sister in Georgia. Five other siblings are still unaccounted for, but the Haig agency is reportedly continuing the search.

Item Third -- What goes around comes around -- CBS-Westinghouse o&o 70s-oldies station WARW-FM ("Arrow 94.7") this week unveiled a new flight of television commercials. The new spots proclaim the station is "Washington's Only Classic Rock", and has many little still and video clips of the stations principal artists. However, the only audio mention of "Arrow 94.7" comes at the end of the spot, aside from seeing the logo on the screen sporadically through most of the comemrcial. Interestingly, they remind one of the old spots run by the late-classic rocker in this market, WCXR-FM (105.9), which used to be owned by Westinghouse, and is now owned by Viacom (as WJZW-FM "Smooth Jazz 105.9").

Item Third -- Snip, snip, snip -- Finally, an update from Wes Johnson, morning man at 70s station "Xtra-104" (WXTR-FM / WXVR-FM), on his recent appearance on NBC's "Unsolved Mysteries" last Friday:

FROM: INTERNET:WildWesXTR@aol.com

>>Actually Max, I was mostly left on the cutting room floor! All my lines were cut, and >>all you see me do is walk down a path and get yanked away from a

ghost by my >>"wife". Then it cuts to the real guy and you never see me again. >>I was walking funny, because that's the way the guy walks, and sticking my belly >>out like nobody's business. I was only on for about 30 seconds at the most. >>Quite anti-climactic!

Oh, well, Wes, that, as they say, is show business! Better luck next time!

That's our report from Washington, Airwavers! More next week:

Cheers,

Battle of the Bandwidth in Berkeley 25-Watt
Guerrilla Takes

Washington Post

(c) 1996 Washington Post. All rts. reserv.

Battle of the Bandwidth in Berkeley 25-Watt Guerrilla Takes On Established Order, Which Wants to Unplug `Free Radio'. The Washington Post, March 15, 1996, FINAL Edition By: John Boudreau, Special to The Washington Post Section: A SECTION, p. A03 Story Type: News National Line Count: 103 Word Count: 1139

BERKELEY, Calif. - "This is Free Radio Berkeley, 104.1 on your FM dial," the baritone voice announced. Stephen Dunifer, self-described anarchist and founder of the 24-hour-a-day, illegal station, was on the air again. "This is Acting Globally, Revolting Locally."

He may lack the polished delivery of a commercial radio jockey, but the U.S. government hears him clearly all the same. The Federal Communications Commission wants to silence Dunifer and scores of other guerrilla radio stations operating around the country without licenses.

Airwave squatters have been sounding off in places such as Iowa, Miami, New York City and Richmond. None of the stations is particularly powerful, but the impulse they represent -- people wanting to communicate without the filter of corporate mass media -- seems to be growing. In many ways it represents a low-tech version of the free-spirited computer communication of the Internet.

"The FCC's regulatory structure only allows people with money to have a voice," Dunifer said. "Why do the airwaves have to be a concession stand for corporate America?"

Media expert Ben Bagdikian, former dean of the University of California's journalism school, calls such radio stations a grass-roots rebellion against the increased domination of the airwaves by media conglomerates. "We have just about lost community-oriented broadcasting," Bagdikian said. "We're going

to see ever more unlicensed stations, Free Radio Berkeleys, all over the country. I've been told we have hundreds of them."

Dunifer, who will fight the FCC's attempt to boot him off the air at an April 12 hearing in U.S. District Court in Oakland, said home-grown radio stations are the leaflets of the electronic age. He said the government should provide room for low-watt community radio stations such as Free Radio Berkeley, which has only an eight-mile range.

The government, however, views Dunifer as a threat to the established broadcasting order. The FCC fined Dunifer $10,000 (no, he hasn't paid) and hauled him into court for operating his tiny 25-watt FM station without a license, interfering with the signals of legitimate stations and, in general, risking chaos on the airwaves.

The case of Free Radio Berkeley would normally be nothing more than light static for the FCC, which has had no trouble booting renegade radio stations off the air in the past. The commission banned new micro stations, which operate at less than 100 watts, in 1978. Ten years later, the government won a case against Radio New York International, a pirate station broadcasting from a boat off Long Island. A year later, officials shut down an unlicensed station operated by a Cuban American group in Miami. Likewise, a Venice, Calif., micro radio station was forced off the air in the early 1990s. And last summer, the FCC confiscated homemade equipment of Black Liberation Radio in Richmond.

But last year U.S. District Judge Claudia Wilken in Oakland refused to issue a preliminary injunction to stop Free Radio Berkeley. Instead, she questioned the constitutionality of the FCC's regulations as they applied to micro radio stations. The FCC, hoping to bypass a trial, is now seeking a permanent injunction against Dunifer.

"We're very concerned," said David Doon, an investigator in the FCC's Bay Area office. "The more stations that come on, the more problems we'll have. There's a finite spectrum. A lot of people complain of interference."

In the past three years, Doon asserted, there has been a tenfold increase in unlicensed broadcasters in the Bay Area, though that figure is impossible to

prove, given the small-scale, unregulated nature of the micro radio stations. (Other local micro stations include Radio Libre and San Francisco Liberation Radio.) Officials worry that stray signals from micro radio stations could interfere with aviation, police or fire radio bands.

"In the long run, it has the potential for real danger. These unauthorized servers will destroy the ability of people to get clear radio signals," said Jack Goodman, vice president and policy counsel for the National Association of Broadcasters in Washington, which filed a legal brief in support of the FCC's case against Dunifer.

"No one has a constitutional right to broadcast," he said. "The Supreme Court has rejected that (argument) over and over again."

The airwaves in countries that sanction micro radio stations, such as Canada, aren't jam-packed like they are in the United States, which has 11,000 AM and FM stations, Goodman said.

What appear to be open slots on the spectrum actually accommodate the shortcomings of inexpensive receiver designs, said Fred Krock, radio engineering supervisor at KQED-FM, the Bay Area's main public radio station. Wedging more stations onto the broadcast band would require sophisticated, and expensive, new receivers that most consumers wouldn't want to buy.

"There's a place in this world for Mr. Dunifer," said Krock, whose powerful station broadcasts at 110,000 watts. "They just haven't sentenced him to it yet. We're not looking at a situation of free speech. What we're looking at is anarchy."

Dunifer calls airwave rebels like himself the vanguard of a 1990s free speech movement and maintains that regulating the airwaves is unconstitutional. Unlike publishing a newspaper, or creating a World Wide Web site on the Internet, operating a legal radio station requires a government license.

Dunifer supports himself by assembling and shipping backpack-sized radio kits around the globe -- to Haiti, Mexico, the Philippines. The kits enable people to broadcast for as little as $1,000 plus the monthly power bill -- without a license, of course.

An FCC license costs about $3,000. With legal and consulting fees, the price tag to get on the air legally can be $100,000 -- assuming there is a frequency available for use.

Like other underground micro radio stations, three-year-old Free Radio Berkeley began as a clandestine operation. Dunifer and his friends would climb into the Berkeley hills at night, unpack their equipment and begin beaming their signal out.

He's gone slightly more establishment now, broadcasting from a "collective" of anarchistic-minded people in Oakland. His station airs a variety of programs from a communist talk show to "The Radical News Hour" -- with hosts broadcasting in the nude on Saturdays. Music ranges from African chants to industrial thrash.

Easy listening it is not.

But for Dunifer, a lanky, 44-year-old self-educated engineer who looks like Rip Van Winkle with his long mane and beard, that is not the point.

"It threatens the status quo," Dunifer said of his station. "It threatens the relationships of power in this country. What we call democracy in this country is a consensus among the elite. They want people disempowered, alienated from each other. If people can't communicate, they can't organize. And if they can't organize, they can't fight back."

CAPTIONS: Free Radio Berkeley founder Stephen Dunifer, already fined $10,000 by the Federal Communications Commission for operating an unlicensed station, has a court date in April.

NAMED PERSONS: DUNIFER, STEPHEN ORGANIZATION NAME: FREE RADIO BERKELEY; FEDERAL COMMUNICATIONS COMMISSION

DESCRIPTORS: Radio; Communication regulation and law; Fines; Free speech; Lawsuits

2746. FWD: NCI to sell Las Vegas radio stations.

Newsgroup: rec.radio.broadcasting

From: mjain@ix.netcom.com
Message-ID: <4ioavs$88g@vixen.cso.uiuc.edu>
Source record: 24932

COLUMBUS, Ohio, March 15 (UPI) -- Nationwide Communications Inc. will sell two radio stations in Las Vegas, the nation's 48th largest radio market, company officials announced Friday.

NCI said the American Radio Systems Corp. of Boston had entered into a contract to acquire KLUC-FM and KXNO-AM for $11 million. The sale was subject to Federal Communications Commission approval.

``Our company's current strategy is to own and operate stations in the nation's top 25 radio markets,'' said NCI President Steve Berger, adding Las Vegas did not fit that profile.

NCI earlier this month announced it intended to buy KMJZ-FM and KSGS- AM in Minneapolis and KFSD-FM in San Diego. Minneapolis is the nation's 16th largest radio market and San Diego is the 15th largest.

American Radio owns or operates 15 FM and nine AM stations in Boston; Baltimore; Hartford, Conn.; West Palm Beach, Fla.; Rochester, N.Y.; Dayton, Ohio; and Austin, Tex.

NCI, a subsidiary of the Columbus, Ohio-Headquartered Nationwide Mutual Insurance Co., now owns or operates 12 radio stations in seven states. The NCI stations are in nine markets: Dallas, Houston, Baltimore, Las Vegas, Cleveland, Seattle, Phoenix, Orlando, and Columbus.

Reply-To: wallyaudio@aol.com (WALLYAUDIO)

I am looking for either a Technics EPA-B500 tone arm or an SME 3009/S2 or S/3 tone arm to mount with the Technics SH-15B3 base for their SP-15 turntable. I have a large number of 78 RPM discs I need to transfer to DAT and want a good arm for the project. I would also consider purchase of a complete SP-15/Base/Arm combination if that's what you have to offer. I'll pay a fair but reasonable price.

Also, I'm looking for a Gates/Harris Executive audio console. Prefer one in good condition and unmodified if availible. Again, I'll pay a fair but reasonable price. I know, they are UGLY, but there's still a certain charm to 'em.

Items are for personal use.

: Turns out, it ended up going around 30 takes. But *not* because of
: George Burns -- he was the only actor who knew all his lines, and got
: everything right, every time.

Another story that was told to me by one of the participants:

Back in the late 70's George Burns offered to cut a fundraising promo for the then tiny KCRW Santa Monica. Needless to say the station personnel were thrilled and spent hours putting together a script. The production director took it over to Mr. Burns' office, along with a cassette machine to record the track.

George glanced at the provided script, remarked that it was duller than ditchwater and told the guy to start the tape. 60 seconds later he'd ad-libbed a funny, interesting spot that just happened to hit every point mentioned in the original script.

Kevin Tekel wrote the quoted material below:

" 1 watt on AM in daytime could go about a mile or two. During the
" night with not much interference it could go a lot farther [....]

I once worked for a station with 5000 watts daytime, damped down to 200 at sunset, then down to 43 at night. The 43 watts came from a TIS transmitter hanging on the side of the 5kw rig. The 200 watts came from the 5kw with lots of resistors. The 43 xmtr could be heard better than the emasculated 5kw job running 200, probably because of plate versus grid modulation methods. Anyhow, once during daytime the 5kw rig shut down and we had to switch to the 43 watt. Most listeners didn't notice a difference. At night, however, the 43 wasn't enough to overcome the co-channel noise soup.

D.M. "Quozl" Falk wrote the quoted material below:

" Here in Eureka, CA, we get an FM relay of KGO 810-AM San Francisco. The
" FM relay is listed as KGOE 105.5 FM...

>From what I have been able to piece together from the situation, the guy who owns the C. Crane Company (DX antennas, radios, etc, by mail order) saw that KGO pulled a higher audience share at night, 250 miles away than any Eureka/Arcata/Fortuna station did. Also, during the Ferndale quake a couple years ago, KGO was a more useful source of news than any area station, and in fact had sent a reporter up to Eureka to cover it.

I understand that KGOE pays KGO a carriage fee, gets ISDN delivery of KGO's signal, and apparently can cover some spots with their own local spots. Not a bad deal at all.

Below, excerpts from _THE PEOPLE'S ALMANAC #2_. The chapter titled SOME STATIC IN RADIO HISTORY begins on page 730.

(begin excerpt)

1922

Feb. Secretary of Commerce Herbert Hoover

(content deleted)

said "it is inconceivable that we should allow so great a possibility for service to be drowned in advertising chatter."

1931

Jan. 4 Father Charles Coughlin, a radio commentator since 1928, asked his listeners whether CBS should be permitted to muzzle him after that network had demanded advance copies of his increasingly political, sometimes anti-Semitic "sermons." Although more than a millino pro-Coughlin letters inundated his studio at the Shrine of the Little Flower at Royal Oak, Mich., CBS executives pulled the priest's plug anyway. Coughlin set up his own network, and in 1934 a national poll named him the second most popular man in the U.S.--topped only by President Roosevelt. By 1940, however, he had drifted so far to the right that his program was forced off the air by his ecclesiastical superiors. He continued to expound his political views from the pulpit until his retirement in 1966.

(content deleted)
1946

Oct. 28 Through the letters column of the Chicago _Tribune_, Lee De Forest upbraided the members of the National Association of Broadcasters: "What have you gentlemen done with my child?"--and then went on to bemoan the proliferation of commercials.

1947

May _Counterattack: The Newsletter of Facts on Communism_ began publication. From this eventually came _Red Channels_, a handy guide designed to keep radio sponsors posted on the latest "Commies" infiltrating the industry. Many performers, writers, and directors thus suspected of left-wing leanings were blacklisted for years; others so branded were drummed out of the business for good.

From: BROCKRADIO@aol.com
Message-ID: <4iob0t$8a4@vixen.cso.uiuc.edu>
Source record: 24948

Get out your radio logs, and note these changes in Hawaii Radio:

AM on Oahu
990 KIKI still dark (Was oldies, lost antenna site.)

1130 KLEI still dark (Was Big Band. Dark for over 10 years. Lost antenna site)

1170 KOHO still dark, was Japanese. Lost antenna site. Expected to return in six months as Radio Ahs, on the tower shared by KHNR-650, and KJPN-940.

1540 KISA now dark. Was Filipino, sold last month for $200,000, and taken off the air.

AM on Maui
1570 KUAU still dark. Wasn't on for very long.

FM C.P.'s comming to Oahu
99.5 KORL due on April 1st. Co-owned by KDEO-FM. Will be brokered to "World-FM" as a Japanese Tourist Station. U.S. CHR, Japan CHR, Tourist advertising.

104.3 KPBL due on this Summer. Co-owned with KRTR-FM. Jerry Clifton is involved, so you speculate on the format.

105.9 to be on in 1997. Format to be Hawaiian.

Bear in mind that before 1984, the FM Broadcast band in Hawaii ended at 97.9 Mhz.These new C.P.'s represent the slow opening of the band. Before 1984, 98 to 108 Mhz was used for inter-island telephone relays. Now that was DX.

2764. Re: Selecting station for company's phone system "music on hold"

Newsgroup: rec.radio.broadcasting
Date: 1996-03-21 00:00:00 UTC
From: k8zgw@hamnet.org
Message-ID: <4iquml$207@vixen.cso.uiuc.edu>
Source record: 24700

As quoted from <4iimen$99i@vixen.cso.uiuc.edu> by wa2ise@netcom.com (Robert Casey):

+---------------
|
|
| This past week, my technician (at the electronics company I work for)
| inquired about putting some music on the company's phone system "music
| on hold" system. I had a "piece of junk" old AM\FM 1970's vintage
| portable AC/battery radio in my office. Took it to the storage room
| where the phone switching equipment (AT&T Merlin?) is mounted, next to
| the Sun computer workstation network wiring hub. Too much computer
| RFI, coupled with being in one of those company "glass box" kind of
| office buildings, meant I couldn't get ANY stations back there. But
| could get several stations when using the radio next to my desk (which
| is next to a window, lovely view of the parking lot). The phone system
| has an input RJ11 jack for the music signal for the "music on hold", and
| there was an interface box that converts from single ended RCA jack to
| balanced RJ11 phone level audio. Initially, I used an extra pair of
| phone wires running along side my desk phone's lines to pipe the audio
| from the radio (next to the window) to this interface jack next to the
| phone system. Too much crosstalk to my phone line, so I moved the
| interface to my desk, and now convert the radio's audio to phone line
| levels and then pipe it to the phone system equipment in the back room,
| no more crosstalk.
| Then I took the steps to be sure that the music as head by someone
| placed on hold would sound decent. I used my desk phone and dialed
| thru the outside world and ran over to the operator's position and
| put myself on hold, and I adjusted the level to get clean sounding
| music at a listenable and compatable level of sound. I suspect most
| companies skip this step, as I've heard lots of distorted music on hold.
|
| Last, but certianly not least: selecting which station to have heard
| by someone on hold. Sorry rap fans, I don't think management would
| want rap music (I didn't eighter!). AM reception is not good enough,
| FM got several stations decently. I don't think I could get away with
| Howard Stern on hold! :-) Not that I'd do it. Modern music may be
| too new for some of our customers (25 to 55 years) and I couldn't get
| any classical stations. So, I settled on an oldies station, strong
| clean signal, and (I think) an in-offensive format of music. You know,
| the kind of oldies station that play the usual playlist of 800 songs.
|
| The big boss's out of town, wonder if he'll notice when he gets back. :-)
|
| [Moderator's Note: I have heard that using broadcast music such as

| this for either customer background music OR music on hold, is not
| permitted by ASCAP and BMI. That is why background music services
| charge so much, they are paying additional BMI/ASCAP fees for the
| use. Any other observations? Bill]
|
| As a small telephone interconnect, we often put in music on hold for
our customers. The first thing I tell the customer is that it is "not
legal" to use the radio for your music source because of ASCAP/BMI.
You could get an ASCAP/BMI license but the cost is around $300.00 per
year. (this figure is just "rumor", it could be less, or more)
Another option is to use "Talk Radio", because they play no music, you
should be safe from ASCAP/BMI. Would you/could you have " Rush on hold"

Yet another option, a custom "on hold program" (which I will be glad to
sell you :-}) which uses non copyrighted music.

Remember, its not how the music gets to the MOH or who plays the music
but the fact that it is "regestered" with ASCAP/BMI that makes it "illegal"
|
|The best, IMHO, is to use C.D.'s of old classical music that is not
copyrighted. You can find some great "no name" C.D.'s at Best Buys or your
local record store for around $6 or $8 and have no ASCAP/BMI worries.

Remember, you only "need" about 8 minutes of program for most MOH apps,
because if the customer is on hold for more then about 4 minutes at a time
something is bad wrong. (I know thats not good grammer, but makes the point.)

I hope this helps someone.

2765. 1996 IBS National Convention

Newsgroup: rec.radio.broadcasting
Date: 1996-03-21 00:00:00 UTC
From: Jeff Tellis <jtellis@mhv.net>
Message-ID: <4iqumn$209@vixen.cso.uiuc.edu>
Source record: 24701

The IBS National Convention for school and college radio
stations is scheduled for the weekend of April 26-28, 1996,
at the Hotel Pennsylvania in New York City.

There'll be sessions for everyone at the station, including
station managers, program directors, music directors,
news directors, sports directors, promotions directors,
chief engineers, faculty advisors, and on-air staff.

It all happens in midtown Manhattan, across from Madison
Square Garden and near all of the clubs and other places
you want to go while youre in New York.

For more details, registration and hotel reservation info,
visit the IBS Convention web site at:

http://www.isn.net/~bizz/IBSConvo.html

Questions? Email to IBSHQ@aol.com

IBS is a nationwide, nonprofit association of school and college
radio stations providing information and support since 1940.

> Bill

Well, the people to complain to would be the FCC, as the locals usually
don't get involved.

However, before going the FCC route, you ought to do a little detective
work yourself. Take a portable radio, and see if it can detect the
interference; if the interference can be detected, try roaming around
inside your house w/ the portable to see if the interference is coming from
a particular indoor electrical/electronic source (computer monitor, digital
clock display on an appliance, garage door opener, light dimmers, etc.).
If you do find the noise source in your house, try powering down that
source whilst listening to the Telefunken to verify that the interference
does indeed disappear. Solutions to a "home based" noise problem will vary
from simply turning off the offending source to outright replacement of the
offender, so it'd be difficult at this time to suggest a particular fix.

If you've exonerated everything in your house, the next thing to do would
be to wander around your yard & immediate neighborhood w/ the portable to
see if the problem is due to something amiss in the local power
distribution grid (e.g., a bad insulator on a pole). If it looks like
that's the problem, you could contact your power co. about it. If your
walkabout suggests the noise
is originating from a neighbor's house, you'll have to decide what
subsequent action to take depending on your relationship w/ that particular
neighbor...

Oh, one thing to keep in mind w/ respect to the FCC crowd is whether the
interference is strong enough to step on local stations or if the noise is
detracting from your ability to DX a station like KRLD, WBBM, etc. - they
may be less inclined to help if it's only impacting stations outside your
local area.

Good luck -

TGB

If attempting to clear the interference at the source proves to be a dead end, there is a gadget on the market that reportedly is highly effective in minimizing interference on the receiving end. It is an add-on box called the ANC-4 noise canceller and it's connected between your antenna and the receiver. It workss on the principle of picking up a sample of the noise on a small built-in (or external) whip antenna. This noise sample is then amplified, variably phase-shifted and mixed 180 degrees out of phase with the incoming signal, effecting a cancellation of the noise. Unfortunately, I don't have any further info on this product at this time; perhaps someone else will be able to provide same after reading this.

I mention this product as a result of having read some very positive things about it from users such as BCB and SW DXers. If I find out who makes it, I'll post the info here later.

So do we at MUSICAM USA. Indeed, all of our CDQPrima models shipped in the past month, have four pre-programmed 'Quick Configurations' for the Telos Zephyr at 56/64 kb/s and 112/128 kb/s Layer II. There are also 'Quick Configurations for 56 and 64 kb/s G.722.

If you own a CDQPrima, any model, and would like us to download the Zephyr configurations into your codec, respond to me via e-mail and we will arange a download.

2771. Re: Low-powered AM

Newsgroup: rec.radio.broadcasting
Date: 1996-03-21 00:00:00 UTC
From: Fred Weinberg <fred@ktrt.com>
Message-ID: <4iqun0$20j@vixen.cso.uiuc.edu>
Source record: 24707

Those of us who own many Class IV (Class C) AM's in our portfolio (four in my case) are considering a run at the FCC to increase the power from 1,000 watts to 2,500 or 5,000 watts. Our engineers tell us that it is feasible given the NRSC rules, more selective radions and the fact that we have admitted we are not trying to "preserve" those channels for new entrants.

The arguments are simple. The stations were designed to cover local markets. Their power was increased from 100 to 250 to 500 to 1,000 watts over the years as the AM band grew progressively more noisy and the markets grew past the geographic boundries of the power allowed.

Now, those of us trying to cover Las Vegas and Oklahoma City with those stations can make the same arguments again. And the real question is who cares? My bet is that we ask for 5Kw and we get 2.5 or 5 days and 2.5 nights.

>more.

True in general, Bob, but not always. Just ask my friend Bob Bittner,
who owns WJIB 740 Cambridge MA, 250 watts day, 5 watts night, ND.
For Boston listeners, WJIB sits between 50kw giants WRKO 680 and
WEEI 850 on the dial, and within Rt. 128 (the main ring road around
Boston), I'd venture to say few listeners can hear much difference
between the 680/850 signals and the 740 signal. Sounds incredible,
but it's true. At night, the 5 watts still get out within about
an 8-mile radius. I live 5 or so miles from WJIB, and it blocks out
co-channel CBL Toronto for me at night. Within that 8 mile
radius, Bob can reach probably half a million listeners, easily.

Given a choice between 50kw, highly-directional WNRB 1510 Boston and
Bob's little 250 watt station, I'd pick WJIB any dalight hour of
the day.

There are a lot of very marginal AM signals out there, but there are
many factors beside sheer power.

[One note: Bob does have problems with skywave from CBL on winter nights,
so from December till April, he signs off at 11pm and back on at 6am.]

I have gotten into many an argument over my impression of city grade coverage vs to old 25 mv/M or the "new" 5 mv/m limits. I have always believed than something around 100 mv/m is more realistic in this day and age. I have tried to accomplish this goal with the stations I have built. If all stations raised power equally....oh well no point in daydreaming.

compiled by Uli DK2GO @ HB9EAS.CHE.EU
Edition 130

** VHF/FM News ** (all QRGs in MHz)

* BELGIUM
BRTN Radio Donna at Schoten on 89.00 now using 20 kW, RTBF-2
Frequence Wallonie at Wavre on 101.10 / 50 kW. (FMBB, R. Brand)

* FRANCE
New stations in the Mulhouse area: Europe 1 on 94.80, RTL on 107.10,
RTL 2 on 91.20 MHz (ex R. Porte Sud) and Emission Habsheim on 98.10.
(C. Bruelhart, DK2GO)

* GERMANY

* Baden-Wuerttemberg:
New transmitters: S2 Stuttgart-Degerloch 105.70 / 75 kW (ex 87.90 / 1 kW),
S4 Frankenradio in Bad Mergentheim on 105.50 / 10 kW (ex 100.50 / 5 W).
Planned: S4 Kurpfalzradio in Buchen-Wallduern 107.50 MHz / 25 kW. (K. Hahn)

* Bavaria:
Antenne Bayern in Hochries on 107.70 now with 50 kW (ex 10 kW).

* Berlin:
New station: "Newstalk 93,6" on 93.60 MHz with a low-profile talk px.
Power changes: KISS-FM 98.80 / 3 kW, RTL 104.60 / 8 kW,
Klassik-Radio 101.30 / 5 kW. (DC7ER,MABB)

* Brandenburg:
ORB Fritz auf 100.10 MHz is to be moved from Angermuende (3 kW) to Casekow
(50 kW) during March. (DG2NUH)

Berliner Rundfunk 91,4 now transmitting also via Cottbus 102.20 / 3 kW and
Casekow 100.90 / 1 kW. BB-Radio on air in Pinnow on 104.30 / 100 kW,
Inforadio in Calau on 104.40 / 60 kW. (DC7ER, DC7TL, MABB)

* Hesse:
hr 1 new at Heidelstein/Rhoen on 104.80 / 50 kW (ex FFH Vogelsberg).
FFH Eschwege (104.60) has been closed.

* Mecklenburg-Vorpommern:
DLF is on air in Garz on 104.00 / 10 kW. (DG2NUH)

Ostseewelle on air at Heringsdorf on 103.30 / 2 kW, Antenne MV at
Heringsdorf on 105.40 / 10 kW and at Garz on 105.10 MHz / 50 kW.

* Northrhine-Westphalia:
New transmitters for local stations: Radio RST Tecklenburg 104.00 / 1 kW.
Antenne Niederrhein at Kleve on 90.10 / 0.2 kW.

* Sachsen:
DLF on air in Dresden on 93.20 / 1 kW. (DLR)

* Schleswig-Holstein:
NDR 5 N-Joy Radio new at Heide on 94.90 / 0.5 kW, NDR 4 new at
Luebeck on 95.90 / 0.1 kW. (NDR u.a.)

New network NORA (NordOstseeRAdio) started transmissions on 1-1-96:
Sylt 89.10 / 1, Luebeck 91.50 / 1, Kiel 97.00 / 0.1, Lauenburg 97.40 / 0.5
and Kaltenkirchen 101.10 MHz / 20 kW.
Planned for 1996: Flensburg 88.50 / 0.16, Bungsberg 106.20 / 0.25,
Schleswig 92.40 / 1, Garding 94.10 / 0.5, Helgoland 101.60 / 0.5,
Neumuenster 88.90 / 0.5, Rendsburg 93.60 / 0.5, Itzehoe 104.90 / 1 kW.(ULR)

* SWITZERLAND
At the new Chasseral site DRS 1 (103.00) und RSI 1 (107.30) are on air
with 20 kW. On the Saentis, RSR 1 is new on 99.90 / 44 kW, RSI 1 will
follow on 107.80. (C. Bruelhart)

I can recall WFIL in Philadelphia was so conservative, they made their own version of Paul Simon's Kodachrome. They snipped the phraze, "crap I learned," and replaced it with the phraze, "girls I knew," from the next verse. I don't remember anyone else doing this, and the first time I heard it, it really knocked me for a loop.

In May 1991 I came to Hawaii to work for Radio Free Hawaii (KDEO-FM), a commercial station with music controlled by a listener ballot system to this day. It was just prior to start-up for the new format and the PD was concerned because NWA's "Fuck the Police" had made the initial playlist and he didn't know how he could play it. Having never heard the song I volunteered to get out the blade and reverse a few "fucks" (the station had only the bare essential equipment at that time). Well there are somewhere around 150 or so "fucks" in that track (I lost count) and that's how I spent my first working day in paradise. They carted it up, called it "FCC the Police" and played it for months until the cart broke. I think they later recreated it using a Harmonizer. I have never voluntarily listened to an NWA song again.

Easy - contact any nearby electrical wholesaler. One that
services major electrical contractors. They will give you a
competative quote. You can get the wire in "small putups"
which are suitable for small tractors and can be handled by
one person, or you can get put ups of around 25,000 feet per
reel. Requires a "Cat" to handle. The 25,000 foot putups
cost somewhat less. It all depends of what you will be using
to install the ground system.

Rosa Rio is (or was) performing silent movie organ soundtracks for a company called Video Yesteryear in Sandy Hook CT. I presume this has to be the same Rosa Rio. Perhaps she can be reached through them.

>William Brainard
>p020188b@pbfreenet.seflin.lib.fl.us

This brought back memories; I was an engineer for WTIC, and went with Dick Bertel to Rosa Rio's home in southern Connecticut to record the interview and some of her music. We then brought the tape back to the station and added excerpts from some of the old radio shows for which she provided the music. I remember her as a gracious lady. It was especially meaningful for me, since I had grown up on old-time radio and remembered hearing her music and her credits for years.

Incidentally, Dick Bertel is now Chief Producer at the Voice of America in Washington, and I'm also at VOA, working as a technical project manager!!!

: have to conform and get letters beginning with "W". WOW in Omaha would
: have to recieve a "K".

Minnesota is in some kind of strange Twilight Zone, what with the
Mississippi running through* the state, not just along a border. There
are plenty of mismatched designations in the state, including both W & K
call letters in the Twin Cities (WBOB most recently, even though it's
studios are in Minneapolis, i.e. west of the river-- but then what about
KCFE, which is also located west of the river?) and St. Cloud, where
the river runs just west of that city but through the middle of it's
'metro' area. Compounding the confusion in the Cities is the fact that
many stations share the same tower, which is located east of the river.

Egads!

2785. Re: SALES: Is there a Future for free standing AM's?

Newsgroup: rec.radio.broadcasting
Date: 1996-03-21 00:00:00 UTC
From: Fred Weinberg <fred@ktrt.com>
Message-ID: <4iqunc$215@vixen.cso.uiuc.edu>
Source record: 24721

We do it every day and I'm buying as many stand-alone AM's as my bankers will let me. True, we're networking some of them and clustering some of them geographically, but if you think Infinity is going to serve Muskogee Oklahoma (or Tulsa, for that matter) as well and as cost effectively as my staff, you are smoking something.

We sell radio the old fashioned way. We make 20 calls a day and we sell radio before we sell our stations. We NEVER badmouth other radio stations and we try and solve our customers' problems as opposed to dropping a rate card on the table and saying take it or leave it.

Finally, we deliver results. We have a filet of audience that buys things and doesn't need the credit department to pay for them.

Yes, the big boys are going to get the buys made by 23 year old media buyers who can barely read an arbitron book much less realize that most of it is nonsense, but any mom and pop merchant (and there are over 21,000 of them in Tulsa) can be sold radio with the right approach. And most of them can't afford $120 morning drive spots.

I can't speak for WBZ, since they are not currently a client of mine, but I do have friends there, and my best guess is that with a new owner (CBS) rigorously evaluating all current expenditures and with several staff changes and a PD having left, their priority right now is something other than a home-page. Given how promotion-minded WBZ has been in the past, I'm sure they'll get to it at some point, but right now I think everyone is waiting to see who the decision-makers will be as the new CBS leadership goals evolve. donna halper/halper & assoc.

I saw your post in Airwaves Online. Let me try to help. In answer to your basic question--does the info in the database tell you in which direction the station broadcasts? The answer is, for most people, it does not. You need to know quite a bit about the design of directional arrays and the location of other stations on the frequency to even guess successfully about the nature of a station's directional pattern given the information in the database. If you have the information about the location of other stations and you know which stations have been on the frequency the longest, you can probably guess at the shape of the pattern just as successfully without the database info as with it.

What you need is a book of directional patterns. The National Radio Club has just announced the publication of a new edition of its Night Pattern Book (publication number NPB). Like all NRC publications, it is available at a very reasonable price (US$16.95 for NRC members in the US and Canada, US$22.95 for others in the US and Canada). You can order a copy from Ken Chatterton, NRC Publications, PO Box 164, Mannsville NY 13661.

As to degrees, the database uses the term to mean two quite different things. When it talks about orientation, it is referring to degrees of the compass, which divide a circle into 360 degrees. Zero degrees is true North, 180 is due South, 90 is due East and 270 is due West. When the database talks about spacing or tower height in degrees, it refers to electrical degrees, a unit of length. To determine how much distance one electrical degree equals, you divide the station's wavelength by 360. To determine the station's wavelength in meters, divide 300 by its frequency in MHz. A station operating on 1000 kHz (1 MHz) has a wavelength of 300m. To convert meters to feet, multiply by 3.28. Thus the wavelength at 1000 kHz is 984 ft. To determine the spacing between towers or the height of the towers, multiply a distance equal to one electrical degree by the spacing or height in degrees that you see in the database.

AM station antenna heights vary. Generally, stations on lower frequencies must have taller towers to achieve reasonable efficiencies. However, because AM groundwave propagation is more efficient at lower frequencies, if everything else is equal ("everything" in this case being the electrical height of the towers, the number of conductors, and the electrical length of the ground system, the soil conductivity--a very important factor, and the directional pattern), a station operating at a lower frequency will have much better daytime (groundwave)

coverage than another station operating at a higher frequency. A very rough rule of thumb is that if you double the frequency, you need 20 times the power to get the same coverage.

Ground conductivity has a dramatic effect on AM propagation. The best natural conductor of medium-wave signals is salt water, which has a conductivity of 5000 millimhos/m. In Kansas, the Dakotas, Eastern Montana, Saskatchewan, and Alberta, the soil conductivity in many places is 40 mmho/m. The largest area coverage of any AM station in the US belongs not to a 50 kW station but to KFYR in Bismark ND with 5 kW on 550 kHz. KFYR has the benefit of a low frequency and excellent ground conductivity. In other parts of the country (the area around Atlanta, and Litchfield County in northwestern CT are two I happen to know about), the conductivity is as low as 0.5 mmho/m, just a little more than 1/100 as high.

Another factor affecting coverage is antenna height. By keeping the discussion of antenna heights in degrees, you can normalize for the effects of frequency. The most efficient AM antennas are somewhat taller than 1/2 wavelength (180 degrees). The most common height is 1/4 wavelength (90 degrees). Reasonable efficiency is achieved down to roughly 1/6 wavelength (60 degrees).

The 50 kW station you cited had towers of 135.5 degrees, midway between 1/4 and 1/2 wavelength, and had an rms field of 2355 mV/m, where rms means root-mean square. This number is the unattenuated field at 1 km. What that means is, if the ground were perfectly conductive and you took field-strength measurements around the compass at a distance of 1 km from the electrical center of the antenna, and you took the square root of the average of the squares of the measured field strengths, the result would equal 2355 mV/m. The reason that you have to take a bunch of measurements around the compass is that the station is directional. The effective field strength in some directions is quite low and in other directions is equivalent to a power much higher than the actual 50 kW antenna-input power.

Class I stations are required to have more efficient antennas than Class II or III stations, which in turn are required to have more efficient antennas than Class IV stations. The minimum unattenuated rms fields at 1 km with 1 kW for the various station classes are: Class I 362 mV/m, Class II and III 282 mV/m, Class IV 242 mV/m. Since the station you cited operates with 50 kW, to make comparisons with the field strengths just above, which are for 1 kW, you must divide by the square root of the power ratio, in this case 7.07 (the square root of 50). The cited station has an rms field of 333 mV/m/kw, which is consistent with its antenna height. I have found some stations in the database for which the normalization to 1 kW is already reflected in the numbers. So be

careful. If the numbers don't sound right, try multiplying by the square root of the power ratio and compare the result with the figures for other stations with the same power and roughly the same antenna height.

A way of slightly increasing a station's antenna efficiency is to top-load the towers. This station (like most AM stations) does not use top-loaded towers. You can tell from the top-loaded(0) notation. If the towers were top loaded, the listing would read top-loaded(1). Top loading is sometimes accomplished by placing what looks like an upside-down top hat on top of the towers. It can also be done by using a portion of the guy wires that support the tower. Implementing the guy-wire approach to top loading (used by two Boston-area stations that I know of--WRCA 1330 and WNTN 1550) looks to be quite inexpensive and I don't understand why more stations haven't used it.

Well, I hope that helps to answer your questions. It sounds as if you are not an engineer or an engineering student. Hence I don't know if you really care about this stuff. I find it interesting, though.

In Minnesota, stations can have either W or K... the line that divides
K-land and W-land kinda twists around... In Minneapolis, about 1/2 the
stations are K's and about 1/2 are W's.. To the best of my knowledge,
they can all run 100K as if they were on the west of the Mississippi

2791. ADMINISTRIVIA: Real Name Policy (repost)

Newsgroup: rec.radio.broadcasting
Date: 1996-03-21 00:00:00 UTC
From: Bill P <rrb@clm.aiss.uiuc.edu>
Message-ID: <4iqum8$1vm@vixen.cso.uiuc.edu>
Source record: 24780

[Moderator's Note: This is a repost of the results of a straw poll conducted on this group, about a year ago, regarding the use of 'real names' on the rec.radio.broadcasting newsgroup, and its companion digests such as AIRWAVES and AIRWAVES-SELECT. It is posted for your information and understanding of this policy. Bill]

Hello All:

Well this has certainly been an interesting poll.

I received 70 replies to the request for input on the subject of requiring 'authentic' or 'real' names on AIRWAVES/rec.radio.broadcasting by the cutoff time, and several after that time.

The idea stems from conversations I have had with Barry Mishkind about his belief that requiring real names on the FIDO broadcast echo has raised the signal-to-noise ratio substantially on that forum, without any perceptible negative effect. Since we are, primarily a professionally oriented forum of adults, it seemed like a good idea to encourage, and even require a poster to sign a real name to her/his name t their post.

So I posed the question to the group to see what all of you felt. The results are kind of interesting in that what was originally a binary choice question, has turned out to shed quite a bit of light on the ideas of this group.
The Votes

If you just count the votes, you have a landslide in favor of real names that Nixon would have been proud of!. Like 59 Yes votes to 11 no votes. However those ballots dont tell the whole story. It was in the stuff written AFTER the vote that told <begin Paul Harvey Mode> "The Rest Of The Story" <exit Paul Harvey mode>.

THE YES VOTERS' ISSUES:

1) Higher brain-balone ratio as posters would be required to identify themselves and their posts.
2) Having some kind of handle on who they are corresponding with.
3) Having a real name attached to a post adds maturity and professionalism to the discourse.
4) Handles are the domain of children and game players which have little if any place on a quasi-professional forum.
5) Rumor control would be improved as those posting such would be forced to identify themselves.

========= HOWEVER ========

Despite the smaller numbers, there was also substantial and moving input from the NO voters too.

1) Denial of access based, not on content, but on a perception of what constitutes a 'real' name.
2) Some misunderstandings on matters of 'air names' being considered as valid as birth names for those posters who choose to only be known by their air names for various reasons.
3) Concern over repercussions against those who post advance or 'sensitive' information and the impact of that possibility on the quality of information the group will see.
4) Concerns over increasing restrictions on postings and where it will lead/end.

So, it is not just a cut and dried matter as the raw votes would suggest. So after looking at a variety of very good reasons why and why not, I concluded that the following would come as close to pleasing most readers who have replied.

1) Since we are all adults here, and this is a fairly professional forum, we can safely, I believe, call a halt to 'handles' as the sole name on a post. By Handle I speak of non-realistic nick-names as one might find on CB or IRC (RockMeister, RadioGod, ad-nauseum). Virtually all of the yes voters saw this as the real issue. If you have an account with a "handle' type name attached to it, dont fret. Just sign your name at the bottom.

2) 'Real name' is defined as a) Your real, legal name - or - b) Your current on-air name (or name you are known as in the business). If you do want to use your air-name, it would be appreciated if you also include the station/network too, so people know which 'Chris Cannon' we are talking to :-) <latter is NOT required, though>.

3) Situations which are unusual, or which require an anonymity will not be locked out. It should be brought to my attention in the article. Example: If posting information under your real or air name would endanger your job or standing, tell me about that and Ill be sure you are covered.

4) Any poster seeking work in the biz, or looking for T&R's from talent in the group must have a real name, postal address, and preferably (but not required) a voice phone to post here. This is an attempt to keep scams from proliferating while not restricting good, valid information.

5) Any poster who has a commercial affiliation, and starts (or contributes to) a thread involving their type of products, they MUST identify themselves and their company. Even if they are not directly promoting their wares in that particular post, and even if they are not officially speaking for their company. With the increasing level of commercialism on the net, I would like to make sure that those with a commercial axe to grind do so in the open. I will not kill a post simply because it is

made by a person with a commercial affiliation, but you *must* make it clear that such is the case.

It is also good to remember that a real name will make your post more credible and will increase the chances that you will receive credible replies. Many on this group have told me that they wont even read, or reply, to posts with 'handles' as the sole means of identification.

A few voters suggested banning all AOL posts. While AOL is the biggest offender of handles (by allowing multiple screen-names per account) I cannot see banning all of AOL. Many good users use AOL and I wont join the anti-AOL crusade at this point. However I sure wish they would stop offering multiple logins on one account.

Also, I am not going to be bothered following up on or checking up on the validity of names, unless there is a problem with a poster posting libelous, or fraudulent material on this forum. The move toward real(istic) names is merely an attempt to control the silliness that some handles bring with them.

I certainly hope we can all live with these policies. I tried to take into account, the various reasons people had for their opinions, rather than just counting raw votes. Everything done here is in the interest of maintaining an intelligent, respectful, informative and fun newsgroup/list for those who work in, have worked in or take a personal interest in the great field of radio broadcasting.

Unlike many Net Moderators, I actually care about the users of this forum. While lines have to be drawn someplace, I try hard to remain responsive to the needs of the posters and readers. As I have said numerous times, we have the greatest, most knowledgeable, friendliest group of radio-heads assembled anywhere. Lots of posters have written to say that they get more information, and more timely information from this forum than from traditional trade pubs. Many old friendships have been re-united via this group, many new ones have been formed.

I often receive mail thanking me for this product. While I do a good little bit of work keeping the noise down to a minimum, and I appreciate the kind words, let it be known far and wide that I am responsible only for what you *dont* see here. What you *do* see in the pages of AIRWAVES and r.r.b is to be credited to * YOU * the people who ask the questions and post the answers. I am honored to be among such great minds.

My personal mail box is always open for anyone who wishes to write. I answer ALL mail (some might take longer than others) so feel encouraged to write. <wdp@airwaves.com>.

Sincerely

William Pfeiffer
Moderator rec.radio.broadcasting/AIRWAVES

Help wanted:

Television transmitter operator

This position is an ideal position for an older operator/engineer type who is now finding it a bit hard to find work due to his age. To me, thats an advantage if with that age comes a few years experience with an old GE low band vhf transmitter. Are you reasonably sober? Does the phrase "TF-3A" mean anything to you? If both answers are yes, then I need you to:

Come to Wild, Wonderfull West Virginia. Watch the deer and turkeys play out your window, or ours. Hear the music of an occasional coyote in the evenings.

The duration of this job could last from now till we pull the plug on the last NTSC transmission, which at the current state of progress, might never happen! Most assuredly another 8-10 years. Our transmitter has never been remote controlled, and has very little prospects of ever being remoted. It is fairly stable, but not enough that I'd feel good leaving it alone for days at a time.

We are of course, an "EOE" company, and have an insurance package thats about par for the times. We maintain and fuel a 4WD pickup, currently an 89 Ford 150 series, so that you won't have to beat your vehicle up when the road goes bad with the weather. In the last 2 days of my running that 1/2 mile of road, I've counted deer in quantities of 10 or so twice, and wild turkeys, one yesterday, then tonight about 20 in one group about roosting time. Several nice beards were noted in that group!

Our city of license is Weston WV. The transmitter is 3 miles north on state hiway 19, and I-79 going north-south runs right by our doors. Our studios are located in Bridgeport, at the 119 mile marker of I-79, just get off and follow your nose to the bottom of a 250 foot tower thats visible from the exits.

If you think this might be an old, comfortable shoe to settle into, give me a message at the email address in the sig below, or a resume to:

Gene Heskett, CE
WDTV
P.O. Box 480
Bridgeport WV, 26330

Or a phone call, your quarter, to 304-623-5555, afternoons to enhance the chance I'll be at that number.

The April issue of PC Computing has a review--well, a sneak preview, anyway--
of the latest offerings from Sony.
The MultiSync LCD300 (13" display area is equivalent to what you get
on a 15" CRT) is $5,999 and the smaller LCD200 is $3,999. As the preview says,
these prices are "without the computer."

Hi folks...

Anyone doing a street patrol thing where the van and someone from the station go out to some heavy traffic area...whether a mall, an intersection... somewhere...to shake hands and kiss babies? I'm talking about assigned weekly deals...not necessarily broadcasting, which means not during the regular scheduled airshift.

Typically (is there a typically?), are these things staffed by full-time on-air folks? Morning shows...PM drive guy? Or do they go to DangerBoy and such...interns...?

We're going to be doing these things and I was just wondering how much complaining I might feel justified to do? ;^)>

But seriously folks...any ideas to make these things more than just a regular old "Hi, how are ya? Here's a sticker!" Tickets and stuff, naturally but anything anyone out there is doing in a stop-and-go half hour deal that gives us a little bang for the buck?

Thanks!

John Webster

2801. Country in NYC

Newsgroup: rec.radio.broadcasting
Date: 1996-03-21 00:00:00 UTC
From: wrichard@amanda.dorsai.org
Message-ID: <4iqume$1vv@vixen.cso.uiuc.edu>
Source record: 24790

Broadcasters have been trying to play country music on the radio here in NYC for more than 40 years. WNBC (now WFAN) ran part of the Grand Ole Opry on Sat. nights. Martin Block played the top 5 country hits each Saturday morning on WABC. A guy named Don Larkin did a 2 hour daily program, "Hometown Frolic," on WAAT Newark (This call sign is in use again, but the actual station of that time now is WWDJ, Hackensack.)
WWDJ tried it full time, and it didn't "take."
WHN tried it full time. So did WTHE, Mineola (10 KW at the time.)
Ditto WKHK, and of course, the late lamented WYNY.

The reasons the stations didn't stick with it varied from "no signal" to "no ratings," to "not enough money."

When Scott Carpenter and I did the morning show on WYNY (1989,) we pulled in a fair arbitron rating. It wasn't enough. Westwood, then the owner, fiddled and fiddled, "improved" and "streamlined" the station right into the ground. Jim Kerr couldn't save them. Dan Daniel couldn't save them. They weren't happy to make a few million over costs, so they sold.

The country audience in NY and surroundings is a marvelous group. It's loyal, dedicated, and relatively undemanding. The people come out for "events," and shows. They shop at sponsors' businesses. They go to great lengths to keep the music playing.

It's a damned crime they have to.

I am a native New Yorker. I have lived here all my life. I, too, love the music, and regret it's always been a fight to keep it on the air.

Message-ID: <4iqum9$1vn@vixen.cso.uiuc.edu>
Source record: 24792

A few things cluttering up the notebook since last time:
Country KNIX(102.5) has cut Carolyn Coffee loose...
she'd been part of the John and Bobby morning show.
They will continue.
Talk KFYI(910) has flipped Dr. Laura Schlesinger and Ken
Hamblin's syndicated shows....Dr. Laura moves to 6PM...Hamblin to
9PM. 'FYI says a lot of Hamblin fans
wanted the show on later so they wouldn't have to choose between him
and Suns basketball on KTAR(620).
The "Hot Tub Radio Party" has found its third home
in as many months in the Valley of the Sun. Talk KXAM
(1310) has decided to leave the transmitter on 24 hours(they had been
signing off at midnight)..."Hot Tub" fills graveyard(and no doubt sets
morning talker and former
conservative Republican Congressman Sam Steiger's
teeth on edge). The station was at all-news KOPA(1440) until it
flipped to a simulcast of sister Classic Rock KSLX(100.7)...then
moved to Wickenburg New Age FM KBSZ(94.1)for a whopping 6 days.
And, from Charlie Van Dyke's Arizona Republic
radio column...Phoenix's own Trendata is preparing to
expand...if you don't know about them....they measure
radio listening by monitoring "leakage" from the antennas of passing
cars. It only works with FM...it doesn't give you
demographics...it doesn't give you time spent listening..but it does,
with the right sample size...give you what people are really listening
to instead of what they write down a week later when Arbitron is
asking for the diary back.
Van Dyke printed Trendata's list of Top 10 FM stations
for February...

#1. KKFR(92.3-CHR)
#2. KMLE(107.9-Country)
#3. KNIX(102.5-Country)
#4. KOOL(94.5-Oldies)
#5. KSLX(100.7-Classic Rock)
#6. KDKB(93.3-AOR)
#7. KUPD(97.9-AOR)
#8. KEDJ/KHOT Simulcast(106.3/100.3-Alternative)
#9. KZON(101.5-Alternative)
#10.KESZ(99.9-Adult Contemporary)

Trendata's Top Ten FM Morning Shows for February:

#1. Tim & Willy (KMLE 107.9)
#2. Bruce Kelly & Maggie Brock(KKFR 92.3)

#3. John & Bobby(KNIX 102.5)
#4. Tim & Mark(KDKB 93.3)
#5. Howard Stern(KEDJ/KHOT 106.3/100.3)
#6. Beth & Bill(KESZ 99.9)
#7. Dave Pratt(KUPD 97.9)
#8. Tony Evans(KSLX 100.7)
#9. Danny Davis(KOOL 94.5)
#10.Shawn Burke(KHTC 96.9)

2804. PHOENIX: SEBASTIAN LEAVES KSLX

Newsgroup: rec.radio.broadcasting
Date: 1996-03-21 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <4iqum9$1vp@vixen.cso.uiuc.edu>
Source record: 24793

Citicasters(soon to be Jacor) Classic Rock KSLX(100.7) PD
John Sebastian has handed in his resignation, effective April 5 .
Sebastian will return to Los Angeles(where he has programmed KHJ and
KTWV) as PD of Chancellor Country KZLA. This has prompted rumors of
a format switch for KZLA, possibly to Classic Rock.
Sebastian says the station will
remain Country..but take a different approach....and says
the challenge of working in a format he's never done
is part of what attracts him to the job.
KZLA ranked 21st in the just-released Winter '96 Phase 2
Arbitrends...Sebastian says it should and can be a
top 10 performer.
Sebastian revived KSLX two years ago, dragging
a station and format that most in the market had pronounced
dead out of a 2.2 and up to a 5.1 in three books. It has since
settled into the high 3's.

CORPORATE AIRWAVES RADIO DAZE

I am an unemployed disc jockey.
There are a mess of details that I won't get into, but the bottom line is my boss wanted me to become a dumping ground for sports radio, keeping it short and sweet. But the show needed more of me and fewer interviews with jocks.
I like being me. Not everyone likes it when I'm me. That is the essence of radio.
Even at the height of my career, only nine out of 100 people liked me (or listened to me just to hate me). Recently it was closer to three or four out of a hundred. But even those people, listening for only 15 minutes a day, is enough to make a radio station extremely profitable.
The problem today is that profits, and not creativity, rule the business. That is an exceptional liability in a medium that ultimately relies on the intimacy between broadcaster and listener. It shouldn't be as impersonal as TV, as formulaic, but that is what it's becoming.
I was brought here in 1978 to shake things up a little bit, as I had done in Detroit. I had one of the top rated shows in Detroit, mainly by talking about my life on an FM rock 'n' roll station.
At the time, that was considered revolutionary. A manager in Detroit once had discouraged me from sharing anything with the audience besides the music. He instructed me not even to mention the time of day to listeners because "it bums them out."
When I first came to Chicago and got a job at WDAI-FM, people were checking my forehead for the sign of the devil. Radio here was stilted and boring. Sodium pentothal. Funny stories about animals, every day, for 10 years. The most popular rock station was automated. The Baby Boomers didn't have a voice.
Like my audience in Detroit, they were just waiting for somebody to speak to them.
I did what I did, speaking as 15 different characters, even though they told me not to. The owners got scared, fired me on Christmas Eve and proceeded to go disco.
When I got to WLUP, by comparison a small company, the first thing I did was start making fun of disco. The ratings started to climb. Everybody was happy.
The station, which attracted some of the most creative and iconoclastic people I've ever worked with in radio, was willing to take risks on the air and reaped the financial rewards. Its success had nothing to do with a

formula. There wasn't one.
Nothing lasts forever. In 1980, the station fired me for what it said were assaults on community standards. I spent the next decade refining my own style at three large stations. The more I acted like myself, the more successful I became.
Then I was told to reinvent myself, though I didn't do the reinventing. I got into sports radio at WMVP-AM. That didn't go so well. Too many sports highlights.
After all the changes and compromises, I don't really hate radio. But I'm scared for its future, and mine.
There are no risk takers anymore. I know, I'm so sentimental it sickens me.
But imagine baseball never having Bill Veeck. Or worse, never having another Bill Veeck. No Harry Caray, and no disco demolition.
That's what we've got now, with a handful of broadcasting corporations controlling virtually every important radio outlet.
Don't get me wrong. There are a couple of companies that actually still seem to care about the business of radio broadcasting (especially the ones I'm negotiating with). But most radio broadcasters don't really care about quality if it doesn't meet their bottom-line needs.
The same thing is happening to television, cable, newspapers and periodicals, the information superhighway and the movie industry. Let's hope you'll hear me talking about it. On the radio.

2807. KALC-FM/KIMN-FM Denver Bought

Newsgroup: rec.radio.broadcasting
Date: 1996-03-21 00:00:00 UTC
From: GZJR86A@prodigy.com
Message-ID: <4iqumh$202@vixen.cso.uiuc.edu>
Source record: 24796

Drew,

Someone was spreading rumors that they were going to flip formats of KIMN to country, which to me, seems unlikely, since KIMN has been doing well in the ratings, and has an exclusive format in the market. There is also talk that KTCL (93.3 from Fort Collins) may be switching to country as well. It's anyone's guess.

When we were all debating with regard to the 99.5 frequency (now KKHK - The Hawk), many were saying that nobody would try and go up against KYGO, seeing that Jefferson-Pilot will do anything to maintain their #1 position.

Anyway, as of 12:04pm today (3/20) both stations are still running on format. So, I guess we'll see.

Re: 50kw day/night MW stations in N. America

> " 690 2 CBU Vancouver BC DA1

690 XETRA Rosarita, BC, Mexico DA2

is seventy-five thousand, five hundred screaming watts from seven towers in the San Antonio section in Rosarita. The station is the most powerful station geared for English audience in North America. [before I get flamed, please re-read the previous . . .]

I believe XETRA "Xtra Sports 690" changes pattern at night.

On the Hawaii stations:

I remember KAIM at 50kw when I lived there [1989 - 1993] In fact, the AMer actually broadcasts from another island next to Oahu. There is another 50kw on the Big Island. Perhaps some of our Aloha-DXers could fill in the blanks.

From: tome5503@ait.fredonia.edu
Message-ID: <4itgjj$mda@vixen.cso.uiuc.edu>
Source record: 24651

If anyone is aware of the modern rock "revolution" taking over New York City then you probably know the following; K-ROCK (WXRK-FM) has receintly switched its format to alternative/modern rock. They still have Stern on in the morning, but they dropped the Greaseman at night.

The reason I'm telling all of you this is because I'm a huge Greaseman fan and I'm pissed! I'm going to start writing letters to K-ROCK to chew them out for this horrible act and I would like any fellow Greaseman fans on the list to do the same. There is strength in numbers and I think we can actually make a difference. Between K-ROCK's nighttime ratings plummeting and a large number of letters in support of the Greaseman's show, K-ROCK should see the point; ditching the Grease was a bad move!

I don't think we'll be able to get the Grease back on the air on K-ROCK, but we'll be making a statement about current radio broadcasting. I consider myself the future of radio broadcasting and I'm sickened by what I'm seeing! Shows like the Greaseman show are considered by many (and myself) to be the last traces of "real radio." Back when a show was good because of its content, not how loud and vulgar a disc jockey can be! I fear the future of radio broadcasting if the cancelation of the Grease on K-ROCK is any sign of the times.

I have included K-ROCK's address below. If anyone does not want to write their own letter, I would be glad to e-mail you a copy of mine. Thanks for the help, I have faith in all of you.

Having seen comments from Telos and Musicam (formerly CCS) about the interconnectivity of the Zephyr with the CDQ-1000 or CDQ-Prima, and having spoken with both companies, I would like to point out that while you can easily connect the two using G.722 or Layer II, the sampling rate used by the Zephyr for Layer II is 48k -- not 24k; therefore, the audio frequency response you get will be 8.2k as opposed to 10k. I do understand that there is one configuration on the Zephyr which will support the higher frequency response, but I was not able to achieve this in my own limited tests. For my particular application (which would use the two "B" channels of the ISDN circuit independently) the 10k bandwidth is not supported.

I applaud both companies for their attempts to get these two great codecs talking to one another. Unfortunately, they're not completely "there" yet.

Just my humble opinion,

Rich Roszel

Larry Bornacelli wrote:
>In the world of wall street FM's and AM's combos. Is there hope for the
>stand alone AM's anymore?
>(snip)
>No one wants a home town station like in the old days of radio.

Not necessarily true ... I've been keeping an eye on our local AM stations for years. The one that has done the best, ratings-wise (WSYR - consistently beats a lot of the FM stations even, I think), is the one that has local drive-time segments, and runs a variety of syndicated talk shows (talk/sports/financial/???) the rest of the time. The local segments are _good_ -- excellent on-air persons, constant traffic updates (upstate NY is prone to nasty weather in the winter!), events, local news, things along those lines.

Does WBZ (Boston) count as a "home town station"? I may be mistaken, but I believe they are 100% local origination (except for network news). I assume that --- based on what it must cost to run the station -- if they weren't doing well, there would be changes in a hurry.

I don't think that either of these stations has changed their formats in quite a while -- maybe people _like_ consistency, instead of "latest and greatest this week". According to my dad, the latter was what killed the late great WCAU-AM in Philadelphia (he was a long-time listener) -- supposedly they brought in psychologists and other "experts" to determine what users _really_ wanted, and kept changing things until nobody called their talk shows any more.

I'd ask one (and only one) set of related questions...
1)Is the station attracting a substantial audience?
2)Is that audience desirable or salable to advertisers?
3)Is the station format-dominant (or at least close-
ly competitive) in its market?
If the answer to all three questions is "yes," you have
a viable property whether or not it's got an AM or FM duopoly
partner. If you're looking for a struggling or dark station to
buy and hope to make big bucks on a turnaround, you had bet-
ter have a wide-open format niche in the market to plug, and
a good signal pattern both day and night to cover the market,
PLUS a considerable amount of cash to spend on staff hiring
and initial station marketing and promotion...or else you're
toast.
9 years ago when I was thinking about getting back into radio
and wasn't sure whether I wanted to be an owner or simply go
back to an air staff position, I looked at some small to medium
market stations in my part of the country. The ones that were
both available and affordable, even then, looked like overpriced
and distressed properties. The ones that were worth anything
at all were drawing the BIG $$$. Today I'm a talk show host. I
may not be my own boss, but I'm not in Chapter XI either...

|: > products, and most others.

[with]
|: But there are still a lot of un upgraded Zephyrs in the
|: field which makes the incompatability statement still
|: partially true.

Only if a broadcaster chooses _not_ to take advantage of Telos' generous free upgrade offer. When they announced the LII addition, they also said any user could send their Zephyr back to the factory for an absolutely free mother-board replacement.

Jeepers, claiming a system is incompatible because the owner didn't bother upgrading it is like saying your office fax system doesn't work because some people still have Group II machines.

There is still a lot of incompatibility in the ISDN world, when various manufacturers have decided to either:
a) add their own 'tweaks' to the bitstream and make it incompatible
b) deliberately encrypt their signal so your correspondents had to buy _their_ brand of equipment or subscribe to their network.

That's why the AudioBahn advises testing the setup before any important transmission between different brands of codec.

But if a unit _is_ MPEG compliant, it's compatible.

FY>True in general, Bob, but not always. Just ask my friend Bob
Bittner,
FY>who owns WJIB 740 Cambridge MA, 250 watts day, 5 watts night, ND.
FY>For Boston listeners, WJIB sits between 50kw giants WRKO 680 and
FY>WEEI 850 on the dial, and within Rt. 128 (the main ring road around
FY>Boston), I'd venture to say few listeners can hear much difference
FY>between the 680/850 signals and the 740 signal. Sounds incredible,
FY>but it's true. At night, the 5 watts still get out within about
FY>an 8-mile radius. I live 5 or so miles from WJIB, and it blocks out
FY>co-channel CBL Toronto for me at night. Within that 8 mile
FY>radius, Bob can reach probably half a million listeners, easily.

Scott,
Assuming the tower is still in North Cambridge near the shopping
mall, the station had one of the best 250 watt signals I've ever heard.
I'd say it could be competitive with most of the stations in Boston. I
first knew it as WHXR, then WCAS (under Kaiser/Globe) and now WJIB. It
had a self-supporting tower next to a building that housed a frequency
measuring service.

When I was with Kaiser/Globe the station was a daytimer.

Fred Weinberg wrote the quoted material below:

" The arguments are simple. The stations were designed to cover local
" markets. Their power was increased from 100 to 250 to 500 to 1,000
" watts over the years as the AM band grew progressively more noisy and
" the markets grew past the geographic boundries of the power allowed.

The answer is just as simple, too. You noticed that the increase from 250 to 1000 watts didn't cut down the interference problem. Why would raising the power to 2500 or 5000 watts be any different? Class IV stations were designed to serve only a local community. They are spaced close together already.

In the SF Bay Area I can think of many examples of stations located super-close together. The 1450 channel is a good example with 3 stations within 130 miles of each other (SF, Ukiah, and Yuba City). From what I remember seeing in allocations on those 6 channels, there would be no way to increase power and not make it far worse than it already is. The 1230 and 1240 channels are similarly crowded - AND they're adjacent.

There were all news stations on the FM dial in the mid-70's as part of NBC Radio's News and Information Service. I am particulary referring to WNWS-FM, New York which later became WYNY. Before that it was WNBC-FM and WRCA-FM at 97.1. There were no talk shows on WNWS, just news both from the network and local. But the Dallas station my indeed be the only FM all newser at the present time.

>
Promo guys are remarkably creative with this stuff....some PD,
somewhere(probably the one who bought that Prince was really
saying "funk" in "Erotic City"), was probably told that the
line was "sure I gotta have her".
There's a wonderful story...can't remember exactly where I read
it...but back in '69, the London records promo guy supposedly got
"Honky Tonk Women" by the Rolling Stones on KFRC, San Francisco's
playlist by convincing then-PD Paul Drew that Jagger was singing
"Played a divorcee in New York City"....instead of "Laid a divorcee..."
Hey, bad vinyl...low-tech cartridges & speakers....
And let's never rule out the possibility that the PD's didn't
buy it, but wanted to play the records in question and figured they
could fool the GM, who couldn't understand what those guys were
singing anyway.

(On alleged Beatles' use of the "f" word in a song);
That story has had a lot of different versions...but it probably started with the one! two! three! FOUR! countdown at the start of the early Beatles single "I Saw Her Standing There." A lot of kids (especially) THOUGHT they heard that last "four" as the big F when it first played on their tinny transistor radios (and on a bad radio even now, it kind of sounds like that). But it isn't...

P0>Anyone know who the South American Radio Network is that owns about
100
P0>radio stations in the US? Think they own WBZT AM 1290 in West Palm
P0>Beach.. thanks in advance!!

Bill,
Whoever they are, they must have bought them all over the last few months. Until recently there was a cap on the number of stations anyone could own. It was nowhere near 100. The other issue is one of foreign ownership. There's no way a foreign company could own 100% of a station.

I think you may be thinking of the Paxson stations in Florida. "Bud" Paxson is an American with large holdings in Florida.

Rich

With everyone asking whether or not Q104.3 (WAXQ) will be changing formats or not, I offer these facts:

1) They billed $10.5 million last year, and were swapped in a deal involving 6 stations and $90 million in cash. That is a bit steep for a 10 million dollar station, isn't it?

2) They have begun using the term "alternative music" in a positioning statement. They didn't dare use the word "alternative" until K-Rock came to town.

3) They refuse to co-promote shows that includes bands getting big airplay from Z-100 (Ministry, for example).

TRUST ME!!!! WAXQ will change by August at the latest. Then, Z-100 and K-Rock will battle until death..... And who has the most to gain by this??? WNEW, my station on the Jersey Shore, and whichever of the stations that move to a contemporary country mix format...

2834. Buffalo/Toronto Radio Watch(3/21)

Newsgroup: rec.radio.broadcasting
Date: 1996-03-22 00:00:00 UTC
From: ag064@freenet.toronto.on.ca
Message-ID: <4itgj5$mcq@vixen.cso.uiuc.edu>
Source record: 24727

Reply-To: ag064@freenet.toronto.on.ca (Carl K. Gorney)

If you're wondering why I'm operating from a different system,it's because my primary system(the Buffalo Free-Net)switched last week to a Web-based interface,which-as a result-fouled up my ability to post watches, among other things. So,this will be my home for now.(You can still reach me on BFN,BTW.) Now,on to business:

*WECK(1230;adult standards)has started its search for a new AM driver to replace Tim White,who started at crosstown WMJQ(102.5,hot AC;Q 102)March 6 handling its Q After Dark show(7pm-midnight),including placing an ad in the March 10 Buffalo News. A number of Buffalo radio vets are said to be in the running,including Dave May(ex-WBEN),former FM 101 The Planet AM driver Jon Summers(who now does fill-in work at sister station WJYE(96.1,AC)as well as announcing duties for WKBW-TV(ch.7),including its morning show AM Buffalo), and Don Allen Jr.(rotating weekday overnight duties on WYRK/106.5). However,no decision has been made yet.
Also,now that WBLK(93.7)has new owners(Palm Beach Broadcasting,which American Radio Systems has a financial stake in),look for 'BLK to get an equipment upgrade and repairs to its on-air studio.
One more thing:Is something major coming down the pike in the near future with at least one of the ARS stations locally? Stay tuned....

*CKEY(101.1,CHR/dance;FM 101 The Planet)has applied to the CRTC to make a couple of changes to its license,according to an application filed with the CRTC March 15. Under the application:1.the effective radiated power would increase from 8.67kW to 19.7kW,and 2.it would add an FM transmitter in St.Catharines,Ont.at 101.1 FM with an ERP of 150 watts.(The CRTC adds that the transmitter would be a co-channel,synchronous repeater of CKEY-FM.). 'KEY's licensee,CJRN 710 Inc.,says these changes will improve reception of the station throughout its coverage area,primarily in St.Catharines. (http://theplanetfm.com/rock)

*Up in Toronto:CFTR(680,all-news;680 News)dropped their 20-minute,3 times an hour newscasts on March 4,moving to 2 30-minute newscasts an hour-which puts it inline with its sister station in Vancouver,CKWX(News 1130). Now that 1 less cast/hour is on,some staff may be cut.(However,the weekend news anchors were doing 30 minute casts anyway,even under the old 20-minute cycle.) (http://www.canoe.ca/680News/home.html ;680 can be heard live w/Streamworks)

*Stateside:
-Shawn Scott,ex-MD and PM driver at WFLY(Fly 92)in Albany,has jumped to crosstown WKLI(K-Lite 101)for afternoons. Back at Fly 92,weekender Brian Cody moves to nights.
-In Rochester,WPXY(97.9,CHR;98 PXY)middayer/MD Jo Jo is on the mend from from an emergency appendectomy. And the Phlash has been sighted:Phlash Phelps

is now handling 10pm-2am,replacing J.J.Rice. Phelps arrives from WSSX in Charleston,S.C.
-In Utica,WSKS(Kiss 102)named Steve Lawrence as its APD/MD,and Justin Peters moves into PM drive-moving J.D.Redman to nights.
(http://www.borg.com/~kiss102)

*Dr.Maims,ex-WKSE AM driver(who last worked at Fresno's KTHT and was put on the beach when KTHT was sold),is back in business. He'll be doing wakeup duty at KDON(102.5,CHR)in Salinas beginning March 25,teaming up with MD/news personality Jennifer Wilde.

*George Beck,who worked as a musician,band leader & broadcaster,died Monday(3/18)after a brief illness at Millard Fillmore Hospital He was 61. The Fredonia State grad also worked as a concert promoter,bringing a number of jazz artists to town. For many years Beck was a news co-anchor at WHLD in Niagara Falls(actually,its studios are on Grand Island)as well as hosting jazz shows on radio,first at WUSJ(1340,Lockport,now WLVL;USJ stands for the city's newspaper,the Union-Sun & Journal)and then hosted "Jazz Nightly" for WEBR(970;now WNED). He was named as PD for Niagara Frontier Cable(now Adelphia-Niagara)in 1981,and named PD of WJJL(1440,Niagara Falls) in 1986,as well as hosting a public affairs show for Adelphia.

Is any one know, where can i get a broadcasting Year book.
I found one in library but, it is back issue in 1988.
can I go to FCC home page and look at this? how?

I'm very happpy, if someone can help me.

Thank you, Thank you

[Moderator's Note: The B'cast and Cable Yearbook, though
comprehensive, is VERY expensive. I suggest the M-Street
guide. At about $45.00 it is almost 1/4 the cost, is smaller in size
and has almost everything (radio wise) that the yearbook has.
However, you can access the FCC station database free at
http://radio.aiss.uiuc.edu/~rrb/fccdb.html Bill]

2837. Higher power for Class IV (Class C) AMs

Newsgroup: rec.radio.broadcasting
Date: 1996-03-22 00:00:00 UTC
From: Dan Strassberg <0003372209@mcimail.com>
Message-ID: <4itgj6$mct@vixen.cso.uiuc.edu>
Source record: 24730

This is in response to a post by Fred Weinberg

Fred: I don't own radio stations like you, so I'm sure you will ridicule me for not knowing whereof I speak. but I'm quite sure I have my technical facts straight. As an owner of Class IV AMs, you should remember how badly the increase from 250W to 1 kW worked out. The only _real_ reason that station owners could have been happy about it is that the dummies who buy time for large ad agencies think more power is better. So if revenues for Class IVs went up after the last power increase, that must be the reason. Yes, interference from sources like triac lamp dimmers and switching power supplies in PCs is on the increase. But I question whether the coverage lost to interference from co-channel stations (at night, anyway) makes up for the greater ability of a higher power station to override man-made noise.

When everyone on the channel gets higher power in the same proportion, nighttime interference from co-channel stations goes up faster than the signal from your station. So you don't gain coverage, you lose it. Think about what happens in skywave propagation. The path from an interfering station to your listener is a long one--longer than the point-to-point distance on the earth's surface. The signal has to travel up to the ionosphere and back down. The path is through the atmosphere, which is not an almost-perfect conductor like salt water. The atmosphere really isn't a very good conductor at all. So the signal is attenuated, and the attenuation is more than proportional to the path length. Increase the station power and the skywave signal that returns to earth increases faster than the square root of the station power.

The only exceptions might be stations on 1490 within the nighttime secondary coverage of KSTP and WTOP. If those Class IVs had more power, they would probably lose less coverage to adjacent channel interference from the Class I stations.

At midday, the situation is a little different. Currently, the primary service of Class IVs is limited to 1 mV/m. Since only in a few sparsely populated areas of the west do Class IVs provide service beyond the 1 mV/m contour, higher power will mean that useful service is provided to a higher-intensity contour. You get 5 kW, you get protection to the 2.24 mV/m contour. But as you approach sundown, the skywave signals start to come in and you lose coverage.

I guess maybe power is cheap in Oklahoma and Nevada, so you won't mind paying five times as much for the power needed to serve a smaller area. I have to think that you have appreciable stock holdings in a company that makes AM transmitters. What do 5 kW AM transmitters cost these days? I'd guess around $40k. Multiply that by, what, 1500 Class IVs in the US and Canada (a larger number if we bring Mexico in). Somebody stands to gross over $50 million on your proposal. But it isn't the owners of the Class IVs.

2838. Club Contests... need help!

Well, I heard this song tonight on the 70's rock outlet here in LA
(KCBS-93.1), and the word in question, was, let's say the "industrial strength"
version of "shoot" . . .

Of course, this same sation plays Pink Floyd's "Money", with the
"goody good bulls***" line in it, uncensored . . .

>technology with the simplicity of the old analog?

The 2200 uses a lot of 8200 technology -- the protect and two-band structures on the 2200 are essentially the same as their 8200 counterparts. What's different is that the 2200's two-band structure has a 12dB/octave shelving bass EQ available, and also has a program-adaptive high-frequency enhancer. The latter has not been available on any Optimod so far. The 2200's two-band sound is thus potentially a bit different than anything available from the 8200 (if you use the 2200's LF EQ and HF enhancement).

We still consider the 8200's five-band structure to be Orban's flagship sound, and it's one that the 2200 doesn't have the DSP "horsepower" to produce. IMHO, the 2200 is a very impressive $3800 processor, but the 8200 is still Orban's high-end FM product.

BYW, the 8200 is the best-selling FM processor (in terms of units per year) in Orban's history, so from that point of view I must consider it _more_ successful than the 8100.

Ran across a homepage for WBZ-TV (Channel 4) the other day;
it's got links to the Yahoo TV area and to the Boston radio/TV dial
home page, as well as various other industry lists...can't recall
the URL offhand but it's there. (Most of the CBS/Westinghouse TV
O&Os seem to have homepages these days, including KDKA TV and
AM, KPIX TV/FM, etc. and probably they all will soon. CBS was the
first to have a network home page and it's pretty sophisticated.)
Now a question for Scott Fybush, who often posts the Boston
area radio news...will WBZ-AM join its sister station with a web
presence soon, or has it done so already?
Bob Smith, middays WXXI-AM 1370 Rochester NY

Yes, but it only is applicable to offering commercial time to all
candidates if commercial time is made available to one candidate, OR,
if someone wishes to respond to an identified editorial.

A debate doesn't qualify since it is classified as a public affairs
presentation.

>
> - Paul
>

McCartney's "four"s have always sounded like that...and fueled speculation...both on the Sgt Pepper reprise that segues into "A Day In The Life"...and on the earlier "I Saw Her Standing There." There is a neat little trick buried in the track-out grooves of the British pressings of Sgt. Pepper(on vinyl)...maybe 15 seconds after the long final chord of "A Day In The Life" trails out, there's about :03 of gibberish...music and voice....played backward, it screws up your stylus...and sounds like the boys singing "he will f--- you like a superman". If I'm not mistaken, the track is on CD's issued in America...but there's no easy way to play it backward.

2853. DXing with SRF-42 AM Stereo Walkman

Newsgroup: rec.radio.broadcasting
Date: 1996-03-22 00:00:00 UTC
From: Danny Draffen <ddraffen@huber.com>
Message-ID: <4itgje$md4@vixen.cso.uiuc.edu>
Source record: 24746

I read some of the Airwaves articles regarding the SRF-42 AM Stereo Walkman and went and bought one. I am very pleased with the sound quality and overall performance of this inexpensive, compact unit. AM stereo sounds very close in quality with FM stereo. It sounds far better than my Sony radio headset which has AM mono and apparently an audio bandwidth of only a couple of kilohertz.

I recently erected a 30 foot antenna mast with antenna tuner and ground radial system in my backyard for AM/Shortwave DXing. I used Radio Shack's higher grade RG8 52-ohm coax for my antenna lead in. I experimented with magnetically coupling the antenna signal from the coax into my SRF-42. I ended up wrapping 36 turns of (insulated) #16 gauge wire around a short piece of 2" PVC pipe and terminated the coil into a chassis mount (PL-259) RF connector to which I connect my coax. When I placed my SRF-42 near the coil it turned into a hot potato! It was around 9:00 PM here in Huntsville, Alabama and I was receiving WJDM, on 1660khz, loud and clear - as if it were a nearby station. At one point I was receiving a faint R&B type music just below WJDM - I like to think it was the new station over in California - but not sure as I could not identify it. Another station, apparently on 1680khz, comes in occasionally, but no success in identifying it.

In this configuration, the SRF-42 is outperforming my Realistic DX-440, especially in receiving WJDM. Incidently, when I remove the SRF-42 from the field of the coupling coil, WJDM goes away completely! When coupled to the antenna, the SRF-42 does not exhibit the overloading characteristic that the DX-440 does to strong AM stations in the area.

Can anyone shed some light as to what new stations are coming up on the expanded AM band and what the time frame will be?

>>up a lot of space. I have seen some flat panel LCD monitors, but they are all
>kind >of 10" size display maximum. Does anyone know of a source of larger LCD
>>monitors?

I recently found some flat panel displays from IBM. They even make them
available with touch-screen technology.

Be prepared to pay through the schnozz though. They are less expensive
than the $5000 ones listed in an earlier post, but still not cheap.

I agree with another post that mentioned putting laptops in the studios.
It is the most cost effective solution if you do not want CRTs in there.
However, I have found that the electrical noise caused by the notebook
is about as bad as the CRT. (Keep them away from RE-20s).

2857. Sale in Syracuse

Newsgroup: rec.radio.broadcasting
Date: 1996-03-23 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <4ivrkg$6i9@vixen.cso.uiuc.edu>
Source record: 24600

Reply-To: talk1370@aol.com (Talk1370)

WHEN AM/FM in Syracuse has been sold by Park Broadcasting
to the Cox Broadcasting organization. Price is said to be about
$4.5 million for the pair. It's part of Park's cash-out of its broad-
cast properties, and it's Cox's first presence in the upstate NY
area. (This may also be Cox's smallest market.)
WHEN (AM) was once, in the 1970s, the dominant station in the
market, especially in 18-49 and 25-54 demos. It was a pioneer of
the personality adult contemporary format which seems to domin-
ate the FM band in so many markets today (but the 70s were a time
we were still mostly AM listeners). It also had, as a major drawing
card, the first 24-hour newsroom in the market, and a wall full of
news awards. Having been a part of that news operation during its
heyday in 1973-74, I remember it well and fondly. It was a GREAT
station then, with a major market sound that would have rivalled
stations in much bigger cities for energy and quality.
Trouble with WHEN was, unlike many of the killer heritage AMs
of the past, in the 80s it didn't make a successful transition to per-
sonality talk, except in morning drive (the rest of the day it sounded
the same in 1990 as in 1975, even the same music). So it missed
the height of the talk radio craze, and the bottom completely fell
out after veteran morning personality Phil Markert was retired
(apparently for cost reasons) in 1993, killing what had been the
station's last really solid daypart. Meanwhile arch-rival WSYR
grabbed the news-talk franchise in Central NY for itself, and holds
on to it today.
WHEN-AM now flounders badly with a sports-dominated and
syndication-heavy air sound, a shadow of the dominant station it
once was (and still could have been if it had moved to talk in the
late 1980s and stayed local). It has arguably the best signal cover-
age of any AM in the market, but it'll take a big investment in pro-
motion and air talent to make it even remotely as important a sta-
tion as it once was.
The FM side began as classical WONO over 30 years ago, was
purchased by Roy Park in the 70s and has been through a number of
format changes since (it's been commercial light classics, rock,
country, elevator music, and who knows what's next?). It's got a
strong signal and good coverage, but has never been a major factor
in the market.
No word on what Cox will do with the stations format-wise, or
who will run them (current management or someone new). They
like to do a lot of research before pulling the trigger on any change.
In one way, it's the completion of a circle...since Cox's research

honcho Jim Ashbery was WHEN's PD at the height of the station's success in the 70s, and undoubtedly he'll have a lot to say about where the stations go from here. Hope they find a way to make it once again, what it once was...a great personality station and community service.

Bob Smith, middays WXXI-AM 1370 Rochester NY

Hi Jim,

When I listen to a tape, I hope to hear a sample hour or so (telescoped) of a show. Obviously, the first break or two must really grab me! So open with your strongest stuff. I won't listen to any tape longer than 30 seconds, if it doesn't grab me by the ears.

Five minutes, max., on one side of a cassette ... flip side may contain a few minutes worth of production. I suggest different styles -- different reads -- one easy and conversational, a hard sell, one medium, perhaps a character voice or two (if you're good at those). Show off your editing skills. In fact, flaunt all your best qualities.

Make the whole package -- tape, resume, cover letter -- look really good. (Have cassette labels designed and printed, if necessary.) Nothing makes me wonder about an applicant, like a sloppily hand-written cassette label. I take that back -- I've gotten a couple of sloppily hand-scrawled resumes!

Anything else you need answered, I'm at your service.

Good luck in your search.

Breeze is a UK commercial classic hits station about 30 miles out of London.

We're currently looking at the idea of having a tie to a station in the States, partly as a programming plus, but primarily for an exchange of ideas, news / gossip - probably on a weekly basis.

It would work both ways - if your station wants anything from the UK - we can probably oblige.

If there's any stations out there that are interested in the idea, perhaps you could email me?

email: breeze@netforce.net
WWW: http://www.breeze.netforce.net

The station we're looking for should ideally be of the same format (Classic Hits, and have a web presence, so that we can point to each other's sites.

Best wishes from the UK,

Pete

You're talking TV vs. Radio. No two radio or TV stations can use the
same calls, but WSTR-FM and WSTR-TV are different. There's also a WONE-FM
in Akron, OH and WONE-AM in Dayton, OH.

- Chris

A great way to get people to a club and involved inthe promotion is to
offer a really hot grand prize.

Tie in with a local travel wholesaler, tour operator, airline, cruise
company or travel agent and throw a suitcase party.

Listeners show up with suitcase in hand..ready at the given moment to
hit the road for a free vacation. You can have one winner or multiple
trip recipients. They could have qualified on the air or you can trust
your stations pull and have people regester at the door.

The destination sets the tone for the party.
Spring Break trips? Beach Party! European Excursion? Octoberfest
Bash! Hawaiian Vaction? Luau! (sp)

Use your station giveways as door prizes or runner up gifts.

Use the travel opportunity to generate revenue and a promotion.

It's a hot promotion that's great for use during a ratings period.

Have fun!

Date: 1996-03-23 00:00:00 UTC
From: Mark Shneyder 2-4219 <nhmas@gauss.med.harvard.edu>
Message-ID: <4ivrjk$6h5@vixen.cso.uiuc.edu>
Source record: 24609

[The last two weeks have been very quiet and uneventful in the #10
market so please forgive me if I seem to be reaching a little
in this latest Boston Radio Watch installment....:-)]

* Arbitrends for December/January/February....

Here's a look at the Winter's rolling averages for the 12+ demo :

Call/Freq Fall '95 D-J-F(Rolling Format
Avgs.)
1. WBZ AM 1030 8.1 8.1 News/Talk/Sports/Bruins/Umass
2. WRKO-AM 6.3 6.5 All-Talk/Rush/Celtics
3. WJMN 94.5FM 6.9 6.1 CHurban/Rhythmic "Jamn 94-5"
4. WXKS 107.9FM 5.3 5.9 CHR/Top40 - "KISS 108"
5. WMJX 106.7FM 5.0 5.6 AC -'Magic 106.7'
6. WBCN 104.1FM 4.7 5.2 Modern Rock/Stern/Patriots
7. WODS 103.3FM 4.6 5.0 All-Oldies - 'Oldies 103'
8. WCRB 102.5FM 4.6 4.4 Classical
9. WBMX 98.5FM 4.2 4.2 Hot AC - 'Mix 98.5'
10.WZLX 100.7FM 4.1 4.0 CR -'Boston's Classic Rock'

* Boston-based American Radio Systems makes deals...

Boston-based American Radio Systems(owner of WRKO-AM 680, WEEI AM 850,
WBMX 98.5FM and WEGQ 93.7FM) spent $192.5 million in three separate
merger deals over the past week. And the word out of the ARS' corporate
offices at 116 Huntington Ave. is that the company is not even close
to being done dealing/merging...:

Deal # 1 : On March 14,1996, ARS acquired 2 Las Vegas stations,
KLUC-FM and KXNO-AM, from Nationwide Communications for an aggregate
purchase price of $11,000,000.

Deal #2 : On March 15,1996 ARS agreed to merge with another
Boston-based radio group, Marlin Broadcasting,Inc. This deal is a big
one from a standpoint that it takes ARS into large-size markets. So far,
with an exception of Boston, it's been strictly medium-size market
operator. [ARS currently owns stations in in Boston, Baltimore, Hartford,
Austin, Buffalo, West Palm Beach, Rochester and Dayton].

This deal was originally was announced back in late November '95
and then fell apart a month later. This time around the conditions
were just right for Marlin. For $66.5 million ARS gets to enter into #5
market, Philadelphia's Classical WFLN-FM, and #6 market, Detroit's
Classical WQRS-FM. As part of this merger, Marlin's president
Howard "Woody" Tanger gets to buy back Marlin's Miami station,
Classical WTMI-FM for $18 million.

Deal #3 : On March 21,1996. ARS merges with San Francisco-based Henry Broadcasting. In the $115 million deal, ARS adds Henry's 9 stations in 4 new markets : Portland,OR(KUFO-FM and KBBT-AM), Sacramento(KYMX-FM and KCTC-AM), Fresno(KSKS-FM, KKDJ-FM and KMJ-AM) and Omaha(KGOR-FM and KFAB-AM).

Under this agreement, Henry Broadcasting Chairman and CEO, Charlton Buckley, becomes a substantial shareholder of ARS : he will receive shares of American Radio common stock worth about $64 million.

* Neighborhood groups seeking to put roadblocks into stations' summer concert plans....:

In the blue corner : Boston's two major FM stations -- AP WFNX 101.7FM, and All-Oldies WODS 103.3FM -- ready and able to present/promote their respective free weekend night concert series to the tens of thousands of their loyal listeners at the Hatch Shell this summer...In the red corner : the challenger(s), Beacon Hill Civic Association and Back Bay Neighborhood Association, managed and trained by City Councilor Richard Iannella, who represents both neighborhoods. The neighborhood groups are all up in arms about potential noise, traffic and general disruption to the neighborhood these night-time concerts are going to their historical part of the city.

Neighborhood groups are still living with horrors of the infamous Green Day concert on September 9,1994 when a crowd of 70,000(mostly drunk teenagers/college kids) began rioting at the Hatch Shell.(yours truly also happened to be caught in a massive traffic jam on Storrow Drive and witnessed some of the madness that took place on that unforgetable Friday night :-) The end total was : over 50 people injured(1 very seriously) and over 100 arrests(mostly for disorderly conduct and assaulting State Police officers). As the result, the Metropolitan District Commission made a promise to the residents of Back Bay and Beacon Hill that it would never allow another free rock'n'roll concert to go on at the Hatch Shell after sunset ...Well, like most political promises they're meant to be broken...:-)This year, WFNX which sponsored the notorious Green Day fiasco back in '94 was allowed by MDC to switch its concerts at the Hatch Shell from afternoons to evenings....

Councilor Iannella vows to do anything politically possible to reduce the number of station-sponsored concerts in his district. He's also threatening potential court action against MDC for using public property(the Hatch Shell) for commercial purposes...

In addition, back in mid-February All-Oldies WODS 103.3FM announced that its 8-year old City Hall Plaza concert series is moving from downtown to the Hatch Shell on the Charles this summer. WODS' GM Bob Pates had indicated that the switch was made accommodate more fans/listeners. WODS has already booked 6 Saturday nights at the Hatch. The first concert featuring Little Richard is set for June 1st. A crowd of at 100,000 is easily to be expected.

Now, add to the mix Boston's Mayor Menino who claims that he hasnt missed a single City Hall Plaza show in recent memory and feels betrayed by WODS' move to the river venue. Menino says that he has already lined up another radio station(rumored to be all-70s WEGQ "Eagle93-7") to sponsor a few 70s/oldies free shows at the Plaza this summer. Although, no official word yet.

Meanwhile, the bad boys of Boston radio Modern Rocker WBCN 104.1FM, which by the way just celebrated its 28th birthday on March 15th, is sticking its nose into this mess as well. Eventhough, WBCN hasnt yet announced any acts for its Hatch Shell series, the New Rock's 3 popular weekday jocks(Charles Laquidarra, Bradlee Jay and Mark Parenteau) all have taken their on-air turns to knock the elite Back Bay/Beacon Hill groups. 'BCN's view is simple : Dont live in the city if you dont want to deal with urban headaches(traffic, noise, lack of parking, etc...)....

Among other major Hatch Shell concert traditions to be seen and heard this spring/summer : the EarthDay Concert sponsored by WBOS 92.9FM on Saturday, April 27th; all-day Classic rock show "Be In" in August will be sponsored by WZLX 100.7FM and the grand-daddy of them all -- July 4th Boston Pops Concert will once again be simulcast on WCRB 102.5FM...

* Surfing the Dial....

- WABU-TV68, the new home of the Boston Red Sox, stopped simulcasting the middle hour of WRKO's Charles "The Canadian At Night" Adler's weeknight(7pm-10pm) show on Boston's only 24-hour talk station. Adler gets new hours for his live ch. 68 call-in "Adler On-Line" show : weekdays, 4pm-5pm...The station now runs movies in the 8-10pm block. 75 Red Sox baseball games will be seen mostly on Fridays, Saturdays and Sundays. WBUR-90.9FM's Doug Brown, the radio voice of Boston University's sports, will be anchor 30-minute Red Sox pregame show on WABU called "On Deck"...

- The latest on the new 50,000 watt AM station to hit Boston this spring : Framingham's WKOX AM 1200 plans to be operating at the new increased power sometime in May...

- A few weeks ago, Boston Herald reported that Evergreen's Kiss108 night-time jock(10p-2a) and dance music wiz David "Kid David" Corey was headed to New York City to take over music director duties at Evergreen's new dance music station, WKTU 103.5FM, which by the way sounds fantastic... Apparently, Corey was doing some consulting work for 'KTU for couple of weeks...Andy Shane from Z-100 in NYC was named 'KTU's new music director last week...

- AAA WBOS 92.9FM seems to be having trouble keeping a permanent night-time(7pm-12a) voice in its line-up...The latest casualty is Geoff Allen who left the station last month. Allen, who originally did weekends and fill-ins at 'BOS, took over

evenings at 92.9 this past November....In less 2 years WBOS had
4 different jocks covering the 7p-12am slot : Marilee Kelly(now
at AAA LA station), Dick Pleasants(now back at WUMB-FM in Boston),
John Hutchinson(now out of radio; working for British Airwaves) and
Geoff Allen. Plus numerous fill-ins in between all the on-air
personnel moves. Regular weekend/fill-in jock Sonia Mosrtenson is
now doing 7pm-12a shift....

Speaking of WBOS, the station is now positioned as "The Best Variety
of Rock from the 80's and 90's". That seems to be the trend on
Boston's FM dial as of late...:-)

Also, when WBCN-WZLX's parent company, Infinity Broadcasting, agreed
to buy WBOS 3 weeks ago, rumors began flying that Imus' syndicated
show was headed to personality-free station. That's very unlikely.
ARS' SportsRadio WEEI AM 850 still has 3 1/2 years left on its
contract with the nationally syndicated "Imus In The Morning" program.

- Add SportsRadio WEEI AM 850 to the ever-growing list of Boston
stations on the Net. Point your Web browser to http://www.weei.com.
The site is still in the development stage so not all the sections
may contain the info you're trying to access. That's a lot more than
you can say for WBZ AM 1030 which has been promising a Webpage for
over 6 months now with absolutely nothing to show for at
http://www.wbz.com...

- And speaking of the Web presence,the "New Rock of Boston" WBCN 104.1FM
keeps switching Internet providers like it's going out of style...
The Internet Access Company(TIAC) becomes WBCN's 3rd Internet access
provider in 1 year. WBCN started out its WorldWideWeb journey with
NovaLink last February/March. That didnt last long -- Novalink's
server was painfully slow. Next, Channel 1 : this time around
the speed was acceptable but the graphic design was absolutely
horrible. Now, it's the Internet home to many Boston radio and
TV stations -- TIAC...Oh, judge for yourself ===> http://www.wbcn.com

SLATEN SUSPENDED BY KSD-AM;
WIBV SETS DATE FOR DEBUT

by Scott Simon

ST. LOUIS --- KSD-AM afternoon sports talk show host Kevin Slaten is in trouble again, suspended by the station for 14 days after a volatile diatribe on the station's Frank O. Pinion morning show.

On March 20, a judge hearing a civil suit against Slaten ordered him to pay $130,000 to a man he beat up in a fight after a St. Louis Blues hockey game in November, 1992.

The incident took place after Slaten's car and the other man's vehicle were involved in a minor accident leaving the parking lot. According to testimony by the man's fiance', Slaten got out of his car, opened their car, and began fighting, breaking a cheekbone and causing possible permanent eye damage.

Television stations, most notably KMOV-TV, Channel 4, reported the court judgement on evening newscasts.

The next morning, appearing on KSD-AM's morning show, Slaten launched a personal attack against Channel 4 anchor Larry Connors, who Slaten worked with from 1977 to 1981 at Channel 4 and KTVI-TV, Channel 2.

Host Frank O. Pinion disclaimed Slaten's remarks by saying they were his opinion, and not the station's.

Obviously, general manager Karen Carroll felt the same way, suspending the controversial Slaten. When she hired him last fall, Carroll warned him that he had to be on his "best behavior."

Insiders say that his days at the station are probably over, because he has a long history of public disturbances, dating back to 1981, when Slaten got into a fight with a Buffalo indoor soccer player in the penalty box, while Slaten was the public address announcer for the now-defunct St. Louis Steamers.

The parking lot fight resulted in Slaten being convicted of felonious assault in St. Louis circuit court in September, 1993, and sentenced to two years court-supervised probation, which was successfully completed.

After the fight, and prior to the conviction, Slaten struck his wife at a popular St. Louis bar which is a nightspot for St. Louis Blues hockey players. He was arrested, but never went to court because

his wife refused to press charges.

During the probation, Slaten caused an incident at his son's basketball game by kicking a basketball at a referee, striking him on the side of the head. The official declined to file charges, although the youth league permanently banned him from attending any games.

Then last summer, while employed by all-sports KFNS, Slaten was involved in a shouting match with KFNS general manager Bob Burch during a function involving the St. Louis Rams. Burch immediately fired him.

It is amazing how much attention Slaten commands, but it's not because of ratings, which he has never delivered, even when he was the morning host at classic rocker KSD-FM back in 1993.

The opinion most St. Louisans say of Slaten after such an incident is that he'll never work in town again. But somehow, he surfaced at a different station.

This time, the trend may be different for Slaten, whose show theme, "Bad To The Bone", has an appropriate fit.

The latest judgement against Slaten will be appealed by his attorney, Mike Smallwood, who also is in the radio business, hosting a Saturday morning show at KFNS.

WIBV GEARING UP: While new owners Tim Dorsey and Charter Cable await the sale of WIBV-AM to their company, they will lease the station and begin broadcating April 15.

The new company hired several people from News/Talk KMOX, which has sparked almost daily television and newspaper coverage about this development.

The tentative WIBV lineup being addressed will have Bill Wilkerson and Wendy Wiese from 6-10 a.m., John Carney from 10-2 p.m., Kevin Horrigan solo from 2-4 p.m., with Horrigan on from 4-6 p.m. with a drive time co-host still to be announced.

From 6-8 p.m., there will be a sports talk show, with a host still to be announced, and Dianna Proffitt and Debi Allen from 8 p.m. to 12 a.m. No word on what WIBV will do on weekends, although Dave Strauss will be hosting a trivia show, as he did at KMOX.

Joan Beuckman was named WIBV's new news director, coming from KMOX where she had been a top writer, desk reporter, and editor.

Meanwhile, KMOX is reorganizing in quick fashion after the defections to WIBV. Kevin Killeen, a writer/reporter who was laid off by KMOX in February, was brought back to replace Beuckman. Sportscaster Randy Karraker, who was cut from full to part-time by KMOX, returned to full-time status when Jim Holder decided to join WIBV.

Most interesting about Karraker's move is that KSD-AM announced two weeks ago that he was going to be their new sports director, because they are the flaship of St. Louis Rams football. But they never signed him to a contract, so KMOX program director Tom Langmyer jumped at the chance to lure him back, and did so in a matter of two days.

Michael Dixon is doing the 2-5 a.m. shift on KMOX from his home studio in Phoenix, which he has done on a periodic basis for the past 13 years. He may get the job permanently, although KMOX is considering hiring a host for that shift. There's no replacement yet for Strauss' Sunday Night Trivia Spectacular on KMOX, although the station is seeking someone to do a lighter, more entertaining show, rather than another news oriented talk show.

April 15 is the annual depressing day to file income taxes, but the first day of an exciting era in St. Louis radio, creating an atmosphere of anticipation and speculation, overshadowing its newspaper and television compatriots.

: >stand alone AM's anymore?
: >(snip)
: >No one wants a home town station like in the old days of radio.

Len Kaplan (lkaplan@servtech.com) wrote:

: Not necessarily true ... I've been keeping an eye on our local AM stations
: for years. The one that has done the best, ratings-wise (WSYR -
: consistently beats a lot of the FM stations even, I think), is the one that
: has local drive-time segments, and runs a variety of syndicated talk shows
: (talk/sports/financial/???) the rest of the time. The local segments are
: _good_ -- excellent on-air persons, constant traffic updates (upstate NY is
: prone to nasty weather in the winter!), events, local news, things along
: those lines.

To be fair here, WSYR 570 is not a stand alone AM by a long shot. It's run in conjunction with WYYY (Y-94), an AC powerhouse and WBBS (B-104), a strong country station. They market them jointly, which gives WSYR much more muscle than it would have otherwise.

As far as I can tell, every major market has one or two strong AM outlets that outrank most FMs, usually based on local sports coverage -- the strong suit of WSYR. When the games are on, the ratings soar; when there are no games on, the ratings slide. This makes sense, IMHO.

Dan

2869. Dark DC AM's

Newsgroup: rec.radio.broadcasting
Date: 1996-03-23 00:00:00 UTC
From: "Seifert, Rick" <rseifert@usia.gov>
Message-ID: <4ivrjp$6hc@vixen.cso.uiuc.edu>

Speaking of stand alone AM's:

There are two stand alone AM's in the Washington DC metro area that are currently dark.

- 1030khz - 50kw DA-D - WNTL
(This station programmed multi-national (mostly arabic - but carried BBC world service for a time), calling itself "Washington's International station".

- 540khz - 500/250w ND - formerly WDMV Pocomoke City Md, but moved to a site midway between DC and Baltimore.

Source record: 24677

All-news FM?? I'm not so sure about that, only because I don't think it is making the best use of FM's enhanced audio capabilities. Besides, I for one suspect there would be a "frequency-recognition" problem; you know, AM for news/talk and FM for music. I wish the Dallas station a lot of luck; they will need that, along with one heck of a good marketing campaign.

Andrea Wiener in NYC

[Moderator's Note: Don't forget that at one time FM was the sole dominion of Classical and Beautiful Music (called semi-classical at that time) and AM was where you found Rock and country. These mental images of what goes where are merely products of the times, and times change... boy don't they? Bill]

Jay, we're half in agreement here. I agree with you that Dershowitz
is no great air talent. He sucks. But Grant, whatever he once was,
seems to me to have deteriorated into the status of angry old fart,
and the angry old farts are precisely who he's reaching these days.
Trust me, neither one of us would want his demo profile...
Moral of this story is, if Boyce wants to can Dershowitz because
he isn't any good, fine. But making him the poster boy for ideological
polarization, and going to bat for an old bat like Grant who represents
talk radio's past (and not his future) is a big strategic mistake.

2879. Higher power for Class IV (Class C) AMs

Newsgroup: rec.radio.broadcasting
Date: 1996-03-23 00:00:00 UTC
From: "Julian H. Breen" <breen@ix.netcom.com>
Message-ID: <4ivrk0$6hl@vixen.cso.uiuc.edu>
Source record: 24682

My recollection is the daytime power increase to one kw for Class IV's back in the sixties was a good idea. It did seem to provide more solid coverage in areas where stations had been spotty, especially in the northeast. However, it was not in my experience a coverage extender to areas which received no service at all previously. The limit was less signal strength and more interference.

The nighttime increase to one kw was a disaster. Stations received interference where they had none previously and outside of very strong signal countours many have a constant chatter of interference audible below the audio.

The notion of further increasing the power on Class IV's has the great liklihood of producing even more interference on these channels especially in the heavily populated areas of the country. In exchange for being heard above lamp dimmers and computer power supplies many of these stations will give up the ability to be heard without on-channel interference beyond the shadow of their own towers.

The laws of physics are exceedingly difficult to repeal.

2880. More power for Class IV AMs

Newsgroup: rec.radio.broadcasting
Date: 1996-03-23 00:00:00 UTC
From: Dan Strassberg <EDNSTRASSBERG@cahners.com>
Message-ID: <4ivrk2$6hm@vixen.cso.uiuc.edu>
Source record: 24683

This is an additional response to a post by Fred Weinberg

Fred, I'm sure that my earlier post won't convince you of the folly of your propsal, but here's something that might:

A power increase for Class IVs would produce LOTS of prohibited overlap with adjacent-channel Class II and III stations (on 1220, 1250, 1330, 1350, 1390, 1410, 1440, 1460, 1480, and 1500). The rule used to be no overlap of 0.5 mV/m contours between stations on adjacent channels. I think that rule has been tightened, but I'm not sure what the new rule is. Overlap exceeding that permitted under the new rule is grandfathered if it existed before the new rule existed.

Anyhow, if you say that Class IVs which would create prohibited overlap if they were to increase power will not be allowed to increase, the whole proposal begins to unravel. If a Class IV can't increase, nearby co-channel Class IVs can't increase either, because unless all Class IVs increase, those that don't will have their daytime service areas materially reduced by co-channel interference. (Any power increase for Class IVs must be accompanied by a new and higher definition of the normally protected daytime contour.) And of course, a similar argument holds at night, although Class IVs have no normally protected nighttime service areas.

Your proposal opens a can of worms and works to the detriment of Class IV stations and to AMs on adjacent channels. Don't say that you weren't

warned.

>

Rich is correct. The Layer II implementation of Zephyr does not yet provide 24kHz sampling required for the higher bandwidth. Look for this feature later in the year. Our implementation will meet the MPEG standard for such coding, which will not be immediately compatible with other Layer II codecs at 24kHz sampling as some of them currently use proprietary schemes. (To defend these codec makers, I must report that they came up with these schemes before the standard was inked - they were acting in their customers' best interests.)

At present, the only method of using the two channels of Zephyr for higher bandwidths is to use Layer III. You can get 15kHz and you will be able to transmit each channel as a mono signal to two different destinations.

2887. Re: Selecting station for company's phone system "music on hold"

Newsgroup: rec.radio.broadcasting
Date: 1996-03-23 00:00:00 UTC
From: stellastar@aol.com
Message-ID: <4ivrk8$6hu@vixen.cso.uiuc.edu>
Source record: 24690

Just to complicate things one teeny bit more; if you ARE a radio station, and put your own signal into the "music on hold" system, which would seem logical...are your current ASCAP/BMI fees sufficient to cover that, or would they want even more?
And though it's nice for a caller to get to hear you, what about that suggestion that a client may hear his/her competitor's ads while on hold, or be confused by some live chat in their ear, thinking it's a "real" person taking them off hold, vs. the jocks on the radio?

Source record: 24691

Regarding the moderator's note at the end of your posting about putting the radio on your phone system. Yes, ASCAP and BMI will get upset if you put the commercial radio on your on hold system -- but only if first, you don't pay them and, second, they catch you. All you do is contract for a yearly "rights fee" (much like a radio station) and life is good again -- if you have a good cash flow... .bc

[Moderator's Note: I know ALL the arguments about this matter, but I still think it is a stinking form of petty double-dipping to charge a radio station for playing records (a public performance) then to try to extort another fee when that public broadcast is received in a place of business. I am all in favor of composer's making money, but it still smells. Bill]

: once?

For the same reason Top-40 radio itself developed: listeners are wont to
hear their favorites more often than their not-so-favorite songs.

What gets me is that in some markets, e.g. Minneapolis/St. Paul, that
have their own rich oldies history, there are few-- if any-- of the local
oldies hits played by oldies outlets. Also, the 'Motown Sound' was not
especially popular here at the time of the original releases, and yet
those records been played with great frequency over the past eight years by
the FM oldies station here as if it had been very* popular. 'Course it
then becomes a self-fulfilling prophecy (to stretch a phrase) when some
of the records start testing well a decade later. (Consider, too, the
fact that Minneapolis/St. Paul was the only* concert the Beatles did not
sell-out on their first tour-- although the line for A Hard Day's Night
did wind around the Southtown Theater three times.)

How many other markets have oldies stations that ignore local music
history and go strictly by national test results?

Because oldies stations, in order to compete with other formats, do exactly what their competitors do...they do music research, the results of which prove that, as a rule, shorter playlists get higher ratings.

I know this isn't a classic like the Beatles tunes mentioned on this subject... but there is a "one-two-three-f*ck" count at the beginning of Prince's "Raspberry Beret". If you play the 45 (anybody still have one) at 33, it becomes VERY obvious.

That's interesting, at our student station, we couldn't announce the title of the "Kiss My Ass" Kiss tribute album, though we *could* say the name of the band the Ass Ponys. Go figure...
We did play songs with all kinds of words in them, some of which we edit out. I was told to edit Liz Phair's "Supernova" ("...and you f*ck like a volcano..."), but not the Pogues' "Rain Street", or Heather Nova's "Walk This World", both of which also have the same word.

Since we are a student station, though, we have more than just the FCC to worry about...we've also got to keep the Dean and the Board of Trustees happy as well.

The club you're looking for is called DecalcoMania. It began as a club strictly for promo collectors (primarily bumper stickers, hence the "Decal" in the name), but has since expanded to include airchecks and other radio-related interests.

Their address is 9705 Mary NW, Seattle, WA 98117-2334. Annual membership dues, last time I looked, were a very reasonable $8 per year.

March 21, 1996

RCI TO CONTINUE BROADCASTING

The CBC is pleased to announce that it is withdrawing layoff notices for all employees of Radio Canada International. The Corporation's President and CEO, Perrin Beatty, made the announcement today after the Minister of Canadian Heritage, the Honourable Sheila Copps, announced that the federal government had found funding to keep RCI broadcasting for another year.

Mr. Beatty welcomed the news, saying that the Minister, along with her cabinet colleagues, deserve the credit for coming up with the federal funding. He also expressed gratitude to the Corporation's Board of Directors for its support. Under the arrangement, the Corporation and the federal government will split the annual $16-million cost of RCI.

Mr. Beatty hopes today's announcement will help to assuage anxiety over the future of the international service. He thanked the 125 employees of RCI, saying: "I appreciate your professionalism and dedication for working, under what must have been very difficult circumstances, over the last few months."

Mr. Beatty added: "While this solution is only for one year, the Corporation and the government will use the time to seek more permanent funding. I look forward to a long term solution."

Corporate Communications and Public Affairs
Head Office
Canadian Broadcasting Corporation

==========
Nothing would be possible without your support :)

From: cco@execpc.com
Message-ID: <4j2eop$csj@vixen.cso.uiuc.edu>
Source record: 24550

Hello. A friend of mine has some very old 16-inch diameter, thick, and heavy records that contain recordings of some historical talks that he would like to replicate on another media (probably cassette tape), and keep them in archives. He does not have any equipment to play them on, so he can't do the recording himself. I have not seen the record myself, so this is all I know, at this point.

Supposedly these were records produced for radio broadcast. I'm wondering if there is still equipment around that can play these. Do audio transfer companies work with them, and what are they called so that they might know what I am talking about? I'd also be interested in any other information about them (such as playback speed (RPM), timeframe when these were commonly used, etc.).

If you know anything about such records as these, or if you can recommend a better newsgroup on which to ask for information, please post or e-mail as you see fit.

Thanks a bunch!
Chris

> shortcuts and things to watch-out for.

We have been using the Vox Pro at KKNU Eugene for over a year and a half now, and we love it! Use it in 2 track, and put the caller on one track and the Jock on the other (you can double the amount of space you have by using it in mono, but it is so much more useful in 2 track). Time slip is such a great function! I know I tend to talk over the callers too much, and this allows me to fix this little problem in less than 10 seconds.

We also have a great set up for the 2 keyboards. We have them rack mounted under our Denons using 2 15" midi keyboard drawers (we used a Mac ergonomic keyboard so it would fit, our engineer had to re-wire it so the plugs go out the back).

Tell Dale that Beth says hi next time you give him a call. I'm the one that talked them into having the counter count down as well as just up. They called it the 'Beth Timer' at first!

Beth Bryant

can't help you with much besides the feedback and opinions.....I produce an all-request dance show on saturday nights, with the host (Jeff Lawrence) connected via ISDN in his home in Orlando, and let me tell you, since i'm feeding phone callers down the line, it saves me crucial minutes being able to use the digital editing rather than the old razor. I wouldn't be able to pull off the show without it. I love it...

As a former Employee of WAVC, maybe I can answer you Query.

WAVC has a history much like KDKA. It began broadcasting in the early
1930's -- before there was an FCC rule about W's and K's and which side
of the river you were on.

Since Minnesota has the Mississippi twisting through the middle of it,
You have W calls and K calls on both sides. Usually because many
stations in Minnesota began before the FCC W/K rule. That's why KSTP is
in St. Paul... and WCCO is in Minneapolis. Actually, many stations
chose call letters that mirrored their company or owners name. WCCO used
to stand for the Washburn County Company. The company milled flower...
you now call the company Pillsbury. Pillsbury no longer owns WCCO,
but they kept their calls. WAVC is the same way. Although I forget
what they stand for.

Now a days, with deregulations... I believe stations bordering the
Mississippi, have the luxury of choosing either a K or a W for calls, as
long as they are available on the FCC's list.

Hope that clears it all up!

Reply-To: uktony@mneuk.tcp.co.uk

About 20 years ago I obtained 12 programs of The ODIAR Wavelength.

It was a program which paported to come from sometime in the
future, when the music of the 1970's was called the vynal era.
This let them play what was then current music as if they were
oldies. They also had some great Si-Fi bits between tracks.

Does anyone know what happened to Cy Holiday who did the Verbal input
to the program, or anyone who was part of the program?

The one I saw for WBZ-TV WAS new, and clearly still under con-
struction, when I ran across it about 10-15 days ago. Could be it's
been pulled again (which would explain why the one link you found
turned out to be a no-hit), until it's fully ready for prime time.
The one I saw was MUCH cruder than the similar pages run by
KDKA-TV, KPIX-TV or the CBS network in NYC.
A lot of stations (including my own) currently have very basic
home pages with their current program schedules and a little station
history...but are working to put together something a little more
interactive and more useful for the listeners and radio buffs who
wander by. (Something that'll give you updated local news and wea-
ther, links to other interesting pages, and a chance to give some
feedback to program hosts, producers and management.) When you
figure only about 1/5 of the nation's radio and TV stations have any
Web presence at all, you see how it's going to grow...

Here's the latest in Radio Waves from San Diego
3.24.1996

Winter ratings were released for the 15th market:

Sum '95 Fall '95 N/D/J D/J/F
XHTZ-FM (CHR/Rhy) 6.8 6.7 7.5 7.4 Z90
KSON-A/F (Country) 6.4 7.8 7.6 7.2
KYXY-FM (AC) 7.6 6.8 7.2 7.1 "Kick-si 96"
KSDO-AM (News/Talk) 4.5 4.2 4.9 4.8 News/Talk 1130
XETRA-FM (Alt) 3.6 4.4 4.3 4.5 91X
KKLQ-FM (CHR/Pop) 5.4 4.1 4.3 4.2 Q-106
KFSD-FM (Classic) 3.2 3.3 4.0 4.0 Sale in process
KBZT-FM (Oldies) 4.5 3.5 3.9 3.9 K-BEST 95
KFMB-AM (Full Serv.) 4.2 3.5 3.8 3.7 760 KFMB
KFMB-FM (Hot AC) 3.3 3.2 3.5 3.6 Star 100.7
KGB-FM (Cl. Rock) 3.4 3.9 3.5 3.2
KFI-AM (Talk) 2.4 2.5 2.3 2.9 LA powerhouse
KIFM-FM (NAC) 3.2 3.2 2.9 2.9 Jazz FM98
XHKY-FM (Spanish) 1.4 2.6 n/a n/a
XHRM-FM (Alternative) 3.2 2.6 2.8 2.7 92.5 the Flash
KPOP-AM (Nostalgia) 2.7 2.2 2.5 n/a
KIOZ-FM (Rock) 3.0 2.5 2.4 2.6 Rock 102
XETRA-AM (Sports) 2.6 2.3 2.0 2.3 Xtra Sports 690
KOGO-AM (Talk) 1.9 2.4 2.2 2.0 Hot Talk
KKBH-FM (Oldies) 2.2 1.7 1.4 1.5 The Beach
KMKX-FM (Cl. Hits) 1.9 2.2 1.8 1.5 Vote RockMix 103
KCBQ-FM (Cl. Rock)* 1.8 1.3 1.2 1.1 SETS-FM
KNX-AM (News) 1.5 1.2 1.1 1.1 1070 [LA]
KUPR-FM (Adult Alt)** .8 1.2 .9 .8 Progressive 95.7
KCBQ-AM (Oldies) .8 .8 .9 .6
KOWF-FM (Country) 1.5 1.0 n/a n/a
XLTN-FM (Spanish) .8 1.0 n/a n/a
KSPA-AM (Nostalgia) 1.4 .8 n/a n/a
* Switched to SETS-FM format in February. Will be KXST, Oceanside 102.1
** Was KKOS-FM until September 95.

**ELECTRONS-Collide!: zNet, my provider, and host of the "Art Bell" web page had 500,000 individual access the weekend of March 15 - 17. During Bell's March 15th show, he featured Richard Hoagland. He's the skeptic that claims there is life on the moon, and Mars. http://www.artbell.com .

**Talk Wars?: Roger Hedgecock, who has the number one local talk show in San Diego, presently on KSDO, wants to give political commentary to KFMB-TV 8. However, word to the SDRW says that the Gannett station says "NO" because

of TV 8's ties to 760 KFMB. Hedgecock goes up against Stacy Taylor on KFMB. Listeners to both shows know that each are top of their talk format.

Hedgecock, who's contract is up in December of this year, is reportedly "feeling" other stations in the market if an agreement can not be reached with KSDO. Possibilities include: KFMB or KOGO. TV 8 recently dropped popular sports commentator Ted Leitner, during the 11 p.m., newscast . . . . http://www.rogerhedgecock.com

**Stations to flip: This week, SETS-FM, currently on 105.3, will "move" to 102.1. Rock 102, and the call letters, KIOZ, will "move" to 105.3. On the AM side of the house, 50kw DA KCBQ, 1170, will be the new home of Jef & Jerr, as the station simulcasts KKLQ-FM 106.5. This is the much publisized -- and often confused with listners -- buy out by Par of the Compass radio group. Compass will own an operate the Oceanside based 102.1 after the change. New calls: KXST [after the change].

**91X Changes: Mike Halloran, PD, "was let go" by the Jacor management team at XETRA AM-FM. Also, KHTS, 93.3, El Cajon is now relaying WFLZ, Tampa, Fla., while live studios being built at Xtra complex on Pacific Highway in SD.

**SD Tribune: Local readers of the San Diego Union Tribune will be glad to know that John Freeman is on-line. His e.mail address is: john.freeman@uniontrib.com . Stations with news are encouraged to send it electronically! John's column on local radio is in the Wednesday paper.

**LAST REPORT: I am taking the next few weeks off. I will, however, attend the NAB and the computer luncheon on Tuesday of the show! Be well!!

2909. Chicago Radio Watch-3/24/96

Newsgroup: rec.radio.broadcasting
Date: 1996-03-24 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <4j2ent$cr4@vixen.cso.uiuc.edu>
Source record: 24617

A sure sign the end of civilization is approaching......

Sports talker WMVP-AM was looking for a host for their pre and post Chicago White Sox game programming. Of all of the possible candidates existing on planet earth, WMVP selected the worst possible scenario. A radio bufoon named "Chris Cross" who pollutes the airwaves of Chicago on WMAQ-AM during the stations' lame "Sports Huddle" program wll be jumping over to MVP to host the pre/post game White Sox show. Chris, who regularly displays his utter lack of sports knowledge, is a living proof that if you cheer for the team your station broadcasts, your chances for a job increases exponentially. I think I am going to be ill.

In a related move, WMAQ has decided to replace Chris with something as enlightenng as him-dead air. No third member will be added to the "huddle".

Perhaps in a related move, Brian Davis is now "free lancing" at WMVP. Brian had been hosting an evening talk show. However, with the arrival of the White Sox, Brian's role would have been more and more limited. He will continue his work as pre/post game host for Chicago Black Hawk hockey.

Demise of a station....

Rocker WABT-FM, which is heard in the Northwest suburbs, has been sold by its owner M and M Broadcasters to the group which controls Z Spanish Radio Network. The new owners plan on changing the station to Spanish language broadcasting.

Air personality shuffles...

Morning jock Johnathon Brandmeier has a new affiliate: KZPP-FM in Phoenix. However, Johnny also lost one station when Milwaukee's QFM dropped him when the station went to a smooth jazz format.

Robert Chase, former morning personality (who hasn't been?) on alternative rocker WKQX has resurfaced at the station taking over the midday slot from Lisa Rush. Lisa gets Robert's fill-in/weekend duties.

Tim Hattrick and Willie D. Loon from KMLE in Phoenix will take over mornings at WKXK-FM. Capital Cities management received final approval to start using KXK in lieu of WLS-FM.

Al Lerner, formerly with infotaining WGN, sports talker WSCR and talker WLS-AM has resurfaced at sports talker WMVP where he will handle a weekend shift.

Nick Alton is out overnights at smooth jazz WNUA-FM. Budget cuts were to blame for the move. If NUA owner Evergreen Broadcasting needs to cut an overnight jock to make ends meet, you have to wonder about their ability to

manage money.

Dave Kaplan has inked an extension at WGN where he handles weekend sports talk and weekday sports updates.

Nan Wyatt, formerly of all news WBBM-AM has landed an anchor job in St. Louis at KMOX-AM. Nan shares the PM drive with former CNN correspondent Charles Jaco.

Your Chicago radio watcher will be vacationing in the warmth of Florida until April 1. If you have any questions or comments, I will get back to you after the 1st.

I just read that Don Imus made some pretty funny remarks about President Clinton last Thursday night at the Radio-TV Correspondents dinner--with Bill and Hillary present!

It was carried live on CSPAN, and the White House was so flipped out over the remarks that they asked CSPAN not to replay it. They denied the request and will show it again!

Does anyone know when it will be rebroadcast, or does anyone have a tape of it that I could borrow or buy??

Thanks!

Neil Scott

> 5fm
> Weekends 1-4am

Finding a way to make your listeners a part of your show is important.
But you've got to manage phones, just like any other part of the program.

There has to be a reason to use phones call on the air. If you can take a
call, or a portion of it, and tie it into a song, or something you've been
talking about during the show, all the better.

Try and learn something about the caller. Why do they want to hear a
particular song? Does is remind them of something? Is there a short,
humorous story surrounding it?

Invite them on your show, but remember....it's your show. Keep the calls
short, and don't use the same callers all the time. Treat listeners with
respect, and others will be encouraged to call.

Divide it by 10. KLAC is 5kw, directional at night. 5kw that low on the dial gets out better than 50 at the high end.

>
>Andrea Wiener in NYC

I just have to jump into this discussion. I work at the Dallas
All-News FM station. (KEWS 94.9 FM for those who missed the calls and
frequency) There has been a lot of talk about this without a lot of
information on the station itself.

First, the debate over whether this was the first all-news FM was pretty funny
to me. The promo line is actually "The First All-News FM Station in America,
Made in Texas." We are the first in Texas..not the first in America.

Second, it seems that people are more interested in the format idea itself
than with what we are actually doing and how well we are doing it.
Yes, we have the glitches and gaffes that any new station will have, but
overall, I'd have to say that each and every day we sound a bit better than
the day before. The quality of our product will ultimately determine whether
or not we get a lot of listeners. I think that in the long run, people will
find the quality of our newscasts to be the best in the market.

Third, will it work on FM?? This is a silly question. What I find ironic is
that it appears that many of you would not have nearly as many doubts about the
potential for success of this format if this was an AM station. I just don't
think it matters that much. I think you have to start by asking whether or not
the band you are going to put *any* format on has the potential to be listened
to by enough people to make it profitable.

Many of you mention the ultimate failure of all-news FM stations that were
on the air in the 1960's and 1970's. Well, back then, AM dominated the
radio market and many people *never* listened to FM...quite a few people didn't
even have an FM radio. Since then, that has been entirely reversed.

The FM band has proven to be able to reach enough listeners that a station
can make a profit. So has AM for that matter. Clearly, music formats are
best suited to the FM band. However, that does not mean that music can't
work on AM. Nor does it mean that a news format can't work on FM just because
AM has traditionally been the home of news on radio. If the programming is
good, something that the market needs and wants, and is properly promoted,

it will work. i.e. if your market was say 1% spanish speaking, the best spanish language format in the nation wouldn't do very well there....you get the picture.

So, do we have the right formula for success? That of course depends on how you define success. Our format is very simple: 30 minute newscasts..one right after another..all day and (soon) all night...continually updated... lots of live reports...lots of breaking news. I'm not sure that lends itself to a huge average quarter hour share, but I don't think it has to either.

In 1992, I worked at a station in Dallas that had about a 0.5 share in afternoon drive using basically the same format that 94.9 uses now. However, the ad sales were tremendous. Even though we had *no* promotion whatsoever, we had a huge cume and a very high-income listenership. When someone put an ad on our news, they got great results. Spots that should have been going for maybe $15-$20 were selling at about $60-$70 a spot. Now, if there had actually been some serious promotion of the station, who knows what we would have gotten.

Will there be adquate promotion of 94.9? Yes. We're owned by Infinity Broadcasting. From everything I've seen, they promote their stations very well.

Moderator wrote:

>its format to alternative/modern rock. They still have Stern on in the
>morning, but they dropped the Greaseman at night.

Mike--
Sorry to disappoint you, but the Greaseman's ratings were miserable on
K-ROCK. The only reason they kept him on was because Infinity (K-ROCK's
owner) was syndicating him and wanted the clearance in the NY market. The
switch in format was a way to dump him off the station and save face among
the other affiliates.

As for Grease's future, he's doing AM Drive in Atlanta (I think) via
satellite or phone line in a separate deal from his syndication and his
syndicated show may be folded before too much longer.

Forgive me for the tardy response, I'm just catching up on a slew of Airwaves!

Re: the practice of masking objectionable words. This raises two issues. 1) The integrity of the artist's creation as intended as a creative expression; 2) over-editing to meet the "PC" standards du jour.
Here's an example. About a year ago, rapper and TV star Queen Latifah, among the pioneers of pro-female rap and a gold-level-selling performer, released a single titled "U.N.I.T.Y." The song was a positive anthem as reflected in the title, and included the lyric "who you calling a bitch," going on to discuss respect and unity. Understand that the use of "bitch" was not for exploitative or attention-getting purposes, it was used in a valid sense to make a valid point, "bitch" being common vernacular on the street (and on TV and everywhere else...). Latifah was the perfect person to convey such a theme.
Wouldn't you know it? Many stations either refused to play the song or edited the "bad" word out, thus nullifying the entire point of the song. Every time I heard the emasculated version, I cringed. Why bother playing it?
A case of not seeing the forest for the trees. (Hey! And no smarty-pants comments about Latifah's recent traffic stop, which uncovered a gun and driving under the influence of smoke.)

Alan Freed

[Moderator's Note: Why play it? For the very reasons you mentioned, Alan. It is a positive song in a very negative-leaning musical genre. The ord 'bitch' should not have been cut, but it is better than cutting the song entirely, no? Bill]

2919. Jack Buck fired from CBS Monday Night Football

BUCK, STRAM ARE REPLACED ON MNF;
MORE COST CUTTING BY GROUP W/CBS

by Scott Simon

ST. LOUIS --- It's official --- Jack Buck and Hank Stram have been fired from their long-time Monday Night Football gig, a victim of cost-cutting by Group W/CBS.

They are being replaced by Howard David and Matt Millen.

Buck told Dan Caesar of the St. Louis Post-Dispatch that he accepted a pay cut before the 1995 season, even before Group W had acquired CBS. But after the season, when Group W was in control, he had been asked again to accept a cut, to which he said no.

Buck and Stram had been a team since 1977, when CBS acquired the rights, except for the 1985 and 1986 seasons, when the rights were owned by NBC radio.

Buck will continue to broadcast St. Louis Cardinals home games for KMOX and the Cardinals radio network, as well as hosting sports talk shows for the flagship station. Stram, who lives in New Orleans, will do some spot features for CBS.

The "1996 Broadcasting & Cable Yearbook" is available as a standing order for $161.95 by calling 1-800-521-8110. Press 1 for customer service, and ask for operator BF66. Or, you can track it down at this URL: http://www.reedref.com

Another concise and inexpensive directory is the M Street Radio Directory, published annually. The M Street listing includes frequency, power, directionality, format, address, phone number, and other info. M Street also is indexed by call letter order and by frequency. The M Street directory can be purchased directly from M Street at 800-248-4242. The 1996 "M Street Radio Directory" costs (I think) $45. I don't know of an e-mail address or Internet URL for M Street.

The station I was most recently laid off from (since they can't afford anything anymore) is run with an iron fist by a very good consultant. He is good at playing the ratings game. The station ignored, and still does,.... its purpose. To make money. While screaming about not making any. They ID between every song in a 12 in a row sweep from :55 to :35.... It works great for top of mind awareness and it resulted in putting them back on top in Arbitron. But it also resulted in what any pea could see. Just because people remember you when they turn around a few days later to write down a few days of listening habits does not mean they are around to hear the commercials when you finally get around to present them. Since the format calls for nothing but promoting the 12 in a row nothing is forward movement. 12 songs are back announced. (Guess what you missed, HA!) the commercial segments are at 35, 45 and 52. With an ID between every song (jingles, sweepers, acapellas, shouts) there is no flow established. With tempos not being considered... ballads crash into rockers while rockers fall of cliffs into funeral derges. But you see, tempo and timbre doesn't matter when 12 in a row (12 ids separated by 12 unfamilier songs) is the point.

So the have great numbers and no sales. You see.... the consultant has done his job and done it well. They got the numbers. Thats what they asked him for. But they don't have the sales because advertisers don't get responses from the station. How could they. The listeners sample to see what the song is they don't commit to the station. When the commercials start up they know they have to wait from :35 to :55 to hear another 12 in a row so they don't pay attention to what might be played between commercial sets. All the hot hits are put in that spotlighted 12 in a row with nondescript older material stuck between the sets. No one ever teases anything coming except the 12 in a rwo. The station has been reading the same liner cards in the same location, the same way for 6 months or longer. Driving those calls home. And driving those listeners away. Ratings are fine but unless you measure your success by your profit you

have nothing.

So don't be concerned with how many songs you can get away with without IDing just don't get carried away in either direction.

: for a yearly "rights fee" (much like a radio station) and life is good
: again -- if you have a good cash flow... .bc

Isn't the rule based on playing a radio station in a store like this:
It's okay if you just have a radio sitting out there. But if it's feeding
a permanently-installed sound or public address system (with speakers
built into the ceiling, for example), then you are liable for ASCAP fees.
And besides, the fees that ASCAP says the want for playing a radio in a
store are something around $600 per year. For this amount, you could get
a hookup from Muzak, etc. and have all music and no commercials from your
competitors or anyone. Why bother with commercial radio then?

SidS1045 (sids1045@aol.com) wrote:

: Because oldies stations, in order to compete with other formats, do
: exactly what their competitors do...they do music research, the results of
: which prove that, as a rule, shorter playlists get higher ratings.

This is a prime example of broadcasters putting their own interests ahead
of the listening audience, as they often do.

I live in a major market, and every station in a rock or oldies format
has a short list of songs they play over and over and over and over....
To the point where I am thoroughly sick of them, even though I might have
once liked the songs. I mean, I punch the button more often to get rid
of a song which has been played to death than to get rid of commercials.

It's like the MD's at these stations think that the ONLY thing people want
to hear was what was #1 on the Billboard chart when the listener was
exactly 20 years old. And that they want to hear these SAME songs every
single day... Or they are so afraid that because they play some song
which got a few too many negatives on some music test, they will lose
audience because of it. So they stick to the short, "safe", restricted
playlist. I have a feeling some programmers view listners more as rats
in a lab and/or numbers in a spreadsheet than real people.

I think the stations do this because so far, they've been the only game
in town, and can get away with it. A wider variety of music would
benefit the public. These sickeningly short playlists produce a
perceived benefit to the broadcasters, but the audience loses out.

Recently, I was on driving trip and was amazed at how many good songs
exist but which don't get airplay anymore in my market. Either the other
markets have different short playlists, or the smaller markets have a
different mentality about music variety.

But change is on the horizon. Right now, there are lots of services
which deliver quality, commercial-free music to the home by satellite.
The number of these is growing every month. And in only a couple more
years, there will many new stations available by a service which operates
off a tiny satellite antenna. That you can listen to anywhere you want.

I'll say right now that I'm going to be first in line to get one of these
when they come out in 1998 or so.

More station choices benefits the audience. They get a much better chance
of hearing their favorite music. Yet every time the subject of adding
additional stations comes, the NAB has lobbied furiously to shoot it down.
And in recent years their attempts have been mostly successful.

Preserving the status quo, where the listener is forced to choose between a small fixed number of stations. Where the playlist is a limited as they choose to make it. Where music is plagued with commercials which are annoying, irritating, insulting, and repetitious.

But technology is changing so fast that even the NAB's best efforts to stop it can't succeed anymore. I am looking forward to the day when a radio picks up at least 100 stations, where they have a wide variety of all kinds of music, and NO commercials. Instead, it will be financed by payment of a very reasonable subscription charge, and worth it. I'm looking forward to it.

Message-ID: <4j2eoe$cs2@vixen.cso.uiuc.edu>
Source record: 24638

Reply-To: dhughes@prairienet.org (Dan Hughes)

To the fellow from Minneapolis who laments the fact that local oldies are not played on the local oldies stations:

The Gestures! The Avantis! T.C. Atlantic! And my favorite (because I knew the bass player) The Bad Omens!
How sad these great bands are not remembered in their own town. My guess is that the program directors who ignore these songs did not grow up in Mpls and know nothing of the strong local music scene in the 60's.
On-air radio station employees are this generation's gypsies, and they have no sense of local history because they weren't local when history was being made. Also, many of today's program directors weren't even BORN when these groups were recording.
Wouldn't it be a hoot for someone like yourself to find a local station willing to give you, say, two hours every Sunday afternoon to play Twin Cities oldies? I'd just about drive the 500 miles to hear it.... ---Dan

Eric Rhodes is indeed the publisher of Radio Ink and the book about the first 75 years of radio. He could also be termed a radio "buff." He also was an air personality, program director, station owner, and station manager. Oh yes, he was also a consultant.

There is no connection to KDKA, and the book isn't a hype. It was a labor of love for Eric. You should see his collection of antique radios. You should also know about the myriad of ways he helps radio people, from new ideas to finding jobs.

Music testing and it's results are pre-determined by the titles that are tested. Eg.: Latest research shows the 25-34 year old is by far and away the largest demo listening to "Alternative" stations. Yet PD's, consultants and testing orgs. will tell you that "they" don't want to hear all the music that
made "Alternative" the format that it is today, i.e.: 80's. That music is relegated to specialty programming. HOWEVER -- latest music testing in the Nassau/Suffolk, N.Y. market show that the above mentioned PD's, consultants & testing orgs. are WRONG....80's music is exactly what the "Alternative" listener wants to hear. This might be a local phenomenon, however you can't assume that after the N/S, NY music testing results. The biggest problem w/radio today: MEDIOCRITY!

2939. K106 Seattle...Blown up!

>>
..>> Interestingly enough, there is a WSTR-TV, Star 64 in Cincinnati, OH.
How can two stations in separate cities have the same call letters? Or has
the FCC relaxed its criteria for this too?
>>
>> Dan
>>
>You're talking TV vs. Radio. No two radio or TV stations can use the
>same calls, but WSTR-FM and WSTR-TV are different. There's also a WONE-FM
>in Akron, OH and WONE-AM in Dayton, OH.
>
>- Chris

The FCC changed its Rules regarding Call Letters 7-8 years ago
permitting stations in different services to have call letters in
different cities. In the Los Angeles area, CBS changed its FM calls
from KODJ to KCBS-FM (KCBS-AM has been and continues to be in San
Francisco). And, taking this to the ultimate end, the KCAL calls are
fully distributed:
Call City Owner
KCAL-AM Redlands, CA Andy James Farkas
KCAL-FM Redlands, CA Anaheim Broadcasting
KCAL-TV Los Angeles, CA Walt Disney Company
The stations are all separately owned.
So, these days, one cannot assume that any XXXX -AM/-FM/-TV calls are
even related in any way to each other.

Steve Kingston (ex-WHTZ-FM Z100 Program Director) broke his silence on the message boards of America Online today.

In a post in which Kingston criticized a writer for what Kingston labeled "irresponsible journalism", he concluded:

"The way I see it, WKTU will go for Z100's target audience, and win it...and WXRK will go for their musical position, and own it....it's tough when you have to burn down something you helped build."

I don't think there's any one who knows better what the future has in store for New York City radio than Steve Kingston...and I think this forecast of his will hold true. WKTU will steal Z100's primary audience...and K-Rock will rule the format with him on board. If nothing else, New York City radio will be very interesting this fall when Kingston assumes his role at WXRK, Poleman is firmly planted in his role at WHTZ, Q104 lands on a format, and WKTU matures it's playlist and has a complete on-air talent schedule.

If you have access to America Online, I encourage you to check out the industry message boards (Keyword: MMC) and read the complete text of Kingston's passionate comments.

Personally, I think the move from Z100 to K-Rock is a step in the right direction for Steve Kingston's career. He lived up to the reputation of being the "King of 100.3"; he dominated the format, mastered the convergence of CHR and alternative, and is in a position to take the music to the next level without killing the product/image he's built-up over the last few years.

I wish him nothing but continued success at WXRK...and I'm forever thankfull to him for giving me my "big break" in major-market radio (heh..or any radio for that matter) by giving me a role on Z100. I'm sure he'll continue to have the Midas touch regardless of where he's at.

C-Span showed it last night at 9PM and Mid ET. They may show it again; check http://www.c-span.org for today's schedule.

It was really painful to watch. Imus realized toward the end that he had gone too far; the flop sweat was palpable. Unless you really enjoy seeing someone die at the dais, don't look for it. He really couldn't suck enough.

Although Monday morning's radio show promises to be >very< interesting.

2943. Microphones for Home Studio/Broadcasting

Newsgroup: rec.radio.broadcasting
Date: 1996-03-25 00:00:00 UTC
From: gadesign@crl.com
Message-ID: <4j5n21$cef@vixen.cso.uiuc.edu>
Source record: 24501

Hello All!

I lost the previous msg, so here it goes again.

I have been doing some research and have come to the conclusion that the best choices for a microphone are the following.

Spending Budget - $350-375

Shure SM7 / EV RE20 / Sennheiser MD421-U

I have only used the SM7, the local store does not carry any of them,

My needs are:
Record voice-overs/narration (educational tapes, training tapes, etc) into a Tascam 644 4track recorder. Mixdown will eventually go into a DAT recorder. Some programs will be broadcasted over radio. (These most likely will be mixdown to Tascam 102MKII) Some programs may be duplicated, to be sold at a later date (DAT mixdown).

MIC (BAL) Input (XLR Balanced x 2)
Mic Impedance Less than 600 ohms
Input Impedance 2.8k ohms
Nominal Input Level -70dBV (0.3mV) to -25 dBV (56mV)
Maximum Input Level -7dBV (0.4V), trim minimum
*No Phantom Power

The above information is the specification for the XLR inputs.

In part I have to rely on you fellow netters for input about these mics, Reliability, Track Record, Quality Sound, etc.

Based in your experience and with the information above, what would be a good choice for me. Most likely I will purchase this microphone mailorder, unless I find a local store that stocks them (and has competitive pricing)

One other microphone that caught my attention, at least from the ad, is the CAD E-100, and perhaps the CAD E-200. However I have not heard/read any info about them. (provieded I can afford it) :)

Most likely I will be creating a web page to help other people that may be in the same situation as myself.

Thank you in advance for all your help/opinions.

2944. Micropower in California

Newsgroup: rec.radio.broadcasting
Date: 1996-03-25 00:00:00 UTC
From: bp648@yfn.ysu.edu
Message-ID: <4j5n22$ceg@vixen.cso.uiuc.edu>
Source record: 24502

A month or two ago I was watching CNN Headline News when they did a
piece on low-powered stations operating in California. I believe the Sony
corp. was an owner of one of these stations. I guess from the tail part
of the story that I saw; the company uses the stations to let commuters
in on new music from the latest artists.

If someone could fill me in on what they're using to broadcast (part
15 type stuff, i'm sure) and what it's all about ... i'd appreciate it.
I have an interest in the microbroadcasting movement.

Please e-mail in addition to responding to this message. I don't often
get time to check the newsgroups.

Thanks!
Adam Rideout

Reply-To: gbostrom@aol.com (Gbostrom)

Is anyone out there currently working in radio in Montreal? I would love
to know what it is like there. How does it compare to the U.S? I'd love
to travel to different foreign cities and see what radio is like there.
If anyone can give me some details on Montreal radio that would be great.

2946. New Orleans Media Watch: 24 March 1996

WGNO: ABC 26 has finished its first week of newscasts since gaining the ABC affiliation on 1 January. Co-anchors are Andre Trevigne and Brad Giffen. Giffen is a former employee of Toronto's MuchMusic cable channel. New Orleans veteran Ed Daniels reports the sports, and weather is by Bruce Katz, formerly of WAFB Baton Rouge. Although the only nightly newscast is at 10 pm, they'll likely expand.

Meanwhile, Trevigne will continue her radio talk show on WWL 870 AM. She can be heard middays from 9am-noon.

2947. Re: OLDIES STATIONS REDUNDANCY

Newsgroup: rec.radio.broadcasting

Bob-- didn't we used to work together a long time ago? Regarding your comment, the other big problem is those old buzz-words, 'duopoly' and 'confority'. There has always been a herd mentality in radio-- even years ago, a format would take off in a market (remember disco?) and suddenly, 100 stations would be doing it whether it fit their market or not. Today, with fewer choices and fewer owners, there is even less of a desire to take chances. And people wonder why time spent listening is down... sigh...

In article <4j2eod$cs1@vixen.cso.uiuc.edu>, slwork@netcom.com (Steve Work) writes:

>This is a prime example of broadcasters putting their own interests ahead

>of the listening audience, as they often do.

The interest of broadcasters is to attract a listening audience.

>It's like the MD's at these stations think that the ONLY thing people want
>to hear was what was #1 on the Billboard chart when the listener was
>exactly 20 years old. And that they want to hear these SAME songs every
>single day... Or they are so afraid that because they play some song
>which got a few too many negatives on some music test, they will lose
>audience because of it. So they stick to the short, "safe", restricted
>playlist.

All that is true. So what?

> I have a feeling some programmers view listners more as rats
>in a lab and/or numbers in a spreadsheet than real people.

If that were the case, they'd be experimenting with untested music.

>I think the stations do this because so far, they've been the only game
>in town, and can get away with it. A wider variety of music would
>benefit the public.

Oldies stations compete with news/talk, country, classic rock, adult contemporary and "smooth jazz" formats for roughly the same audience. And then there's soul oldies, 70's oldies, etc. And all of radio is competing with every other entertainment form and information service available.

>But change is on the horizon. Right now, there are lots of services
>which deliver quality, commercial-free music to the home by satellite.
>The number of these is growing every month. And in only a couple more
>years, there will many new stations available by a service which operates

>off a tiny satellite antenna. That you can listen to anywhere you want.

Which will result in even more narrowing of formats as these services try to differentiate themselves from one another, and from traditional radio. So it will get worse, not better.

>More station choices benefits the audience. They get a much better chance
>of hearing their favorite music. Yet every time the subject of adding

>additional stations comes, the NAB has lobbied furiously to shoot it down.
>And in recent years their attempts have been mostly successful.

This is objectively and demonstrably false. Hundreds of new stations have been allowed to start up in the past decade. There are more stations on the air than ever, and music radio is more boring than ever. Why do you suppose that is? I'll tell you. lt's because the more stations there are, the smaller the audience shares for each one become. To survive, they must "narrowcast" and appeal to an ever-lowering common denominator of taste. They can afford fewer and fewer risks as competition increases.

If you've ever switched stations when a song you didn't like or a newscast or a commercial came on, you're part of the problem.

It was only in the "bad old days" of a handful of stations per market that each station featured a lot of variety. That's because a station could afford to take a chance on playing something people might not like, since there weren't many other places they could go. I know. I was there. 25 years ago I programmed an a/c station with a huge playlist of over 100 currents and literally thousands of oldies and album cuts. It was a 3-station market. It was fun, but it's history. Nowadays, music programmers must live by the adage that what you don't play can't hurt you.

Frequently Asked Questions (FAQ) File for OTR
Old-Time Radio
(FAQ Edited by Lou Genco (lgenco@old-time.com))

Last Modified: Thu 03-21-1996
---------------------

Copies of this FAQ are distributed monthly to rec.answers,
rec.radio.info, rec.broadcasting, rec.antiques.radio+phono and other
newsgroups; and are on file at bloom-picayune.mit.edu in the file:
/pub/usenet-by-group/news.answers/radio/old-time-faq.

---------------------

Table of contents:

Q1. What is "OTR"?
Q2. You haven't mentioned OTR music, why not?
Q3. Where can I buy recordings of old radio shows?
Q4. Which vendors have (lower prices) (higher quality) (faster
response)?
Q5. Are OTR shows rebroadcast? If so, where and when?
Q6. I remember a great show called (x). When was it aired?
Q7. Are there any books about OTR?
Q8. Does anybody trade tapes of OTR shows?
Q9. What's this stuff about Copyright?
Q10. How can I get my local radio station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
Q16. Is there a World Wide Web page (URL) or FTP address that I can
access for more info?
Q17. Is there an email newsletter on OTR? How do I subscribe to it?
Q18. Can I get archived copies of old issues of the OTR Digest?
```

Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your FTP site?
Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?
Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1960's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band. There is also an Old Time Music on the Radio WWW page (apparently for Bluegrass music).

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from my OTR WWW site.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR Digest to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at http://www.old-time.com.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested

various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at http://www.old-time.com

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the new National Radio Club's _AM Radio Log, 16th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at +1 615 865 1525 voice, or +1 615 865-2598 fax. The address is M Street Corp., P.O.Box 1479 Madison, TN 37116-1479 Price is $44.95 plus S&H

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR Digest, or look through the program databases (WWW or FTP). Also see answer A14 below. Please do NOT send requests to -me- to name or find specific programs for you.

Q7. Are there any books about OTR?

A7. Yes, there are many books related to OTR. See my WWW page or for a list of some of them.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR Digest. My WWW page has a database of private traders as well. Leave a note in the OTR Digest if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights have been renewed. Examples of the latter include The Shadow (Conde Nast) and some of Arch Oboler's productions. See my WWW site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Local stations may be able to redistribute OTR available via satellite downlink. Ask the station managers to check with either:

Collectors Radio Network (The Radio Vault)
1-800-739-7900

Yesterday USA (YUSA)
(214) 690-3636
YUSAOTR@aol.com

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping.

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo. If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible difference. Other audio optimization features are of negligible value for OTR. Dolby HX also requires no playback decoder.

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and leave a note in the OTR Digest asking about local clubs for your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and

Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?

A14. Some of the OTR Digest subscribers have contributed Program Logs for several well-known series. The logs are available at my WWW site. While you are there, check the online libraries; some collectors have very complete collections of various serials, and they are listed by name or date in their listings. I am currently compiling a database of contributed catalogs and libraries, which will eventually contain most of the readily-available programs for popular OTR series. At present, the database exceeds 90,000 records, and is searchable with your WWW browser.

The "logs and publications" entry in my WWW page gives names and addresses of several vendors of these items. (Thanks to RadioJoe5@aol.com (Joe Coleman)). There is also a Netscape table of logs and log sources at http://www.old-time.com

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 95). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR Digest for inclusion in one of our databases.

Jim Widner and others have contributed some synopses / introductions to various programs. They are on file at his site and mine.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more information?

A16. Yes, there is a growing number of WWW sites, as well as FTP sites and a Gopher. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start, since the major OTR WWW pages have links or pointers to each other. If you learn of any others, I'd appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.old-time.com

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: pub/AIRWAVES/OTR

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Yes. The Internet OTR Digest is a freely available electronic newsletter, mailed every night to subscribers. Traffic has increased considerably, and the digest is usually mailed more than once a day!

To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR Digest?

A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible via:

FTP: radio.aiss.uiuc.edu (directory /pub/AIRWAVES/OTR/)
GOPHER radio.aiss.uiuc.edu 7070 (select OTR)
Web http://radio.aiss.uiuc.edu/~airwaves/history.html#archive

Readers with a WWW browser can access a "smart" archive program. This program can sort and display old OTR articles by author, subject, thread or date submitted. Just the thing to use when you want to catch up on a discussion thread, without plowing through a lot of extraneous material. To access this service, point your browser at: http://radio.aiss.uiuc.edu/~rrb/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the takeup reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This may lead to a greater loss of signal (particularly high-frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibilty with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

From: ErikS74342@aol.com

I'm using a brand-new dubbing Sony deck that has given me terrific results over the last three months. (Sony TC-WR565, about $200 at Circuit City). It's a dual-motor model, with precise LED volume meters and tape counters. It is one step below Sony's best dubbing deck, which offered few additional features for an additional $70. I wouldn't recommend Sony's entry-level models, which skimp on the details. This deck automatically encodes tapes with Dolby HX.

This particular deck comes with a pitch control that can be used to correct pitch problems with master tapes -- a godsend when working with too-fast reel-to-reel source copies. (Sony also offers the TC-WR465, without the pitch control, for about $20 less. Believe me, it's worth the price.)

To reset volume levels and correct other deficiencies with master tapes -- yes, you need a second cassette deck and a graphic equalizer.

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO <click> TWO <click> TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements,

but instead created a tape much more prone to
hydrolization than anything had ever been. The problem
did not show up for years, and the formulas did not get
corrected until sometime in the mid-80's. Theoretically
any tape could get hydrolyzed over a long period of time,
especially if stored in a high-humidity situation, but in
practice most squeaky tapes were made (roughly speaking)
between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and
entreprenurially successful producer of radio drama in
the US today) gave me his formula and I've done it many
times now and it works:

Bake the tapes in a convection oven for 8 hours at 130
degrees Fahrenheit. It is entirely possible to bake a
tape twice if the first time doesn't do the trick. You
get about a three-week "window", sez Tom, before the tape
starts to re-absorb water. So the best deal is to bake
the tape and immediately make a copy. But if you forget
to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios,
phonographs and accessories is the rec.antiques.radio+phono
newsgroup, created by Bill Robie. A pointer to his FAQ may also be
found at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m)
- Focusses on radios, phonos, and related materials made
before the 60s
- Avoids "ham" radio gear (the Boat Anchors group
covers that)
- Has a -very- comprehensive FAQ that new folks should read

Several museum sites are available at my WWW page. The WWW
site, "The Bellingham Antique Radio Museum" is also available
directly via URL http://www.pacificrim.net:80/~radio/ This site
contains info and GIFs on old radio hardware, as well as
soundclips of OTR show intros.

The University of Maryland also has a WWW site entitled "Broadcast
Pioneers' Library". This is an excellent resource for the serious
/ professional researcher. It can be accessed through my WWW
site, or directly via the URL:
http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware
resources may also be found at http://www.old-time.com

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios. A SuperRadio FAQ is available via http://www.old-time.com

David Moisan maintains a text FAQ for the GE Super Radio at
ftp://ftp.shore.net/members/dmoisan/faqs/gesr_faq.txt
he also has a hypertext formatted FAQ at
http://www.shore.net/~dmoisan/faqs/superradio/gesr_faq.html

-Some- readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, drop me a stamped,
self-addressed envelope:

Dan Hughes
WPCD, Parkland College
2400 West Bradley Ave
Champaign IL 61821

If you are interested in AM Broadcast Band reception, and technical artlcles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at http://www.old-time.com):

Atlanta Radio Theatre Company: http://www.webamerica.com/artc
ZBS Media http://www.zbs.org/zbs.html
LodesTone Productions
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop?
http://www.thoughtport.com/tpa/non/mrtw

There is also a mailing list for folks interested in current
radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at
your WWW site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file
for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers.
To get the latest edition, send e-mail to one of the addresses below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:

SUBJECT: [blank]
BODY:
help
end

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where
can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained
to OTR topics. Folks interested in early TV shows might be
interested in this note from Kathy O'Connell
(oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman
named Linda has just started a list devoted to
50's-60's Television. You can contact her at
LEEKNIGHTS@delphi.com I signed on immediately, and
it's a wonderful place to meet other people
interested in this subject. Very much like the OTR
list, but for television!!!

Q26. I have never heard "Old Time Radio". Can I get an audio sample
via Internet?

A26. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Most of the soundbytes can be downloaded, and played on your computer's sound card.

Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A27. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one one I like best has some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase orders, prepayment, cash and other nuisances).

Polyline Corporation
1233 Rand Road
Des Plaines IL 60016
(708) 390-7744
FAX (708) 390-9886

or, their West Coast branch (where I got mine)
PolyWest Corporation
16018 Adelante Street, Unit C
Irwindale CA 91702
(818) 969-8555
FAX (818) 969-2267

They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in white and CPCN.4+4M/RBLU in royal blue. Outside dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.

I paid $2.11 each plus tax and shipping for my latest batch (November 1995). The minimum economical order is 40 albums. You can order smaller quantities, but the price is $4.68 EACH. Check with

Polyline before ordering. The prices change
frequently.

Q28. All this new software is a bit difficult for me to use, as I am
blind. Can you give me any assistance on how to read your page?

A28. Yes. Although my WWW page is best viewed with Netscape, I also
have a text-only menu that might be easier on your reader.
Use the URL http://www.old-time.com/txtindx.html

There are many blind OTR collectors who might be able to help you
as well. Two experts in OTR as a hobby and Internet / computers
are: Henry Brugsch <henry@g0gku.demon.co.uk> and Ronald Staley
<rstaley@netcom.com>. One or the other would be able to help you
use your computer and reader to access my pages or maintain your
OTR collection.

> Alan. It is a positive song in a very negative-leaning musical genre.
> The word 'bitch' should not have been cut, but it is better than
> cutting the song entirely, no? Bill]

Bill, we agree that the song has thematic merit, but by playing the song with the "bad" word eliminated, radio removed the point of reference to what she is directing her remarks at, and weakened its impact. Listeners were deprived of an important element in receiving her message. I think the use of the word was legit in this context.

[Moderator's Note: I agree with you, Alan, but I still submit that it beats the other choice, simply ignoring the track and not playing it at all. Bill]

2952. LES MALLOY - Pioneer in Bay area Talk Radio - Dead at 81

Newsgroup: rec.radio.broadcasting
Date: 1996-03-25 00:00:00 UTC
From: DUANE WADSWORTH <dwadsworth@wadsworth-pacific.com>
Message-ID: <4j5n1v$ced@vixen.cso.uiuc.edu>
Source record: 24561

This obituary appeared in the San Francisco Chronicle on 03/22/96:

Les Malloy, a popular radio and Tv personality in the Bay area for a half-century, died yesterday at his Atherton (CA) home after a long illness. He was 81.

A disc jockey with a folksy, garrulous style, Mr. Malloy was best known in recent years for his "Freeway Funnies," an afternoon commute program of vintage comedy that ran on tiny KEST radio (1450 KHz, San Francisco) for 20 years.

Born in 1915, the son of a San Francisco policeman, Mr. Malloy's radio career began in 1934 when, at age 16, he started at a San Francisco station called KGTT.

By the 1940s, Mr. Malloy was one of The City's pre-eminent disc jockeys, spinning records on as many as three radio stations a week, including KGO, KYA and KFRC.

During the 1950s he graduated to television, hosting the "Les Malloy Show" on KGO-TV, a precursor to "The Tonight Show," and other variety programs. He was famous for demanding that cameras focus on his guests instead of himself.

"Les pioneered talk radio - we're all kind of his children," said Ed Baxter, afternoon news anchor at all-talk KGO-AM.

Mr. Malloy owned radio stations in several cities and is also credited with starting the nation's first Spanish-language broadcasts of major league baseball.

Well known for his philanthropic activities, he was honored at 1995 Man of the Year at Bellarmine College Prep in San Jose.

Mr. Malloy is survived by his wife of 50 years, Gerogiene, of Atherton; a daughter, Leslie Price of Sacramento; a son, David of Redwood City; four grandchildren; and one great-grandchild.

Funeral services will be private, the family said.

<<This is a prime example of broadcasters putting their own interests ahead
of the listening audience, as they often do.>>

If a broadcaster researches his/her audience, and comes to the conclusion that a shorter playlist gets a bigger audience, then the broadcaster is in sync with the audience, not putting its own interests ahad of the audience's. It may also interest you to know that broadcasting is a business, and a business that loses money year after year because they make the wrong programming decisions is not a business for very long.

<<It's like the MD's at these stations think that the ONLY thing people want
to hear was what was #1 on the Billboard chart when the listener was exactly 20 years old. And that they want to hear these SAME songs every single day... Or they are so afraid that because they play some song which got a few too many negatives on some music test, they will lose audience because of it. So they stick to the short, "safe", restricted playlist. I have a feeling some programmers view listners more as rats in a lab and/or numbers in a spreadsheet than real people.>>

So...what's your solution for measuring audience tastes? And what makes you so sure that any other mathod of research will come up with any different result?

<<But change is on the horizon. Right now, there are lots of services which deliver quality, commercial-free music to the home by satellite. The number of these is growing every month. And in only a couple more years, there will many new stations available by a service which operates off a tiny satellite antenna. That you can listen to anywhere you want.>>

Uh-huh. And what makes you think the programmers of satellite radio won't make their decisions the same way that it's being done now?

<<But technology is changing so fast that even the NAB's best efforts to stop it can't succeed anymore. I am looking forward to the day when a radio picks up at least 100 stations, where they have a wide variety of all kinds of music, and NO commercials. Instead, it will be financed by payment of a very reasonable subscription charge, and worth it. I'm looking forward to it.>>

No difference from what's being done now...just the method of paying for it.

What this seems to boil down to, is that you don't like what you hear on the air. Perhaps your own personal radio station is the answer...then you can play anything you like.<g>

THIS is a prime example of not understanding that since deregulation,
broadcasting is a revenue-driven business, not a protected public utility.

>More station choices benefits the audience. They get a much better chance
>of hearing their favorite music.

Really? Then why do so many different stations in a market play the same
music? After all, how many news/talk stations does it take to cover what's
happening in a city? There has been a dramatic increase in the number of
licenses, especially FM licenses in the past 10-15 years...but that hasn't
translated to more variety...it just means every market has Rush and Howard
and no matter what time of day or night, you'll always find somebody playing
Hootie...

>Yet every time the subject of adding
>additional stations comes, the NAB has lobbied furiously to shoot it down.

Because the last I heard, over half the radio stations in the country are
losing money. Adding more stations (increasing competition, if you will) has
resulted in what we have today....Everybody playing the same things, trying to
scratch out a living. That's compared to the pre-deregulation days where a
licensee had a little protection and as long as he served the public in some
fashion, he could plan on creating a niche for himself without having to
compete with 6 other stations in the market all owned by the same company in
NYC...

I'm not unsympathetic to your comments above...I just think you're a little
naive if you believe that broadcasting in the 90s is about providing the
audience with a wide range of programming choices--that's 70s stuff. Today,
unfortunately, its about AQH, cume, and converting that to advertising revenue
in order to pay the lenders, pay the staff, pay the bills, and try to have
something left over.

} rickh@midwest.net (Arthur Wingnut)
} >
} >: Because oldies stations, in order to compete with other formats, do
} >: exactly what their competitors do...they do music research, the results of
} >: which prove that, as a rule, shorter playlists get higher ratings.

Then why are all these stations that are playing the same 200 songs
losing money?

} THIS is a prime example of not understanding that since deregulation,
} broadcasting is a revenue-driven business, not a protected public utility.

Everyone knows that, Rich. Belaboring that tired old line is not the
point. We all know that radio is a business. We all know that it
takes money. The question here is this... If you all are so right in
the assumption that the same 200 songs (more or less) are the way to
make money, then why, as you say below, are 'over half the existing
stations losing money'?

} >More station choices benefits the audience. They get a much better chance
} >of hearing their favorite music.
}
} Really? Then why do so many different stations in a market play the same
} music? After all, how many news/talk stations does it take to cover what's
} happening in a city? There has been a dramatic increase in the number of
} licenses, especially FM licenses in the past 10-15 years...but that hasn't
} translated to more variety...it just means every market has Rush and Howard
} and no matter what time of day or night, you'll always find somebody playing
} Hootie...

You bely your own point, Rich. One of the reasons that these stations
are losing money is because there is nothing to distinguish them from
every other station, so when the listener tunes in they are punching
buttons every 4 minutes or so.

I know that my words are against the 'standard party line' but I
believe that they are accurate. With all the posturing that 'Radio is
not here to serve the listener but to serve the advertiser' we forget
that these are real people on the other end of the mic cable. They
are not 'demographics' they are people. Sure we need to reach the
most people at a time, but in our tunnel-vision of ratings and
research, we lose sight of the notion that when it comes down to it,
you are communicating with people. Whether that is communicating a
news story, a commercial, a traffic report or a song.

Radio is going broke, not so much because of new signals on the air (although that is part of it, for sure) but because we have stopped talking *to* people. We have taken the most personal mass medium on earth and robbed it of even the veneer of personality. Then we wonder why the listeners are not loyal to us, why they are busy punching buttons and inserting cassettes and CD's, why they are deserting radio as anything but background music.

It is because radio views listeners as product. And that is OK as long as it doesn't go to our heads and worse, to our presentations. I am not suggesting that the inmates run the asylum, but when it becomes an industry-wide belief that listeners don't matter... numbers do, we are bullshitting ourselves because in the end, listeners ARE numbers.

} Because the last I heard, over half the radio stations in the country are
} losing money. Adding more stations (increasing competition, if you will) has
} resulted in what we have today....Everybody playing the same things, trying to
} scratch out a living.

Let's make a little analogy here...

One of the (if not *the*) most profitable food establishments is Mc Donald's. Nobody can dispute that they, with their limited menu, standardized cooking and seasoning, identical appearance and such are a very profitable formula. So popular that many fast-food establishments have copied them. Mc Donald's seldom go broke, and they are expanding every day. They are an enviable success story in the food-service industry.

However, if we take the logic used in your statements, the fact that Mc Donald's is the most profitable food establishment in the country, and has found a tested and true formula that is universally successful, then *all* restaraunts should serve Big Macs and fries. Or to make the analogy more accurate, that all restaraunts should at least be fast food, small menu, predictable chains of a similar nature. If you wanted a steak, or seafood, or ethnic cuisine, go home and cook it yourself.

I think we can agree that such a scenario would be ridiculous. Yet that is what you propose when you say that 'increased competition makes stations all play the same things to survive'. If you want anything else, go home and play a CD.

} That's compared to the pre-deregulation days where a } licensee had a little protection and as long as he served the public in some } fashion, he could plan on creating a niche for himself without having to } compete with 6 other stations in the market all owned by the same company in } NYC...

So you are saying that the more outlets on the air the fewer groups should be served? That, in my view, is absolute double-think. It makes sense that we cannot start playing African war chants in drive time, but it makes no sense that we should all be chasing the *same* audience and using the SAME bait. If I were confronted with an ever

splintering marketplace, I would actively seek out an unserved demographic and concentrate all my energies on serving them. I would rather be the ONLY station serving a (possible) smaller audience than one of 5 attempting to target an (arguably) larger slice of the pie.

I say arguable, because I also believe that a loyal following is better than the fickle, button-pushing listeners who flit from one similarly programmed station to another. I realize that this flies in the face of all the sacred-cow beliefs in this industry, but if we look at the declining audience shares, we need to ask ourselves *why*.. Sure cable radio is a factor. Sure more allocations are a factor, but even in today's fragmented markets, people are still people. They still want a station that, at least gives them the feeling that, they are being talked *to*, not *at*. That is why request shows are popular.

} I'm not unsympathetic to your comments above...I just think you're a little } naive if you believe that broadcasting in the 90s is about providing the } audience with a wide range of programming choices--that's 70s stuff.

Interesting that you should point that up, Rich. In the seventies, stations were, on a whole, much more profitable. You say that radio in the 90's is not about providing a wide choice. Why? We have all those damned stations on the air, most losing money, all doing the same basic formula. We have all those people who are NOT being served, that are not finding a 'radio home', but are channel hopping because everyone sounds the same, and when diary time comes, they cannot say whether they listened to Q-97, X-101, US-99, EZ-94, Oldies-108 or FU-92.

Why? Because there is nothing there to 'grab' them. Nothing to speak to them, nothing to differentiate Q-97 from FU-92. It all melts into a background murmur that becomes little more than wallpaper.

} Today, } unfortunately, its about AQH, cume, and converting that to advertising revenue } in order to pay the lenders, pay the staff, pay the bills, and try to have } something left over.

It has been said that the definition of insanity is doing the same thing over and over and expecting the outcome to change. Example...

WLUP-FM in Chicago is one of the highest billing stations in an incredibly competitive market, yet their 12+ was only in the upper 2's (2.7 I believe). Why? They provided a product that was live, local, responsive, unique and spoke to a very intelligent, affluent group of people. What they did was summarily dismissed as 'impossible' but a lot of movers and shakers in the business. They broke the rules and guess what... they have never been broke since.

WGN-AM in Chicago is either the number 1 or 2 highest billing station in the COUNTRY, and they continue to be a people-driven, accessible, friendly, low-key station that millions of listeners call their 'radio

home'. Their morning show is the ONLY radio show in the market to draw double-digits (like 12.?). They are not hip, trendy, or overly consulted. They simply talk to their audience as they have for five decades.

My point is this, Rich. We can, when confronted with competition, circle the wagons and try to clone one-another, or we can take the challenge and carve out a leading edge for ourselves. It is the common wisdom (backed up by a lot of common people) that we should not step out of line, even if that line is in front of a firing squad. These are the people who believe if something is no longer working, keep doing it because we cannot afford to do something else.

It reminds me of the drunk who is looking on the ground under a street light. A cop comes and asks what he is doing. He says "I am looking for my wallet". So the cop helps him look but finds nothing. The cop asks the drunk "Are you sure you lost it here?" the drunk replies "No, I lost it over there...". The cop says "Then why are you searching over here?" The drunk replies "Because the light is better".

I believe this exemplifies the situation. Radio keeps looking where it has always looked, even though 'the wallet' (the listeners) are someplace else. I disagree with that philosophy, and the string of failing and near-failing stations indicates that despite the prevailing industry opinion that what we need is ever-narrowing tunnel vision, ever more restrictive playlists, elimination of true creativity and fun from most formats and lock-step conformity, that if we remove the blinders from our eyes, we will realize that we are killing ourselves by failing to be truly responsive to the audience who, despite the hype to the contrary, is who we have to reach to be successful.

Sure there is room for the consultants and their 200 safe-song playlists, just like there is room for Mc Donalds. But there are people who are anxious for radio that speaks to them. These people are not being served and are going away. Today, with all these stations on the air, we are in a position to serve more demographics than ever before, but we don't, and we wonder why we are going broke at record speed and must own 2, 3, 4 or even 8 stations to be profitable again.

I know Ill be chided by those who cannot see beyond the end of the ledger, but the spirit that built radio is a dying (dead?) thing. Unless someone realizes how we are killing ourselves, we can look forward to more radio tune-outs, less reason to listen and more bankrupt stations. Do we really want a radio dial filled ONLY with Mc Donalds, Burger King and Wendy's? Is there no room for steak and lobster? God I hope so.

These are usually referred to as "acetates". They run at 33 1/3 RPM, although they require a stylus designed for 78 rpm, not the "microgroove" associated with the consumer LP disc developed in the late 40's.

They may be recorded with a groove that starts near the center and works its way out toward the edge. In some cases of multiple-sided material, the inside start and the outside start alternate, so that the sound quality of the segue will match.

The acetates I've worked with usually ran about 15 minutes to a side.

I agree totally. I have noticed, the oldies station here in Charlotte
emphisizes heavily on the late 50's and early 60's, playing the same
songs again and again. Recently while I was in Atlanta, I noticed
an oldies station there, using the same type promos and jingles etc,
played almost everything from the late 60's, but still repeating the
same songs. Why can't they create a better mix?

It's not that the PD's couldn't careless about returning your calls, or even the courtesy of informing you that you weren't the successful candidate...

Some of these guys and gals are so darn busy that they couldn't be bothered to follow up with you (yeah, right!)...

But 'tis the nature of the beast called radio that lends itself to such a milieu wherein such common decency is often trumpeted but rarely displayed...

Worry not, though. In the end, the karma of such actions will undoubtedly catchup to this and all PD's who pull similar stunts...

I agree. Here in Boise, we have an oldies station, KLTB-FM "KOOL 104" which has a playlist of about 400 records, which they repeat over and over, day after day. You can hear the same song almost at the same time every day. I love oldies, but it's almost like they are playing a Top 40 list, but the list never changes week to week.

I would love to put Rush on hold, especially if I had the reasonable
expectation of being able to keep him there.

I have always loved radio stations on hold, because I spend a lot of
time on hold and it is the 90s version of DXing. Now that the FCC has
gone stark raving mad turning out broadcast licenses like little
sausages, its not possible to hear much outside of your market
anymore.

Not to beat this one even farther into the ground, (but since I am...) the Mississippi ends, or rather begins, partway up Minnesota, leaving the delineating line absent north of a certain point.
An early explorer with a classical education finally nailed the "true head" of the river and dubbed it "Veritas Caput" which became Itasca fpr residents less hifalutin' in their language.
In the Twin Cities, if you can't remember whether one country station is WBOB or KBOB, it doesn't matter; they have phone listings under both. Not a bad idea for any station with that particular call-letter identification problem, for that matter.
And for others curious about Mini-Apple media, the MN legislature has passed a bill to clarify the funding trail from for-profit subsidiaries like upscale mail-order outlets to their non-profit parent corporations. After much protest, MN Public radio is allowing that president Bill Kling's salary is a ways up into 6 figures, not the 5 that's been claimed heretofore.

What I meant, and evidently said in a way that wasn't clear, was that with CBS and Westinghouse now combined, there is another layer of management, a new person overseeing the FMs and another the AMs, and while expenditures may well have been figured out long ago, the CBS TV stations have been money losers and WBZ lost big-time when it lost its NBC affiliation. So, I think the TV folks are getting a lot of the attention right now, and that will take some money to remedy. I have also heard the TV people doing more actualities on radio and vice versa (to save money, perhaps?)-- btw, I have never liked it when a radio station says "at 6 pm turn on WXXX-TV"-- even if it's their sister station, you are asking the listener to leave!!! donna

Hi all:

Been looking for awhile for someone who'd be able to tape "The World Chart Show" (distributed by Radio Express)ss) for me on a weekly basis. I'd be willing to trade other taped radio programming (or your taping expenses) in return. I know the show is primarily aired outside the United States, but has just been added by a "Hot AC" outlet in Chicago. If you're interested in working something out, please respond via private email to me at sml@eden.rutgers.edu

I have a slew of old radio programs that I could send tapes of in exchange (lots of old "AT40," especially), and I live in the NYC market, so would be willing to tape anything found on the NYC airwaves for you.

Let me know...

Scott

Market #33 Update for Norfolk-Virginia Beach, VA...

Recent Changes:

New format means a housecleaning for WJQI-AM/FM from AC Q94.9 to Hot AC/Alternative hybrid 94.9 The Point. Co-owned 92.9 WFOG (Light AC) is now simulcast on the AM at 1600.

Imaging statements include "No Howard, No Bull - Get The Point", a reference to morning drive at alternative competitors 93.7 The Coast WKOC, which runs the Howard Stern syndication, and local bad-boy of the airwaves, Henry "The Bull" DelToro, heard on 96X WROX.

In the news...

Speaking of "The Bull"...here's the headline of a front page story by Marc Davis from the Virginian-Pilot newspaper on March 5, 1996...

[begin excerpt]

GRIFFITHS AT FM 99 SUES EX-PARTNER HENRY
``THE BULL'' DEL TORO AND OTHERS AT 96X,
TO THE TUNE OF OVER $1 MILLION, CLAIMING
SLANDER.

They rocked together on WNOR-FM 99. They cut up together. They did weird TV commercials together. They got suspended from their jobs together for telling listeners on April Fools' Day that [a former landfill, now a recreational site, known as]Mount Trashmore was about to blow up.

Now they will share a courtroom together - on opposite sides.

Griffiths, the more sedate half of the former radio team of Tommy and The Bull, is suing his one-time broadcast partner for slander. He accuses Del Toro, now co-host of a rival morning drive-time show on WROX 96X, of suggesting to listeners that Griffiths is a cocaine addict and homosexual.

He seeks $800,000 in compensatory damages, plus $350,000 in punitive damages.

The suit claims that after Del Toro joined 96X in June, he and [PD and morning co-host Perry]Stone and [GM/Owner Robert]Sinclair ``formulated a plan or scheme calculated to damage Griffiths' reputation in the broadcast community and among his listeners, to embarrass and humiliate him, to inflict severe mental anguish and emotional distress upon him, to diminish his ability to work and to have a derogatory effect on his listening market.''

The lawsuit is just the latest in a long series of controversies that have dogged Del Toro.

In 1985, he was arrested on a cocaine possession charge, received first-offender status and apologized on the air.

In 1992, he, Griffiths and two other WNOR employees were suspended for two weeks without pay for the Mount Trashmore hoax.

Later, the Federal Communications Commission slapped the station with a letter of admonition.

In 1993, a Hampton woman sued Del Toro and won $45,000 for being the unwitting butt of a Del Toro ``wake up'' call.

In the same year, Del Toro was convicted of prescription fraud in Norfolk, Virginia Beach and Chesapeake. He was fined, got a suspended jail sentence and was ordered to drug treatment and to perform community service.

[end excerpt]

Interested observers can read the sordid details, which include not-so-veiled references to illicit drug use and homosexuality/pedophilia in a not-too-flattering light, at the archive site for the Virginian-Pilot...

2971. Springfield Missouri RadioWatch

Newsgroup: rec.radio.broadcasting
Date: 1996-03-25 00:00:00 UTC
From: Bill P <rrb@clm.aiss.uiuc.edu>
Message-ID: <4j5n18$cdg@vixen.cso.uiuc.edu>
Source record: 24580

Greetings again from the Queen City of the Ozarks.

A few shake-ups have occurred over the last month or so. Here is the skinny from this reporter's observations and the information supplied by local media contacts. BTW I am very interested in talking to others in the Springfield Branson markets. Please drop me an email.

=== Young 'Not-So-Hot' Country.

As if this market needs another country outlet, KLTQ 96.5 (50Kw@500') has, under the guidance of Great Empire's KTTS, become the fifth 'local' country signal and (if you count rimshots that are heard well in Springfield) the eighth country player.

In our last RadioWatch, I reported that KTTS had entered into a JSA (Joint Sales Agreement) with KLTQ and was, essentially, bonusing their clients with spots on the lackluster soft rock outlet. Well two weekends ago, KLTQ became 'Max Country' and debuted with a fairly standard, 're-current heavy' mix of modern country, clearly intended to target women.

I am not sure if Great Empire has gone beyond the JSA with KLTQ, but I would be very surprised GE is doing the programming. The music is definitely modern country hits, but lacks any sort of definition. The use live AT, some remaining from the old KLTQ, some new and some from KTTS. The intent seems to be to draw some of the listeners away from KGMY-FM (My Country 100.5) which has made serious inroads into KTTS's long-time dominance in the market. KTTS-FM has been consistently number 1 since 1972 with a combination of News, weather, community service and a more mature mix of modern, but not 'HOT' country music.

Frankly, I am at a loss as to what GE really hopes to accomplish with this signal. It is not likely to supplant KGMY which has a very loyal and entrenched following with their lively current-oriented, music-intensive format. KLTQ's programming has not yet gelled to the point where they will be much more than another button on the country music listener's radio dial. Strange that a strong and creative company like Great Empire would debut a signal like this without a strong identity that can be promoted and placed in front of the listener to lure them away from KGMY.

KTTS-FM's music mix has gotten more in tune with the standard GE sound of wide playlists, a mix of modern and traditional country, good personalities and an incomparable commitment to the community with news and weather information found nowhere else.

But it still puzzles me because KLTQ, in its current state, can be little more than a spoiler for both front-runners in the country music battles, KTTS and KGMY. I imagine GE hopes it will siphon some of KGMY's younger listeners, but I fear it may backfire and detract from KTTS's hold on market dominance as well. But Curt Brown and company at KTTS are smart and savvy folks so it remains to be seen what they will do with this signal.

Here is the current rundown of country signals in the Springfield Market in alphabetical order.

Locals

KCTG-FM 92.9 50Kw@500' Branson Music Network Afil.
KGMY-FM 100.5 33Kw@600' Hot Current Country
KLTQ-FM 96.5 50Kw@500' Modern Country
KTTS-AM 1260 5KW DA-N All-Time Country
KTTS-FM 94.7 100Kw@1120' Full Service/News/Country

Strong Rimshots

KHOZ 102.9 100Kw@1200' Harrison Ark
KJEL 103.7 100Kw@1000' Lebanon Mo
KRZK 106.3 8Kw@800' Branson Mo

==========

=== From Z to Q? What is it?

As reported in the last RadioWatch, KZPD 104.1 (21Kw@400'), a mom-and-pop owned rimshot from some 20 miles out, was sold. The old owner, Len Smith, walked away with a reported $900,000+ for the recently upgraded Big Band/Standards station. Still unknown is the identity of the new owner, who is reported to be a concern from Texas.

This weekend the station flipped from what was left of the standards format (Len pulled all his personal CD's from the CD Jukebox before leaving) to a hard-to-define mix that would have to be called 'light rock'. The mix is definitely contemporary, but is not exactly AC. I have heard Michael Jackson, Genesis, Everything but the Girl, U2, Peter Gabriel, Bruce Springsteen, and others. They seem to be playing pre-recorded sets on tape, because the segues are very tight and the same tracks play in the same order. Seems like a fairly tight playlist, but it may just be something to place on the air for now.

They are calling themselves Q104, although the calls are still KZPD. The top-of-the-hour ID says "104.1 - Q104 KZPD Ash Grove. Springfield's New Q104". Again no word on the future of this station, but I imagine they are trying to target all five people in the audience of the former Light Rock KLTQ and of course AC giant KGBX. However with the rimshot signal in Springfield, they may have their work cut out for them.

==========

=== Shot 106.7?

Like the "Artist Formerly Known As Prince", this station should be called "The Station Formerly Known As Hot-106.7".

The degeneration of once-strong CHR KHTO continues. The station has lost all of its energy and identity since its acquisition by Corporate Communications (Channel-Z/B-95). Most live talent has been replaced by voice-tracks and automation. It has been suggested that this degeneration is deliberate since KHTO did serious damage to Channel-Z's grunge-COR ratings during its first year on the air. It now is a mere shadow of itself and survived by default. It still calls itself Hot 106.7, still runs the sounders, still plays occasional rhythmic CHR, but is totally rudderless and sounds like a ship without a captain.

==========

==== Local Boy Makes Good

Former KWTO-AM PD and Morning Man Phil Gibson, who was tossed out at the News-Talker last year has not only landed on his feet but has been doing what he does best, creating interesting talk radio.

Phil, who's on-air style is similar to Paul Gonzolas from the Peoples' Radio Network (down-to-earth, friendly and genuine) has started Gibson Communications, where he creates and syndicates 'Common Sense Advice', a series of topic-oriented programs similar to his 'ask the professional' series he did on KWTO-AM.

He uplinks his program on Satcom C5 in analog SCPC and is carried on several regional stations in the area. Phil's number is (417) 869-8118. He is a heck of a nice guy and a great broadcaster as well. His show is totally barter and very well done. I don't usually like that sort of thing, but Phil makes even the driest guest interesting.

==========

That is all for now, folks. If anyone in the area would like to discuss the market, its trends and other news, email me at wdp@airwaves.com.

Unlikely to exist. Scout around for a used C-QUAM exciter designed
for licensed stations and attenuate the output. Many AM stations
have abandoned their experiments with stereo so there are likely
many surplus exciters on the market.

Check this out. It was done in Syracuse 3 years or so ago. Monday, go on-air with a phoney spot from the local phone co. saying that due to a build-up of magnetic dust in the phone lines, the phone co. will be "blowing out" the lines the first of April. Magnetic dust is what cause that scratchy noise heard from time to time on the phone lines, and the problem has gotten worse due to the proliferation of fax machines, modems, etc. And because cleaning magnetic dust out of carpets is expensive, we're asking you to place an ordinary plastic garbage bag over your phone at 8:00am sharp for five minutes while we do this opoeration. If you have an un-used phone outlet, place duct tape over the hole to block the dust. Run a regular spot schedule for this annc., then the morning of the event have some "interviews" with phone co. people, rug cleaners etc. saying how important this is and how expensive cleaning magnetic dust is etc. Say it will take five min. then at 8:05 reveal the joke and take calls from people who fell for it. It really is a great gag if done with sincerity.

2976. Danny Bonaduce to Hit Detroit!

Newsgroup: rec.radio.broadcasting
Date: 1996-03-25 00:00:00 UTC
From: jeffdeck@aol.com
Message-ID: <4j5n1e$cdo@vixen.cso.uiuc.edu>
Source record: 24585

Reply-To: jeffdeck@aol.com (Jeffdeck)

Danny Bonaduce to hit Detroit morning radio starting Monday, March 25 on Evergreen's WKQI-FM 95.5 mHz according to The Detroit News. Bonaduce replaces popular long-time morning-drive personality Paul "Dick" Purtan. You may remember Bonaduce from the 1970-74 television show, "The Partridge Family" on ABC Friday nights at 8:30 p.m. EST. More recently he hosted the short-lived "Danny!" syndicated talk show. He currently does afternoon-drive in Chicago on Evergreen's WLUP-FM 97.9 mHz. He will stay overnight weekdays in Detroit to perform morning-drive on WKQI. He will then fly to Chicago for the afternoon-drive gig on WLUP. He then will fly back to Detroit each weeknight for the next day's morning gig on WKQI! In his press conference, he also stated that he plans to shuttle his wife and daughter between homes in Detroit and Chicago. If successful in Detroit, he also stated that he would probably drop his WLUP show, and move to Detroit permanently.

Bonaduce's show promises not to be compared to The Howard Stern Show. Ironically, Drew Lane and Mike Clark, hosts of the successful "Drew & Mike Morning Show" on Greater Media's WRIF-FM, interviewed Bonaduce many times last year from his Chicago home. Bonaduce now will be in direct competition with "Drew & Mike." Such is the state of affairs in radio.

Dick Purtan moves to Infinity's WOMC-FM on April 15. Tom Ryan, current morning-drive personality on WOMC, moves to afternoons at the same station on the same day.

My question is when will Infinity bring Howard Stern to Detroit? He had a short stint at Detroit's WWWW-FM when the format was AOR in 1980. Perhaps Doug Podell, current PD at WRIF-FM, could fit in Howard Stern mid-days at "The RIF", as he did successfully to morning-drive when he was PD at WNCX-FM 98.5 mHz.

Which means that CBK, Regina, Saskatchewan, 50kw clear channel at 540khz, has quite an enviable license. Yet they use only a quarter-wave antenna! Don't they care, or doesn't it matter? (KFI at 640 uses a half-wave. So do KFYR and WNAx, 550 and 570 khz, 5kw, who have the greatest ground wave propagation in this country, partly because of the excellent ground conductivity where they are).

Does anyone know the ground conductivity around Regina?

Thanks,
John

Anyone know what happened to the CKO radio network in Canada? Many years ago it was broadcasting ALL-NEWS on the FM band...

It has since gone dark, leaving a trail of prime FM allocations in its wake, namely 99.1 in Toronto...

Any word as to when (or if) the CRTC will re-assign these frequencies across Canada?

> Weekends 1-4am

Of all the on air call in dedication situations I've been in
(Austin,Montgomery,Coastal Carolina,Fort Smith) I've found one thing that
absolutely works. Its just like anything else: If you're going to do
something then do it. Don't do it half way and what ever you do don't just
give it lip service. If your going to call it a dedication show then make
ALL songs dedications. Its simple to get it kicked off too. It will take a
couple of days and thats all to get it rolling. The idea is to have the
show feeding yours call for requests and as they come in have the jock
tell them to keep trying... they're guaranteed to get on the air. Then
come in 10 minutes early to the booth and start answering calls.... All it
takes is ONE call to start it rolling. Don't make the calls long, don't
get cute, don't make comments about the listener or the song and don't try
to play smart with the caller. Do it this way: Answer the phone on tape
with the station's handle or calls or what ever the boss wants..... then
ask what the caller wants to hear.... when the caller gives you the song
PAUSE for a second...... if you want to play it then tell them OK its on
the way and hang up. If you're using a decent tape deck with a counter
(Like Otari 5050B reliable counter) set the '0' to the end of the caller's
voice, (song title) then back it up to the moment you answer it. (leave in
the phone click it sounds 'live') how long is it? -12 seconds? good your
song intro is how long? 15 seconds? good that leaves you a realistic 3
seconds to give the artist name your self or intro it in some other way.
BUT IMPORTANT..... To the caller and the listeners you don't have ESP.. So
you can't start playing a song before it's asked for..... right? so set
the '0' at the moment the song is requested. If the caller talks after
that and you make the intro on tape you know how long it will take to end
by the timer..... with a 15 second intro and five seconds remaining on
the call after the song is named you have 10 seconds to either fill or
shut up in. At all times give the phone number (when ever you can) and do

this with EVERY song. As soon as you start playing one answer the phone and take another one.. Cue it up and take a breath. The cued tape and song intros will make the show very tight and the listeners will be amazed at how fast you get things on the air. And they will call too. After one week of this my phones in Fort Smith, on a country station went from ZIP to over 70 calls an hour. For a two hour request show in the evening. And they were for the most part different people. You can mix in personality comments but NEVER refer to callers as 'babe', 'honey' or anything familier. A caller wants to 1:hear their song and 2: hear their voice on the radio.... do both and your a hit. It makes for a seriously busy show too.

Source record: 24594

I didn't think it was as much funny, as it was a cruel, honest look at some of the windbags in government and the media in Washington, DC. During most of the sppech, Imus was getting some pretty decent (albeit smug) smiles.. but I think anybody laughing out loud would have been sent back to covering Bosnia.. in Sarajevo!

C-SPAN told the White House to take a hike when they were asked not to replay the speech.. and they scheduled it for last night (Saturday 3/23). But they were only going to run the Prez (whom I thought was pretty good), and Imus. Hope you get to catch it, and let us know what you thought.

2986. Re: Imus, Clinton at Press Dinner

Based on the time of your post, if you had turned the tv to C-SPAN you would have caught the last 15 minutes. I was watching it and didn't find it offensive at all. Not in the best of taste maybe but obviously the people who are complaining have never listened to Imus or Howard Stern on the radio. Clinton is a Imus fan and certainly knew what to expect. The rest of the complainers, especially that Republican congressman from Florida (I think) who was whining about it on the floor of the House must live a very sheltered life. Lighten up guys and get a life...it was only a radio shock-jock.

2987. Re: Imus, Clinton at Press Dinner

2988. NYC Radio Personality in Washington

Newsgroup: rec.radio.broadcasting
Date: 1996-03-25 00:00:00 UTC
From: bbrent@pipeline.com
Message-ID: <4j5n1o$ce3@vixen.cso.uiuc.edu>
Source record: 24597

Thought this would be of interest...

The following is
c.1996 N.Y. Times News Service

WASHINGTON - Don Imus knew something was awry when he made a raunchy joke about President Clinton and looked over to check his reaction.

``I can't even describe his face,'' the New York radio show host said. ``If he'd had a gun, he'd a shot me. I was talking to him like I was sitting next to him on a bar stool. I did not want to go down there and be a weasel. You've got a big mouth on radio and then you say it face to face to these people and it's a different story. All this is hypocrisy. It was watered down, believe me. I wanted to have a joke about how the president could combat charges of womanizing by becoming a Mormon. And if we had four or five first ladies, America was bound to like one of them.''

Nobody in the capital is talking about China or Colin Powell. All anyone can talk about is Don Imus. His after-dinner monologue before the media and political establishment at the Radio-Television Correspondents Association dinner Thursday has thrown the capital into a kerfuffle.

With the Clintons trapped on the dais, growing more and more uncomfortable - ``I heard the first lady say, `Oh, my God,' when I did the joke about Peter Jennings and the intern,'' Imus recalls - the cadaverous comedian did 30 minutes of the same tasteless, over-the-top, disrespectful humor he has been doing on radio for a quarter of a century. But, somehow, the company was shocked, shocked, that the shock jock was shocking.

The black-tie audience looked as if it was caught in a ``Friday the 13th'' movie, half-smiles frozen.

``I didn't have much time,'' Imus mused afterward. ``And there were so many people to butcher.''

Whoever thought we'd need a V-chip for C-SPAN? Michael McCurry, the White House spokesman, called C-SPAN executives and asked them not to rebroadcast the ``tasteless'' monologue. C-SPAN refused. The most boring and polite channel on earth had never before been accused of pandering, licentiousness and bad taste. But it recognized a hit when it saw one. After those endless hours trained on a deserted Senate chamber, C-SPAN cameras had captured the stunning spectacle of a cherished Washington ritual imploding.

The Radio-Television Correspondents Association sent a letter of apology to the president, and the media stars and pols who do guest spots on the Imus show began, as one put it, ``running for the hills.''

Cokie Roberts of ABC said she would never go on again, noting, ``You can't make fun of the president when he's sitting right there.''

But it was the president, after all, who ``certified Imus's influence,'' as New York Magazine put it, when he went on the show during the 1992 New York primary. To go over the head of the establishment media, Clinton traded down to Imus, Phil Donahue and MTV. Imus called him ``Bubba,'' and Clinton said Bubba was Southern for ``mensch.''

Clinton was playing with fire. The candidate who used Imus to showcase his populism is now the president who wants more respect. But the Bubba jokes are coming home to roost.

Washington press dinners are based on a charade. If political humor is going to be really funny, it has to be impolite. But the press and the pols want to cozy up, so the comedy is supposed to singe but never burn, as the Gridiron motto goes.

Imus may have been coarser than his predecessors, but I remember cringing as I watched Paula Poundstone go after President Bush at a White House press dinner, and again the next year when Sinbad taunted Barbara Bush about looking like a grandmother.

Why should the president and first lady have to subject themselves to evenings like this, fraternizing with their critics and getting roasted by what Tom Brokaw calls ``low-rent lounge acts''?

And Don Imus should not be expected to be Garrison Keillor. ``You put a shark in the bathtub, it's gonna eat the fish,'' says Jeff Greenfield of ABC. ``Did they expect Bob Hope material about Clinton's golf game?''

White House officials snubbed Imus after his speech. I asked the tormentor how it feels to be the pariah. ``It doesn't get any better than this,'' he said, with a low chuckle.

(3/24/94 The New York Times)

We are using it here at KISS in Dallas, and it is FABULOUS! Once you get familiar with it, which only takes a couple of days, you'll never want to use tape again! What used to take ten minutes to edit now takes maybe a minute and a half!

One thing you'll want to learn early is the "make new master" command. Voxpro keeps a copy of the master recording from which you edit. If you're like me, you may only use 20 or 30 seconds from a three minute conversation. Unfortunately, Voxpro stores the entire three minutes in the "master" folder. This eats up disk space, which you'll find becomes pretty precious. So once you finish editing a bit, go to the "make master" command, create a new master which is essentially a copy of your edit, and then discard the original master which contains all the stuff you DIDN'T use.

You will LOVE Voxpro!

2992. Westinghouse Strikes Again... does WGA?

Newsgroup: rec.radio.broadcasting
Date: 1996-03-26 00:00:00 UTC
From: kkiernan@usa.pipeline.com
Message-ID: <4j7su4$sh5@vixen.cso.uiuc.edu>
Source record: 24401

Was sorry to hear about Buck & Stram losing their gigs at Westinghouse/CBS.

Did you know Westinghouse is playing hardball with the Writers Guild of America (East and west)?

Negotiations have been going on for weeks... CBS wants "multi-tasking" that would allow anyone to write so long as it encompassed the minority of their work (49% of any employee's job could be writing) and the ability to "lay off" at will without any regard to seniority and with no recall rights.

They also want to:
Pay temps (per diems) less than they currently make
Eliminate the overnight differential (15%) for those working 12m-7a (t-v, graphics, promo)
Scrap a guaranteed level of benefits over the life of the contract
Eliminate the right to petition to get off an undesirable shift after a long time working it
Eliminate any paid lunch, and impose several other new "working conditions."

The Guild wants
Insurance of adequate training on any new equipment
Jurisdiction over any material written for transmission on-line and/or produced for video imaging
Benefits for non-covered members who work full-time hours
Improved severence pay and rights of recall for anyone laid off
Eye-care coverage
Pre-hire verbal agreements put in writing

Some 320 Writers, Wirter/Editors, Production Assistants, Assistant Producers and Graphic Artists covered under the current WGA-CBS contract in Los Angeles, New York, Chicago and Washington have taken an authorization vote with 95% affirming their negotiating committee's power to call a strike if no acceptable agreement is reached by the deadline, now one week away.

The Writers Guild (East and west) struck CBS in 1985 for 6-1/2 weeks.

Any and all support for the Guild is appreciated.

A few items of note:

* As written previously on Airwaves, Chris Underwood has left WOWO where he did overnights for the past 5 years. I have his complete show (minus a few "technical difficulties"..amounting to about 20 minutes) available if interested. Excellent show! He goes out and signs off with class and emotion. A definate collector's item.

* I'm waiting the start of WQHK "Radio Hollywood 1380", playing soft, simple sounds. They sign on tonight at 12:00a. Ron Gregory does mornings, in addition to his mid-morning shift at WOWO. The rest of the day will be satellite from ABC. Expect a call letter change on WQHK to WHWD. I'll be rolling tape both tonight and tomorrow morning...Ron's complete show.

I think that's about all...I've just completed my latest revision of my aircheck list. E-mail with your postal address if interested, and I'll mail you a copy. Till then....

Another concise and inexpensive directory is the M Street Radio Directory, published annually. The M Street listing includes frequency, power, directionality, format, address, phone number, and other info. M Street also is indexed by call letter order and by frequency. The M Street directory can be purchased directly from M Street at 800-248-4242. The 1996 "M Street Radio Directory" costs (I think) $45. I don't know of an e-mail address or Internet URL for M Street.

That station was recently put back on the air. The DA proof was done by a friend of mine from Pensacola, FL (why do I always miss the fun?). Yes the Continental is still there. The station had been dark for about 5 years.

There is a 50 kw day, 500 watt night DA-2 that is dark (I still belive) in Magee, MS about 40 miles south of Jackson. The station calls were WSJC and this station was also on 810 KHz. They have/had an ITA transmitter.

With apologies to Mark Allen (former night slammer at KPLZ Seattle) I have adopted something called "The Massive Moment of Mush" (or MMMMMMMM for short) Mark used to do Mark's Moment... I take dedications during our Top 10 @ 10 countdown. I've been doing this for about 2 months now and I don't even need to plug it on air, people already know when to call. And then after the Top 10 in my last break of my shift, I list off all the dedications over a schmaltzy soap opera bed. No callers, just me and then I slam straight into a huge ballad.

While this feature is mainly 12-17 driven it can carry some audience into the last quarter hour after our Huge Cuming countdown. This is the first book we've used it, so we'll see how it works.

Listeners demand dedications, just be creative about it and bury it where it won't hurt but help your numbers. I wouldn't put it in an 8p or 9p hour, but at 10:50p, it's perfect!

catch the buzz...pass it on.

Heard recently in market #33...

W---, Kill Devil Hills, Hampton Roads, a Joe Schmoe Radio Station...

Is this a legal ID?

In this case, the station is licensed to Kill Devil Hills, NC, but
reaches the region known as Hampton Roads.

To put it in perspective, consider the following:

If the ID said W---, Kill Devil Hills, Virginia Beach, a Joe Schmoe
station...I have no doubt this would be legal.

What exactly is the current FCC criteria for fulfilling the requirements
of the legal station ID every hour?

3006. 50 KW stations in Hawaii

Newsgroup: rec.radio.broadcasting
Date: 1996-03-26 00:00:00 UTC
From: BROCKRADIO@aol.com
Message-ID: <4j7st7$sfl@vixen.cso.uiuc.edu>
Source record: 24519

There is one 50 Kw 24 hour station in Hawaii. KAIM 870 Khz (religious) is 50/50 with the same directional pattern 24 hours a day. Two towers to form a null towards WWL 870 New Orleans. They are a Honolulu station, but
their transmitter is on the island of Molokai, about 50 miles south of t he metro. You may think that 50 Kw is a bit much for the islands, but con sider this; although we are surrounded by salt water, the ground conducti vity is very poor out here. We have no soil to speak of, just volcanic rock.

Plus, we have mountains that really attenuate signal strength. A station in Hilo, 200 miles south of me, does not have the "punch" it would , in s ay, Florida. I grew up in Tampa, and took it for granted that you could h ear WTIX-690, WWL-870, and WNOE-1060 in New Orleans at 12 Noon on a car r adio. No such luck out here. KAIM has what I would call a "grade B" signa l in Honolulu, but is much stronger on the other side of Ohau's mountains 2E They put their transmitter on Molokai, so they would have room for a two tower DA. Land is not cheap on Oahu.

KPUA 670 in Hilo 10 Kw 24 hours non-DA, has had a CP for 50Kw for years, but the land and cost of the required directional array, has prevented them from building it. They will need to protect KBOI-670 in Boise, KWNK- 670 in Simi Valley, and yes, KDLG-670 in Alaska.

Besides KAIM, the only other directional AM station in Hawaii is KIFO-1380 5Kw (CP for 10) in Pearl City, Oahu (NPR). They run a two tower pattern 24 hours a day, to protect an FCC monitoring station.

>Although Monday morning's radio show promises to be >very< interesting.

Chicago Tribune's James Warren (a self-proclaimed Imus fan who was there) devoted his entire Sunday column to this yesterday. I haven't seen the performance myself, but based on his description and those here, it would indeed seem that (a) Imus made a huge miscalculation; and (b) so did the folks who invited him (many of whom have been guests on and listen to his show). Warren's column also had some moderately interesting thoughts about what all this (the idea of pols and press toasting and roasting each other, Imus' speech, and the subsequent wails and posturing) says about both our culture in general and the Washington political elite culture in particular (can you say "hypocrisy," boys and girls?).

There was a great picture along with the column of Imus at the podium, with the president in the background, head down with his hand over his eyes--kind of sums it all up.

the flap is an interesting one...already the I mans GM Joel Hollander refused to apologize for what Imus said and hollander was right.
I saw most of the "schtick" he did and it was pretty bad..however, the folks who put together the dinner knew what they were in for if they have ever listened to the I Man...(with his wash dc ratings therein may lay the problem)...However...wasn;t there a similar flap when the president made remarks a year or two ago which offended Rush...
I don't recall EFM Media asking Brian Lamb at C span not to re-run the remarks.....
Clinton's people were out of line in even asking.....The call made the whole deal a bigger story than it should have been.
I think that Imus was ill advised by his writers on what bits to use but this whole thing is "Much ado about nuttin"
all the best !!!!

>*STEREO* (C-Quam) transmitter! Anybody know where I can get one?

If you want something which is truely PART15, you'll have to
build it yourself. CQUAM on a micropower tx would require
some considerable skill, but would not be impossible to do.
I could give you construction ideas if you want via private
Email (too big to post).

If you want the "bend the rules" you might find an unused
Cquam exciter which someone is scrapping. The Motorla and
Delta units both have sample transmitter outputs which are a
little over the 100 milliwatts, if you find a unit locall,y,
you'll have to change the frequency.. Using this
professional equipment is of course not legal but it is
pretty low powered.

Are you referring to Montreal, Quebec? Its not all that different from
Toronto, Vancouver, etc. Except there are more stations because they are
split between french and english. I have some links to the stations in
quebec that have websites if you want to check out my web page. I would
have to say that Montreal radio is not much different than anywhere else
except for the language. Now, if you want to talk about the style of
french radio in Quebec, then there are some differences, basically in
on-air presentation, obviously in music, etc.

KUZZ1 (kuzz1@aol.com) wrote:

: The interest of broadcasters is to attract a listening audience.

No it's not. It's to create advertising revenue for themselves.

Of course, the first step in maximizing ad revenue is to make sure your entire audience is 25-54, because that's where the ad dollars are. Not everyone is 25-54, and even if they are 25-54 (like me), they don't want every single station playing what the "typical" 25-54 wants to hear.

: >to hear was what was #1 on the Billboard chart when the listener was
: >exactly 20 years old. And that they want to hear these SAME songs every
: >single day... Or they are so afraid that because they play some song
: >which got a few too many negatives on some music test, they will lose
: >audience because of it. So they stick to the short, "safe", restricted
: >playlist.

: All that is true. So what?

A lot of us are sick of hearing the same short list of songs played over and over. That's what. It's a big turnoff. I'm not sure music testing accurately measures this. Music tests measure reactions to individual songs, not to the overall radio stations.

: >But change is on the horizon. Right now, there are lots of services
: >which deliver quality, commercial-free music to the home by satellite.
: >The number of these is growing every month. And in only a couple more
: >years, there will many new stations available by a service which operates
: >off a tiny satellite antenna. That you can listen to anywhere you want.

: Which will result in even more narrowing of formats as these services try
: to differentiate themselves from one another, and from traditional radio.
: So it will get worse, not better.

No, I think it will be better. If there are 100 music channels on a satellite service, the chances are much better that I will find one to my liking. Better than the 10 or 15 music choices I have now.

: >Yet every time the subject of adding
: >additional stations comes, the NAB has lobbied furiously to shoot it
: down.

: This is objectively and demonstrably false. Hundreds of new stations have
: been allowed to start up in the past decade. There are more stations on
: the air than ever, and music radio is more boring than ever.

What I meant was not more stations, but new broadcast services. Like the debate over allocating L-Band spectrum for terrestrial digital broadcasts. The NAB was all up in arms about this because it threatened the existing stations.

Me, the listener, is the one who loses out on deals like this. Why does it NOT benefit me if a new radio service comes on with better sound and more choices? Like I said before, in deals like this the broacasters are putting their interests above the audience.

: If you've ever switched stations when a song you didn't like or a newscast
: or a commercial came on, you're part of the problem.

Reacting to the problem. I hope the buttons on my car radio don't break from all the punching.

It was funny to see this thread going, since I was going to start one on the same subject...

First, let me mention that I have researched this, because I get at least a call a month on what's legal and what isn't regarding music on hold. ASCAP and BMI want a royalty fee from the company planning to do this. What I found interesting is that one(sorry I can't remember which right now) determines the fee by the number of employees that work at the business. The other determines the fee by the number of phone lines the business has. And since you'd have to pay both ASCAP & BMI, it makes more sense (and is cheaper)to pay a subscription fee to a music service (Muzak, Digital Cable Radio, etc...) than to pay the fees to the licensing companies direct. I always suggest that companies put my AM on hold, WSYR runs a news talk format and plays no music. We don't pay the fee, so neither would the company putting us on hold. Now, I don't know how receptive most of their customers would be to Rush Limbaugh in the afternoon...

My question to everyone out there is this...With all of the duopolizing going on, and consolidation of studios, what radio station are people putting on hold at the studio facility? We have three in one building, all of whom want themselves on hold (one phone system, one choice only). We had it switching with a timer when we had two, for equal time, but when we added the third, we ended up just pulling music on hold off altogether to prevent fighting within the building. Anyone have any suggestions?

This shouldn't surprise anyone familiar with Sinclair's business methods. Papers filed with the Commission several years ago accused him of filing applications for Assignment Table changes in efforts to keep a Chesapeake-based station from getting an upgrade. Needless to say, there are some folks who have questioned his business morality

>About 20 years ago I obtained 12 programs of The ODIAR Wavelength.

It was a program which paported to come from sometime in the
future, when the music of the 1970's was called the vynal era.
This let them play what was then current music as if they were
oldies. They also had some great Si-Fi bits between tracks.

Does anyone know what happened to Cy Holiday who did the Verbal input
to the program, or anyone who was part of the program?<

I thought I was only one who ever heard of OIDAR. (By the way, that is the correct spelling; it is "RADIO" in reverse.)

I ran it as a PD in 1973, and I have all the episodes in a box somewhere. (Maybe there only were 12? Can't recall.)

It was a good idea, wonderfully executed.

I'll call around to see whatever happened to Cy Holiday (I'm in Los Angeles, where OIDAR was produced). As I recall, the producer of OIDAR also worked on a syndicated program for Charlie Tuna. I met him once, but it was SO long ago....Jeff something?

Anyway, perhaps Tuna can give me some info, too.

I'll let you know what I find out.

>once?

well, we get back to the cume vs aqh strategies.

do you want a small, but loyal audience listening all the time (giving
you a higher cume)? then play a wide variety of familiar and unfamiliar
music. (AAA/progressive stations do this well)

or do you want as many people to tune you in as possible (giving you a
higher 'average quarter hour' (aqh) rating)? then play the hits and play
'em hard! sure, people will burn out a little more quickly, but when
someone needs an oldies fix, they will know where to turn to hear
'runaround sue' for the 500th time! :-) stations following this
strategy are usually researched to the hilt.

the station i work for goes for the latter strategy, and it sure drives
me nuts! but it pays the bills. :-) we can play tunes that aren't in
the normal rotation during request hours, so at least there's an outlet
for 'em.

i speak only for myself...

If you live in a major market, you probably already have

over 100 choices. As you mention mediocrity and security are

the real villians. Imagine in an expanded universe 50

stations playiing the same oldies over and over again!!

There is a way to do great oldies and classic rock, we've

done it some time ago, it works, but alas, the researchers

are still running the asylum.

>every day. I love oldies, but it's almost like they are playing a Top 40

>list, but the list never changes week to week.

It IS a top 40 list. THE original top 40 list. The reason you think they play the same tunes too much is because all you are hearing is the music. If oldies radio was what oldies radio was (when IT was top 40) you would be listening to entertainment where the music filled the gaps between the fun and the commercials. The music was secondary when it was new. To make an oldies station succeed today it has to be the same way. Inexperienced programmers and owners who want an oldies station take the songs that were hits during a particular era and put them on the air with liner card reading, boring deliveries, where fun is considered to be a four letter word. It is thought to equal a real four letter word,, cost. It isn't. Talent doesn't cost more it just takes more.

If your oldies station was presented the way the format was when it was 'new' the music would fill the gaps and keep any dead air from happening. But without the sound effects, the production value, the jingles, the time elements, the features, the self promotion, the fun its just another spot on the dial. And I hate to break to the news to anybody but another spot is there only to be rubbed out.

Here's something I thought I'd pass on to you. Had a radio friends blow through Nashville recently and had a copy of a new book "Blast From The Past" by Eric Rhoads (the guy from Radio Ink mag). What a cool book...it's a coffee table-type deal and it's got hundreds of pictures of radio, from the early days to present (I think they got the idea to do this when they put out their radio anniversary Radio Ink last fall). For someone like me who started in radio in the '70s, it's really neat to see all the pictures of stations in the '40s, '50s, '60s and from when I started in the business (Super CFL, WLS, CKLW, etc). I ordered my copy and have let all my jox take a look at it (some are younger and I thought they'd enjoy some radio heritage). Anyway, it's about $40 and if you're a radio junkie like me, you gotta get your hands on this book. I've never seen it advertised, so I thought you'd like to know it's out there.

>undoubtedly catchup to this and all PD's who pull similar stunts...

Its the nature of the human beast. A person reaches a position of power and it is power that is paramount. A person reaches a position of authority and it is authority that is paramount. When a person reaches a level of a personal goal it is the personal goal that is paramount.....The problem with all of this is not that its radio, it is that it is human nature. Controllers hoard power . It makes them strong. Any time any humility is sprinkled in it is seen as a loss of power. This is NOT just radio. Its everyday life.
There are hundreds of very fine programmers, true managers of the human element, but there are many more who are not. And the Peter Principal sums it up: A man is promoted past his level of incompentence.

A great jock may not make a great manager. When made one the great jock who doesn't know how to manage people dictates to them instead and can't be bothered with personal things like courtesy, professional decorum and the like. He's not a manager he's a jock in a manager's job. It will always show. The person promoted to a step past their incompetence will begin to fail at the competence and seriously fail at their incompetency. In radio that incompentency can be hidded behind (the other guys fault) (HE had low ratings)(HE didn't follow orders)(HE costs too much)(HE can't execute the well thought out plan)... all things a real manager KNOWS is the manager's responsibility.

A true manager will accept vicarious liability as a jerk back to reality. An out of place manager won't know what it is, let alone recognize it to avoid it.

Radio PD's are not much different than any other business except in one thing: There is no other business where a great bolt installer can be promoted to a bolt designer just because he has flair in putting the thing in the hole.

Chris,

What you have are referred to as "transcription" discs. Yes there is still new equipment being produced to play these type of discs. There is a company in Downers Grove, IL called either ESOTERIC SOUND or ESOTERIC AUDIO. A stripped model will go for around $600, a good one for way over $1000. Remember we are not talking mass produced models here so the price are not really "out of line". I've heard there are a few companies that can that can take sound recordings from any medium - 78's, cylinders, wire recorders, and transcription discs - and transfer them to a more modern and convenient medium - but I don't know who they are or where they are located let alone what they may charge for their services.

Wally,

I don't have the turntable/arm you are looking for but I have some
useful info for you. Go to the nearest library that has back issues of
AUDIO magazine and look for a 2 part article from June and July 91
written by a Michael Lane on the playback of 78's. About 80% of the
info is still current with the biggest deficit being the absence of
hard disc recording.

Dana

PS What kind of 78's (in particular in regards to age) are you
attempting to transfer?

Second that! Tape seems antiquated, archaic, almost barbarian by comparison.At KEX, Portland we were lucky enough to get it last September. You'll find it very manageable, and will immeasurably improve your phone work .
Reel to reel? Now as useful as 78rpm's.

You'll also find that each jock has his/her own data path with password, so you can keep good bits in there which no one can play/erase/edit except you.

Hollywood, thanks for the tip on making a new master, that will help us as we tend to use up disc space quickly. When VOXPRO will allow us to dub off a day's work onto disc for filing they will have perfected this tool.

Just added Vox Pro at both KFRC AM/FM, and Young Country (KYCY-FM) here in San Francisco. All the airstaff is in the learn-by-doing mode... after some brief off-air practice with it. So far it's a great hit! I haven't heard anyone say anything bad about it. One person wants to know how to add echo to the trax, like you can with tape. I told her I think you just have to feed the signal to a real tape deck and fold the delayed sound back in for the effect. As far as I know there isn't any "echo" function on the Vox Pro.

Bottom line... GET IT! It'll save tons of frustration trying to quickly get a great call "fixed up" and on the air!

3040. ST. LOUIS RADIO WATCH 3/26 -- DORSEY SPEAKS ABOUT WIBV

Newsgroup: rec.radio.broadcasting
Date: 1996-03-27 00:00:00 UTC
From: ssimon9@ix.netcom.com

NEW WIBV MANGER PREDICTS
TRIPLING CURRENT AUDIENCE

by Scott Simon

ST. LOUIS ---- Tim Dorsey, who will become the general manager of WIBV-AM on April 15, is predicting that the station's audience will triple in one year.

He made the statement in a lengthy question and answer interview with columnist Jerry Berger, published in the March 26 edition of the St. Louis Post-Dispatch.

"Right now, it's a 1 -- we'll easily triple that," Dorsey told Berger. "I wouldn't be surprised if we were somewhere in the 5 to 7 range."

The last time any St. Louis AM station had a 5 share of the 12 year-old and older audience was in the mid to late 70's when KXOK-AM (now KJSL) was a Top 40 station, and KSD-AM was a personality-oriented adult contemporary format.

The headline of the article is titled, "Radio's Pied Piper". Dorsey is basing this prediction on the audience who listened to former KMOX air personalities Bill Wilkerson, Wendy Wiese, and Kevin Horrigan, who announced on March 3 that they were jumping to WIBV.

Wilkerson and Wiese in morning drive at KMOX was part of a 6-10 a.m. time period that recently commanded an approximate 14 percent share of the 12+ audience (Wilkerson and Wiese were on from 6-8:30 in that time, but started their show at 5 a.m.).

Horrigan was paired with Charles Brennan at KMOX from 8:30-11 a.m., and recent arbitron ratings for the period 10 a.m. to 3 p.m. also posted similar figures (although exact shares weren't available as this is written), although some of that success can be attributed to the success of the Rush Limbaugh show.

Dorsey's claim isn't so far-fetched. If a third of KMOX's audience from 6-11 a.m. followed the pair to WIBV, they could average anywhere between a 3 to a 5 percent share.

There are two crystal ball questions right now --- will KMOX listeners stay with the the current 6-11 a.m. lineup of Charles Jaco, Nan Wyatt, and Charles Brennan? And will WIBV's 5,000 watt directional signal cut down on the reach to the TSA (total survey area?).

There's no answer to the former. But Dorsey shed light on the latter.

"This station was not purchased on the strength of a signal," he said. "This station is totally being built on the strength of the people that are surrounding it, and in it.

"I don't know that it (the signal) can be improved. I have been told by people that they think that there can be a slight improvement with the signal of the station. But there are other alternatives to the signal."

Dorsey has contracted a consulting engineering firm to research a possible increase of power, and/or change of the WIBV directional pattern, which protects co-channel stations in Indianapolis and Springfield, Missouri.

Critics of Dorsey's action say WIBV won't succeed because many listeners in St. Louis can't pick up the station at night. But Dorsey easily rebuffed them with a response only a super-savvy professional can present.

"When we took a look and prepared a pro forma on the station, everything was based during daylight hourse, so that anything else we did would be gravy," he told Berger. "It was all done on a very, very conservative basis.

"We built in the cost as high as we can possibly go, we tookd the revenue as low as it could possibly go, and the numbers still make good sense."

And here is where Dorsey is putting pencil to paper. He already has a sales staff on the street.

"I have heard from many people that were in the advertising business and, acutally, people who really own their own companies, who tell me that they would like to be a part of WIBV and they want to do it sooner rather than later.

"In most of these instances, the rates that they were quoting me, which they'd pay, were higher than what we had on the pro forma. But most of them were in the $250-300 range for one minute in morning drive time."

Other revealing notes in the article said that current WIBV host Bruce Bradley, a former popular star at KMOX, was approached by Dorsey, but that Bradley chose not to pursue working for the new group.

The station is exploring studio and office sites in the St. Louis area. Locations mentioned are the current studio of WKBQ-FM in south St. Louis city (Q-104 is moving to Maryland Heights in the office and studio now being occupied by sister station KIX-106), or suburban Sunset Hills, where Dorsey's office is located as the current general manager of the Cable Advertising Network of Greater St. Louis.

One of the owners of Cable Ad Network is Charter Communications, who will be a majority owner of WIBV.

Dorsey said if on-air announcers decide to affiliate with the American Federation of Radio Television Artists (AFTRA) or any other union, that station management will honor that decision.

He also said the group may buy another station in the market to help cover areas not reached by WIBV's signal, but that right off the bat, Charter Cable will make the signal available on one of its cable TV channels, targeting people in the western part of the St. Louis metro area, furthest from WIBV's towers outside of Belleville, Illinois.

ED. NOTE: The Post-Dispatch does not have a writer who is regularly assigned to covering the St. Louis radio market. Berger is the paper's unofficial radio editor, and includes brief radio items in his five time-a-week variety column.

WSPD (1370 AM, News Talk)
Dateline, March 21st.
Bill Wagy, who hosts the nightly sports program on WSPD was fired (3-21). WSPD General Manager, Andy Stuart said that the reason Wagy was fired was because "He (Wagy) wanted to emphasize local high school and college sports." Stuart said, adding that the station wants to focus on national sports. "That's what our research told us to talk about." Stuart said.
Wagy was quoted as saying, "I'm not controversial enough," Wagy was a former channel 13 sportscaster who was hired by WSPD last July. "They said I was too much of a journalist and less of a talk show host, which I took as a compliment. I'm going to be credible. I'm not going to go off and alientate people just to generate ratings." WSPD, however, does still carry the Jim Rome show from 8-11PM weekday nights.

WXKR, 94.5
WXKR has ditched their slogan, "X94.5" and renamed themselves K-Rock 94.5. The station is has a classic rock format.

3045. DANNY BONADUCE BECOMES "FLY JOCK" IN COMMUTE BETWEEN DETROIT & CHICAGO

Newsgroup: rec.radio.broadcasting
Date: 1996-03-27 00:00:00 UTC
From: "Michael R. Lewis" <lewismik@metronet.lib.mi.us>
Message-ID: <4jajuv$sc0@vixen.cso.uiuc.edu>
Source record: 24408

...from the [Radio/TV Dial Pages] http://nether.net/~mikel/people/bonaduce.html

---

Following a protracted legal battle that ended in Dick Purtan leaving Detroit's 95.5 WKQI, the station quickly found a replacement at a sister station in Chicago - Danny Bonaduce from the Loop, WLUP-FM.

Bonaduce is the bad boy, youngest child of the old TV sitcom, "The Partridge Family". His life of a troubled child TV star lead to drugs and all manners of anti-social behavior that has been fodder for tabloid papers and TV for at least a decade. His antics have included beating up a transvestite and tattooing his buttocks with the Loop's logo (while on overnights at then-WLUP-AM 1000) and faxing it to hundreds of listeners.

His most recent failed venture was a nationally syndicated TV talk show.

Tom O'Brien, program director of WKQI, said that Bonaduce will move to Detroit to do the 6AM-10AM morning show called, "The Q Crew". Concurrently, he will continue to do his afternoon shift at WLUP-FM in Chicago. This will involve commuting between the two cites via planes.

The "Fly Jock" idea is one that was abandoned after many years, by the Chicago/Dallas DJ, Tom Joyner. He was most famous for his daily ritual of doing the same sort of thing at stations in both of those cities.

Bonaduce's first show at WKQI came off without a hitch. Both WXYZ-TV7 and WJBK-TV2 did live interviews during the show. Michael Collins of WJBK-TV2's Eyewitness Morning was a one-time morning host at Detroit's then-ABC O&O - WRIF 101.1FM. At 8:20 Collins quizzed Bonaduce about the commute and the variety of people that were crowding the studio. They pointed out Rebecca Marshall, the news anchor who came from Salt Lake City's KBEE-FM. Resident-sidekick and comedian Bob Heffron was there. They were quick to point out that Heffron was a local who lived in the far-western suburb South Lyon and that he attended Eastern Michigan University. Also present was Carey Carlson, traffic reporter, most recently from WCSX 94.7FM. Management people present were PD-O'Brien, John Fullam-GM and Fred Buchalter-Music Director who serves double-duty as board op on the new morning show.

A stand-out of the in-studio crowd was John Smyntek, a local newspaper writer that does gossip and media writing. Smyntek had been strictly an editor at the Detroit Free Press, until Strikes by several Unions caused the town's newspaper(s) to grind to a halt. The JOA'd papers

have refused to negotiate with the Unions and have continued to publish abridged and less distributed versions of the paper(s) utilizing scab laborers locally and from other Knight-Ridder and Gannett outlets nationally. The management of the paper(s) have cried poor and have downsized their staff(s).

The conspicuousness of Smyntek, was his itinerary for the day. He followed Bonaduce around all day to Chicago and back. And this junket sponsored by a newspaper complaining of bad financial health. To add insult to injury, a prominent sponsor of Danny's first show was... The Detroit Free Press.

Tom O'Brien said that Smyntek's coverage and the prominent sponsorship by the paper were "independent of each other."

Several of the writers of the paper(s) have found other or additional emloyment and sometimes displacing broadcast professionals at other radio and TV outlets in the city, like Susan Stark at WDIV TV4, Mitch Albom at WJR 760AM and Jon Pepper at WXYT 1270 AM.

When asked how the whole "fly-jock" concept came to fruition, O'Brien explained that back around mid-December, Purtan was on vacation and Kevin O'Neill was filling-in. Bob Heffron was acting as sidekick and Bonaduce came in as a guest. Bonaduce asked to do a fill-in show by himself, which he did. At the time he suggested the idea of the "fly-jock" to WKQI management. Purtan's gone, in rolls Bonaduce.

O'Brien told, that even though Bonaduce will make "Detroit his home," there is the probability that the Detroit show will be done from Chicago on occasion. "We have the ability to do ISDN, so he may do the show from Chicago" due to bad flight connections or promotional events keeping him in town. "Evergreen has a syndication division," said O'Brien, but there are no plans to syndicate Bonaduce. "Evergreen does syndicate the Johnny-B show to Phoenix, though," he continued.

Bonaduce's antics on his first day included taking a call from old friend, Drew Lane of the popular "Drew & Mike" morning show on crosstown WRIF 101.1FM. After chiding Bonaduce for awhile about being a failed child TV star, Drew played a tape of a trademark ambush phone call to former child star Gary Coleman. Coleman was working as a car salesman and became infuriated by the call in the middle of his work time.

Another gag was giving away a "Best of...the Morning Show" CD. The joke being that the show was less than an hour old and already had a "Best of..." CD. The CD was actually one of Dick Purtan's annual collections of WKQI bits that were sold with proceeds going to charity. Danny refers to his giveaways as "what's-his-face's old stuff". Purtan is now at WOMC 104.3. Dick Purtan's first show there is April 15th.

Calls came in telling Bonaduce that he had "big shoes to fill". This prompted Danny's response: "Who was this guy? A clown? These are

mighty big shoes!" He continued, "That's gross. Wearing someone else's shoes. Like... 'you have some pretty big underwear to fill...'".

Repeated questions of how he will handle the busy schedule brought a stock reply, "I have no life. I'm making up for 15 years of lost time."

In Smyrna, Ga northwest of Atlanta there is a construction permit for another 50kW AM on 830kHz it is a da 2 with 500 watts at night the coodinates I have for it are about 7 miles from my home putting it about 4 miles from the Powder Springs monitoring station. isn't there a rule about field strength over a monitoring station/radio astronomy observatory?

I drive by this piece of land (off of U. S. 278 between Austell & Powder Springs) everyday but never knew it had been a suspect site for an AM array in fact I think once went four wheelin' there before they built the highway.

The licencee that I have is in California any other info on this station or other hi power AMs that are dark or were never buit please pass it on.

My my my...two postings in two days...this is a record!

* WQHK-AM signed back on the air last evening with its beautiful music format. They're using ABC's "Radio Hollywood" satellite service. Ron Gregory is doing 6a-9a mornings, in addition to his 10a-2p (or 3p) shift at WOWO. The rest of the day is ABC's Satellite along with ABC-Information network news at the top of each hour. They are using WHWD as their calls, though I've not seen an official confirmation from the FCC that this is okay.

* Lightening struck the towers of WGL-FM and WGLL-FM (94.1 and 102.3 respectively), knocking them off the air Sunday night and most of Monday. They both were back on the air as of 1 pm today (3.26.96)

(The second item was according to the Ft. Wayne Journal Gazette)

That's about all for now...till next time...

Come Come...

How many of those "laws" have we found technological solutions for when we wanted to work around them?

Your solution is to tell 977 licensees that they'll never be able to live up to the terms of their licenses because we planned poorly in the early 1950's.

I must tell you that at least two of my properties gained substantially in 1984. So your "laws" do not appear to be universal.

I suggest that there is a solution. Maybe more power is it. Maybe it lies in more elegant technical solutions.

But I know that there IS a solution.

I hope this ain't happening. Evergreen has basically destroyed the
San Francisco market. First, Evergreen moves KMEL PD Keith Naftaly to
KKBT in L.A. (he's now at Arista Records). As a result of Naftaly's
move, he takes many of KMEL's top air staff and programmers with him.
Then, Evergreen "buys" Mancow from Wild 107 (KYLD) to stop losing
morning listeners from KMEL to KYLD. Sure, now they supposedly buy
KYLD. Geez, what are they going to do with two CHR? Probably
maintain KMEL's format and lose KYLD somewhere in the mix.

i can see it now...
PD of KMEL Michelle Santosuosso promoted to Evergreen post
how bout combining KMEL and KYLD and forming the new 106 KMEL...
PD: Michael Martin (PD of KYLD)
APD: Michael Erickson (current APD)
MD: Joey Arbagey (current MD)

6-10: Dog House (from KYLD)
10-2: Renel (current jock)
2-6: Rick Chase (current)
6-10: JoJo Wright (from KYLD)
10-12: Sway (current morning jock)
12-6: Gil Alexander (current)

of course I'm speculating, and being very immature about this whole
issue, but I really don't want just one CHR in this market. how bout
KMEL go back to its roots of hip hop/R&B and KYLD lean to house music.

hmmmmm....I wonder if this deal includes KSOL?

A friend of mine interested in setting up a home studio to produce commercials and two hour long programs a week for radio broadcast. She need some advice as to what sort of equipment would be best for this. Her budget is fairly tight, not a lot of cash to throw around, but she wants to avoid stuff that will sound terrible. She'd also like to run the whole thing off her computer, a Power Mac 8100. If any of you radio types have any ideas aobut what sort of stuff she'll need, please post or e-mail. Thanks.

3056. More on Legal ID's

Newsgroup: rec.radio.broadcasting

From: Russell.Smith@mindspring.com
Message-ID: <4jajvc$sdh@vixen.cso.uiuc.edu>
Source record: 24419

this is a legal id:

wsb atlanta

call sign = wsb
city of licence = atlanta

i understand that that this too would be legal :

wsb fm 98.5 megahertz atlanta

one of our lma stations gives the following id :

wjzf la grnage, atlanta

city of licence followed by a secondary city that we serve.

but i have noticed this rule bender :

w*** atlanta's (possesive tense) classic rock

also on a clear channel station i was listening to out of the mid west
just gives the call sign w** with no city of licence .

but my favoite is when they totaly blow it and say some sentence that
might contain all the information but just in the wrong order.

back when New City had a simulcast duopoly here in town they had two
cart machines one for each station and aired the leagl id for each
seperately

part 73 goes into a lot more detail about legal id's but my copy from
94 is missing those pages, it would be nice to get a new copy but the
gov. bookstore says they will have them in april.

where you can get a copy on disk or through the net?

>
>Is this a legal ID?

Absolutely. Call letters followed immediately by city of license makes
it a legal ID. In fact, I think that now the frequency can even be
inserted between the calls and the city, right?

The FCC doesn't care what you say before or after <call letters, city of license>.

73.1201 Station identification.

(a) When regularly required. Broadcast station identification announcements shall be made: (1) At the beginning and ending of each time or operation, and (2) hourly, as close to the hour as feasible, at a natural break in program offerings. Television broadcast stations may make these announcement visually or aurally.

(b) Content. (1) Official station identification shall consist of the station's call letters immediately followed by the community or communities specified in its license as the station's location: Provided, That the name of the licensee or the station's frequency or channel number, or both, as stated on the station's license may be inserted between the call letters and station location. No other insertion is permissible.

(2) A station may include in its official station identification the name of any additional community or communities, but the community to which the station is licensed must be named first.

Actually, if the city of license is Kill Devil Hills, all that's
necessary is that the station ID itself as "W---, Kill Devil Hills."
They can put anything they want before or after that, but nothing is
allowed to come between "W---" and "Kill Devil Hills". (Theoretically,
not even the word "in", although I've never heard of a station getting
called on it.)

I've heard stations take it to the limit on this; i.e., "WXXX ...
Chicago's best rock." or "WYYY ... New Orleans' Hot Country."

As I understand it, as long as you get call letters and city of
license in together, you can add other items to the ID. You're allowed
to mention other cities you serve, as long as the city of license is
mentioned first. The absolute minimum legal ID is the call letters
followed by the city of license.

After seeing all the press about the Imus fiasco, I watched the replay on CSPAN hoping to see some biting political humor. After seeing it, I was amazed that all the press reports were about his "outrageous humor". From what I saw, the real story was that Imus bombed. For more than a half hour he fumbled with his papers, reading off unfunny line after unfunny line while the sweat poured off him as joke after joke flopped and got polite laughter at best. Am I the only one who noticed the absolute silence after most of his so called funny lines? These weren't only the lines taking a jab at the people in the room, so that cant be the reason for the lack of laughter. We don't hear Imus in our market, but I have always heard him described as "the thinking man's Stern". I always thought that meant that unlike Stern, Imus doesn't do fart humor, but apparently it means that unlike Stern, Imus is not funny.

Could someone familiar with the morning drive numbers in New York, please report how Imus does against Stern. I always heard that Imus gave Stern a good run for his money in the ratings, but after witnessing an Imus performance first hand, I find that hard to believe.

Hello, Peter! Sorry for this late response. I'm just back from
vacation. Now, let's see... How much have I forgotten in a week?

Layer III delay times have been clocked in the 500 millisecond range,
with variations for codec type and sampling rate.

Your cascading question is interesting, both from the standpoint of
someone trying to put a radio station together, and from the recording
studio side as well. Here are some accepted truths:

1. The more the audio is compressed, the less you can cascade without audible artifacts.

2. When you connect audio codecs together over a single ISDN BRI, you are squashing the stereo audio signal from an uncompressed bit rate of about 1,500,000 bits per second to 128,000 bits per second. (Some BRIs in the US operate at 2 x 56 kb/s, or 112 kb/s, total.) That's quite a bit of squashing.

3. Using basic, unenhanced Layer II, the recommendation is to NOT cascade after one pass through the encode/decode chain at 128 kb/s; however, when the bit rate is increased to 256 kb/s, Layer II is transparent to most listeners through five encode/decode cycles. At 384 kb/s, Layer II can support 15 encode/decode cycles.

4. Our implementation of Layer II, known as MUSICAM in the US, follows largely the same rules as Layer II, with the additional benefit of less audible artifacts than generic Layer II coding at any bit rate.

5. Layer III works differently. Its strength at lower bit rates comes from the fact that, in addition to using psychoacoustic principles for reduction of redundency, Layer III uses Huffman coding techniques to build lookup tables at the decoder end of the connection. Therefore, when a familiar audio bit pattern is detected at the encoder, only a few "lookup" bits are sent. Clever, right?

6. But here's a concern for cascading with Layer III: When a bit pattern is presented to the encoder that is CLOSE to a stored lookup, the encoder sends the same lookup bits (hey, close is good enough, right?). This fools your ear the first time through the encode/decode cycle, but after more than one pass, the audio quickly degrades. Sort of like "Whispering down the lane" when we were kids.

7. All of the above is strongly dependent on program contant. Pure sine waves sound great all the time on all but the ugliest codecs (yes, ugly codecs exist, so buyer beware). But give a codec something hard to chew on, like Mozart or Susan Vega, and artifacts from cascading can become audible quickly.

So what do you do? Here are some logical suggestions:

A. Don't compress unless you have to, but hey, you already knew that.

B. When sending or storing audio, use the highest bit rate you can afford. Some codec companies who understand these principles offer codecs that let you operate at up to 384 kb/s. One (guess who?) even offers codecs that let you plug in up to three ISDN terminal adapters for connection to three ISDN BRIs. (The codec provides IMUX capabilities internally, and even supports J.52 BONDING for compatibility with other codecs.) By the way, when you're not in need of 384 kb/s digital mastering quality, you can send stereo to three separate locations,or mono to six separate locations,

simultaneously, without external equipment.

C. Don't lock yourself into a codec that only gives you 128 kb/s data, just because a basic ISDN line is 128 kb/s. ISDN service is getting cheaper, and advanced services are already here in some markets. Asynchronous Transfer Mode (ATM) gives you 384 kb/s in one direction, and much higher data rates going the other way.

D. Our new parent company, VirteX, is currently equipping US radio stations with a satellite-based audio delivery system that uses MUSICAM compression at the head end. The compressed MUSICAM audio frames are stored at the receiving end on a local hard disk and decoded when it's time to air the program. When DAB arrives, the station will be able to broadcast the encoded MUSICAM audio, and the decode process will happen only once--right inside the listener's radio receiver. That's one way to avoid the cascade issue.

I hope somewhere along the line that I answered your question. If you need more info, please contact me directly.

Hello, Bob! Forgive me for not responding sooner, but I've just returned from
a (well deserved) vacation.

One of the more recent and thorough evaluations of CCS MUSICAM codecs was
presented at the Paris AES Convention in February, 1995, by Chester Grewin of
Swedish Broadcasting Corporation. The paper details the care and precision
with which Swedish Broadcasting evaluated the codecs of seven different
manufacturers. In the paper, Mr. Grewin makes the point that the ISO/MPEG
standard tightly specifies the decoder, while leaving the encoder design
to the manufacturer. Since the decoder is slaved to the encoder, an improved
encoder makes the whole system sound better. (This is the theory behind DAB.
As more and more DAB receivers are deployed--each with its own decoder--the
system can be improved by improving the encoder. Decoders need never be
recalled.)

Swedish Broadcasting, according to the paper, used a new objective testing
method developed by PTT Netherlands called PAQM, or Perceptual Audio
Quality Measure. The PAQM system had a very high correlation with exhaustive
listening tests that had been previously performed by ISO and other groups.

As you know, there have been a number of schemes developed to measure
audio quality on a subjective level. So far, no one has been able to create
a perfect testing device, but PAQM is so close that it seems to be able
to tell the difference between two apparently "transparent" codecs.

Bottom line, Swedish Broadcasting confirmed their earlier listening tests
in which the CCS MUSICAM codecs were judged superior.

If you'd like a copy of this paper, just let me know and I'll fax it to you,
or feel free to contact the AES and request Preprint 3944(C1).

Regarding the BBC, the proof is in the pudding. The Beeb is currently installing over 70 CDQPrima Model 110 units at their London headquarters, each unit individually addressable under RS485 computer control. I don't know if this satisfies your need for non-CCS endorsement of our audio quality, but the BBC has done a fair amount of testing (not to mention bouncing units off the wall).

Hope all is well in San Leandro. I've always been a fan of the company, and the weather!

3066. ITC Digicenter ProblemS !!! Please Help !!!

Newsgroup: rec.radio.broadcasting
Date: 1996-03-27 00:00:00 UTC
From: ctremere@cycor.ca
Message-ID: <4jajvi$sef@vixen.cso.uiuc.edu>
Source record: 24429

Hi !

Our 3 station package has purchased and has run the ITC Digicenter automation for the last few months and since the system started "full-time" in Dec 1995, we've had a MONSTER problem.

THis is the scoop : (which by-the-way) is the same info we gave ITC and still have the problem, worst than ever.

We record our .SND files and send them to the servers in the master control rooms.

For some reason the files load into Digicenter and while playing, for no given reason the file may or may not play the length of the cut.

It's the same problem for spots, promos and worst of all, songs on our Lite rock station.

The problem (it seems) is within the software or my best guess a hardware problem. The cuts which it DISCARDS may or may not play all the way through and the repros and cuts are all over the board...

As you can see it's a radio-deadly problem and if your station(s) has ITC automation in place -- I'd love to have some help ...

Thanks in advance :)

David...

Jim Bohannon's program on Mutual is still being aired nightly. No word on how many stations carry the program, but I'm told its a substantial number, and he's in most markets. He also anchors Mutual's morning-drive newshour, "America in the Morning". I will leave it to others to answer the question of whether any of the numerous news/talk outlets in Bahstahn airs Jim's show.

3069. KCIN/KRPM Seattle - Now "Kiss 106"

Newsgroup: rec.radio.broadcasting
Date: 1996-03-27 00:00:00 UTC
From: BSNU33A@prodigy.com
Message-ID: <4jajvl$sel@vixen.cso.uiuc.edu>
Source record: 24432

Here's the latest on KCIN/KRPM:

Their "triplecast" with KYCW ended Sunday morning. All day Sunday and most of Monday, both stations played a "transition reel" with several sequences of background audio (kids playing, spaceships shooting, a boat on the water, etc.) broken up every 5-7 minutes by an announcer with a brief story, each ending in the tag line "and soon, you will know."

Well, as from 3 pm Monday, we know what the secret was. KCIN 106.1/KRPM 1090 are now collectively known as "Kiss 106," and the music of choice is now adult contemporary - "No elevator music and no hard rock," so they say.

It appears the station has gone to a no-host format. There are no live DJs, only male and female voiceovers in the sounders and IDs. Occasionally, they will slowly spell out "K-I-S-S" between songs in a soft voice. Legal ID is on the hour, using the existing call signs. This "K-I-S-S" ID is not unusual for this company. When their AM side was playing oldies under the call of KULL, they announced as "K-Double-O-L, Kool Oldies." This was up until several months ago, when the simulcast with the former K106 was reinstated.

On that informal ID of "Kiss 106," I wonder how much confusion this might create in some areas North of Seattle, where a Vancouver, BC station identifying as "97 Kiss FM" already exists.

Actually, it's you being _foolish_, because it's a 3-month-running trend (i.e., December, January, and February), which means most of the trend is WYNY, not WKTU. You won't get a true barometer of WKTU's performance until the _Spring_ book, as their PD and MD have only recently gotten into place. If they're still pulling low numbers then, you'll be in a much better position to gloat, because it will be April/May/June, 3 full months with the programming team (if not the full air staff) in place.

As for Country in NYC, the rumor mill - if you choose to listen to it - has WAXQ (aka Q104.3) going Country, in light of their performance against existing competition PLUS the change of K-Rock to Alternative.

Keep your fingers crossed!

>WKTU is gonna be BIG.

Well, I do recognize that it isn't fair to gloat over that, and, I understand that these things take time. But, I wish KTU nothing but success, just as I wish for another country station to take its place and fill the void that Evergreen left. Really, I wish them well. Business is business. I just hope that some station, far worse off, realizes that and tries to cater to the market they left.

Ron

P.S. Bob, I think that, as a country station, they were around a 2, and, yes, that isn't even much different than these ratings. I just felt that with all the apparent popularity the new format received from the start that their ratings would have been better. One of my daughters loved it when it first switched, but, she says that, now, they're playing too many repeats, and they aren't being diverse enough. Who knows? I really wish them well.

>were... or is it just me GLOATING??
>WKTU (TOP 40) 1.8-2.1

1) Arbitrends are much less reliable statistically than a full three Arbitron rating period. The most recent Arbitrend includes December/January/February, during which most of that time 103.5 was a country station.

2) Even so, a move from a 1.8 in the previous trend to a 2.1 in the current trend seems to indicate that the station is trending up. That's if you buy into Arbitrends as valid statisical data.

WYNY had a 2.4 in the Summer 95 book. It will be interesting to see how WKTU does in the Summer 96 book. Then we'll be comparing apples to apples.

OK.... think through this situation in selecting a mic.

The SM-7. It's a unidirectional, dynamic microphone. Although the transducer is mounted back from the front of the mic, it is still prone to "proxmity effect" (bass boost when you are close). It's a good mic, and has a nice "round" sound that may broadcasters prefer.

The RE-20 is a cardiod, dynamic, variable-D design (variable-D means that it does not have proximity effect). You don't get bass boost when close micing. Again, a good mic. ONLY USE THE FACTORY WINDSCREENS. Some boneheads use this mic with a typical "ball" style windscreen. This ruins the mic's response, and screws up the variable-D mechanics. They don't put screen down the side of this mic for the heck of it. It's there for a reason.

The CAD is a condenser microphone, and quite good from what I hear. It has selectable patterns (Omni, Cardiod and, I think, figure 8). I would buy from somewhere where you can try and return. Get the sound that you want.

I have the SM-7, RE-20 and Neumann TLM-170 in my mic locker. I use the SM-7 for the TOP-40 sound, the RE-20 for AC/NAC, and the TLM for spoken word/reading.
Get the sound you want.

>Another option is to use "Talk Radio", because they play no music, you
>should be safe from ASCAP/BMI. Would you/could you have " Rush on hold"

Even Rush plays music! Think of all his update themes -- "Born Free," "You Don't Own Me," "I Am Woman..."

I remember reading that during the big fight between ASCAP and the networks in the late 1930s the nets considered setting up soundproof booths at football games to avoid the risk of picking up ASCAP music being played by the band.

[Moderator's Note: Does Rush still do those update themes? I don't listen often, but when I have (maybe twice a week) I don't hear them and haven't for some time. Part of the 'de-humorization' of Rush. If he still does them, they are far less frequent than they once were. Bill]

> every "Oldies" station I hear repeat the same ones over and over and over?
> While there are countless hits from the 60s & 70s that I have not heard even
> once?
>
Having just come back from Los Angeles... I wonder the same thing. After listening to K-Earth 101 (KRTH), KDES and KOLA.......... the only thing different was the presentation (i.e. production and jocks). The songs were all the same. There is only a limited number of times one can listen to ''Brown Eyed Girl'' by Van Morrison..... or the same 3 Beatle and Beach Boy songs.

After button-pushing for two of the four days I was there.... I resorted to popping cassettes into the rental car's tape deck to get rid of the redundancy. And they wonder why people are tuning out radio stations?!

Sorry... but I'd rather hear ''Tomorrow'' by The Strawberry Alarm Clock than Incense & Peppermints played every hour. There are also a score of regional hits that are great to hear from time-to-time. Just because some programmer 'test' the songs in Cleveland, Ohio doesn't mean that they fit in Hartford, Connecticut.

Last note... It's time to 'freshen up' the oldies stations to keep them alive. While the promotions and jocks can be great (yes it was good to hear Don Steele in LA)... narrowing the play-list to 400 top songs makes the format burn out... as it obviously had in LA. These are oldies... not re-currents.

If you think the redundancy on traditional Oldies stations is bad, try listening to your local 70's station for awhile (if you still have one, that is!) The same 300 or so "safe" songs "carefully selected and researched" under the direction of focus groups and research. No wonder TSL and ratings are down in almost all markets, and the format is dying a slow-but-painful death.

Really sad, especially if you realize the potential of this format if it had been done correctly.

Actually, this is a question that I'd like to see some discussion on.... Of course, listeners will be turned off by obvious defects in audio such as earburn highs, distortion and other artifacts. But aside from gross audio problems, misadjustments or the like, I'd like to know-

In a competitive marketplace, does anyone have any hard evidence of how much market share can be bought solely by 'improvements' (whatever they are!) in audio processing?

There are those who say if a listener likes the station, they'll listen in spite of less than optimum audio or signal; others feel that Joe Listener will punch the button on the radio on the slightest snap, crackle or pop. I'd find any objective evidence one way or another to be mighty interesting and food for thought....

Bottom line: higher power for the graveyard AMs would be a DISASTER... both for themselves, and also for the regional and clears on adjacent frequencies. Dial your radio up to 1230, 1240, 1340, 1400, 1450, or 1490 at night and notice how high the noise floor is! Quite a bit higher than it was back when nighttime power was 250 watts, BTW. Can you imagine what this noise floor would be like if every one of these hundreds of stations were running 5KW instead of 1KW?

I remember hearing a tape of this played when 'Coop was at 680 CFTR in
the '80s. Tom Rivers (Then am driver) was doing a special show with Mike
during the PM drive to celebrate (I think) 10 years of Cooper being with
'TR? This was back when they were CHR, the station is now 680NEWS.
Anyway, I think I have a tape of this show with Tom and Cooper, and on it
they play all the bits, including when the "disgruntled listener" breaks
into the studio and "shoots" cooper right in the middle of Coop's tagging
off the back of a commercial. Mikes operator/producer even does a good
job of running out of the studio screaming "he's been shot!" They
supposedly had over 30 seconds of dead air before Cooper says "April
Fools" and then launches the song "I shot the sherrif". Apparantley
enough listeners called the police that the ETF (Tactical squad) showed
up....AAhhhh the good old days of radio.......

John

It was cult hit: Mike Cooper's world famous "5:10 stupid joke of the day"
on CFTR...

From: talk1370@aol.com
Message-ID: <4jd801$pkm@vixen.cso.uiuc.edu>
Source record: 24358

There could be a couple of possible solutions to the plight
of the class C AM's...that might even help all of us in the
medium-power, regional-service Class B realm as well. One,
of course, might be to thin out the band, drop off the marginal
performers that can't/won't offer significant local program
service to their communities, the way the old Federal Radio
Commission got rid of about 1/4 of the stations on the band
in 1931. (Simply re-instating the old local service and news
and public affairs requirements that existed before 1981
would force a lot of the marginal performers either to improve
their program offerings or go dark...and the overall quality of
AM radio service nationwide would improve in either case.)
But beyond that, maybe a major move to in-band, on-channel
digital audio service would help as well. I'm told by the tech
types that this kind of transmission can be sent simultaneous-
ly with analog AM over the same transmitter...but unlike an-
alog AM, it behaves like FM in that the strongest signal "captures"
the receiver completely out to the far fringe of that station's
coverage. So you don't get a "station on top of station" mishmash
except in a tiny zone at the border between two stations' half-
millivolt contours (not even that in parts of the country where
stations are more widely spaced, like the mountain and western
regions). Some contend that IBOC creates more adjacent-channel
splatter on analog receivers, but that's going to be limited to a
small area within the 25 mv/m city-grade contour of the trans-
mitter anyway, and need not be a bother outside a station's prime
coverage area. (Stations in any community are spaced far enough
apart that they won't interfere with each other or with nearby
rimshot stations in any event, whether we're talking analog or
digital service.)

Bob Smith, middays WXXI-AM 1370 Rochester NY

WWTL AM 700 is a brand new 5,000 watt directional daytime-only station licensed to Walkersville, MD (near Frederick). During the week, WWTL rebroadcasts 91.3 WTRM, a Winchester, VA non-commerical religious FM. On weekends, though, WWTL airs its own programming and calls itself "the international station" and airs some foreign language programming, but mostly just plays a variety of music, some of which is foreign language, but a lot of which is just regular old U.S. pop music. Their towers are on Route 26 east of Frederick, but I'm not sure where the studios are...on the air, they give out a Frederick phone number and an L Street DC mailing address.

3096. HIGH SCHOOL STATION NEEDS HELP

Newsgroup: rec.radio.broadcasting
Date: 1996-03-28 00:00:00 UTC
From: rbadesc@orion.it.luc.edu
Message-ID: <4jd806$pl0@vixen.cso.uiuc.edu>
Source record: 24362

I put out the call once again to any broadcasters who have
equipment gathering dust in their basements, whose stations are switching
over to computer equipment, or stations who have fully depreciated
equipment: out soon to go on the air student radio station is in
desparate need for a used but useable 'real' radio broadcast console.
We currently have had over $60,000 of equipment donated including
a NEOTEK production console from WFMT-FM (Chicago) and cart machines,
turntables, and a SMARTCASTER system from the Crystal Radio Group in
Kalamazoo, MI.
While we can use the production console, the students really need
to learn on a real radio broadcast console. The production console
posses problems for many of the student 'jocks' trying to 'mix' their
'rap' and 'hip-hop' and 'house' music. PLEASE, PLEASE, PLEASE, does
anyone have a console????
We have 9 inputs and need 4-5 outputs (2 CD's, 2 TT's, 3 carts, 2
R-R's). By the way, in case you haven't guessed yet, the board has to be
donated because the school board has NO money for the station. The
students have done this all on their own. Please help them!!
You can send the board (and any other working used equipment) to
my attention at the school: Roger Badesch, WKR Radio, Evanston Township
High School, 1600 Dodge Ave., Evanston, IL 60204. I am the
advisor/consultant to the students and the station. We are in the
process of investigating into the feasibility of applying for a frequency
in our area. Until then, we will be broadcasting over one of the
school's local cable channels.
Finally, is there one or two single sources to contact to get on
mailing lists for public service announcements other than the Ad
Council? Thanks for any and all assistance!

>

And thus, according to my understanding, the additional community or communities do _not_ have to be served by the station. It would seem that, for example, "WOI, Ames, Des Moines and Los Angeles" is a perfectly legal ID. IMHO, of course. Anybody feel or know otherwise?

Cheers,

Don

Here's a brief advance notice of the line-up and dates for 1996's European PD GRAD SCHOOL. The brochure will be ready for mailing in a couple of weeks.

If you would like a more detailed description of the sessions & schedule, please e-mail me and I'll reply with a fuller version.

(I did not want to take up a lot of your download time with information you might not need.)

If you would like to receive our brochure via snail-mail, please give us your complete name & mailing address (and your station affiliation).

*Dan O'Day's PD GRAD SCHOOL

*WHEN: Saturday - Sunday, July 5-6, 1996

*WHERE: London, England (Sheraton Skyline Hotel, across the street from London Heathrow)

*COST: Earlybird registration costs $795(U.S.).

SCHEDULED SESSIONS & PRESENTERS

*AIR PERSONALITY PLUS (Dan O'Day)
(Two-part session, Saturday & Sunday)

*THE RADIO NEWS CONNECTION (Rasa Kaye)

*THE TOTAL RADIO EXPERIENCE (Lew Dickey)

*OUTSIDE-IN MARKETING (Dwight Douglas)

*BRANDING YOUR RADIO STATION (Lew Dickey)

*INSIDE 'THE MORNING ZOO' (Ross Brittain)

Hope to see you there!

The best Legal ID I ever heard was a few years back on WGTZ-FM/Dayton.
Their Legal was "Z-93 is WGTZ-FM, Eatin' Dayton Alive". For months it
astounded me that they got away with this, until I realized their
actual city of licence was the suburb of Eaton (Eatin').

What a classic!

- Chris.

In article <4j7st5$sfk@vixen.cso.uiuc.edu>, Don Leonard Munthali <munthali@infi.net> writes:

>What exactly is the current FCC criteria for fulfilling the requirements >of the legal station ID every hour?

Call letters followed by city of license, for example, "WABC, New York." You can bury this phrase any way you please. For example, we end our :53 past the hour newscasts with "I'm (name) for KUZZ-FM, Bakersfield's news leader." That suffices as the legal ID for the hour, since it contains "KUZZ-FM, Bakersfield" in exactly that order as required. (Yes, nit-pickers, the call sign includes the FM in our case. We once had KUZZ and KUZZ-FM. When we changed the AM calls, we did not change the FM.)

Rimshot stations often list several cities after the call letters, which is legal as long as the first one is the city of license. Sometimes the big city boys do it, too--it's popular in San Francisco, for example.

Indeed, it would even be legal to say:

WSB-FM, channel 253, 98.5 MHz, WSB, Inc., Atlanta

>but my favoite is when they totaly blow it and say some sentence that
>might contain all the information but just in the wrong order.

There are a number of slimy operators who do things like this. Go to the Boston Radio Archives (URL below) index of samples, and tell your Web browser to look for the word ``illegal'' in the index pages. I think the worst one in the collection is WRCN-FM Riverhead / WMJC Smithtown, on the Eastern Long Island page.

>where you can get a copy on disk or through the net?

Some kind soul posted the entire text of 47 CFR 73.1201 to AIRWAVES a few months ago, and I HTML-ized it and placed it in the Archives as well. I'm planning on printing up a whole bunch of copies to hand out during my tower-hunting trips this spring and summer. The URL is:

ftp://radio.lcs.mit.edu/radio/bostonradio.html

The legal ID requirements can be found under `Other Radio Resources'.

> believe.

In the Fall 1995 Arbitron Stern was first in AM Drive at persons 12+ with an 8.5 share. Imus generated a 3.5 share-- tied at eleventh with WADO, a Spanish language AM station.

In the money demo, adults 25-54, Stern was first and Imus was eighth with about one third of Stern's share. Even at eighth, Infinity makes a lot of money with Imus in New York. But, at number one it makes even more with Stern.

Yes, for the uninitiated, Stern and Imus are Infinity stablemates although the studios of WXRK are in Manhattan and WFAN's are in Queens.

Imus hasn't got a good sense of audience, or camera.

He's a wonder in his medium, which is radio.

Any true Imus listener listens expecting to wait, for that line that comes up out of a clear sky from the material at hand.

Much of the time is spent getting material at hand, to give this line its chance.

It may go many shows without showing up.

This doesn't translate to speeches.

The speech does, and wonderfully, give Imus material for his show.

Hi,

I am a collector looking for WLS airchecks from the late 60's through the mid 80's (unscoped or scoped.) Have most of the airchecks from the "commercial" aircheck companies. Also looking for the WLS Jody Lyons "Rock of Chicago" jingles from l972 (would prefer air versions) and the WLS PAMS "Windy" (air versions) package from l976. Have checked with Ken R, Ricky the K, and Ben Freedman, who have access to the PAMS material and the "Windy" air versions master seems to be "lost." Anybody know where else to look?

Also looking for Tanner packages from KGRC in Hannibal, MO. Anybody who use to work there have a dub? The station no longer has their reference copies.

Thanks in advance for any help you may be able to give. Tim

You've read it wrong.

The latest Arbitrends came out in March, and even though they HAD to note WKTU (because that is what they call themselves now), the ratings were a reflection on when the station was WYNY.

I guarantee you to look out for the Arbitron ratings and you will see 'KTU catapult to the top. Not disrepecting country music..I want to see that back on the radio for fans of that music, but don't bash 'KTU because we have been waiting for this for 4 years.

Thank you.

I have have discussions on just this matter with BMI. They consider MOH to be "broadcasting", believe it or not. But that makes it easy for a radio station to put itself on hold since it already has a license for broadcast performance of the cleared material. I have not discussed this issue specifically with ASCAP but they vary little from BMI on legal definitions.

You want petty... I read an article (I think from the NAB, but I'm not sure) some time back that described this scenario.

A plumber's union holds a convention at a popular hotel. At the evening dinner they hire a DJ to play tunes. ASCAP/BMI can charge the DJ for profiting from the performance, and charge the union for the music rights since they are entertaining their members, AND the hotel for rights because they're making money off the whole convention! Triple-dipping from ONE performance!!!

But, then again... if you're walking down the street humming a favorite tune and someone hears you, ASCAP could get you for that too, right? I think I'm gonna start my own music licensing agency.

- Chris.

[Moderator's Note: I am always looking in the bushes when I play my guitar around the campfire, for an ASCAP/BMI agent. I am all for protecting property, but these guys are getting totally out of control with their extortion. Bill]

It is a fairly common practice to copyright the arrangement of material
which is otherwise in the public domain. In those instances you are
still subject to the shakedown.

I don't know about the ex-CKO frequencies out west, but CKO 106.9 in
Ottawa went to "The Bear" CKBQ when CJSB switched from 540 AM last
year. We're now left with CHUM's CFRA talk radio 580, Rawlin's
CFGO/Energy 1200 hit radio (with a fantastic wideband stereo signal,
by the way), and Roger's (ex-MH) CIWW 1310.

Montreal never had CKO on FM -- they took over CFOX's 1470
frequency adssigned to the Montreal suburb Pointe Claire. 1470 has
never been reassigned, AFAIK.

That's not radio's fault. That's advertisers' fault. I don't like it, but there's nothing I can do about it if they refuse to believe anybody my age has any money.

> If there are 100 music channels on a
>satellite service, the chances are much better that I will find one to my

>liking. Better than the 10 or 15 music choices I have now.

Only in the beginning. It's the same phenomenon that has driven quality from television. The more the audience is sliced up, the more costs must be cut, and the more programming must be aimed at the lowest level of taste in order to survive. You'll have the Elvis channel, the Beatles channel, the 1963 channel, the punk channel or whatever, but it will all be narrowcast. You'll have to do even more station-switching to get variety!

>: If you've ever switched stations when a song you didn't like or a newscast
>: or a commercial came on, you're part of the problem.
>
>Reacting to the problem. I hope the buttons on my car radio don't break
>from all the punching.

No, part of the problem, because you won't tolerate the very variety you demand. Your behavior belies your stated beliefs. It shows you do not want what you say you want. Most people don't. Every radio programmer knows that the listener who says he/she wants more variety is too fickle to stay through even one tune he/she doesn't like. The natural reaction to that is to try to find out which music the target audience likes most, and confine the format to that music.

But another poster here put it best, noting that it's what goes between the songs that really makes a great radio station. My attitude has always been, if all you want is music, go play your records, CD's or tapes.

I would like to offer a differeing point of view here which I think has some validity because I was playing Fats and Chuck when they weren't oldies and I have a clear recollection of "Top 40" in those days.

The problem IS the music played by the oldies sttaions. Because it is NOT the original mix. "Oldies" has come to be defined as a certain type of old rock. That is not the top 40 of yesteryear. In those days we played the hits...ALL of them...no matter what catagory. It was not unusual to air Jerry Lee Lewis, Doris Day, the Four Lads, and the Mormon Tabernacle Choir (yes, the actually had a hit) in the same half hour. Not to mention Johnny Horton and Johnny Cash.

Even the dreaded (by our parents) top 40 stations managed to expose listeners to a wide variety of music. Today's highly researched stations have no choice but to become a lot more boring a lot more quickly.

But nothing in this world is as consistent as change. The days of Dan Diamond getting 50 shares in the afternoon on WNOE are gone forever. All of us can complain about the way things are but there is a tendency to become a little more cautious when it's our own bucks on the line. We can no longer afford to take chances because there are now 50 or 60 viable signals in Detroit where there used to be ten. Instead of a few stations in New Orleans there are now a few dozen.

The economic pie can be sliced only so many ways before people (and stations) get hurt.

Grant

> another to be mighty interesting and food for thought....

I think it would be extraordinarily difficult to find any objective evidence, I can offer this anecdotal evidence....

Here in Dayton, OH, ARS owns or influences WMMX (Mix), WTUE (AOR), and The Edge (with AC WLQT and oldies WDOL soon to come and WCLR/WZLR in a LSA). Thus, one engineer sets a lot of the audio processing in this town, and he apparently *really* likes Bass with a capital B! Other stations seem to set their processing to achieve a similar/comparable sound. There is not a single station in the Dayton metro with a reasonable, interesting, or "magical" high end!

Because of this, a friend of mine *avoids* listening to Dayton radio altogether. Only one of his 18 car presets is a Dayton station - all others are set for Cincinnati and Columbus stations! He chooses to accept noise and static to gain an accurate and/or interesting high end.......

Wanting to have *some* idea of what's going on in my own market, I'm a little more generous with Dayton presets -- 33%!

Don, you might want to visit a local musical instrument outlet and look at the equipment that is used by rock bands. Brand names like RockTron and DigiTech come immediately to mind. I think you'll be pleasantly surprised by both the prices and the audio quality.

3123. ST. LOUIS RADIO WATCH 3/26 -- DORSEY SPEAKS ABOUT

Newsgroup: rec.radio.broadcasting
Date: 1996-03-28 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <4jd80r$pm9@vixen.cso.uiuc.edu>
Source record: 24389

SS> Dorsey's claim isn't so far-fetched. If a third of KMOX's audience
SS>from 6-11 a.m. followed the pair to WIBV, they could average anywhere
SS>between a 3 to a 5 percent share.

That a humongous "if." I've seen many situations where personalities moved from one station to another, never to recover their former audiences. In cases like KMOX where its heritage franchise is far stronger than any newcomer, you'll probably see WIBV gain a slight increase (maybe from 1.0 to 1.5). I seriously doubt WIBV will be a threat to KMOX. They'll probably increase their presence in the market so they'll be able to make a good living, but not knock KMOX out of the box.

I'm always skeptical of claims of future dominance when a signal doesn't cover the entire metro. It looks great in print to puff out one's chest and boast. It's another matter to accomplish the feat with a suburban signal.

SS> There are two crystal ball questions right now --- will KMOX
SS>listeners stay with the the current 6-11 a.m. lineup of Charles Jaco,
SS>Nan Wyatt, and Charles Brennan? And will WIBV's 5,000 watt directional
SS>signal cut down on the reach to the TSA (total survey area?).

Most likely, the answer is yes to both. I believe you'll find that the station has too much history to it to expect listeners to abandon it just because a few personalities change. Over time, however, if those new personalities don't measure up the audience will go elsewhere.

SS> Critics of Dorsey's action say WIBV won't succeed because many
SS>listeners in St. Louis can't pick up the station at night. But Dorsey
SS>easily rebuffed them with a response only a super-savvy professional
SS>can present.

SS> "When we took a look and prepared a pro forma on the station,
SS>everything was based during daylight hourse, so that anything else we
SS>did would be gravy," he told Berger. "It was all done on a very, very
SS>conservative basis.

It doesn't take a "super savvy professional" to answer this. It takes a good businessman. What we often fail to realize is that ratings don't guarantee success. There are many stations that make great livings with low ratings. It depends on your sales department and their ability to maximize the value of the product. Not everyone can be #1, yet many #10 stations outbill the rating champs. In the end, the real test of a succesful business is how many wheelbarrows of cash you take to the bank, not the ability to boast about ratings on the Internet.

WIBV's previous owners have created a cantankerous, hot talk station under some difficult conditions. Even a suburban station can find a profitable niche on the outskirts of a city if they do it right. From what I've heard, the new owners will carry that much further. They don't have to be #1. They just have to program and sell smart.

SS> Dorsey said if on-air announcers decide to affiliate with the
SS>American Federation of Radio Television Artists (AFTRA) or any other
SS>union, that station management will honor that decision.

They'll have no choice if an election is held and the staff votes for it.

Personally, I think the "new" WIBV will be a very viable operation. I wish them the best of luck. It sounds to me as though they're doing it the right way.

Rich

[Moderator's Note: Also, WIBV is on the east side of the river in Illinois, and they protect co-channel KTTS-AM in Springfield Mo, 200 miles SW of there, so they have a null toward St. Louis at night. Plus they are only 5,000 watts as opposed to KMOX' 50,000 non-directional. Bill]

Tapecaster went out of business a couple of years ago. I tried to get some parts, called the former owner, and was told that no more parts per se exist. However, I just dismantled my voice over studio and have a Tapecaster 701RP mono record/play unit in mint condition - I bought it in 92 (one of the last ones they sold). e-mail me at Garysice@Tiac.net - I could be talked into parting with it (I haven't touched it in over a year).

Yes folks-

It's true....Howard Stern MAY be returning to Hartford, CT. WCCC's (107-FM, AOR) morning show will soon have an expired contract, and the station is considering bringing "Howie" in. The $300,000 price tag (per year) is making management hesitate (not surprising, since they are still using Tapecaster mono cart machines at a 50KW radio station).

The question: Can Sebastian (WZMX 93.7 FM, 70's station) survive??

>it rather unconventional to trash a winning formula?

They're making the same mistake as K-102 (KEEY) in the Twin Cities made 3 years ago when WBOB went on-the-air. Overreacting to a new "hot" country compeititor, and throwing away their heritage market position in the process. The results will be the same, too. Remember, in 1993, K-102 had in excess of an 11-share. BOB cut that in half and beat them within 2 years.

WAVC made a HUGE mistake here, one that will come back to bite them in the you-know-what!

Source record: 24452

WZPL INVOLVED IN BROAD RIPPLE GOOSE CONTROVERSY -- Driving along Westfield Boulevard in Indianapolis's Broad Ripple district often involves dodging geese that have wandered into the road from the nearby canal they call home. Residents complain that the geese damage their lawns, leave lots of smelly droppings in their yards, and sometimes bite passersby. Meetings of the Broad Ripple Village Association, which acts in the interest of the neighborhood, have recently centered on the goose situation. BRVA members have discussed options to reduce the number of geese. WZPL (99.5, CHR) had heard that the BRVA would vote at their March 19 meeting whether to remove some of the geese to another location, and took the position that all the geese should remain-. To draw attention to the issue, the station faxed pro-geese press releases to newspapers and television stations and even broadcasted live from Broad Ripple on the morning of the 19th. No vote was held at that evening's BRVA meeting, but WZPL morning show co-host Julie Patterson said that she knew that BRVA was at least going to discuss the issue. She promised further coverage of the issue, especially the BRVA's next meeting in May.

WZPL STUFFS A SUZUKI IN GIVEAWAY -- WZPL's latest contest will place four strangers into a new Suzuki Sidekick. The last one left in the car gets to keep it. Contestants will enter the car at noon on Saturday at a local shopping mall. They'll be allowed five minutes every three hours to answer nature's call -- but they will not be allowed to read, watch TV, change clothes, or take showers. The contestants will also raise money for a local charity as part of the stunt. If more than one person remains in the car at the end of the contest on April 13, the person who raises the most money will win the car.

WRZX ADDS MONTHLY REGGAE PROGRAM BY LOCAL REGGAE LEGEND -- Beginning this weekend, WRZX (103.3, Alternative) will begin airing a reggae program called _Dread of Night_ at 8 p.m. the last Sunday of each month. The program, which aired for several years on an Indianapolis noncommercial radio station that is no longer on the air, is the brainchild of well-known local reggae disciple Allen Deck. Deck is familiar to many Indianapolis radio listeners who remember his "Allen Deck at Large" feature on WNAP-FM in the 1970s.

WNDE ANNOUNCES AUTO RACING SCHEDULE -- WNDE (1260, sports/talk) will carry several auto races this year, including Sunday's Food City 500 from Bristol, TN, the April 14 First Union 400, and the April 21 Goody's 500.

Nashville Radio Watch (3/28/96)

WKDF-FM's modern rock format was the only station to show any significant change in the latest numbers....up one full point....to fourth from fifth. Country continues to dominate with WSIX-FM a solid #1 and WSM-FM five points back at number two.

The readers of Nashville's alternative weekly newspaper, The Scene, have named WSIX morning man Gerry House as the best disc-jockey in its Best Of Nashville poll. WRLT-FM (adult alt) was named best radio station and also the best radio station suffering from an identity crisis. Teddy Bart of WKDA-AM was named best radio talk-show host.

WGFX-FM (arrow) afternoon personality Lisa Manning's sister, actress Lori Alan, appears on tonight's "Boston Commons" on NBC-TV. Manning is the second Nashville radio personality with a sister appearing on a network sitcom. WSIX morning sidekick/producer Devon O'Day's sister Faith Ford plays the part of Corky Sherwood on CBS-TV's "Murphy Brown".

It has been a rough couple of months for veteran Nashville talk show host Les Jameson. First Jameson was fired from his long-time midday job at WLAC-AM. The next week he underwent heart surgery. Then one week after starting his new job at WIZO-AM, he found out he has prostate cancer. Then a week later Les suffered a stroke. He's now in the Columbia Summit Hospital. WIZO officials say they will keep Les' job open until he's able to return. Cards to Les may be sent c/o WIZO, 1814 Carters Creek Pike, Franklin TN 37064.

> Craig back for the morning show.
>
>What stations will do for numbers!!!

Craig is currently doing the morning drive at all-70's WEGQ
"The Eagle" 93.7FM in Boston. However, considering the fact
that ARS management has publicly made its point in the Boston
daily back in January that Craig by no means has the lock on the
Eagle morning job, the Hartford rumor may not be all that farfetched...

I still think that much rumored Sebastian(currently on WZMX-93.7FM
in Hartford) simulcast on Boston's WEGQ-93.7FM is a strong
possibility down the road...

I work at a 1240, and the night time signal is NO better, often WORSE
that with the old 250 limit. WKDK was the first on 1240, but here they
are in so tight, that going to ANY higher power would be a disaster!

Quite a bit higher than
>it was back when nighttime power was 250 watts, BTW. Can you imagine

>From the rumors that have been going around it would seem as though what would happen in the case that Evergreen did purchase KYLD, KYLZ and KSOL is that KMEL would revert back to being more Urban with KYLD/KYLZ sticking to a more "dance" oriented format. KSOL would apparently remain as it is, at least for awhile. The SF Examiner reported last week that there were deals by Evergreen to purchase the three stations at a whopping $42 million but that talks had broken down. A radio web site called Radiologon reported on March 22nd that the sale had apparently gone thru and that KYLD/KYLZ PD Michael Martin was a bit upset. However, there has been no confirmation of the sale and so far all parties involved have denied it. Of course, in radio they usually deny everything until the change really happens. :)

This is the idea that was passed around as well, and I think it's very intriguing - especially as a local dance label. Having both stations compete with a bland mixture of this-n-that is not helping anyone, including both stations! They don't take chances like Hot 97.7 used to.

>
> hmmmmm....I wonder if this deal includes KSOL?

>From what I read, yes. See <http://www.radiologon.com/truth.html>

The current local buzz is that "deal is final" means that Evergreen has made a very healthy bid, but Crescent is waiting to hear other bids before agreeing to anything.

So we all wait eagerly...

I do not believe that material like this has ever been licensed for sale to individuals. The main reason is that there is such a small market for it that no one has seen it profitable to license and sell it.

I guess you could call someone at Bonneville Broadcast Systems, they do produce the material on CD's for the few stations who actually still run this format (you probably can count the stations on the fingers of one hand). My guess is they won't sell it it you, but it never hurts to ask. Another name I remember is Tom Churchill (I don't know where he is), is or was (probably was) a syndicator of easy-listening programming.

I'm sure that there are lots of stations who USED to run this format who have a stack of 10-inch tapes stashed way back in the corner. It's probably not legal for them to give them away, though.

The year was ---1973! I was the new PD at WRIF Detroit, ABC O&O.

Upon arrival, I was faced with a jock shortage since one of my jocks (Pat St. John) had just gotten a transfer and promotion to the NYC station in the chain.

Somehow I met Greg Budel, who was at that time doing middays at WBBM-FM, CBS O&O in Chicago.

For a while, Greg did nights for WRIF Detroit, caught a plane at Metro airport after his shift, flew back to Chicago, slept on the couch at WBBM-FM, and woke up in time to do middays. Then, after middays in Chicago, he flew to Detroit.

This went on for a month maybe. Last I heard, Greg was in Miami, hopefully staying on the ground.

> Thanks.

the 8100 is a great platform for what she wants to do. she should look into MacroMadia DECK II or Opcode Digitrax. DECK is more feature laden and powerful enough for music production, whereas Digitrax is more based on spot and multimedia production.

She'll also need a large hard drive for audio only (1gb+), something to back up to (DataDAT, Zip, Jaz all work great), and preferably a way to bypass the powermacs flimsy d/a a/d converters (AMII card or a new cheaper alternative Nubus card to be annouced soon).

then it's just a good voiceover mic, a mackie 1202 or 1604 mixer, some fx, and her creativity away!

email if you need some more info, as this is sorta what i'm doing right now and i can probably lend a few more details.

: to mention other cities you serve, as long as the city of license is
: mentioned first. The absolute minimum legal ID is the call letters
: followed by the city of license.

A few years back, when the WKRP tv show was popular, a station in
Salt Lake City changed it's call letters to KRPN. Listeners would hear
the legal ID:
"this is WKRP in Salt Lake City"

which was actually:
"(this is W) KRPN Salt Lake City"

Pretty clever, but I don't think it helped. I believe the
station is now dark.

Well, maybe not exactly. Recently, WHFS Annapolis, MD was ordered to pay a sizable fine for numerous violations, among them "misidentifying its city of license". For a long time, it made a practice of running an unobtrusive legal ID at the top of the hour, followed by a louder, clearer ID "WHFS Washington-Baltimore". Not anymore, though...

[Moderator's Note: I bet those "other" violations you mention triggered the ID problem. Stations routinely mumble rimshot IDs and trumpet false, positioner, IDs. Happens all the time. Bill]

Hi, Gang,
I just couldn't resist telling you all about the most bizarre
legal ID I know of. There was a station in (I believe this is the
correct name of the suburb) West Valley City, UT, a suburb of
Salt Lake City. For a while, this station (on 1550 kHz) played
oldies and billed themselves as WKRP. I just *had* to listen for
their legal ID at the top of the hour to see what their call really
was. And here's what it would sound like to the untrained ear:
"This is WKRP in West Valley City."
But, you see, the *N* was actually the word "in", and the W was
superfluous. The legal ID, intact, was KRPN, West Valley City.

There are several other answers on it being calls next to city of
license. I just wanted to point out you can do the real legal ID at :55 past
and then say what you want at the top. KQLZ Los Angeles-- back when Scott
Shannon ran it with the "Pirate Radio" format, they ended their last stop set
of the hour with a quick legal ID and then at the top they would say something
silly like, "Broadcasting around the globe in digital stereo with 50 million
bubba watts... this is 100.3 FM, Pirate Radio". So do the ID early (just not
too early since their are rules about how close to the top and how the
regularity) and then say what you want at the top.

The Code of Federal regulations is available as a searchable database at:

http://www.pls.com:8001/his/cfr.html

The search engine is a bit tempremental, so here is some information they
sent me about how to search for particular sections of the code:

The way the software is set up right now (it retrieves
a maximum of 60 sections per search), is not great for trying to
retrieve entire CFR parts. On the other hand, if you were looking
for a particular section of the CFR, e.g., 43 CFR sec. 73.3598,
I would suggest the search

43:cite w/3 73.3598:cite

That search will look for "43" in the CITE (i.e., citation) field,
within three words of "73.3598".

I had been a volunteer for years at a listener-sponsored radio station. Legal I.D.'s were one of my MANY peeves there over the years, but I won't go into a whole list....
After MONTHS of discussion with the GM about what constitutes a legal ID, how to give the ID, the order in which to SAY the ID, the GM types up some ID's for the various On-air folks to cart up and run as IDs throughout the day. Not one, I repeat NOT ONE of those "IDs" is a legal ID. They still run them. Months, YEARS!!! without a legal ID! I havn't volunteered there in three years, but it STILL bugs me.

>12+ with an 8.5 share. Imus generated a 3.5 share-- tied at
>eleventh with WADO, a Spanish language AM station.

>In the money demo, adults 25-54, Stern was first and Imus was eighth
>with about one third of Stern's share. Even at eighth, Infinity
>makes a lot of money with Imus in New York. But, at number one it
>makes even more with Stern.

Thanks for these numbers, Julian.

With all the hype about how successful Imus is, its interesting that
Stern's 12+ numbers are about two and a half times that of Imus, although
there are no doubt plenty of broadcasters who would be thrilled to
achieve a 11th place ranking with a 3.5 share in the #1 market in the
country.

Also of note is that the common claim by Stern's detractors that his
audience is just a bunch of kids does not seem to be backed by the
numbers. When you throw out the kiddies and just look at the adult 25-54
numbers, Stern's share relative to Imus increases, rather than decreases.

Tony,

Point well taken, and, I've received quite an education regarding how these ratings came to be. What you say makes sense, and, I agree with you. Besides, bashing never got anyone anywhere anyway, so, if my post sounded like that, I apologize to everyone.

As you, and others, have stated, when the next set of ratings are released, they'll be far more indicative of the performance of WKTU. I truly hope that, by then, perhaps, we'll also be seeing the familiar 2's for some staunch radio station content to make a couple of million per year, after costs. (With the 90 million dollar price tag for WAXQ, I'm being realistic, and not holding my breath for Viacom.)

Rumors do persist, however, with respect to 92.7 FM, WDRE, in Garden City, LI. I have heard that on 4/1/96 they are bringing back personalities from WLIR to bid farewell to the alternative rock format. Further, the information someone sent to me goes on to say that on 4/2/96, the station will switch to a country format. It offers other small tidbits, such as former WYNY personnel being hired by the station (not particularly unusual as people do have to make a living). Anyway, I'm thinking this would be a great setup for one of those April Fool's Day Jokes, so, even if I tune in on 4/1 and they are saying goodbye to alternative rock, I suppose I still

won't be convinced. Now, if I tune in on 4/2 and hear Garth Brooks coming out of the FM band on my stereo, well, now, that'd be quite another matter wouldn't it?

Thanks for your comments, and, know that they certainly haven't fallen on deaf ears. I hope that 'KTU does perform as you believe they will, and, that you'll continue to enjoy the music that you, and others, love.

Ron

TO> I guarantee you to look out for the Arbitron ratings and you will see
TO>'KTU catapult to the top. Not disrepecting country music..I want to see
TO>that back on the radio for fans of that music, but don't bash 'KTU because
TO>we have been waiting for this for 4 years.

Tony,
While I admire your willingness to go where no man has gone
before, I have a problem making absolute statements like this. The only
way you can guarantee that WKTU will "catapult to the top" is if you've
already seen the results of the survey that hasn't yet been conducted.

I'd be willing to bet that WRKS ("Kiss") will remain very strong, as
will WQHT ("Hot 97") and WPAT ("Suave 93") will make significant gains
by taking the very audience that WKTU is targeting. There will be a
significant audience for WKTU, but I don't expect they'll reach #1 any
time soon.

The worst mistake a radio programmer can make is to assume that
everyone's taste matches his own. It never has and never will. You have
to look at the whole market, not just what interests you.

Rich

3161. Anybody know Mike Harvey's address?

Mike Harvey has a syndicated oldies show each weekend out of Disney World
in Orlando, Florida. I was wondering if anybody would have an address
for him at the show! If you do, please e-mail it to me, as I don't get a
chance that often to read the newsgroups. Thanks much!!!!!

Hope you don't mind that I'm posting my reply to the newsgroup, too.

On Mon, 25 Mar 1996, 8 wrote:

> How would I research the musical history of an area?
>
> Ray Smith, 92.7 WUVA FM, Charlottesville.

First thing to do is to research the station history of your area-- find out what stations existed when and with what format(s). The likeliest stations to play 'local' (i.e. regional) music in the 50's and 60's would most probably have been Top-40 or Country & Western stations-- but I know, too, that full-service stations in the past have also featured local talent from time to time. Next step would be to see if any of their old record libraries are intact.

You might also track down some of the old booking agents-- find out who the popular local groups or talent were in the 'old days'... find out if any of them made records.

Plan a trip to the library. Look through old local or regional newspapers. If you're doing a research paper, a newspaper may even allow you into their 'morgue' where all their clippings are kept. Keep an eye out for record store advertisements highlighting local and regional recordings, as well as stories about musicians printed in the paper(s). Perhaps a reporter has already, sometime in the past, compiled a history of local/regional music that was published either in the paper or as a book.

Keep an ear open, too, for any local record collectors who might have copies (if not also a good knowledge) of records recorded by local musicians.

The hardest part is then to track down these musicians-- if they are still living-- and record their oral histories. Finding only a couple early on can greatly aid in your research as they will probably remember other groups and performers from among their peers... that information can make your subsequent searching much easier.

Larger, urban areas are, obviously, easier to search through than smaller urban or rural areas. But I think most everywhere in the country has had some local musicians of (pardon the pun) note who either made recordings or played live on the radio. (However, it may not all be rock'n'roll.)

Happy hunting!

: That's not radio's fault. That's advertisers' fault. I don't like it,
: but there's nothing I can do about it if they refuse to believe anybody my
: age has any money.

I'm looking forward to the day when radio is done by subcription. Not only will the incessant commercial interruptions be gone, but Madison Ave. won't be dictating the programming.

: > If there are 100 music channels on a
: >satellite service, the chances are much better that I will find one to my
: >liking. Better than the 10 or 15 music choices I have now.

: Only in the beginning. It's the same phenomenon that has driven quality
: from television. The more the audience is sliced up, the more costs must
: be cut, and the more programming must be aimed at the lowest level of
: taste in order to survive. You'll have the Elvis channel, the Beatles
: channel, the 1963 channel, the punk channel or whatever, but it will all
: be narrowcast. You'll have to do even more station-switching to get
: variety!

There's a fundamental difference between music radio and TV. On TV, lots of effort is required to produce programming. Yes, lots of what is on TV is junk because it is low-budget. But music radio is different, the main product, the music, already exists. The programmer merely selects which music to play. Sure, this takes some effort, but not the same level of effort as producing a TV program.

Why would I NOT benefit from having an Elvis channel, etc.? All I get now on the radio is the three or so "safe" Elvis songs every day.

And why is it NOT a benefit to me to have a much wider variety of stations to switch between? The net result is MORE variety.

Remember, on a subscription satellite service, the individual channels aren't competing tooth and nail with each other for "market share", like radio stations do. Suppose channel 64 has a 200-song list of 70's hits (typical of todays radio). Channel 65 has a 4000-song list of 70's hits, 3800 of which I can't hear on the radio now. I can switch between 64 and 65 and anything else as often as I want. The "program director" on channel 65 is not wringing his hands about losing audience by not playing a "safe" song. All the service cares about is that the get their $15 monthly payment to keep the radio turned on, based on satisfaction with the ENTIRE

product. Why do I NOT benefit from something like this? I get to hear 3800 songs, lots of which I like and can't hear on the radio now.

Steve: Some very good points...but are all the 30-54's in the Twin
Cities people who lived there 30 years ago? Migration in our
society is so common(for professional and personal reasons) that
unless a city is stagnant, a significant number of adults are
from someplace else.
In 1966, Phoenix had roughly 750,000 people in its metro
and most were white. Now, it's closing in on 2.6 million and the
ethnic composition is changing as well. Las Vegas & Los Angeles...
same story. Yeah, these are the high end of the "boomtown"
phenomenon...but, remember...even the guy who's lived in
Minneapolis-St. Paul for 20 years and considers himself a native
did all his radio listening prior to 1976(meaning all
of what the industry regards as "oldies") someplace else.
The key is not national testing or local history...
but knowing what and who your market is now.

> In a competitive marketplace, does anyone have any
> hard evidence of how much market share can be bought solely
> by 'improvements' (whatever they are!) in audio processing?

IMHO... There is no hard evidence that processing has ever had any measurable results in audience size! This is one of those areas about which broadcasters have religious beliefs, and, if you are the decision maker and have the money, you get to choose, whether or not you can prove that it makes any difference.

Having said that, I'll certainly grant that there are some basic things that do make a difference. Since so much listening is done in cars, and a car is inherently a noisy environment, it's hard to listen to anything in a car that has very much dynamic range. This wouldn't be much of a problem for contemporary music stations, even without processing, but it is a problem for classical and some other formats where the music does have some actual dynamic range. Including a fair amount of compression in the processing certainly rouses the ire of (the diminishing number of) purists in the audience, but it keeps the listeners in cars from tuning out when the music drops below the ambient noise level.

For any station, a basic level of processing is necessary to provide reasonably constant levels, and peak limiting to keep the signal within FCC modulation limits. And on FM these days, since most everyone runs at least the equivalent of a first or second generation Optimod, if you DIDN'T limit peaks and control gain based on the the preemphasized signal, you would sound significantly less loud that most every other station on the dial.

Many broadcasters have this fundamental belief that listeners will tune up and down the dial and listen to the loudest station that they hear. I think this superstition dates from the AM days of 50 or so years ago when receivers had much less AGC, and signal strength really did make a big difference in how loud a station would sound. Now, with FM, signal strength does NOT determine how loud the audio coming out of the speaker will be, only how much noise is under it. In any event, these broadcasters are still trying to get the last half db of loudness into their signals, and I claim it doesn't make one iota of difference to their share.

It remains true (fortunately) that radio programming is still an art, not a science, and so it's hard to say for sure what makes

the difference in growing or shrinking the audience. However, the evidence strongly points to program content as the primary factor and processing differences as insignificant.

In the Toronto market, the dominant station for years has been
CHFI. They continue to pull amazing shares with their sleepy AC
format. Barring the local college stations, they're the least
processed station I'm aware of and appeared to have totally ingored
the race for loudness.
Their next closest share competitor in the money demo, I believe,
is the CHUM affiliate. They about have the most processed signal in
the market.
Go figure.

Actually, it was a fairly common practice...more so among the adult contemporary and MOR stations that felt they had to play the record to satisfy Paul Simon fans, but couldn't deal with the "crap" line. Top 40 stations, with a few exceptions like WFIL, generally played it uncut. I don't recall, but Columbia may have supplied the edit to insure airplay.

>-TC
>----
Yeah, but...KRTH's Arbitrons and Arbitrends for the past 6 months
show the station at a remarkably consistent range of 3.5 to 3.9 12+.
That makes it the #6 English-language music station in the market.
It is also one of the top 10 billing stations in the country($28.6
million according to Radio & Records). Wanna bet that Infinity
(KRTH's owner) doesn't see a problem here?
Actually, a previous poster hit the nail on the head. You can
survive....even thrive...with a limited playlist(if not, none
of us would know the name Bill Drake today). BUT...you need to
have all the other elements in place...personality, promotion and
production values(the three p's???) And KRTH does.

Here's a really strange one--from 1985-87, I worked at an AM/FM combo in a small market in the western US. AM was teen-oriented top-40, FM was country. We later flipped the country to AM, and went hot A/C on the FM. At no time, on either the top-40 or the hot A/C, were we allowed to play Madonna's "Like A Virgin!"
The GM was young as GM's go. He had lived in that town his whole life. Other than a brief stint in college radio, he had never worked anywhere except at these stations in his home town. He started as a teen-aged weekender, and wound up running the place. He said he thought the lyrics of the song weren't appropriate for the market. Odd, since this place has some of the youngest demographics in America. I always thought it was really because his Mom and Dad--old country Europeans who still had their accents after 30 years in America, and worked as the stations' janitorial staff!--told him not to play it!

{of KMOX and WIBV}

| Most likely, the answer is yes to both. I believe you'll find that the
| station has too much history to it to expect listeners to abandon it
| just because a few personalities change. Over time, however, if those
| new personalities don't measure up the audience will go elsewhere.

KMOX is loaded with history; WIBW doesn't have any to speak of.
However, this also means that WIBW has a "blank slate" with which to work,
given enough working capital.

The question that's gone unasked in all this: Where's EZ Communications?
KSD(AM) has a killer signal in ALL of St. Louis, day and night. The
nighttime DA puts out a very good signal in all of Missouri. (KSD *might*
be able to use that same DA during the day if KFRM in Concordia, Kansas
were bought out.)

However, the "Big 550" is being run more like the "Little 1550": EZ come,
EZ go. EZ doesn't appear to want to spend the money it would take to be a
real contender in the St. Louis market.

Too bad Charter and Dorsey just couldn't buy KSD. Despite those heritage
call letters, KSD has not been run properly since the 1960s, either by the
Post-Dispatch or later by Gannett. It would be just as much of a "blank
slate" as WIBV, and with no signal problems. If EZ won't spend the cash to
make KSD's programming match its signal, it really ought to sell KSD to
someone who can and will make the investment.

KSD == "Keep Suffering Deprivation"

| SS> Critics of Dorsey's action say WIBV won't succeed because many
| SS>listeners in St. Louis can't pick up the station at night. But Dorsey
| SS>easily rebuffed them with a response only a super-savvy professional
| SS>can present.

Remember, however, that during the winter, "nighttime" in St. Louis ends at
7:15 in the morning. If I'm driving in from Wentzville or St. Peters,
doing so early to beat the traffic on the Blanchette Bridge, it's
a sure bet I *won't* be listening to WIBV. I won't be able to *hear* it.

| [Moderator's Note: Also, WIBV is on the east side of the river in
| Illinois, and they protect co-channel KTTS-AM in Springfield Mo, 200
| miles SW of there, so they have a null toward St. Louis at night.
| Plus they are only 5,000 watts as opposed to KMOX' 50,000
| non-directional. Bill]

KTTS, though, has an anemic signal for all its 5,000 watts. I can rarely hear it here in Kansas City. I *can* hear WIBV during the daytime 130+ miles away in Columbia (Mo.).

Cross-posted to: rec.audio.pro,rec.radio.broadcasting

I have an ADTRAN DSU III AR that I have been using for the past year or so on a Switched 56 kbs (SW56) digital line for sending studio audio to our satellite uplink for radio broadcasts. We are getting rid of the SW56 line and replacing it with an ISDN line. Unfortunately, the ADTRAN is configured for SW56, not for ISDN. I have been using the unit in conjunction with a CDQ-1000 codec (which is NOT for sale), but it will work with a Zephyr, Comrex, Micro 56, etc.

I would like to sell this unit at a resonably cheap price (which is still being determined). If you, or someone you know, would be interested, please contact me via e-mail or telephone. Thanks.

This summer, I'm scheduled to teach a couple college courses in London. One class includes a section on the 1964-67 pirate radio off the English (& UK in general coast). Over the years, I've collected a little bit of info (Paul Harris' WHEN PIRATES RULED THE WAVES, etc.) on the interesting topic, but am really seeking to learn more. Anybody have any articles about English pirate radio, or know someone who actually participated on the broadcast side? It seems like someone would have bought the old Radio London minesweeper ship and opened it up as a pop music/radio museum. 'Course maybe that sort of thing is primarily done here in the US. In any event, I'd really appreciate an e-mail from anyone who like to share some UK pirate radio stories.
Thank you very much.

Drew, Drew, Drew...

K-102 is beating Bob-100 again, and always did 25-54. Bob's inroads were 18-34.

I thought K-102 peaked at a 10.8, in '92? Even so, you have to remember, they were nearly the only Country FM in the market, with KJJO changing in '93, and WIXK coming in from the east. Country was _damn_ hot, and K-102 was just about the only game in town. Now, toss in Mark Miller, ex-WLOL and WCCO (of all resume moves!) in mornings on a high-profile competitor, and K-102 was doomed. It was just too dry. K-102 didn't react to Bob until it had started to eat away the ratings, and, from what I'm told by an-until-recently-insider, the research showed that the 'old' K-102 didn't have the appeal anymore. It sounded like WLTE, with Country music. Now, it sounds much more exciting. Country listeners actually LIKE to get excited about their music! (Like some 70's people I know..... <g>)

Sure, tossing in the towel on a heritage set of calls is risky, but there is a certain 'past' to the management at their competitor, and 105 _may_ win after all, though admittedly not necessarily because of their 'big change.'

I always thought that the Class IV channels were a great thing for the small market operator. Although these channels are loaded, they provide full-time local coverage (and I do mean local) with a very simple setup- one stick, reasonable power consumption and transmitting equipment that is relatively inexpensive and easy to maintain. They aren't and never were intended to have regional coverage.

They also could eliminate AM stations that simulcasts an FM with a power above 50k.

Doing that could get rid of a whole ton of junk stations which just put on anything to keep their liscense. Doing that could eliminate many stations quite easily.

Also, the FCC needs to make it easier for a station with a weak signal to move onto the expanded band.

>of, just volcanic rock.

This is my understanding of the KAIM situation (take it with a grain of salt).

They used to run 10kW, but wanted to go to 50kW. To do so required them to move the transmitter out of Honolulu.

In doing so, their signal into Honolulu has degraded (KLHT 1040's 1kW is heard better in Waikiki, well that was the case last November when I tuned around in my hotel room).

Also, when they moved to Molokia, they had to install a power generator and they are using it 24 hours a day as it's the only source of electricity. I'm pretty sure they currently reduce power nights to reduce the diesel bill due to financial constraints.

They DO, however, put in a thumping great signal down here in New Zealand! Dominate WWL _most_ of the time.

NO! NO! NO! Let's go back to the FCC rules again, once more and with feeling, 73.1201(a)(2), which states that the legal ID shall be done:

"...hourly, AS CLOSE TO THE HOUR AS FEASIBLE, at a natural break in program offerings." (emphasis mine)

If you can break your programming to throw in "what you want" at the top, then you MUST -- MUST! -- do your legal ID at that time. Only if you're in the midst of some form of programming with no natural break, such as a long musical piece, or a live speech, can you wait to do the ID.

>too early since their are rules about how close to the top and how the
>regularity) and then say what you want at the top.

There are rules...and they say you CAN'T just say what you want at the top. Now if we could just get the FCC to enforce them...

<<Not one, I repeat NOT ONE of those "IDs" is a legal ID. They still run them. Months, YEARS!!! without a legal ID!>>

When CBS changed their Boston FM to an oldies format, they ran a top-of-the-hour ID as follows:

(Drake ID jingle, followed by:) "Ladies and gentlemen: You're listening to the greatest hits of all time on WODS..."(jingle:) "Oldies 103--Boston!"

That one, illegal though it was, ran for at least six months before it was re-cut to swap the "Oldies 103" and "WODS." So, it seems it's not just the little guys that don't have a clue. CBS, after all, had at that time an in-house legal department.

>You can bury this phrase any way you please. For example, we end our :53
>past the hour newscasts with "I'm (name) for KUZZ-FM, Bakersfield's news
>leader." That suffices as the legal ID for the hour, since it contains
>"KUZZ-FM, Bakersfield" in exactly that order as required.

How does this square with another part of the requirement, section 73.1201(a)(2), which requires that the ID be made "hourly, as close to the hour as feasible, at a natural break in program offerings." Do your newscasts end at the top of the hour? I've heard FAR too many stations bury the legal ID 10 minutes before the hour, and then do an elaborate illegal ID, often with phony calls or no calls at all, right at the top. The FCC doesn't seem to care, and too many PDs are operating under the misconception that the law gives them 10 minutes on either side to ID? That would be true, I suppose, if you started a movement of a symphony at :45. But I think any segue between songs should count as a "natural break in program offerings"...and CERTAINLY any station that sticks in an illegal ID is acknowledging that there's a "natural break" at the top of the hour.

And then there are the true incorrigibles, like KHTO-FM in the Moderator's home market of Springfield MO. I recently heard an ID from these guys that contained a very hastily-spoken, slurred "KHTO, Mount Vernon" legal, followed by THREE repetitions of the "K-H-O-T" callsign, ending in the flagrantly incorrect "K-H-O-T, Springfield."

-=Scott Fybush - fybush@world.std.com - Waltham MA=-

[Moderator's Note: To their credit, new owners (Corporate Communications) no longer do the sluring ID. They are still calling themselves KHOT, but the KHTO Mount Vernon-Springfield is not clearly uttered at (or near) the top of the hour. Bill]

Stations licensed to communites close to bigger metropolitan areas often stretch the rules. Case in point: At about 7 minutes before each hour, the station clearly states between commercials, "KHYL, Auburn. More music in a minute." Then, at the top of the hour, they run a Drake-Chenault jingle singing "Cool 101 - Sacramento."

We had the same thing down here a few years ago with WFKS/99.9, a Class C licensed to Palatka, Florida, but targeting Daytona Beach. They would "bury" a quick "WFKS, Palatka" in the middle of the :50 stopset and then come out at :00 with a fully-produced sweeper that said "WFKS, Daytona-Orlando-Jacksonville-Gainesville. Florida's KISS-FM"

One day I noticed that I wasn't hearing it anymore, and they were back to a not-as-quick-as-before "WFKS, Palatka-Daytona Beach" ID in the :50 stopset. Hmmm...wonder if Osborn got fined over that one (?)

:>have produced any new jingle packages recently. If you know of any, have
:>purchsed them for your station, or have copies of some recent demos,
:>please e-mail me and let me know as I am trying to expand even further my
:>jingle collection

JAM has had various CDs. Mostly of older stuff, there is some new stuff.

Uni-Que: AC for WKQI (Q-95) Detroit. It's a little fresher than
Quick-Q's but the top of the hour from Quick Q's is the best since the
original Q-Cuts package. RECJ&A rating ****
(out of 5 stars)

Master Mix: Another Mix/Vareity package. JAM's feeble attempt to
go after Thompson Creative's mix jingle packages but trying to use
the same logo that they used on Digital Mix. I will say that the
selection of cuts is good, some cuts can actually be lyriced, unlike
some of the Thompson stuff. RECJ&A rating: **

The Coast Approach: What can I say? KOST and JAM go together.
Like Adam and Eve. Like Pizza and Beer. Once again, more ramps
which are a pleasure to listen to in the clear. RECJ&A rating: ****

Metroline: 30 exciting cuts! Yes, once again, Dallas is making 30 cut
packages. Works great with many formats (designed for AC). I would buy
it for REC. Piloted for Y-98, St. Louis although originally produced for
Metro-FM in the UK, it would be nice to hear the demo with Metro.
The liners sound very JAM, the music is very JAM, the logo sounds very
80's TM-Century. RECJ&A rating: *** 1/2

Vareity Pack: If Sunny 95 was still a JAM client, they would use this
package. Hello VOA Europe?? The end of the demo was cuter than the
cuts, which recognizes jingle collectors! RECJ&A rating (the cuts): * 1/2

All of these are on the AC Volume 2. There are other CDs out there
like News-Talk vol 1 and 2, Oldies vol 1 and AC volume 1.

Thompson's latest CD is the "HOTTEST Jingles in Dallas". I have been out
of contact with Thompson since Ben Freedman has been gone.

I have not talked to TM Century since the early 90's.

3193. Los Angeles: KMAX changes format

Newsgroup: rec.radio.broadcasting
Date: 1996-03-30 00:00:00 UTC
From: psychdoc@netcom.com
Message-ID: <4jip53$kol@vixen.cso.uiuc.edu>
Source record: 24315

The Southern California trio of stations known as KMAX (KMAX/Arcadia, KAXX/Ventura, and KBAX/Fallbrook, 107.1) dropped their all-sports format as of midnight Monday night 3/25. The staff were told of the change Monday afternoon, and "Big Joe" McDonnell broke the news on-air at 4:25pm.

Odyssey Communications is now operating KMAX, which aired "all construction radio" for a day and a half - that's right, sounds of a construction site.

Sometime between 4 and 6pm this evening (Wednesday 3/27), 'the new Y107' began airing a modern rock format. It's running jockless, with liners mocking "rival" KROQ, the heritage modern rocker here just to the left of Y107 at 106.7. To this ear, Y107 sounds a bit softer than KROQ.

The all-sports KMAX lasted about a year, and seemed to be picking up some momentum, though it never registered in the ratings. It featured "Big Joe" (who also closed out KMPC/L.A. when it switched from sports to talk) and the Pete Rose show. Before all-sports radio, KMAX broadcast an ethnic format, and I believe it was a "time buying" arrangement.

KMAX suffers from having a less than city grade signal in some parts of LA.

!!!!!!!!! psychdoc@netcom.com !!!!!!!!!! b.j. mora !!!!!!!!!!

If film aspires to be part of culture, it should do the things great literature, music and art do: elevate the spirit, help us understand ourselves and the life around us, and give people the feeling they are not alone.

3194. KPAY/KHSL Chico

Newsgroup: rec.radio.broadcasting
Date: 1996-03-30 00:00:00 UTC
From: "Seifert, Rick" <rseifert@usia.gov>
Message-ID: <4jip54$kom@vixen.cso.uiuc.edu>
Source record: 24316

I noticed a reference to KPAY 1060khz 10kw DA2 /KHSL 1290khz 5kw DAN in Chico, California the other day. The article indicated that these stations were part of a multi station deal in which a 1050khz station in the San Francisco area (maybe KOFY, San Mateo) would upgrade to 50kw fulltime non directional. To do this, the SF station bought 1060khz in Chico in order to take it dark. KPAY then moves to 1290khz, or something to that effect.

Since 1050khz is a Mexican clear channel, the article made reference to a "lease" arrangement between the SF owners and unnamed Mexican parties for the upgrade to happen.

Could anyone shed some light on this? In particular, what kind of lease arrangement (if any) was made between Mexico and the SF station on the use of 1050khz.

I have a personal interest in Chico since my father was stationed there during WW2. I can remember touring the base with him during a visit in the 60's. Already a teenage radio buff at the time, I asked him to drive by the local AM's so I could check out their transmitting facilties. KPAY was one of those stations.

Thanks for the help.

3195. KTTS Springfield and AM in general

Newsgroup: rec.radio.broadcasting
Date: 1996-03-30 00:00:00 UTC
From: SNOWMAN <jlsnow@fcseng.frco.com>
Message-ID: <4jip54$kon@vixen.cso.uiuc.edu>
Source record: 24317

Regarding Mark Roberts's comment about KTTS's "puny" (hopefully not a copyrighted word 'cause I didn't ask Mark if I could quote him), an assessment of that signal would presume a knowledge of their directional pattern. They dominate up here in central Iowa (WIBV is second in level). Over in eastern Iowa, WIBV is dominant. KTTS can also be heard almost nightly in central Texas.

I whole-heartedly agreed with a comment someone else made about cleaning up the AM band by removing the countless string of low-power satellite repeaters. That would help TREMENDOUSLY. Put'm on FM where receivers can much more effectively reject background signals.

When I was in Tampa recently, I tuned into the sports talker on 820 1KW at night and though they were quite strong where I was, I could DISTINCTLY hear WBAP underneath. What is the matter with these people. The argument must be that, while WBAP can be heard in Tampa, their signal is comercially insignificant because virtually no one in the Tampa Bay area will be listening to WBAP. Hard to argue with that. That's the thing about AM, it's really not spectrum-efficient in terms of the geographic spacing of stations required to prevent interference in the hinterlands. The signals trail off too gradually as distance from the transmitter increases.

Other examples abound ... WBAP would be (used to be) quite serviceable here before CHAM came on. Now, WBAP is nearly useless. WOAI is (would be) quite listenable in Chicago. Yet the 1200 station in chicago doesn't even turn up in the ratings! And WHAM Rochester was always quite good here before 8090. Now, 1180 is a mess! GROWN!!!!

I was disappointed, while in Tampa, not to be able to check on the reception of WHO because there is a 420-watt directional station on 1040 in Tampa. It simulcasts 95.9 FM. It's a good quality signal but I bet virtually no one is listening to it. So what is the advantage of that station even being on the air? Beats Me......

Forever Pissed,

Jim Snowbarger

I agree. You have to have the elements in place. Let's face it.
KOLA/KRTH/KDES are all airing the same jingles (Johnny Mann/Drake). The only
thing different is the personality and promotion presentation. It still
doesn't mean the station couldn't freshen up the format by adding more variety.

If there are only a limited number of alternatives available, the public will
choose the least offensive (or the best of the heap). I wonder if their
ratings would improve if they added a greater variety of songs!

MICHAEL HAGERTY (mhtv3@aztec.asu.edu) wrote:

: In a previous article, deejay@mm.com (Steve Sundberg) says:

[my stuff snipped]

: Steve: Some very good points...but are all the 30-54's in the Twin
: Cities people who lived there 30 years ago? Migration in our
: society is so common(for professional and personal reasons) that
: unless a city is stagnant, a significant number of adults are
: from someplace else.

I don't have the figures handy but it's been stated elsewhere that, at least in Minnesota, there hasn't been a great deal of migration into the state as compared to others. (The argument, I believe, revolved around driving habits and how they've changed. Some people attributed the worst habits to migrants from other states but that was disputed with some figures showing that a large migration into the Twin Cities-- much less out-state-- was only a perception, not a reality.)

While I can agree that migration into other markets has to be considered, another, perhaps more important, factor to consider is the influence of television over the past 25-30 years. Along with the homogenization of language there has been the homogenization of music owing to the influence of network programming, program syndication, and the growth of non-local cable TV channels. Before the days of video tape, the only programming the networks provided were the daytime game shows and evening fare-- and before video tape the only 'syndication' that could be done was done live (e.g. American Bandstand). More than half a typical TV station's programming, therefore, had to be made of local productions. Very few, if any, stations today do more than produce their own newscasts; it was a far different situation then than now. I hope you catch my drift. ;)

: In 1966, Phoenix had roughly 750,000 people in its metro
: and most were white. Now, it's closing in on 2.6 million and the
: ethnic composition is changing as well. Las Vegas & Los Angeles...
: same story. Yeah, these are the high end of the "boomtown"
: phenomenon...but, remember...even the guy who's lived in
: Minneapolis-St. Paul for 20 years and considers himself a native
: did all his radio listening prior to 1976(meaning all
: of what the industry regards as "oldies") someplace else.

But the population of the Twin Cities has remained comparitively stable since 1966 when compared with cities like Phoenix, Albuquerque, Miami, Atlanta, Houston... I'm begining to see a pattern here(!). (Miami,

however, is a classic example of the influence migration can have on local music tastes.)

: The key is not national testing or local history...
: but knowing what and who your market is now.

But doesn't it then become a self-fulfilling prophecy? The music listeners know now* is only the stuff they've been fed since, say, 1976 or 1986. And as music has become homogenized, and the influence of smaller markets has waned (just how P-2 or P-3 stations get free promos anymore?), the choice and breadth of music has become more narrow-- resulting in a listenership that does not know of much else than what is being promoted nationally.

If a station in Brainerd, MN (pop. 25,000) wants to sound large-market and subscribes to a satellite service, does that mean the listeners are getting the benefit of local music input? I think not, especially if the pollsters and testers never get around to doing their research in Brainerd.

There seem to be far fewer 'testing grounds' for new music these days. Everyone wants to play the 'hits'... even that small station in Brainerd that backsells Enya as a top-ten charter while many of their listeners say to themselves 'Enya who? Never heard of her before.'

I'll stop here, though.

But before I go, yes, I do think migration plays a part in what oldies stations play nowadays-- as well as national testing, cable TV and those oldies infomercials, and the way records are being promoted (or not* being promoted) today. This does not, however, means it's right.

: museum. 'Course maybe that sort of thing is primarily done here in the US.
: In any event, I'd really appreciate an e-mail from anyone who like to
: share some UK pirate radio stories.

I always had a romantic notion to work in pirate radio but never got around to it.

There is (or was) a CD released about 5 years ago... by Polygram?... that was a compilation of music and Radio London jingles. I received a promo disk in Singapore when I worked there in radio but-- drat!-- never bought a copy for myself. The inside sheet had quite a bit of info about the history of Radio London-- like that it never broadcast from a ship (that was Radio Caroline) but from one of the old WWII concrete gun towers that were placed out in the Channel to repel any German invasion... just beyond the old three-mile limit near the mouth of the Thames.

The only song I can recall from the disk was Bobby Goldsboro's 'Little Things', so you might want to cross reference through Phonolog or Schwann to see if the disk is still in print or even available in the US.

Btw, is Paul Harris any relation to Rick Harris? Rick was the original PD for Lazer Radio, another pirate that began broadcasting around 1982 from a ship in the North Sea. I also recall Jay Stone as having worked there as a PD or announcer before going on to program Radio Luxembourg (Jay went on to bigger and better things in Honolulu, including producing Glenn Medeiros' first album). I do not, however, know where either of these two individuals are at the moment. (If you find Rick, though, say 'hi' to him from a 'old WCVR relic'. We worked very briefly together at the same Vermont radio station just before he went to do Lazer.)

>

BZZZZZZZZT! I worked as a technician...OK, board op...at WFIL from
1973 to 1980, and in fact one of the first records I ever put on
the turntables after beginning work there was "Kodachrome".

Never once do I remember playing anything other than the 45RPM single
as pressed by Columbia Records for that song...."crap I learned" and all.
At the same time, the record company's edited single of Pink Floyd's
"Money" was played rather than the LP cut. And WFIL did play the
"funky kicks" version of Steve Miller Band's "Jet Airliner".

But never an edit on "Kodachrome". Now lemme just reach for that
"lurk" button again.....

What Rush called typical of liberals was the hypocrisy embodied in
the speech. The self-congratulatory attitude when all that really
counts in tinsel town is the bottom line.

Now, if you really want to skewer Rush, simply point out his stance
on this versus his stance on Clinton's call for businesses to be
more socially "responsible".

3206. San Diego Legend 'Shotgun' Tom Kelly signs off.

Newsgroup: rec.radio.broadcasting
Date: 1996-03-30 00:00:00 UTC
From: Roger Otterson <rogo@qualitec.wanet.com>
Message-ID: <4jip5g$kp7@vixen.cso.uiuc.edu>
Source record: 24328

It's Friday...

And I've just heard San Diego legend 'Shotgun' Tom Kelly end his last air shift at San Diego's long time TOP 40/Pop/Rocker/Oldies KCBQ (FM 105.3). The station has switched to the new format is set to move over to the 102.1 position Sunday night, under the calls of KXST 'Sets-FM'.

I was moved to hear 'Shotz' end his show with an emotional (he almost didn't get it out) tribute to the people who been through KCBQ over the last 40+ years. He acknowledged 'Happy Hair' Martin through to his current producer, but wanted to thank the listeners the most.

Many of us natives remember growing up with our transistors tuned to '1170-KCBQ' and arguing with our friends why it was better than 'Boss Radio 1-thirty-6 KGB'. Gary Kelly was there, so were Charlie and Harrigan. We saw country come and go, different packages of oldies, the standard promotions and the whacky stunts that only a station like KCBQ would do.

Shotgun ended his show recalling that he grew up listening to KCBQ in the 50's and 60's and how he eventually went to work there, left and came back. He usually ended his show with "Have no sorrow, be back tomorrow"...but he changed it to ..."Have a 'little' sorrow...there will be another tomorrow."

I know he'll be back on the air, at another spot on the dial, but here's to you Shotgun, the local boy made good and we're all a little better off for the times you've given us on (Heavy drum intro) ...KAY CEE BEEEEEE.....Q!

The following is from the CBS WWW site:

60 MINUTES LISTINGS FOR SUNDAY, MARCH 31, 1996

THE LETTER - Could there have been jury tampering in the O.J. Simpson trial? After months of investigation, a 60 MINUTES two-part segment reveals that an anonymous letter accusing a juror of intending to write a book -- which some say was the reason that juror was dismissed -- was almost certainly a fake. The dismissed juror's lawyer says it was the "jury tampering of the century." Steve Kroft reports. Howard Rosenberg is the producer.

IMUS - He had Washington seeing red last week when he insulted the President and First Lady to their faces at a dinner. The uproar is nothing new to radio "shock jock" Don Imus, who has been raising eyebrows and tempers on his radio show for over twenty years. Mike Wallace profiles the man who many say went over the line. Tom Anderson is the producer.

Recently retired from day to day contract engineering, I have a
Tektronix 2710 spectrum analyzer for sale.

This unit is perfect for AM and FM RF Proofs. It will read from 10kHz
to 1.8 GHz. It has the additional 300Hz resolution bandwidth option
for making AM NRSC measurments.

It also has a printer port for direct printing to any Epson compatible
printer.

Was $11,000 new. Will sell for $7,000.

e-mail to:

kharnack@aol.com

or call me at:

214-620-2211, ext. 117

Bill Pfeiffer did a fine job of summarizing the happenings in Springfield, MO. radio.

However, might I make a few additions and clarifications.

KZPD, Ash Grove, sold to Jerry Evans of San Diego. He moved here a couple of weeks ago, and took possession about 3/20/96. He immediately removed the "Gentle Beat" format aired by the previous owner, Len Smith. Smith did indeed own the CD's, but it wasn't quite as dramatic as presented. Evans wanted to get his own format on the air as quickly as possible, to distinguish himself from the previous owner.

I was there as the change was made. The station uses a TM Century UDS system with a Computer Concepts DCS for commercial playback. As many of you know who use UDS with Pioneer players, changing music is a nightmare. And, so it was.

Especially when the phone began to ring. Smith's small, but very vocal listenership rang the phones for many hours, upset that "their" station had been compromised. In my opinion, it demonstrates that there is room in Springfield for a low-budget nostalgia station on FM.

Smith didn't want to sell. However, his financial backers, all family members, wanted to cash in their chips. They were hoping for fast financial rewards from radio, and when that wasn't forthcoming, they wanted out.

I keep telling Len he should take his format concept to Branson Music Network, or someone else, who would syndicate it. But, Len is still licking his wounds, and isn't ready to consider that at this time.

And, the reported purchase price of 900K is a little inflated. I'd say it closer to 400K, and most of that is already spoken for by Smith's financial backers. He's mostly definitely not getting rich on the deal.

Art Morris

[Moderator's Note: Thanks, Art, for the clarification. My info was, as stated in my report, from a contact in the market, and I have since been in touch with Jerry and planned to correct my errors. Now I don't have to because you have taken care of it for me <g>. I wish Jerry a lot of success, although I will miss Len's mix of jazz and adult standards. Bill]

3211. Re: DXing with SRF-42 AM Stereo Walkman

: > ary slaves would like one too...

: I've seen it in J&R Music World's catalog. 1-800-221-8180

Radio Shack is currently offering the SRF-42 in their main annual catalogue for $29.95.

Any Sony dealer should be able to special-order the radio, if they don't have it already. It retails for something like $39.95 that way. That's how I got mine... :)

I do have a few questions/requests:

1: I'm not good with electronic/electrical work/construction, but I need to ask this: The radio is DC only, no adaptor connection- How may I connect a removable dummy-battery/DC power (3V) assembly, so I could run it off the AC instead of going through batteries (I'm using NiCads right now)?

2: I'm interested in obtaining technical specs/data on all known modes of AM stereo, including all the now-defunct modes... (I know the Motorola C-QUAM format is now the official standard, but I'd still like info on all the other formats...)

3: Along the lines of #2, are there any schematics available for the electronics hobbyist pertaining to AM stereo? (I know what I said in #1, but I don't want to risk *damaging* the radio!)

4: Is there any way to get a database of worldwide AM stereo stations?

5: Is there anyone else who wants to talk AM stereo with me, maybe swap tapes? (My preferred medium is VHS HiFi, but I can do audio tapes... And no, there are no AM stereo stations local to me- I regularly listen to KBOI 670 in Boise, ID, some 600 miles away from me... Great oldies and some newer stuff... :))

6: Anybody wanna set up an AM stereo WWW page? ;)

....Quozl!
(Life's good with a Sony SRF-42 AM-Stereo and a Select-A-Tenna to pull 'em in...)

>
>The question: Can Sebastian (WZMX 93.7 FM, 70's station) survive??
>
>- V
>
>

Having never gotten any closer to the inside of the radio biz
than picking up a prize package at a station I've always been
curious about the economics of radio. I know Howard Stern is
a dominant force in most of the markets he has entered which
considering his 'household name celebrity' status is surprisingly
small. Does anyone in the know why Stern's roster of stations
pales compared to other much less successful syndicated talents?
Best I could surmise was that Infinity was asking outrageous fees or
the threats of big FCC fines and moral majority type community groups
scared stations off. But when I saw the above post concerning Hartford
I became more puzzled. The 300,000/year syndication fee seems
cheap to me for such huge potential. Doesn't Hartford have around
500,000 people and wouldn't that make it a Top 50 market? Hartford
stations must reach into Boston and other Eastern seabord big cities.
So if you could run the Stern show for 6,000 grand a week with only some
cheap and probably stoned employee on hand wouldn't this be a no-brainer?
What would be the cost to a station to produce their own 41/2 hour morning
show? If you're after decent ratings wouldn't a morning man in a market like
Hartford cost 100.000 plus? Add in a decent producer and it seems to me
that Stern or for that matter a Don Imus seems like the less risky and more
economical way to go. If anyone who has some dope on the way radio
works could shed some light on this situation I think a lot of us non-radio
types would be fascinated.

Thanks,

Beans Baxter

From: shadowcat5@aol.com
Message-ID: <4jip5m$kpg@vixen.cso.uiuc.edu>
Source record: 24335

Well, this isn't exactly accurate.

The Hartford Courant reported on March 26, 1996 that Stern is indeed coming to Hartford to WCCC-FM 106.9. Unsure if at this time he will be simulcast to WCCC-AM 1290, which just changed formats from simulcasting the FM to all sports. His first broadcast will be May 6. Mel and Frank are being cancelled, with their last show being April 5, 1996. No one has said what's going to happen between April 5 and May 6 --- probably a fill in jock.

And WZMX won't be the only station to lose listeners. But I think they'll be able to hold their own.

Melissa

: what he means.

: Welcome aboard!

And don't we know it here in the Twin Cities. WCCO-AM AFTRA members have voted to strike at 12:01 a.m. Monday unless a new contract can be agreed upon.

>I looking for an old (1930's) Western Electric 1kw am
> 2 cabinet transmitter.

I know where one is, you might see it, but I don't think you will be able to buy it. The transmitter is a 1930 Western Electric 1 KW with the dynamotor power supplies. It sits at amateur station W5YD, the club station of MIssissippi State University and I wouldn't think the university will let it go. It also has been converted to 80 meter phone. It ran in the early 80's when I was a student there. The transmitter was the original 1 KW transmitter for WREC in Memphis, TN and was donated to the school by the man who put WREC on the air, Hoyt Wooten. Mr. Wooten graduated from Mississippi State in 1917 with a degree in electrical engineering. BTW *GO BULLDOGS IN THE FINAL FOUR*!

WHK, here in Cleveland, has one still in the transmitter building (at
least it was there when I was CE a few years ago) which is not (of course)
functioning and has not been used for years.

My guess is they would welcome you coming to clear it out of there. (More
room for old contest entry forms, etc...)

Current CE is Barry Thomas. Good luck!

3218. WUBE-AM 1230 -- Retro Radio

Newsgroup: rec.radio.broadcasting
Date: 1996-03-30 00:00:00 UTC
From: KFXZ10A@prodigy.com
Message-ID: <4jip5r$kpl@vixen.cso.uiuc.edu>
Source record: 24340

A new format debuted on WUBE-AM 1230 in Cincinnati on Wednesday. The station calls it "Retro Radio, standards for a new generation". The format features non-rock "standards" music by artists such as Sting, Elton John, Barry Manilow, Linda Ronstadt, Robert Palmer, Tony Bennett, Frank Sinatra, Natalie Cole, Harry Connick Jr., Eric Clapton, Carly Simon, and George Benson. The format is intended to bridge the gap between adult standards WSAI-AM 1530 and smooth jazz WVAE-FM 94.9. The station plans to syndicate the format. This is the first I have heard of this format. Does it exist elsewhere?

Chancellor's transition of the all-sports format from WUBE-AM to its sister station WKYN-AM 1160 is now complete. Chancellor also owns country stations WUBE-FM 105.1 ("B-105") and WYGY-FM 96.5 ("Young Country Y96").

Some people have requested a FAQ for this newsgroup/mailing list.
Here is what I have so far. It is *not* by any means complete, but it
should help explain who we are and how we do business around here.

I have not numbered the Q's and A's because I am not yet sure what
order they will ultimately be placed in. Comments and suggestions are
welcomed.

William Pfeiffer
Moderator: rec.radio.broadcasting/AIRWAVES RADIO JOURNAL

============= Begin RRB/AIRWAVES FAQ v0.1b =============

) What is rec.radio.broadcasting?
) What is AIRWAVES?
) Who can join in?
) How Do I Post an Article?
) What is appropriate to talk about?
) What is NOT appropriate to talk about?
) Commercial Postings
) What about signature files?
) Web
) What does 'minimal moderation' mean?
) What about Real Names?
) RadioWatchers

)Q What is rec.radio.broadcasting and AIRWAVES?

A: AIRWAVES (AIRWAVES Radio Journal) is an email-based cyberzine dedicated
to friendly, professional-level discussions about the art, business
and science of domestic broadcast radio. By 'domestic' we speak of
radio which is designed to be received in the same nation from
which it originates. It should not be taken to mean USA or
North America exclusively. Although most posts seem to be from North
America, this is probably due to connectivity ratios and is not due to any
group policy to exclude any nation. In fact we encourage other
nations to post here.

REC.RADIO.BROADCASTING is the Usenet Newsgroup that reflects
virtually all of the same articles that are carried in AIRWAVES.
Netnews may be easier to use, because each article is threaded
and available one-at-a-time. However netnews may not be as
reliable as email on your site, since many sites are forced to

'expire' (delete) articles after a day or three due to disk space constraints. If you have a 'fast expire' time on your news server, consider the following...

AIRWAVES ONLINE is a world wide web site that allows you to view and post to both groups from your web browser. Articles may be sorted by subject, author, thread or date. You click on the article in the index, and you read it. All URL's and email addresses are live hyperlinks, so you can immediately click on an interesting site and visit, then return to the AIRWAVES ONLINE menu. Expire time on this spool is about 30 days (more or less). The URL is...

http://radio.aiss.uiuc.edu/~rrb/online.html

AIRWAVES-SELECT is a 'headline news' version of AIRWAVES that includes only 'news and information' postings and *not* the discussion threads. It is designed for those who want to keep up with the news of the day without all the discussion.

) Q: Who can join in?

A: Since this is a public forum, it is not limited to radio professionals. We strive to maintain a friendly, information-rich, environment where radio professionals, para-professionals, ex-professionals, future professionals and serious non-pros can share a cup of virtual coffee and chat about their favorite subject... radio. Generally we come pretty close to that goal. We're an eclectic mix.

From the heads of major networks to someone getting advice on how to create her first aircheck, AIRWAVES/is there. We've located lost colleagues, assisted people seeking employment, helped engineers in finding an obscure part, and served as a great party line linking up radio-oriented people from all over the globe.

) Q: How Do I Post an Article?

A: You can post to rec.radio.broadcasting via your Usenet News software, or you can send articles directly via email. Posts to rec.radio.broadcasting will run in AIRWAVES and may be selected to run in AIRWAVES-SELECT, if they are deemed to be newsworthy. The email address for posting is 'articles@airwaves.com' (without the quotes). You can also post via your web browser, while reading AIRWAVES-ONLINE at http://radio.aiss.uiuc.edu/~rrb/online.html.

) Q: What is appropriate to discuss?

A: Basically, if it has to do with domestic broadcast radio, is not brain-dead, is not a flame, and has something of interest to offer, it's fine. What do we talk about? Well, let's see... formats, marketing, acquisitions, mergers, DXing consulting, regulation, de-regulation, programming, automation,

micro-radio, satellite, engineering, dxing, duopoly..... We mourned
Wolfman's passing, discuss radio's past and debate radio's future.
We have brainstorms, rants, questions of all varieties (and
people to actually answer them), breaking stories, war
stories, and 'tall tales'. The coffee is always hot and someone
knows the answer to your question.

) Q: What is not appropriate for posting?

A: === Check Flame Throwers At The Door ===

There is no productive end to calling names and insulting the next person.
We define a flame as personal insult or ridicule. It is always OK to
disagree with anyone's opinion, just as long as you attack only her
opinion and not her, personally. Nothing destroys a group faster than
a nuclear flame war. This is, perhaps, the biggest part of what is
meant by 'professional-level'. In short, basic human and professional
respect. Let us disagree when we must, but let us remain as
gentlemen and women as we do so.

=== Excessive Quoting ===

Please trim excess quoted text from your postings. It makes your
post much more readable and does not clog the digest with the same
quoted text as the thread progresses. Only use the amount of quoted
text that you need to make your points. Never quote entire articles
unless absolutely required. Keep the original text to 'more than
half' of the overall post.

=== Use Your Brain ===

Last but not least, we cannot stress enough that AIRWAVES/rrb is not
the place for fandom and flamedom posts about Howard Stern,
Rush Limbaugh or whatever. Certainly these high-profile hosts are
not off-limits, but let's try to limit the discussions to how they
relate to broadcasting. Most of these hosts have their own fandom
groups for those *other* in-depth discussions :-).

=== On Topic ===

Please keep your discussions on topic. We are a professional-level
forum for and about radio broadcasting. We appreciate it if posters
do not stray too far from that arena. There are many other forums for
discussing matters pertaining to television, music, scanner, ham, and
other related topics. Keeping the group focused makes it easier and
more productive for those who need and want this information.

Please remember that the vast majority of the readers are
intelligent professional (wo)men who seek similarly minded
posts. In short, please try to keep the brain-to-B.S. level as
high as possible.

) Q: What about commercial postings?

A: As the Internet moves from research tool to commercial communications medium, we see more and more commercial uses coming into being. Response to this change has been mixed between those who would like to keep the net commercial-free and those who would like to exploit the potential market that the net has created.

Since the core of AIRWAVES/r.r.b is radio broadcasting, a mostly commercial enterprise, it makes sense that there will be those who wish to promote their product or service here. At the same time, there are many who find commercially motivated posts to be offensive. So we have had to come up with a basic guidelines related to such posts. A year ago this issue was brought to the group for a straw poll. The following guidelines are the upshot of that poll...

a) Blatant commercial postings and spams will not be accepted. A 'Spam' is a posting sent to many, mostly unrelated, newsgroups and/or mailinglists for some sort of product or service. Most turn out to be a scam. A 'Blatant' commercial post is a post that is merely a sales piece containing no other topical material (as opposed to someone who happens to mention their company in conversation), or a blatant sales piece that has some 'thin veneer' of topical material, but is clearly there for the sales, not the conversation.

b) We generally do not include posts that promote a commercial online service or one that requires a subscription to a specific online service to access. All net resources must be accessible via the open Internet, if you want them posted here.

c) We gladly post pointers to broadcast-related web pages or other net resources, provided these are non-commercial in nature and do not require the payment of fees for access to the majority of services offered. If you post an article pointing to a page whose primary function is to sell something, even if it is free to access, we require that you include information in the post indicating that fact, and identifying any affiliation you may have with the service. At that point the moderator will access the page and check it out. In other words, if you want to promote something on your page, be up-front about it in your posting.

d) We generally allow individuals offering personal, radio-related, items for sale, provided they state in the post that they are selling personal items (this includes a station selling some surplus stuff) and are not vendors attempting to 'curbside' merchandise (curbsiding refers to the practice of used car dealers selling vehicles, off the lot, as if they were privately owned).

e) Anyone engaged in any business, who posts to this group about products or services which their business deals with, must disclose their affiliations. Even if they are not official spokespersons for that business. We give priority to entrapeneurs or others engaged in smaller, cottage industries trying to gain exposure. We support the American dream, but wish to balance the desires of those in

business to promote their product with a desire *not* to have AIRWAVES/RRB become a world-wide billboard for everyone wanting free, global advertising.

f) AIRWAVES can provide web space for commercial enterprises. For more info, write to 'webmaster@airwaves.com'. Our web sites get upwards of 20,000 hits per month. Pretty good for a single-purpose page.

) Q: What about signature files.

) A: Try to keep signatures to 4 or 5 lines, and keep overt advertising hype at a minimum. Mentioning your company affiliation is fine (in fact encouraged) but leave it at that (along with an email and/or web address if you like).

Joe Fu - President and CEO
FuBar Media Consulting
fu@fu.bar
http://fu.bar/~fu

) Q: What about the web site?

) A: AIRWAVES operates a fairly extensive web site for radio and broadcasters, fans and others interested. We have a search engine online that allows one to look us USA and Canadian station from the FCC's public database, a job search database and a bunch of links to interesting sites around the world. Plus you can access the AIRWAVES archive site where all our cyberzines are kept. The URL is http://radio.aiss.uiuc.edu/~rrb/ .

) Q: What is minimal moderation?

) A: It means that my policy on moderation is to 'err on the side of permissiveness'. In other words if there is doubt, I usually post anyway. I never kill a post because I disagree with the poster's comments or political position. I try to always reply to the few posts which are excluded and offer a reason why and the chance to re-submit. I post something over 90% of everything I get. Most of the remaining 10% are junk mail, tests, misdirected posts and spams.

Occasionally someone will write me and thank me for the quality of this group. I am *quick* to point out that I am responsible for all of the stuff you *DON'T* see... it is the fine caliber of posters who are to be thanked for what you *DO* see on this group. My mission is to keep the group at a high Brain-to-BS ratio without unduly restricting the free flow of information. I am accessible via email for all administrative matters and answer all reasonably-stated questions and concerns. My email address is bill@airwaves.com.

) Q: What about this "Real Names" policy?

) A: A few years ago, when a certain commercial online service (You know the one) allowed email and news to and from the Internet, there

was an outbreak of posts from nondescript CB-like 'handles' or cryptic alpha-numeric strings. Barry Mishkind suggested that for the sake of clarity and professionalism, that posters be required to use a 'real name' on all posts (Barry Mishkind is the moderator of the FIDO 'BROADCAST' echo and its companion Internet email digest).

So our group took a straw poll on whether to require real names. The results boiled down to a strong *yes*, but to allow for appropriate exceptions. Those exceptions allow the use *current* air names (along with station calls), and to allow late-breaking news by people close to the source, by requesting that their name be withheld from the group (I must know who it is, though) Also reasonable exceptions will be made for people asking simple one shot questions, etc.

Today with matters of copyright being raised in reference to the net, this policy is even more important. With the exceptions noted above, if you cannot sign your name to it, do you really need to post it? Anyone quoting a copyrighted source must also state that they are posting "with permission" and give full credit to the source.

=== If you are in business ===

Anyone who posts about a product or service that they are personally involved in, is required to, not only post a real name, but a line beneath it disclosing the involvement.

=== What happened to 'so-and-so' ===

Anyone posting "Where is so-and-so"..... must "definitely" use a real name and include a reason for wanting to know. Poster also is strongly encouraged to leave alternate means of contact other than email (phone number preferred). We are not trying to discourage such posts, only to make some attempt to protect people from inappropriate requests for information.

) Q: What is this RadioWatchers thing I see?

A: AIRWAVES/RRB operates a program called RadioWatchers. RadioWatchers are individuals who are either active in the radio broadcasting industry, or are very much involved in the happenings around their town/city/community and would like to become recognized as a "RadioWatcher" for AIRWAVES. RadioWatchers keep a watchful eye and ear out in their market and post periodic "RadioWatcher Reports" to the group. We have several top-notch RadioWatchers and are always looking for more individuals who would like their market assessments to be read globally. RadioWatchers are given priority placement in AIRWAVES and many report that their activities have gained them much favorable publicity and recognition. All market sizes welcome. Write me (bill@airwaves.com) for more details.

3221. ADMINISTRIVIA: Quoted Text in Posts

Newsgroup: rec.radio.broadcasting
Date: 1996-03-30 00:00:00 UTC
From: AIRWAVES MEDIA <rrb@clm.aiss.uiuc.edu>
Message-ID: <4jip4k$knt@vixen.cso.uiuc.edu>
Source record: 24495

Hello all:

I need, once again, to remind the group that it is very important when posting followups, that you edit out the majority of your quoted text from the original article.

I know it takes an extra few keystrokes and half a minute, but it makes your article much more readable and gives a break to digest readers who must scroll past all of that quoted text to get to whatever it is you are adding to the discussion.

Usenet conventions state that you should have 49% (or less) quoted text to 51% (or more) original text. Please, when following up, adhere to this rule. Whenever possible, edit quoted text to *no more than absolutely necessary* to give context to your point(s).

Conversely, some posters will post with *no* quoted text, and will offer no context of their own. Posts like this are very hard to relate to because they assume quoted text when none is present. If your news software doesn't allow quoted text, be sure to offer context on your own so that readers will understand what you are talking about in relation to the thread.

Also, *NEVER* quote a posters signature file in your follow-up, unless you are specifically commenting on the content of that signature.

Thanks, all, for adhering to these simple guidelines. They make your post more readable and my job much easier. I have edited some of the over-quoted posts, but I cannot keep doing that because of time limitations. I appreciate your understanding..

Greetings, Airwavers! From the Nation's Capital, where we're still digging out from
Imus' class-less appearance at the Radio/TV Correspondent's Dinner...<heehee>
...here's the top of the radio biz news for the week!

Item First -- The Imus Aftermath -- Elsewhere on
Airwaves/rec.radio.broadcasting, you've likely heard about what big Don said in front of the assembled at the Congressional Radio TV Correspondents Dinner. The Washington Post "On the Dial" (radio) column says that Imus will be re-broadcasting his entire speech on his morning syndicated radio show (originating from WFAN-AM / NY, and heard on all-sports WTEM-AM [570] here in D.C.) on Thursday, the 28th...and will be the subject of a longer profile this Sunday on CBS-TVs' "60 Minutes".

Item Second -- Welcome to the club... -- The Post reports that Georgia Foy, whose last port of call was mornings and afternoons at KJMZ in Dallas, is joining the syndicated morning show of Donnie Simpson at Infinity's WPGC-FM (95.5).
Foy is expected to specialize in entertainment reporting for the urban contemporary station.

Item Third -- On the air... -- Following in the path of other Radio Watchers who have done up a breakdown of stations in their markets, here is a table of D.C. metro stations, their frequencies, formats, and network affiliations/promotional slogan/city of licence (where applicable) according to the Washington Post:

AM STATIONS:

570 WTEM Sports
630 WMAL News/Talk (ABC) (ABC O&O)
730 WBZS BusinessNews (Bloomberg) (licenced to Woodbridge/Alex.
Va.)
780 WABS Contemporary Christian (licenced to Arlington, Va.)
820 WQSI Country (licenced to Fredrick, Md.)
900 WILC Contemporary Latin
930 WFMD Adult Contemporary/Talk (licenced to Fredrick, Md.)
950 WCTN Christian (licenced to Cabin John, Md.)
980 WWRC Talk
1030 WNTL Ethnic/International (dark?)
1050 WKDL Children's/RadioZone (Radio Aahs)
1120 WUST Multi-cultural/various
1150 WMET Business/Financial news (licenced to Gaithersburg, Md.)
1220 WFAX Inspirational/Christian (licenced to Fairfax/Falls Church, Va.)
1260 WWDC Big Band/MOR (satellite)
1300 WJFK Talk / Jazz (licenced to Baltimore, Md.)

1310 WDCT Inspirational / Christian Talk (licenced to Fairfax, Va.)
1340 WYCB Inspirational
1390 WMZQ Country (licenced to Arlington, Va.)
1450 WOL Soul / Talk
1460 WKDV Children's / Radio Zone (Radio Aahs) (Manassas, Va. licence)
1480 WPWC Country/Bluegrass (licenced to a Northern Va. suburb)
1500 WTOP News / Sports (CBS)
1540 WMDO Latin Music / News (licenced to Wheaton, Md.)
1560 WMOM MOR/AC (licenced to LaPlata, Md.)
1580 WPGC Rap/Latin ("Flava 1580")
1600 WINX Oldies/Local Sports (licenced to Rockville, Md.)

FM STATIONS

88.1 WMUC Progressive (Univ. of Md.) (licenced to College Park, Md.)
88.5 WAMU News/Talk/Bluegrass (NPR) (American Univ.)
89.3 WPFW Jazz / Talk / News (Pacifica)
90.1 WDCU Jazz / Talk / Gospel (Univ. of D.C.)
90.9 WETA Classical / News (NPR)
91.9 WGTS Classical / Inspirational (licenced to Takoma Park, Md.)
92.7 WMJS Easy Listening
93.9 WKYS Urban Contemporary
94.7 WARW Classic Rock ("Arrow 94.7") (CBS O&O)
95.5 WPGC Urban Contemporary / Top 40
96.3 WHUR Urban Adult Contemporary (Howard Univ.)
97.1 WASH Adult Contemporary
98.7 WMZQ Country
99.1 WHFS Modern Rock / Alternative (licenced to Annapolis, Md.)
99.5 WEBR Adult Contemporary ("Bright 99.5")
99.9 WFRE Country (licenced to Fredrick, Md.)
100.3 WBIG 50s-60s Oldies
101.1 WWDC Modern Rock / Alternative ("DC101")
102.3 WMMJ Soul/Adult Contemporary (licenced to Bethesda, Md.)
103.5 WGMS Classical (Mutual)
103.9 WXVR 70s Oldies ("XTRA-104") (licenced to Braddock Hts./Fredrick,
Md.)
104.1 WXTR 70s Oldies ("XTRA-104") (licenced to Waldorf, Md.)
105.1 WAVA Christian Talk (licenced to Arlington, Va.)
105.9 WJZW Smooth Jazz (licenced to Woodbridge, Va.)
106.7 WJFK Talk / Jazz (licenced to Manassas, Va.)
107.3 WRQX Adult contemporary ("Mix 107.3") (ABC O&O)
107.7 WRCY Modern Country ("Thunder 107.7") (licenced to Warrenton, Va.)

That's it for this week...

Cheers,

From: fybush@world.std.com
Message-ID: <4jip4l$knv@vixen.cso.uiuc.edu>
Source record: 24497

*Not much to report this time, except that WDIS 1170 in Norfolk MA has returned to the airwaves. The station is still running a talk format.

*On the construction-permit front, WFFF-TV 44 in Burlington VT has been granted permission to move its transmitter. The transmitter for the not-yet-on-air station was to have been in New York state. Now it will join the market's other UHFs, WVNY 22 and WETK 33, atop Mount Mansfield, Vermont's highest point.

*The FCC's latest expanded-band plan does little for New England. The last plan had just one New England station moving, WNSW 1200 Brewer (Bangor), Maine. The new plan has just one New England station moving, WZNN 930 Rochester NH, to 170 Just over the New England line, WTRY 980 Troy NY would still move, to 1640. Oddly, WESO 970 Southbridge MA placed very high on the FCC's list of stations qualified to move (they were 21st), yet the station did not receive an expanded-band allocation.

*Now that Infinity has purchased WBOS 92.9 Brookline-Boston, the station is undergoing a subtle shift away from AAA. The new tagline is "Rock of the 80s and 90s," and a new series of TV ads contrast 'BOS with the stations that play "Hard Rock" (presumably a stab at WAAF) and "Old Rock" (apparently a stab at Infinity stablemate WZLX). We shall see whether this month's format can succeed at this notoriously underperforming station.

*An interesting translator application: Saga Communications has applied for a translator of its soft-rock WZID 95.7 Manchester, some 45 miles away in Laconia NH. The requested frequency is 96.5, the same spot on the dial where WAEF in Bedford NH (adjacent to Manchester) is expected to sign on this spring. WZID wouldn't be trying to squeeze out a competitor, now would they? Naaaahh....

3224. HELP WANTED: Sales Position

Newsgroup: rec.radio.broadcasting
Date: 1996-03-30 00:00:00 UTC
From: donnellbj@crd.GE.COM
Message-ID: <4jip4m$ko0@vixen.cso.uiuc.edu>
Source record: 24498

New North Country (95.9FM) in Glens Falls, NY, is in need of a full-time salesperson. Must be motivated, experienced and a team player. Contact Tom Jacobs at 518-793-4446 preferably before noon EST.

Barbara

3225. Real Church Bulletin Anouncements

Newsgroup: rec.radio.broadcasting
Date: 1996-03-30 00:00:00 UTC
From: GBREFINI@aol.com
Message-ID: <4jip4n$ko1@vixen.cso.uiuc.edu>
Source record: 24499

Reply-To: radioprep@halcyon.com

[Moderator's Note: The following article was lifted from Brian Gregory's "Radioprep" mailing list and I felt it was good for a hoot. Sire this stuff is old as the hills but it still is cute. Bill]

Hi All!
Jay Leno has his 'Dumb Ads'. You know those wacky worded real ads. Well, from church bulletins we got a list for you in that same gendre. Enjoy. Bless you! Now pass the hat.....

These are ACTUAL announcements from ACTUAL church bulletins:

1. Don't let worry kill you - let the church help.
2.Thursday night - potluck supper. Prayer and medication to follow.
3.Remember in prayer the many who are sick of our church and community
4. For those of you that have children and don't know it we have a nursery downstairs.
5. The rosebud on the altar this morning is to announce the birth of David Allen Belzer, the sin of Rev. and Mrs. Julius Belzer.
6. This afternoon there will be a meeting in the south and north ends of the church. Children will be baptized at both ends.
7. Tuesday at 4:00 PM there will be an icecream social. All ladies giving milk will please come early.
8. Wednesday the ladies' liturgy will meet. Mrs. Johnson will sing "put me in my little bed " accompanied by the pastor.
9. Thursday at 5:00 PM there will be a meeting of the Little Mothers Club. All ladies wishing to be "Little Mothers" will meet in the Pastor in his study.
10. This being Easter Sunday, we will ask Mrs. Lewis to come forward and lay an egg on the altar.
11. The service will close with "Little Drops of Water" One of the ladies will start quietly and the rest of the congregation will join in.
12. Next Sunday a special collection will be taken to defray the cost of a new carpet. All those wishing to do something on the new carpet will come forward and do so.
13. The ladies of the church will cast off clothing of every kind . They can be seen in the church basement Saturday.
14. A been supper will be held on tuesday evening in the church hall. Music will follow.
15. At the evening service tonight,the sermon topic will be "What is Hell?" Come early and listen to our choir practice.
16. The preacher will preach his farewell message,after which the choir will sing "Break Forth With Joy"

17. Today...Christian Youth Fellowship House Sexuality Course,8p.m.
Please park in the rear parking lots for this activity.
18. During the absence of our pastor, we enjoyed the privilege of
hearing a good sermon when A.B. Doe supplied our pulpit.
19. The Rev. Adams spoke briefly , much to the delight of his
audience.
20. The church is glad to have with us today as our quest minister the
Rev. Shirley Green who has Mrs. Green with him . After the service we
request that all remain in the sanctuary for the Hanging of the
Greens.
21. The 'eighth graders' will be presenting Shakespeare's "Hamlet" in
the church basement on Friday at 7:00 p.m. The congregation is invited
to attend this tragedy.

Frequently Asked Questions (FAQ) File for OTR
Old-Time Radio
(FAQ edited and copyrighted by Lou Genco (lgenco@old-time.com))

Last Modified: Wed 04-17-1996
---------------------

Copies of this FAQ are distributed monthly to rec.answers,
rec.radio.info, rec.broadcasting, rec.antiques.radio+phono and other
newsgroups; and are on file at bloom-picayune.mit.edu in the file:
/pub/usenet-by-group/news.answers/radio/old-time-faq.

(This file is best viewed with a NONproportional font)
---------------------

Table of contents:

Q1. What is "OTR"?
Q2. You haven't mentioned OTR music, why not?
Q3. Where can I buy recordings of old radio shows?
Q4. Which vendors have (lower prices) (higher quality) (faster
response)?
Q5. Are OTR shows rebroadcast? If so, where and when?
Q6. I remember a great show called (x). When was it aired?
Q7. Are there any books about OTR?
Q8. Does anybody trade tapes of OTR shows?
Q9. What's this stuff about Copyright?
Q10. How can I get my local radio station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
Q16. Is there a World Wide Web page (URL) or FTP address that I can
access for more info?
Q17. Is there an email newsletter on OTR? How do I subscribe to it?
```

Q18. Can I get archived copies of old issues of the OTR Digest?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your site?
Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?
Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1960's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band. There is also an Old Time Music on the Radio WWW page (apparently for Bluegrass music).

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from my OTR WWW site.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR Digest to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at http://www.old-time.com.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of

sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at http://www.old-time.com

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the new National Radio Club's _AM Radio Log, 16th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at +1 615 865 1525 voice, or +1 615 865-2598 fax. The address is M Street Corp., P.O.Box 1479 Madison, TN 37116-1479 Price is $44.95 plus S&H

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR Digest, or look through the program databases (WWW or FTP). Also see answer A14 below. Please do NOT send requests to -me- to name or find specific programs for you.

Q7. Are there any books about OTR?

A7. Yes, there are many books related to OTR. See my WWW page or for a list of some of them.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR Digest. My WWW page has a database of private traders as well. Leave a note in the OTR Digest if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights have been renewed. Examples of the latter include The Shadow (Conde Nast) and some of Arch Oboler's productions. See my WWW site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Local stations may be able to redistribute OTR available via satellite downlink. Ask the station managers to check with either:

Collectors Radio Network (The Radio Vault)
1-800-739-7900

Yesterday USA (YUSA)
(214) 690-3636
YUSAOTR@aol.com

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit

runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping.

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo. If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible difference. Other audio optimization features are of negligible value for OTR. Dolby HX also requires no playback decoder.

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and leave a note in the OTR Digest asking about local clubs for your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?

A14. Some of the OTR Digest subscribers have contributed Program Logs for several well-known series. The logs are available at my WWW site. While you are there, check the "Humongous OTR Database" (a database of contributed catalogs and libraries, which will eventually contain most of the readily-available programs for popular OTR series). At present, the database exceeds 90,000 records, and is searchable with your WWW browser.

The "logs and publications" entry in my WWW page gives names and addresses of several vendors of these items. (Thanks to RadioJoe5@aol.com (Joe Coleman)). There is also a table of logs and log sources at http://www.old-time.com

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 95). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR Digest for inclusion in one of our databases.

Jim Widner and others have contributed some synopses / introductions to various programs. They are on file at his site (http://otr.com) and mine.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more information?

A16. Yes, there are several WWW sites, as well as FTP sites and a Gopher. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start, since the major OTR WWW pages have links or pointers to each other. If you learn of any others, I'd

appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.old-time.com

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: pub/AIRWAVES/OTR

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Yes. The Internet OTR Digest is a freely available electronic newsletter, mailed every night to subscribers. Traffic has increased considerably, and the digest is usually mailed more than once a day!

To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR Digest?

A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible via:

FTP: radio.aiss.uiuc.edu (directory /pub/AIRWAVES/OTR/)
GOPHER radio.aiss.uiuc.edu 7070 (select OTR)
Web http://radio.aiss.uiuc.edu/~airwaves/history.html#archive

Readers with a WWW browser can access a "smart" archive program. This program can sort and display old OTR articles by author, subject, thread or date submitted. Just the thing to use when you want to catch up on a discussion thread, without plowing through a lot of extraneous material. To access this service, point your browser at: http://radio.aiss.uiuc.edu/~rrb/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the takeup reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines,

Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibilty with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the

head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

From: ErikS74342@aol.com

I'm using a brand-new dubbing Sony deck that has given me terrific results over the last three months. (Sony TC-WR565, about $200 at Circuit City). It's a dual-motor model, with precise LED volume meters and tape counters. It is one step below Sony's best dubbing deck, which offered few additional features for an additional $70. I wouldn't recommend Sony's entry-level models, which skimp on the details. This deck automatically encodes tapes with Dolby HX.

This particular deck comes with a pitch control that can be used to correct pitch problems with master tapes -- a godsend when working with too-fast reel-to-reel source copies. (Sony also offers the TC-WR465, without the pitch control, for about $20 less. Believe me, it's worth the price.)

To reset volume levels and correct other deficiencies with master tapes -- yes, you need a second cassette deck and a graphic equalizer.

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO <click> TWO <click> TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a

high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake the tape and immediately make a copy. But if you forget to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. A pointer to his FAQ may also be found at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m)
- Focusses on radios, phonos, and related materials made before the 60s
- Avoids "ham" radio gear (the Boat Anchors group covers that)
- Has a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast Pioneers' Library". This is an excellent resource for the serious / professional researcher. It can be accessed through my WWW site, or directly via the URL:
http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware resources may also be found at http://www.old-time.com

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR

programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios. A SuperRadio FAQ is available via http://www.old-time.com

David Moisan maintains a text FAQ for the GE Super Radio at
ftp://ftp.shore.net/members/dmoisan/faqs/gesr_faq.txt
he also has a hypertext formatted FAQ at
http://www.shore.net/~dmoisan/faqs/superradio/gesr_faq.html

-Some- readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran plans with dimensions and number of turns, etc to build one of these antennas. I have built several and I'm no mechanic. If you (or anyone else reading this) would like a copy of the article and plans, drop me a stamped, self-addressed envelope:

Dan Hughes
WPCD, Parkland College
2400 West Bradley Ave
Champaign IL 61821

If you are interested in AM Broadcast Band reception, and technical artlcles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at http://www.old-time.com):

Atlanta Radio Theatre Company: http://www.webamerica.com/artc
ZBS Media http://www.zbs.org/zbs.html
LodesTone Productions
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop?
http://www.thoughtport.com/tpa/non/mrtw

There is also a mailing list for folks interested in current
radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at
your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file
for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers.
To get the latest edition, send e-mail to one of the addresses below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:
send usenet/news.answers/internet-services/access-via-email

To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
Enter only this line in the BODY of the note:
send lis-iis e-access-inet.txt

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at
MIT, and is available from the MIT mailserver. For more info on
how to get files by email from MIT, send a message
TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

I have also initiated a simplistic fileserver. At present, it can
handle only a few files (stations.otr, otr.faq, help). If you
have ONLY email access to the Internet, and wish one of these
files, send an email
To: files@old-time.com
Subject: send filename

where filename is one of: stations.otr, otr.faq, help
do NOT use brackets or quotes
do NOT put anything in the body of the message (it won't be
read)

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where
can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained
to OTR topics. Folks interested in early TV shows might be
interested in this note from Kathy O'Connell
(oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman named Linda has just started a list devoted to 50's-60's Television. You can contact her at LEEKNIGHTS@delphi.com I signed on immediately, and it's a wonderful place to meet other people interested in this subject. Very much like the OTR list, but for television!!!

Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

A26. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Many of the soundbytes can be downloaded, and played on your computer's sound card, others will play "realtime" through your multimedia system.

Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A27. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one one I like best has some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase orders, prepayment, cash and other nuisances).

Polyline Corporation
1233 Rand Road
Des Plaines IL 60016
(708) 390-7744
FAX (708) 390-9886

or, their West Coast branch (where I got mine)
PolyWest Corporation
16018 Adelante Street, Unit C
Irwindale CA 91702
(818) 969-8555
FAX (818) 969-2267

They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in

white and CPCN.4+4M/RBLU in royal blue. Outside dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.

I paid $2.11 each plus tax and shipping for my latest batch (November 1995). The minimum economical order is 40 albums. You can order smaller quantities, but the price is $4.68 EACH. Check with Polyline before ordering. The prices change frequently.

Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to read your page?

A28. Yes. Although my WWW page is best viewed with Netscape, I also have a text-only menu that might be easier on your reader. Use the URL http://www.old-time.com/txtindx.html

There are many blind OTR collectors who might be able to help you as well. Two experts in OTR as a hobby and Internet / computers are: Henry Brugsch <henry@g0gku.demon.co.uk> and Ronald Staley <rstaley@netcom.com>. One or the other would be able to help you use your computer and reader to access my pages or maintain your OTR collection.

3227. RFD for uk.tech.broadcast

Newsgroup: rec.radio.broadcasting
Date: 1996-05-04 00:00:00 UTC
From: Richard Lamont <richard@stonix.demon.co.uk>
Message-ID: <rfd-uk.tech.broadcast-960504-172058@usenet.org.uk>
Source record: 24343
Cross-posted to: uk.net.news.announce,uk.net.news.config,alt.radio.scanner.uk,alt.radio.uk,alt.radio.uk.talk-radio,rec.radio.broadcasting,uk.media,uk.media.radio.bbc-r4,uk.media.tv.misc,uk.radio.amateur

```
REQUEST FOR DISCUSSION: uk.tech.broadcast
-----------------------------------------

Name: uk.tech.broadcast

Summary:
uk.tech.broadcast Technology used in UK radio and TV broadcasting

Rationale:
The newsgroups alt.radio.*, rec.radio.broadcasting, uk.media.*,
uk.radio.amateur and uk.telecom each contain a small number
of posts relating to the technology used in UK radio and
television broadcasting. None of these is a satisfactory
home: the alt.* groups are poorly propagated,
rec.radio.broadcasting is dominated by Americana, and
broadcast technology is off-topic in the uk.* groups.
Discussion of another proposed (non-technical) group,
uk.media.radio.misc, indicated that there was significant
interest in a dedicated technical group. The UK
broadcasting industry has many unique characteristics,
therefore there is much of a UK-specific nature to discuss.
This group would complement the non-technical groups in the
uk.media.* hierarchy.

Charter:
This group is for discussions of all issues relating to
technical operations and engineering in UK radio and
television broadcasting, at all stages of the broadcast
chain from microphone and camera to the transmitting
antenna.

Moderation:
None

Advertising:
Short advertisements (Maximum 20 lines including signature)
are permitted if relevant to the group.

Binaries:
None

Proponent:
Richard Lamont <richard@stonix.demon.co.uk>
```

3228. FAST-TRACK of uk.tech.broadcast

Newsgroup: rec.radio.broadcasting
Date: 1996-05-22 00:00:00 UTC
From: Charles Lindsey acting as control <control@usenet.org.uk>
Message-ID: <fasttrack-uk.tech.broadcast-DrtG7M.M47@clw.cs.man.ac.uk>
Source record: 24344
Cross-posted to: uk.net.news.announce,uk.net.news.config,alt.radio.scanner.uk,alt.radio.uk,alt.radio.uk.talk-radio,rec.radio.broadcasting,uk.media,uk.media.radio.archers,uk.media.radio.bbc-r4,uk.media.tv.misc,uk.radio.amateur

```
FAST TRACK ANNOUNCEMENT uk.tech.broadcast
----------------------

I have received a request to fast-track the creation of uk.tech.broadcast.

I will do this in SEVEN working days unless I receive valid complaints
by EMAIL.

Complaints will be resolved by the committee (committee@usenet.org.uk)

NOTE that this creates a new top-level hierarchy uk.tech.* for which a
hierarchy charter should exist. I have therefore issued a separate RFD to
supply such a charter for uk.tech.*. However, since the existence of such a
hierarchy is not itself in dispute, it has been decided to let this
fast-track proceed in parallel.

Charles Lindsey - acting as control@usenet.org.uk
-------------------------------------------------------------------------------

Name: uk.tech.broadcast

Newsgroups line:
uk.tech.broadcast Technology used in UK radio and TV broadcasting

Summary of discussion:

The RFD for uk.tech.broadcast has been around for 12 days now, and it
appears to be 6 days since anyone commented on it. The statutory minimum
period for discussion is 10 days, so it now seems appropriate to consider
the next step.

In my news spool there are 25 follow-ups to the RFD.

Support for the proposal was expressed by:

John Bennett <john@johnpb.demon.co.uk>
Andrew Boothman <boothman@easynet.co.uk>
Chris Carter <cjc@ast.cam.ac.uk>
Richard Challis <Richard@challrj.demon.co.uk>
James Cracknell <jgc3@aber.ac.uk>
John Gilliver <G6JPG@soft255.demon.co.uk>
Donald Gray <D.Gray@AutoComm.cityscape.co.uk>
Christopher Hall <christopher.hall@bbc.co.uk>
Andy Howard <andy@kiss100.demon.co.uk>
Chris Newport <crn@netix.org.uk>
Tony Quinn <tonyquin@sixpints.demon.co.uk>
```

Neil Skinner <nrs@brooktye.demon.co.uk>

Two of the above (John Gilliver and Andy Howard) suggested alternative
names for the group, but I don't think either of them felt particularly
strongly about it. Chris Newport wanted the charter widened to include
cable and similar systems.

One person (Richard Salmon <richard.salmon@rd.bbc.co.uk>) said that from
his point of view the proposed group would be useless.

Rationale:
The newsgroups alt.radio.*, rec.radio.broadcasting, uk.media.*,
uk.radio.amateur and uk.telecom each contain a small number
of posts relating to the technology used in UK radio and
television broadcasting. None of these is a satisfactory
home: the alt.* groups are poorly propagated,
rec.radio.broadcasting is dominated by Americana, and
broadcast technology is off-topic in the uk.* groups.
Discussion of another proposed (non-technical) group,
uk.media.radio.misc, indicated that there was significant
interest in a dedicated technical group. The UK
broadcasting industry has many unique characteristics,
therefore there is much of a UK-specific nature to discuss.
This group would complement the non-technical groups in the
uk.media.* hierarchy.

Charter:
This group is for discussions of all issues relating to
technical operations and engineering in UK radio and
television broadcasting, at all stages of the broadcast
chain from microphone and camera to the transmitting
antenna.

Moderation:
None

Advertising:

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?
Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the very early 1960s. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures. Some individuals classify the resurgence of this type of radio programming in the '60s and '70s as "Revival Radio", and similar programming since the '70s as "Modern Radio Drama".

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band. There is also an Old Time Music on the Radio WWW page (apparently for Bluegrass music).

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes and CDs of OTR programs. A partial list can be obtained from my OTR WWW site. Many public libraries have a small stock for perusal as well.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR Digest to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at http://www.old-time.com.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at http://www.old-time.com

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the new National Radio Club's _AM Radio Log, 16th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at +1 615 865 1525 voice, or +1 615 865-2598 fax. The address is M Street Corp., P.O.Box 1479 Madison, TN 37116-1479 Price is $44.95 plus S&H

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR Digest, or look through the program databases (WWW or FTP). Also see answer A14 below. Please do NOT send requests to -me- to name or find specific programs or radio personalities for you.

Q7. Are there any books about OTR?

A7. Yes, there are many books related to OTR. See my WWW page for a partial bibliography.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch

<henry@g0gku.demon.co.uk> related a good experience with the
following on-line bookstore:

Acorn Books acornbks@netcom.com

There are also several "book finding" services (one of which is
listed on my WWW page) that will help obtain old/out of print books.

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR Digest. My WWW page
has a database of private traders as well. Leave a note in the
OTR Digest if you want to trade, or send email to me if you
want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights
have been renewed. Examples of the latter include The Shadow
(Conde Nast) and some of Arch Oboler's productions. See my WWW
site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR
programming?

A10. Call the station and tell them of the many people who like to
listen to OTR. Suggest this programming will increase
listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing
director of a non-commercial station, tells us: "The
days of radio being ruled by the artisians is over, and
for some time now it has been in the hands of people who
only look at the bottom line, so to reach them you must
talk through public radio pledges, or through sponsors
on commercial stations."

Local stations may be able to redistribute OTR available
via satellite downlink. Ask the station managers to check
with either:

Collectors Radio Network (The Radio Vault)
1-800-739-7900

Yesterday USA (YUSA)
(214) 690-3636
YUSAOTR@aol.com

Q11. I have some old transcriptions and tapes, how can I make them
sound better?

A11. You might try using a good equalizer and/or digital signal
processing (DSP) unit between the playback and recording devices.
Some people have mentioned that the Radio Shack DSP unit does a
fair job. There are also other, more expensive DSP units available

from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping.

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo. If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible difference. Other audio optimization features are of negligible value for OTR. Dolby HX also requires no playback decoder.

[Dolby HX uses or "preserves" the Dolby noise reduction method of the master tape when duplicating - lvg]

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and leave a note in the OTR Digest asking about local clubs for your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?

A14. Some of the OTR Digest subscribers have contributed Program Logs for several well-known series. The logs are available at my WWW site. While you are there, check the "Humongous OTR Database" (a database of contributed catalogs and libraries, which will eventually contain most of the readily-available programs for popular OTR series). At present, the database exceeds 90,000 records, and is searchable with your WWW browser.

The "logs and publications" entry in my WWW page gives names and addresses of several vendors of these items (thanks to RadioJoe5@aol.com (Joe Coleman)). There is also a table of logs and log sources at http://www.old-time.com

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 95). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR Digest for inclusion in one of our databases.

Jim Widner and others have contributed some synopses / introductions to various programs. They are on file at his site (http://otr.com) and mine.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more information?

A16. Yes, there are several WWW sites, as well as an FTP site and a Gopher. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start, since the major OTR WWW pages have links or pointers to each other. If you learn of any others, I'd appreciate your informing me via email!

(1) My site:

(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Yes. The Internet OTR Digest is a freely available electronic newsletter, mailed every night to subscribers. Traffic has increased considerably, and the digest is usually mailed more than once a day!

To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR Digest?

A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible via:

FTP: radio.aiss.uiuc.edu (directory /pub/AIRWAVES/OTR/)
GOPHER radio.aiss.uiuc.edu 7070 (select OTR)
Web http://radio.aiss.uiuc.edu/~airwaves/history.html#archive

Readers with a WWW browser can access a "smart" archive program. This program can sort and display old OTR articles by author, subject, thread or date submitted. Just the thing to use when you want to catch up on a discussion thread, without plowing through a lot of extraneous material. To access this service, point your browser at: http://radio.aiss.uiuc.edu/~rrb/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the takeup reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibilty with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

From: ErikS74342@aol.com

I'm using a brand-new dubbing Sony deck that has given me terrific results over the last three months. (Sony TC-WR565, about $200 at Circuit City). It's a dual-motor model, with precise LED volume meters and tape counters. It is one step below Sony's best dubbing deck, which offered few additional features for an additional $70. I wouldn't recommend Sony's entry-level models, which skimp on the details. This deck automatically encodes tapes with Dolby HX.

This particular deck comes with a pitch control that can be used to correct pitch problems with master tapes -- a godsend when working with too-fast reel-to-reel source copies. (Sony also offers the TC-WR465, without the pitch control, for about $20 less. Believe me, it's worth the price.)

To reset volume levels and correct other deficiencies with master tapes -- yes, you need a second cassette deck and a graphic equalizer.

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have

a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO <click> TWO <click> TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake the tape and immediately make a copy. But if you forget to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. A pointer to his FAQ may also be found at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m)
- Focusses on radios, phonos, and related materials made before the 60s
- Avoids "ham" radio gear (the Boat Anchors group covers that)
- Has a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast Pioneers' Library". This is an excellent resource for the serious

/ professional researcher. It can be accessed through my WWW
site, or directly via the URL:
http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware
resources may also be found at http://www.old-time.com

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an
excellent choice for picking up distant AM stations that carry OTR
programming. Although the tuning dial has notoriously poor
calibration, the sensitivity and selectivity seem superior to other
radios. A SuperRadio FAQ is available via http://www.old-time.com

David Moisan maintains a text FAQ for the GE Super Radio at
ftp://ftp.shore.net/members/dmoisan/faqs/gesr_faq.txt
he also has a hypertext formatted FAQ at
http://www.shore.net/~dmoisan/faqs/superradio/gesr_faq.html

-Some- readers have had good success with the Select-A-Tenna
antenna advertised in several magazines, and the Grove Catalog.
The S-A-T seems to be rather directional, and may eliminate
off-axis interference.

Ham Radio magazines sometimes carry information about small loop
antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left
this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, drop me a stamped,
self-addressed envelope:

Dan Hughes
WPCD, Parkland College
2400 West Bradley Ave
Champaign IL 61821

If you are interested in AM Broadcast Band reception, and
technical artlcles related thereto, send a SASE to the following
address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern
drama. Check the lists on your local Internet provider to see

which are available to you. Here is a list of some of the WWW
pages for radio drama (more may be found at http://www.old-time.com):

Atlanta Radio Theatre Company: http://www.webamerica.com/artc
ZBS Media http://www.zbs.org/zbs.html
LodesTone Productions
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop
http://www.mrtw.org/mrtw

There is also a mailing list for folks interested in current
radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at
your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file
for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers.
To get the latest edition, send e-mail to one of the addresses below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:
send usenet/news.answers/internet-services/access-via-email

To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
Enter only this line in the BODY of the note:
send lis-iis e-access-inet.txt

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at
MIT, and is available from the MIT mailserver. For more info on
how to get files by email from MIT, send a message
TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

I have also initiated a simplistic fileserver. At present, it can
handle only a few files (stations.otr, otr.faq, help). If you
have ONLY email access to the Internet, and wish one of these
files, send an email
To: files@old-time.com
Subject: send filename

where filename is one of: stations.otr, otr.faq, help
do NOT use brackets or quotes
do NOT put anything in the body of the message (it won't be
read)

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where
can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained
to OTR topics. Folks interested in early TV shows might be
interested in this note from Kathy O'Connell
(oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman
named Linda has just started a list devoted to
50's-60's Television. You can contact her at
LEEKNIGHTS@delphi.com I signed on immediately, and
it's a wonderful place to meet other people
interested in this subject. Very much like the OTR
list, but for television!!!

Q26. I have never heard "Old Time Radio". Can I get an audio sample
via Internet?

A26. Yes, if you have a suitable WWW browser and sound card. Connect
to any of the WWW sites mentioned above, and follow the pointers
to their audio clips and / or soundbytes. Many of the soundbytes
can be downloaded, and played on your computer's sound card,
others will play "realtime" through your multimedia system.

Q27. I have lots of loose OTR cassettes filling my drawers. Is there
a better way to store these things?

A27. Collectors with lots of cassettes seem to use just about
everything from "underbed cardboard storage boxes" to old soft
drink cases. If you want your collection to have a more
"professional" look, here is a note from Ron_B._Hare@livewire.com
(Ron B. Hare)

You almost need to buy cassette albums from
specialty suppliers. Radio Shack used to carry a
small line of these and charged too much. We are in
the recording studio business, and receive catalogs
from several sources. The one one I like best has
some of the lowest prices and unhesitatingly deals
with individuals and will take your credit card
number over the phone for instant shipment (in
contrast to some who require account setup, purchase
orders, prepayment, cash and other nuisances).

Polyline Corporation
1233 Rand Road
Des Plaines IL 60016
(708) 390-7744

FAX (708) 390-9886

or, their West Coast branch (where I got mine)
PolyWest Corporation
16018 Adelante Street, Unit C
Irwindale CA 91702
(818) 969-8555
FAX (818) 969-2267

They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in white and CPCN.4+4M/RBLU in royal blue. Outside dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.

I paid $2.11 each plus tax and shipping for my latest batch (November 1995). The minimum economical order is 40 albums. You can order smaller quantities, but the price is $4.68 EACH. Check with Polyline before ordering. The prices change frequently.

Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to read your page?

A28. Yes. Although my WWW page is best viewed with Netscape, I also have a text-only menu that might be easier on your reader. Use the URL http://www.old-time.com/txtindx.html

There are many blind OTR collectors who might be able to help you as well. Two experts in OTR as a hobby and Internet / computers are: Henry Brugsch <henry@g0gku.demon.co.uk> and Ronald Staley <rstaley@netcom.com>. One or the other would be able to help you use your computer and reader to access my pages or maintain your OTR collection.

Toronto Sports Radio News:

Well it looks like John Derringer (Bill Hayes lil' Brother) is moving on to greener pastures, as Pat Marsden moves in as new morning poo-baa at The All Sports (Fan 590) station. Pat won't be alone however, since he'll be sharing hosting duties with Gord Stellick, former GM of the maple leafs from 1988 through 89. Can Fergie Oliver be far away from the trio ?? (kidding!!) If you've caught Stellick on TSN, you'll know that his hosting skills are as good as his management skills.... boring and sterile!! At least Derringer threw in a few curves every so often

As I've mentioned, I never have liked sports, but when I asked one of my friends, a sports addict and a constant fan listener, his response was "Pat Who???". He went on to comment how lately Derringer hasn't been doing the show, and it's sounded slow and forced... We both agreed that Paul "Shakey" Hunt would make a far better host than anyone currently under consideration by Telemedia management... at least he has some character.

Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the very early 1960s. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures. Some individuals classify the resurgence of this type of radio programming in the '60s and '70s as "Revival Radio", and similar programming since the '70s as "Modern Radio Drama".

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band. There is also an Old Time Music on the Radio WWW page (apparently for Bluegrass music).

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes and CDs of OTR programs. A partial list can be obtained from my OTR WWW site. Many public libraries have a small stock for perusal as well.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR Digest to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at http://www.old-time.com.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at http://www.old-time.com

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the new National Radio Club's _AM Radio Log, 16th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at +1 615 865 1525 voice, or +1 615 865-2598 fax. The address is M Street Corp., P.O.Box 1479 Madison, TN 37116-1479 Price is $44.95 plus S&H

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR Digest, or look through the program databases (WWW or FTP). Also see answer A14 below. Please do NOT send requests to -me- to name or find specific programs or radio personalities for you.

Q7. Are there any books about OTR?

A7. Yes, there are many books related to OTR. See my WWW page for a partial bibliography.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch

<henry@g0gku.demon.co.uk> related a good experience with the
following on-line bookstore:

Acorn Books acornbks@netcom.com

There are also several "book finding" services (one of which is
listed on my WWW page) that will help obtain old/out of print books.

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR Digest. My WWW page
has a database of private traders as well. Leave a note in the
OTR Digest if you want to trade, or send email to me if you
want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights
have been renewed. Examples of the latter include The Shadow
(Conde Nast) and some of Arch Oboler's productions. See my WWW
site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR
programming?

A10. Call the station and tell them of the many people who like to
listen to OTR. Suggest this programming will increase
listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing
director of a non-commercial station, tells us: "The
days of radio being ruled by the artisians is over, and
for some time now it has been in the hands of people who
only look at the bottom line, so to reach them you must
talk through public radio pledges, or through sponsors
on commercial stations."

Local stations may be able to redistribute OTR available
via satellite downlink. Ask the station managers to check
with either:

Collectors Radio Network (The Radio Vault)
1-800-739-7900

Yesterday USA (YUSA)
(214) 690-3636
YUSAOTR@aol.com

Q11. I have some old transcriptions and tapes, how can I make them
sound better?

A11. You might try using a good equalizer and/or digital signal
processing (DSP) unit between the playback and recording devices.
Some people have mentioned that the Radio Shack DSP unit does a
fair job. There are also other, more expensive DSP units available

from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping.

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo. If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible difference. Other audio optimization features are of negligible value for OTR. Dolby HX also requires no playback decoder.

[Dolby HX uses or "preserves" the Dolby noise reduction method of the master tape when duplicating - lvg]

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and leave a note in the OTR Digest asking about local clubs for your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?

A14. Some of the OTR Digest subscribers have contributed Program Logs for several well-known series. The logs are available at my WWW site. While you are there, check the "Humongous OTR Database" (a database of contributed catalogs and libraries, which will eventually contain most of the readily-available programs for popular OTR series). At present, the database exceeds 90,000 records, and is searchable with your WWW browser.

The "logs and publications" entry in my WWW page gives names and addresses of several vendors of these items (thanks to RadioJoe5@aol.com (Joe Coleman)). There is also a table of logs and log sources at http://www.old-time.com

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 95). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR Digest for inclusion in one of our databases.

Jim Widner and others have contributed some synopses / introductions to various programs. They are on file at his site (http://otr.com) and mine.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more information?

A16. Yes, there are several WWW sites, as well as an FTP site and a Gopher. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start, since the major OTR WWW pages have links or pointers to each other. If you learn of any others, I'd appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.old-time.com

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

FTP:
Anonymous FTP to airwaves.com,
directory: pub/AIRWAVES/OTR

World Wide Web URL:
http://www.airwaves.com

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Yes. The Internet OTR Digest is a freely available electronic newsletter, mailed every night to subscribers. Traffic has increased considerably, and the digest is usually mailed more than once a day!

To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR Digest?

A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible via:

Web http://www.airwaves.com

Readers with a WWW browser can access a "smart" archive program. This program can sort and display old OTR articles by author, subject, thread or date submitted. Just the thing to use when you

want to catch up on a discussion thread, without plowing through a lot of extraneous material. Point your browser at:

http://www.airwaves.com/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the takeup reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines,
Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in
response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at
1-800-622-0022 or call Radio World magazine at
703-998-7600 for subscription information. Radio World is
an industry trade and has used equipment listings in the
classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the
Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note
on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines
and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi
machine from a linear machine is that the audio track is
recorded helically (diagonally) on the tape along with the
video track. On linear machines the audio is recorded at the
upper edge of the tape (and a control track at the lower
edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal
as would be the case with linear recording. Instead the
analog audio signal frequency-modulates a carrier which is
then recorded between the video tracks. A duplicate signal
is also recorded linearly to maintain compatibilty with
linear VCRs. The FM signal recorded on the HiFi track should
not be confused with FM radio broadcasts. One of my
customers thought the FM switch on his HiFi was for
recording FM from the radio. Today's machines no longer use
the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other
source) onto HiFi VCRs is virtually indistinguishable from
the source. The material can be dubbed to cassette with no
generation loss.

There is no difference in audio quality using either six
hour or two hour mode.

It is true that at slower speeds the diagonal tracks are
closer together. This does degrade the video signal as
anyone knows who has compared six hour video with two hour

video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

From: ErikS74342@aol.com

I'm using a brand-new dubbing Sony deck that has given me terrific results over the last three months. (Sony TC-WR565, about $200 at Circuit City). It's a dual-motor model, with precise LED volume meters and tape counters. It is one step below Sony's best dubbing deck, which offered few additional features for an additional $70. I wouldn't recommend Sony's entry-level models, which skimp on the details. This deck automatically encodes tapes with Dolby HX.

This particular deck comes with a pitch control that can be used to correct pitch problems with master tapes -- a godsend when working with too-fast reel-to-reel source copies. (Sony also offers the TC-WR465, without the pitch control, for about $20 less. Believe me, it's worth the price.)

To reset volume levels and correct other deficiencies with master tapes -- yes, you need a second cassette deck and a graphic equalizer.

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have

separate output jacks for connecting to other equipment.... almost like TWO <click> TWO <click> TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the

lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake the tape and immediately make a copy. But if you forget to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. A pointer to his FAQ may also be found at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m)
- Focusses on radios, phonos, and related materials made before the 60s
- Avoids "ham" radio gear (the Boat Anchors group covers that)
- Has a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast Pioneers' Library". This is an excellent resource for the serious / professional researcher. It can be accessed through my WWW site, or directly via the URL:
http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware resources may also be found at http://www.old-time.com

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios. A SuperRadio FAQ is available via http://www.old-time.com

David Moisan maintains a text FAQ for the GE Super Radio at
ftp://ftp.shore.net/members/dmoisan/faqs/gesr_faq.txt
he also has a hypertext formatted FAQ at
http://www.shore.net/~dmoisan/faqs/superradio/gesr_faq.html

-Some- readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran plans with dimensions and number of turns, etc to build one of these antennas. I have built several and I'm no mechanic. If you (or anyone else reading this) would like a copy of the article and plans, drop me a stamped, self-addressed envelope:

Dan Hughes
WPCD, Parkland College
2400 West Bradley Ave
Champaign IL 61821

If you are interested in AM Broadcast Band reception, and technical artlcles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at http://www.old-time.com):

Atlanta Radio Theatre Company: http://www.webamerica.com/artc
ZBS Media http://www.zbs.org/zbs.html
LodesTone Productions
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop

http://www.mrtw.org/mrtw

There is also a mailing list for folks interested in current
radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at
your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file
for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers.
To get the latest edition, send e-mail to one of the addresses below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:
send usenet/news.answers/internet-services/access-via-email

To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
Enter only this line in the BODY of the note:
send lis-iis e-access-inet.txt

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at
MIT, and is available from the MIT mailserver. For more info on
how to get files by email from MIT, send a message
TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

I have also initiated a simplistic fileserver. At present, it can
handle only a few files (stations.otr, otr.faq, help). If you
have ONLY email access to the Internet, and wish one of these
files, send an email
To: files@old-time.com
Subject: send filename

where filename is one of: stations.otr, otr.faq, help
do NOT use brackets or quotes
do NOT put anything in the body of the message (it won't be
read)

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where
can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained to OTR topics. Folks interested in early TV shows might be interested in this note from Kathy O'Connell (oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman named Linda has just started a list devoted to 50's-60's Television. You can contact her at LEEKNIGHTS@delphi.com I signed on immediately, and it's a wonderful place to meet other people interested in this subject. Very much like the OTR list, but for television!!!

Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

A26. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Many of the soundbytes can be downloaded, and played on your computer's sound card, others will play "realtime" through your multimedia system.

Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A27. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one one I like best has some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase orders, prepayment, cash and other nuisances).

Polyline Corporation
1233 Rand Road
Des Plaines IL 60016
(708) 390-7744
FAX (708) 390-9886

or, their West Coast branch (where I got mine)
PolyWest Corporation
16018 Adelante Street, Unit C
Irwindale CA 91702
(818) 969-8555
FAX (818) 969-2267

They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in white and CPCN.4+4M/RBLU in royal blue. Outside dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.

I paid $2.11 each plus tax and shipping for my latest batch (November 1995). The minimum economical order is 40 albums. You can order smaller quantities, but the price is $4.68 EACH. Check with Polyline before ordering. The prices change frequently.

Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to read your page?

A28. Yes. Although my WWW page is best viewed with Netscape, I also have a text-only menu that might be easier on your reader. Use the URL http://www.old-time.com/txtindx.html

There are many blind OTR collectors who might be able to help you as well. Two experts in OTR as a hobby and Internet / computers are: Henry Brugsch <henry@g0gku.demon.co.uk> and Ronald Staley <rstaley@netcom.com>. One or the other would be able to help you use your computer and reader to access my pages or maintain your OTR collection.

All Rights Reserved

3233. IMPORTANT: Articles Lost, Please re-send

Newsgroup: rec.radio.broadcasting
Date: 1996-07-02 00:00:00 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <4rc0od$1jg@vixen.cso.uiuc.edu>
Source record: 24349

**** IMPORTANT NOTICE ****

During an attempted backup of my incoming Mail partition, I lost the last two days worth of "Original" articles destined for the newsgroup rec.radio.broadcasting and AIRWAVES RADIO JOURNAL.

By Original I mean all articles that were not replies to other articles.

I sort articles here in one of two folders. One folder is for all a articles that do NOT start with the prefix "Re: ", meaning articles that are presumably not replies. The other folder is for all newsgroup articles that do start with "Re: ", and presumably are replies.

The folder that is effected is the first one, the one for Original articles, not replies.

*** If you sent an article to rec.radio.broadcasting in the past two days, which was not in (Re)ply to another article, please re-send that article, or a reasonable facsimile to me for immediate release. ***

Send articles to articles@airwaves.com - or post, as usual, to rec.radio.broadcasting.

My apologies for any inconvenience this may have caused.

Bill

--

William Pfeiffer - Moderator | "Today's radio tries so
rec.radio.broadcasting/Airwaves Radio Journal | hard not to turn off any
Email: wdp@airwaves.com | listeners, that it fails

3234. SEEKING NEW ARCHIVE SITE FOR RRB/AIRWAVES

Newsgroup: rec.radio.broadcasting
Date: 1996-07-03 00:00:00 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <4rdrr0$ipe@vixen.cso.uiuc.edu>
Source record: 24251

Rec.radio.broadcasting has had archives of its AIRWAVES RADIO JOURNAL issues online for FTP, GOPHER and WWW retrieval for over 5 years. Now, due to changes in the management of the University where we have been housed, we are looking for another repository for these archives.

Here are our requirements...

* 24 hour Publicly accessible anonymous FTP, Gopher and WWW.
* Ability to telnet into site for maintenance.
* ~100 Meg Disk Quota (the archives are now 40 megs compressed, but we would prefer room for expansion and/or to store them uncompressed if possible)
* Established, well connected site (We would like not to have to move the archives again for some time)
* Access and storage must be free, we cannot afford to pay for the privilege of the public to access back issues.

If you have such a site and would be willing to donate the space for our archives, please send me email ASAP. We need to vacate this site as soon as possible. Although no hard date has been set, and we are leaving the site on a friendly basis, it is important that this matter be resolved.

Feel free to contact the system administrator, C. Lance Moxley (clm@uiuc.edu) for any references you may need pertaining to the past 5 years of operation at this, and other, sites under his control.

Hope to hear from you soon.

The idea is certainly okay, but it sounds like a lot of work and an awful lot of maintenance. If you're building in the Delta, you're gonna have to contend with Yazoo clay, which is Mississippi's answer to seismic instability. Y. clay is like a very slow earthquake, and it will do interesting things to your ductwork after a couple of years. That's why the houses there don't have basements. It might be easier to bury copper or steel water pipe and circulate an antifreeze mixture through that to exchange heat with the soil. You'll need a couple of car radiators for heat exchangers and better advice as to pumps, pipe sizing, and other things of that kind than I can give you.

This is to let everyone know that I am moving the moderation stuff for this group from one place to another. There is a delay while that is happening, but I expect to get everything running by this weekend (August 2 - 3).

Feel free to send in articles. I am getting all mail, and will ahve the newsgroup humming in short order.

Thanks

3237. ADMINISTRIVIA: We're Back and Thanks to...

Newsgroup: rec.radio.broadcasting
Date: 1996-08-02 00:00:00 UTC
From: wdp@sashimi.wwa.com
Message-ID: <4tu00j$p3l@miso.wwa.com>
Source record: 24254

Well I am still compiling stuff, changing scripts and trying to get the email digests running at the new server, but at least news is up... You may begin to send in articles as normal, either by posting to the newsgroup, or by emailing them to articles@airwaves.com.

I want to take a moment to thank two great friends without whose support none of this would be possible, or at least it would be a lot harder.

I would like to first thank C. Lance Moxley, the systems administrator at the University of Illinois, Urbana Champaign whose undying support to this newsgroup and several of my other net endevours can not possible be measured accurately. It was he who believed in me and housed this newsgroup and other net-projects, on his workstation for 5 years.

During that time, he supported the operation by offering archive disk space, fast net connectivity, 24 hour access, installed much software for my use and in countless other ways made sure that rec.radio.broadcasting, AIRWAVES RADIO JOURNAL, Old Time Radio Digest and the AIRWAVES MEDIAWEB pages came out.

Near the end of my stay there, which just ended last week, Lance fought to keep this operation on his server, against higher-level administration which was trying to curtail all non-university internet activity. He risked his job to go head-to-head in my behalf. This is a man whom I have never met, only soke to a few times on the phone, and who was receiving no money from me. Lance is one of the good ones on this net and he deserves a big round of virtual applause for his commitment to AIRWAVES/rrb and to my other net projects.

Thank you Lance. It has been fun.

Lastly, but *CERTAINLY* not least there is Greg Gulik, the co-owner of World Wide Access, Chicago's largest Internet access provider. Ever since Greg operated a little uucp site in Chicago's N.W. Suburb, on a sloooow AT&T 3B1 with 4 lines, he has been a gentleman among gentlemen. Mr Gulik, like C. Lance Moxley, has assisted me in every way possible in my net-activities, going above and beyond the call of duty to support my early days of r.r.b, giving me administrative privileges over the news machine when I needed them, working out bugs in software for me, and generally being one of the best sysadmins I have ever had the pleasure of knowing.

Now, Greg's little home computer uucp system has grown to a HUGE service provider, offering dozens of POPs around Chicago, some of the fastest and most reliable service of any

provider
(I wish my local ISP's were as vigilant about quality) in Chicago. While other ISP owners were
spouting off ego on local newsgroups, Greg (and his partner Dave Vrona) were too busy providing the highest possible quality for their ever-growing user base. Like the Tortoise and the Hare, Greg and Dave have leapfrogged everyone and quietly taken over the market.

Through it all, Greg has not lost his personal-touch. He is still accessible, friendly and willing to go out on a limb to help. It is this kind of caring that is lacking in so many service industries. But since Greg grew his business on service, he knows that you cannot become #1 without caring about your users.

Now, with my loss of the uiuc server, Greg has, once again, shown his true colors and invited
me to set up shop on his machine, to moderate this newsgroup and email digests.

Thanks Greg. You are a sysadmins sysadmin and a great friend to the net and to me.

If anyone here is looking for the best Internet site in the Chicago area, or are looking for
super fast, reliable web service, drop Greg a line at greg@wwa.com. Or for an automated info-file, send to info@wwa.com. In this day and age of care-nothing companies, it is good to
know that Greg is one of the exceptions.

BTW, I am not being paid for this, I am just trying to give back some small part of the sup[port I have received from both C. Lance Moxley (clm@uiuc.edu) and Greg Gulik.

Thanks guys...

3238. Now on the Web - AM/FM database search page, FREE!

Newsgroup: rec.radio.broadcasting
Date: 1996-08-10 00:00:00 UTC
From: wdp@airwaves.com
Message-ID: <4uisfg$s8v@miso.wwa.com>
Source record: 24255
Cross-posted to: rec.radio.noncomm,rec.radio.broadcasting,rec.radio.shortwave,rec.radio.info,chi.media,ba.broadcast,misc.misc,rec.video.satellite.tvro,rec.video.satellite.misc,rec.video.cable-tv,alt.radio.pirate

Now on the net, a user-friendly search engine using the FCC's own engineering database. If anyone has ever looked at that database, you can see why a search page like this is such a good thing.

Searches include

* Frequency: returns all stations, CP's and translators on a given frequency
* Call Letters: search with complete, or partial calls
* City/State/Province: look for all stations in a city/state or province
* Metro Area: Selected Metro areas included
* Latitude/Longitude: Enter your own search area

The AM search returns calls, city, state/province, frequency, day power, night power, critical-hours power (if used) and antenna specs such as DA-1, DA-2, DA-3 DA-D DA-N or ND-1 .... etc.

The FM search returns calls, city state/province, power, antenna height and whether the station is directional.

In addition you can see a color map of the transmitter location by clicking on the call letters in the search-results window. Currently the map feature is limited to the lower 48 states. We are working on a feature to include directional pattern data. We do not offer TV data but may do so at some later time.

To use this you must have a forms-capable browser. I suggest using Netscape 1.1 (or later) since much of the formatting is Netscape Enhanced (tables, backgrounds, centering etc). It is usable on Lynx and other browsers with varying results. The output page is formatted nicely and resembles the old "Whites Radio Log" of the early 70's.

The URL is http://www.airwaves.com/fccdb.html

Please let me know if you like the service.

The FCC database is not 100% accurate. We know this so don't write telling me about some station which is improperly listed. I do not control the database and I do not make corrections to it. To do so would be an impossible task. Enjoy the service. It is free and I think you will find it is very helpful.

Table of contents:

Q1. What is "OTR"?
Q2. You haven't mentioned OTR music, why not?
Q3. Where can I buy recordings of old radio shows?
Q4. Which vendors have (lower prices) (higher quality) (faster
response)?
Q5. Are OTR shows rebroadcast? If so, where and when?
Q6. I remember a great show called (x). When was it aired?
Q7. Are there any books about OTR?
Q8. Does anybody trade tapes of OTR shows?
Q9. What's this stuff about Copyright?
Q10. How can I get my local radio station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
Q16. Is there a World Wide Web page (URL) I can access for more info?
Q17. Is there an email newsletter on OTR? How do I subscribe to it?
Q18. Can I get archived copies of old issues of the OTR Digest?
```

Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your site?
Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?
Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?
Q29. I am interested in re-creating some OTR drama. Where can I get scripts?

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the very early 1960s. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures. Some individuals classify the resurgence of this type of radio programming in the '60s and '70s as "Revival Radio", and similar programming since the '70s as "Modern Radio Drama". Purists even discriminate between the "Golden Age" (late 30's and the decade of the 40's) and the "Silver Age" (50's). In any case, there are plenty of programs of various types that are enjoyable entertainment. Best of all, they don't require a large screen TV to enjoy 'em -- the "visuals" are provided by the listener's imagination.

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band. There are also some Old Time Music on the Radio WWW pages (apparently for Bluegrass music), not affiliated with ours.

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes and CDs of OTR programs. A partial list can be obtained from my OTR WWW site. Many public libraries have a small stock for perusal as well. Some vendors and collectors even have their own WWW pages.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR Digest to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at http://www.old-time.com.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at http://www.old-time.com

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the new National Radio Club's _AM Radio Log, 16th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at +1 615 865 1525 voice, or +1 615 865-2598 fax. The address is M Street Corp., P.O.Box 1479 Madison, TN 37116-1479 Price is $44.95 plus S&H

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR Digest, or look through the program databases at my site). Also see answer A14 below. Please do NOT send requests to -me- to name or find specific programs or radio personalities for you.

Q7. Are there any books about OTR?

A7. Yes, there are many books related to OTR. See my WWW page for a partial bibliography.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

There are also several "book finding" services (one of which is listed on my WWW page) that will help obtain old/out of print books.

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR Digest. My WWW page has a database of private traders as well. Leave a note in the OTR Digest if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights have been renewed. Examples of the latter include The Shadow (Conde Nast) and some of Arch Oboler's productions. See my WWW site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Local stations may be able to redistribute OTR available via satellite downlink. Ask the station managers to check with either:

Collectors Radio Network (The Radio Vault)
1-800-739-7900

Yesterday USA (YUSA)
(214) 690-3636
YUSAOTR@aol.com

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables
and sound processing units that can dramatically
improve old recordings. Their sound processing unit
runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all
their material at the following site:
ftp.atd.ucar.edu. Log on with the usual anonymous
then, your routine password. head on over to
/pub/dat-heads/ You will find a wealth of info up
there. All the digests to the current day, and mike
faqs, as well as market postings on equipment. Highly
recommendable for anyone to get their feet wet in this
media. Happy taping.

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter)
occasionally take a "Y" cord and connect the output of
your cassette player to both "sides" of the "Y". Plug the
combined side of the "Y" into your stereo. If the sound
is mush(ier) than what you hear normally, you have a head
alignment problem (assuming that the tape you are
listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible
difference. Other audio optimization features are of
negligible value for OTR. Dolby HX also requires no
playback decoder.

[Dolby HX uses or "preserves" the Dolby noise reduction method of the master tape when duplicating - lvg]

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and
leave a note in the OTR Digest asking about local clubs for
your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are
different. Why?

A13. Sometimes broadcasts are dated according to their original
broadcast date, and sometimes according to a date on which they
have been rebroadcast. For instance, the Armed Forces Radio
Service rebroadcast many Mutual Radio transcriptions at a later
date. Your tape may be of one of these later dates. Alternately,
somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes
on different programs! For instance, a few Suspense shows were
re-scripted / re-cast for Escape. You might also find
similarities between certain SF shows as done on X Minus 1 and
Dimension X.

Q14. Is there any place where I can get a complete listing of all the
episodes in a particular program serial?

A14. Some of the OTR Digest subscribers have contributed Program Logs
for several well-known series. The logs are available at my WWW
site. While you are there, check the "Humongous OTR Database" (a
database of contributed catalogs and libraries, which will
eventually contain most of the readily-available programs for
popular OTR series). At present, the database exceeds 100,000
records, and is searchable with your WWW browser.

The "logs and publications" entry in my WWW page gives names and
addresses of several vendors of these items (thanks to
RadioJoe5@aol.com (Joe Coleman)). There is also a table
of logs and log sources at http://www.old-time.com

Jay Hickerson maintains several logs and lists, as well as -Hello
Again-, an OTR newsletter. Jay is the author of -The Ultimate
History of Network Radio Programming and Guide to All Circulating
Shows- (last supplemented in Oct 95). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the
themes of OTR programs?

A15. Again, some vendors include this information with their
catalogs. If you would like to contribute your interpretations
of the themes, send them to the OTR Digest for inclusion in
one of our databases.

Jim Widner and others have contributed some synopses / introductions to various programs. They are on file at his site (http://www.otr.com) and mine.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) that I can access for more information?

A16. Yes, there are several WWW sites. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start, since the major OTR WWW pages have links or pointers to each other. If you learn of any others, I'd appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.old-time.com

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

World Wide Web URL:
http://www.airwaves.com

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Yes. The Internet OTR Digest is a freely available electronic newsletter, mailed every night to subscribers. Traffic has increased considerably, and the digest is usually mailed more than once a day!

To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR Digest?

A18. Yes. The OTR Digests and Index are updated frequently, and are accessible at:

http://www.airwaves.com

Readers with a WWW browser can access a "smart" archive program. This program can sort and display old OTR articles by author, subject, thread or date submitted. Just the thing to use when you want to catch up on a discussion thread, without plowing through a

lot of extraneous material. Point your browser at:

http://www.airwaves.com/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the takeup reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time. There is very little fidelity loss when using this medium to duplicate programs.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings, and their fidelity is limited by the slow tape speed.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to

Visually Impaired persons. Price of 4 track recorder
around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines,
Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in
response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at
1-800-622-0022 or call Radio World magazine at
703-998-7600 for subscription information. Radio World is
an industry trade and has used equipment listings in the
classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the
Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note
on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines
and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi
machine from a linear machine is that the audio track is
recorded helically (diagonally) on the tape along with the
video track. On linear machines the audio is recorded at the
upper edge of the tape (and a control track at the lower
edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal
as would be the case with linear recording. Instead the
analog audio signal frequency-modulates a carrier which is
then recorded between the video tracks. A duplicate signal
is also recorded linearly to maintain compatibilty with
linear VCRs. The FM signal recorded on the HiFi track should
not be confused with FM radio broadcasts. One of my
customers thought the FM switch on his HiFi was for
recording FM from the radio. Today's machines no longer use
the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other
source) onto HiFi VCRs is virtually indistinguishable from
the source. The material can be dubbed to cassette with no
generation loss.

There is no difference in audio quality using either six
hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

From: ErikS74342@aol.com

I'm using a brand-new dubbing Sony deck that has given me terrific results over the last three months. (Sony TC-WR565, about $200 at Circuit City). It's a dual-motor model, with precise LED volume meters and tape counters. It is one step below Sony's best dubbing deck, which offered few additional features for an additional $70. I wouldn't recommend Sony's entry-level models, which skimp on the details. This deck automatically encodes tapes with Dolby HX.

This particular deck comes with a pitch control that can be used to correct pitch problems with master tapes -- a godsend when working with too-fast reel-to-reel source copies. (Sony also offers the TC-WR465, without the pitch control, for about $20 less. Believe me, it's worth the price.)

To reset volume levels and correct other deficiencies with master tapes -- yes, you need a second cassette deck and a graphic equalizer.

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO <click> TWO <click> TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape

expand a bit, so it doesn't fit the machined tape-guides
properly anymore; and they can interfere with the
lubrication impregnated into the tape; and it is theorized
they can even interfere with the polished smoothness of
the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the
formulation of the plastic backing and binder. In the
mid-70's, both 3M (Scotch) and Ampex, the two major tape
manufacturers, started experimenting with their formulas.
They thought they were introducing major improvements,
but instead created a tape much more prone to
hydrolization than anything had ever been. The problem
did not show up for years, and the formulas did not get
corrected until sometime in the mid-80's. Theoretically
any tape could get hydrolyzed over a long period of time,
especially if stored in a high-humidity situation, but in
practice most squeaky tapes were made (roughly speaking)
between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and
entreprenurially successful producer of radio drama in
the US today) gave me his formula and I've done it many
times now and it works:

Bake the tapes in a convection oven for 8 hours at 130
degrees Fahrenheit. It is entirely possible to bake a
tape twice if the first time doesn't do the trick. You
get about a three-week "window", sez Tom, before the tape
starts to re-absorb water. So the best deal is to bake
the tape and immediately make a copy. But if you forget
to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios,
phonographs and accessories is the rec.antiques.radio+phono
newsgroup, created by Bill Robie. A pointer to his FAQ may also be
found at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m)
- Focusses on radios, phonos, and related materials made
before the 60s
- Avoids "ham" radio gear (the Boat Anchors group
covers that)
- Has a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast
Pioneers' Library". This is an excellent resource for the serious
/ professional researcher. It can be accessed through my WWW
site, or directly via the URL:
http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware resources may also be found at http://www.old-time.com

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios. A SuperRadio FAQ is available via http://www.old-time.com

David Moisan maintains a text FAQ for the GE Super Radio at
ftp://ftp.shore.net/members/dmoisan/faqs/gesr_faq.txt
he also has a hypertext formatted FAQ at
http://www.shore.net/~dmoisan/faqs/superradio/gesr_faq.html

-Some- readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran plans with dimensions and number of turns, etc to build one of these antennas. I have built several and I'm no mechanic. If you (or anyone else reading this) would like a copy of the article and plans, drop me a stamped, self-addressed envelope:

Dan Hughes
WPCD, Parkland College
2400 West Bradley Ave
Champaign IL 61821

If you are interested in AM Broadcast Band reception, and technical artlcles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at http://www.old-time.com):

Atlanta Radio Theatre Company: http://members.aol.com/artcradio
ZBS Media http://www.zbs.org/zbs.html

LodesTone Productions
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop
http://www.mrtw.org/mrtw

There is also a mailing list for folks interested in current
radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at
your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file
for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers.
To get the latest edition, send e-mail to one of the addresses below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:
send usenet/news.answers/internet-services/access-via-email

To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
Enter only this line in the BODY of the note:
send lis-iis e-access-inet.txt

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at
MIT, and is available from the MIT mailserver. For more info on
how to get files by email from MIT, send a message
TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

I have also initiated a simplistic fileserver. At present, it can
handle only a few files (stations.otr, otr.faq, help). If you
have ONLY email access to the Internet, and wish one of these
files, send an email
To: files@old-time.com
Subject: send filename

where filename is one of: stations.otr, otr.faq, help
do NOT use brackets or quotes
do NOT put anything in the body of the message (it won't be
read)

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained to OTR topics. Folks interested in early TV shows might be interested in this note from Kathy O'Connell (oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman named Linda has just started a list devoted to 50's-60's Television. You can contact her at LEEKNIGHTS@delphi.com I signed on immediately, and it's a wonderful place to meet other people interested in this subject. Very much like the OTR list, but for television!!!

Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

A26. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Many of the soundbytes can be downloaded, and played on your computer's sound card, others will play "realtime" through your multimedia system.

Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A27. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one one I like best has some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase orders, prepayment, cash and other nuisances).

Polyline Corporation
1233 Rand Road
Des Plaines IL 60016
(708) 390-7744
FAX (708) 390-9886

or, their West Coast branch (where I got mine)
PolyWest Corporation
16018 Adelante Street, Unit C

Irwindale CA 91702
(818) 969-8555
FAX (818) 969-2267

They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in white and CPCN.4+4M/RBLU in royal blue. Outside dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.

I paid $2.11 each plus tax and shipping for my latest batch (November 1995). The minimum economical order is 40 albums. You can order smaller quantities, but the price is $4.68 EACH. Check with Polyline before ordering. The prices change frequently.

Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to read your page?

A28. Yes. Although my WWW page is best viewed with Netscape, I also have a text-only menu that might be easier on your reader. Use the URL http://www.old-time.com/txtindx.html

There are many blind OTR collectors who might be able to help you as well. Two experts in OTR as a hobby and Internet / computers are: Henry Brugsch <henry@g0gku.demon.co.uk> and Ronald Staley <rstaley@netcom.com>. One or the other would be able to help you use your computer and reader to access my pages or maintain your OTR collection.

Q29. I am interested in re-creating some OTR drama. Where can I get scripts?

A29. Charlie Matkin <cmatkin@earthlink.net> sent us a note saying:

My former partner in New Orleans Radio Theatre, Inc. is closing out his extensive supply of scripts. You may contact him as follows:

John Barber
P.O. Box 70711
New Orleans, LA 70116

(504) 943-6091

Also check with local or national OTR clubs. Many have a "print library" that includes scripts.

All Rights Reserved. Not-for-profit distribution encouraged.

Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?
Q29. I am interested in re-creating some OTR drama. Where can I get scripts?

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the very early 1960s. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures. Some individuals classify the resurgence of this type of radio programming in the '60s and '70s as "Revival Radio", and similar programming since the '70s as "Modern Radio Drama". Purists even discriminate between the "Golden Age" (late 30's and the decade of the 40's) and the "Silver Age" (50's). In any case, there are plenty of programs of various types that are enjoyable entertainment. Best of all, they don't require a large screen TV to enjoy 'em -- the "visuals" are provided by the listener's imagination.

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band. There are also some Old Time Music on the Radio WWW pages (apparently for Bluegrass music), not affiliated with ours.

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes and CDs of OTR programs. A partial list can be obtained from my OTR WWW site. Many public libraries have a small stock for perusal as well. Some vendors and collectors even have their own WWW pages.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR Digest to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at http://www.old-time.com.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at http://www.old-time.com

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the new National Radio Club's _AM Radio Log, 16th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at +1 615 865 1525 voice, or +1 615 865-2598 fax. The address is M Street Corp., P.O.Box 1479 Madison, TN 37116-1479 Price is $44.95 plus S&H

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR Digest, or look through the program databases at my site). Also see answer A14 below. Please do NOT send requests to -me- to name or find specific programs or radio personalities for you.

Q7. Are there any books about OTR?

A7. Yes, there are many books related to OTR. See my WWW page for a partial bibliography.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

There are also several "book finding" services (one of which is listed on my WWW page) that will help obtain old/out of print books.

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR Digest. My WWW page has a database of private traders as well. Leave a note in the OTR Digest if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights have been renewed. Examples of the latter include The Shadow (Conde Nast) and some of Arch Oboler's productions. See my WWW site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Local stations may be able to redistribute OTR available via satellite downlink. Ask the station managers to check with either:

Collectors Radio Network (The Radio Vault)
1-800-739-7900

Yesterday USA (YUSA)
(214) 690-3636
YUSAOTR@aol.com

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables
and sound processing units that can dramatically
improve old recordings. Their sound processing unit
runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all
their material at the following site:
ftp.atd.ucar.edu. Log on with the usual anonymous
then, your routine password. head on over to
/pub/dat-heads/ You will find a wealth of info up
there. All the digests to the current day, and mike
faqs, as well as market postings on equipment. Highly
recommendable for anyone to get their feet wet in this
media. Happy taping.

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter)
occasionally take a "Y" cord and connect the output of
your cassette player to both "sides" of the "Y". Plug the
combined side of the "Y" into your stereo. If the sound
is mush(ier) than what you hear normally, you have a head
alignment problem (assuming that the tape you are
listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible
difference. Other audio optimization features are of
negligible value for OTR. Dolby HX also requires no
playback decoder.

[Dolby HX uses or "preserves" the Dolby noise reduction method of the master tape when duplicating - lvg]

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and
leave a note in the OTR Digest asking about local clubs for
your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are
different. Why?

A13. Sometimes broadcasts are dated according to their original
broadcast date, and sometimes according to a date on which they
have been rebroadcast. For instance, the Armed Forces Radio
Service rebroadcast many Mutual Radio transcriptions at a later
date. Your tape may be of one of these later dates. Alternately,
somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes
on different programs! For instance, a few Suspense shows were
re-scripted / re-cast for Escape. You might also find
similarities between certain SF shows as done on X Minus 1 and
Dimension X.

Q14. Is there any place where I can get a complete listing of all the
episodes in a particular program serial?

A14. Some of the OTR Digest subscribers have contributed Program Logs
for several well-known series. The logs are available at my WWW
site. While you are there, check the "Humongous OTR Database" (a
database of contributed catalogs and libraries, which will
eventually contain most of the readily-available programs for
popular OTR series). At present, the database exceeds 100,000
records, and is searchable with your WWW browser.

The "logs and publications" entry in my WWW page gives names and
addresses of several vendors of these items (thanks to
RadioJoe5@aol.com (Joe Coleman)). There is also a table
of logs and log sources at http://www.old-time.com

Jay Hickerson maintains several logs and lists, as well as -Hello
Again-, an OTR newsletter. Jay is the author of -The Ultimate
History of Network Radio Programming and Guide to All Circulating
Shows- (last supplemented in Oct 95). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the
themes of OTR programs?

A15. Again, some vendors include this information with their
catalogs. If you would like to contribute your interpretations
of the themes, send them to the OTR Digest for inclusion in
one of our databases.

Jim Widner and others have contributed some synopses / introductions
to various programs. They are on file at his site
(http://www.otr.com) and mine.

Many of the local and national OTR clubs maintain informational
libraries with this material.

Q16. Is there a World Wide Web page (URL) that I can access for more
information?

A16. Yes, there are several WWW sites. Each site contains different
information, so you might want to visit them all. The sites
listed below are good places to start, since the major OTR WWW
pages have links or pointers to each other. If you learn of any
others, I'd appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.old-time.com

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

World Wide Web URL:
http://www.airwaves.com

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Yes. The Internet OTR Digest is a freely available electronic
newsletter, mailed every night to subscribers. Traffic has
increased considerably, and the digest is usually mailed more than
once a day!

To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use
old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR Digest?

A18. Yes. The OTR Digests and Index are updated frequently,
and are accessible at:

http://www.airwaves.com

Readers with a WWW browser can access a "smart" archive program.
This program can sort and display old OTR articles by author,
subject, thread or date submitted. Just the thing to use when you
want to catch up on a discussion thread, without plowing through a

lot of extraneous material. Point your browser at:

http://www.airwaves.com/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the takeup reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time. There is very little fidelity loss when using this medium to duplicate programs.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings, and their fidelity is limited by the slow tape speed.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to

Visually Impaired persons. Price of 4 track recorder
around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines,
Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in
response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at
1-800-622-0022 or call Radio World magazine at
703-998-7600 for subscription information. Radio World is
an industry trade and has used equipment listings in the
classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the
Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note
on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines
and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi
machine from a linear machine is that the audio track is
recorded helically (diagonally) on the tape along with the
video track. On linear machines the audio is recorded at the
upper edge of the tape (and a control track at the lower
edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal
as would be the case with linear recording. Instead the
analog audio signal frequency-modulates a carrier which is
then recorded between the video tracks. A duplicate signal
is also recorded linearly to maintain compatibilty with
linear VCRs. The FM signal recorded on the HiFi track should
not be confused with FM radio broadcasts. One of my
customers thought the FM switch on his HiFi was for
recording FM from the radio. Today's machines no longer use
the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other
source) onto HiFi VCRs is virtually indistinguishable from
the source. The material can be dubbed to cassette with no
generation loss.

There is no difference in audio quality using either six
hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

From: ErikS74342@aol.com

I'm using a brand-new dubbing Sony deck that has given me terrific results over the last three months. (Sony TC-WR565, about $200 at Circuit City). It's a dual-motor model, with precise LED volume meters and tape counters. It is one step below Sony's best dubbing deck, which offered few additional features for an additional $70. I wouldn't recommend Sony's entry-level models, which skimp on the details. This deck automatically encodes tapes with Dolby HX.

This particular deck comes with a pitch control that can be used to correct pitch problems with master tapes -- a godsend when working with too-fast reel-to-reel source copies. (Sony also offers the TC-WR465, without the pitch control, for about $20 less. Believe me, it's worth the price.)

To reset volume levels and correct other deficiencies with master tapes -- yes, you need a second cassette deck and a graphic equalizer.

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO <click> TWO <click> TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape

expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake the tape and immediately make a copy. But if you forget to do it and it re-hydrolyzes, you can bake it again.

John Tucky (grumpy@en.com) takes the opposite approach, with his suggestion:

For those who are squeemish about putting a valuable tape into a hot oven, you can put the tapes in a frost-free refridgerator. The humidity in there is very low - that's why everything dries out if it isn't covered or wrapped. It'll take more than 8 hours - might require several days. But then, what's a week to a 50 year old radio show?

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. A pointer to his FAQ may also be found at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m)
- Focusses on radios, phonos, and related materials made before the 60s

- Avoids "ham" radio gear (the Boat Anchors group
covers that)
- Has a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast
Pioneers' Library". This is an excellent resource for the serious
/ professional researcher. It can be accessed through my WWW
site, or directly via the URL:
http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware
resources may also be found at http://www.old-time.com

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an
excellent choice for picking up distant AM stations that carry OTR
programming. Although the tuning dial has notoriously poor
calibration, the sensitivity and selectivity seem superior to other
radios. A SuperRadio FAQ is available via http://www.old-time.com

David Moisan maintains a text FAQ for the GE Super Radio at
ftp://ftp.shore.net/members/dmoisan/faqs/gesr_faq.txt
he also has a hypertext formatted FAQ at
http://www.shore.net/~dmoisan/faqs/superradio/gesr_faq.html

-Some- readers have had good success with the Select-A-Tenna
antenna advertised in several magazines, and the Grove Catalog.
The S-A-T seems to be rather directional, and may eliminate
off-axis interference.

Ham Radio magazines sometimes carry information about small loop
antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left
this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, drop me a stamped,
self-addressed envelope:

Dan Hughes
WPCD, Parkland College
2400 West Bradley Ave
Champaign IL 61821

If you are interested in AM Broadcast Band reception, and
technical artlcles related thereto, send a SASE to the following
address for their product catalog:

National Radio Club
Publications Center
PO Box 164

Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at http://www.old-time.com):

Atlanta Radio Theatre Company: http://members.aol.com/artcradio
ZBS Media http://www.zbs.org/zbs.html
LodesTone Productions
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop
http://www.mrtw.org/mrtw

There is also a mailing list for folks interested in current radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers. To get the latest edition, send e-mail to one of the addresses below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:
send usenet/news.answers/internet-services/access-via-email

To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
Enter only this line in the BODY of the note:
send lis-iis e-access-inet.txt

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at MIT, and is available from the MIT mailserver. For more info on how to get files by email from MIT, send a message
TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

I have also initiated a simplistic fileserver. At present, it can handle only a few files (stations.otr, otr.faq, help). If you

have ONLY email access to the Internet, and wish one of these files, send an email
To: files@old-time.com
Subject: send filename

where filename is one of: stations.otr, otr.faq, help
do NOT use brackets or quotes
do NOT put anything in the body of the message (it won't be read)

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained to OTR topics. Folks interested in early TV shows might be interested in this note from Kathy O'Connell (oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman named Linda has just started a list devoted to 50's-60's Television. You can contact her at LEEKNIGHTS@delphi.com I signed on immediately, and it's a wonderful place to meet other people interested in this subject. Very much like the OTR list, but for television!!!

Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

A26. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Many of the soundbytes can be downloaded, and played on your computer's sound card, others will play "realtime" through your multimedia system.

Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A27. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one one I like best has some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase

orders, prepayment, cash and other nuisances).

Polyline Corporation
1233 Rand Road
Des Plaines IL 60016
(708) 390-7744
FAX (708) 390-9886

or, their West Coast branch (where I got mine)
PolyWest Corporation
16018 Adelante Street, Unit C
Irwindale CA 91702
(818) 969-8555
FAX (818) 969-2267

They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in white and CPCN.4+4M/RBLU in royal blue. Outside dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.

I paid $2.11 each plus tax and shipping for my latest batch (November 1995). The minimum economical order is 40 albums. You can order smaller quantities, but the price is $4.68 EACH. Check with Polyline before ordering. The prices change frequently.

Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to read your page?

A28. Yes. Although my WWW page is best viewed with Netscape, I also have a text-only menu that might be easier on your reader. Use the URL http://www.old-time.com/txtindx.html

There are many blind OTR collectors who might be able to help you as well. Two experts in OTR as a hobby and Internet / computers are: Henry Brugsch <hbj@enterprise.net> and Ronald Staley <rstaley@netcom.com>. One or the other would be able to help you use your computer and reader to access my pages or maintain your OTR collection.

Q29. I am interested in re-creating some OTR drama. Where can I get scripts?

A29. Charlie Matkin <cmatkin@earthlink.net> sent us a note saying:

My former partner in New Orleans Radio Theatre, Inc. is closing out his extensive supply of scripts. You may contact him as follows:

John Barber
P.O. Box 70711
New Orleans, LA 70116

(504) 943-6091

Also check with local or national OTR clubs. Many have a "print library" that includes scripts.

All Rights Reserved. Not-for-profit distribution encouraged.

3241. Joe Frank FAQ

Newsgroup: rec.radio.broadcasting
Date: 1996-10-05 00:00:00 UTC

Joe Frank v4.5
Frequently Asked Questions 10/96

Welcome to the Joe Frank FAQ, posted sporadically to alt.radio.networks.npr, rec.radio.broadcasting, rec.radio.noncomm, rec.answers and news.answers. A new multimedia version is available on the web at wfmu.org/JF/joe_fran.html. This document was created by Richard Looney with assistance from many Joe Frank fans who are net.citizens.

Additional information is welcome - please send to rlooney@csc.com.

Contents:

1. Who is Joe Frank? -> Biography

2. What has he done? -> Chronological Listing of Radio Programs

3. How about video and writing? -> Listing of his non-radio work

4. Is he still on the radio?

5. Are tapes of the radio programs available?

---

1. Who is Joe Frank?

Joe Frank is *not* the host of a long-running New York talk show, and a different Joe Frank (Carollo) was responsible for those top-40 hits from the early 1970s. Joe Frank is best known for the weekly radio show called "Work In Progress" he created in the studios of KCRW, Santa Monica between 1986 and 1992. His program was picked up by some of the more progressive public radio stations, since KCRW made it available 'on the satellite' via SASS.

The following biography from KCRW was dated April 1990:

Joe Frank was born in Strasbourg, France of a Viennese mother and a Polish father. His family immigrated to New York City where Frank was raised

and educated. Frank, who received a B.A. from Hofstra University, attended the Iowa Writers Workshop and subsequently taught at the Dalton School in Manhattan.

In the mid 70's Frank joined WBAI, the New York Pacifica station, as a volunteer. By 1977 he was the host of "In The Dark," a late night entertainment program that featured Frank's monologues, improvised sketches, and live music. In 1978 Frank moved to Washington D.C., to anchor the weekend edition of "All Things Considered" on National Public Radio (NPR). From 1979 to 1985 he wrote, performed in, and produced 18 dramas for NPR Playhouse, garnering many broadcasting honors, including the 1982 Broadcast Media Award, the 1983 Radio Program Award from the Corporation For Public Broadcasting, two consecutive Gold Awards at the International Radio Festival of New York (1983 & 1984), the American Nomination to the 1984 Prix Italia and a Special Commendation from the Berlin Prix Futura (1985).

In 1986, at the invitation of Ruth Hirschman, general manager of KCRW, Frank moved to Los Angeles where he created his own weekly one-hour program, "Joe Frank: Work In Progress" at the Santa Monica-based NPR station. In 1988 Frank won both the prestigious Major Armstrong Award and the Corporation For Public Broadcasting Program Award for his three-part series "Rent A Family."

In February 1989 "Rent A Family" was adapted and directed by Paul Verdier at Stages Trilingual Theater. In March of 1989 Frank gave his first one-man show ("Joe Frank: In Performance") at the Museum Of Contemporary Art's Ahmanson Theater.

Frank has published two plays, "The Decline Of Spengler" (New Directions 48, New York) and "A Tour Of The City" (Tanim Press, New York). A volume of fiction, "The Queen Of Puerto Rico And Other Stories" will be published by William Morrow (New York) next winter.

Montreal's Theater Anima will present Frank's award-winning "A Tour Of The City" at Hangar Number 9 of the Old Port of Montreal in June 1990. This drama, featuring a cast including performers from Cirque du Soleil, will be under the direction of Jordan Dietcher.

Michael Mann, creator of the television series "Miami Vice" and "Crime Story," has purchased the rights to Frank's radio monologue, "Night" and plans to adapt it for a feature film.

Starting in 1993, Joe changed the title of his show to "In The Dark". In early 1995 it was announced that Joe Frank would be 'taking a break' from "In The Dark", and it was removed from the KCRW schedule. Repeats of old shows are still broadcast from a few stations. Joe Frank began a new show called "Somewhere Out There" on KCRW in January 1996.

2. What has he done? Chronological List of Joe Frank's radio programs

This listing began as the Work In Progress Program List received from KCRW in 1987. That list was then augmented by the author of this FAQ

as new shows were broadcast. The productions were originally listed by KCRW as either monologues (M), dramas (D), or both (MD). This FAQ continues that tradition, but simplifies it such that programs with a single vocalist are listed as monologues (performed by Joe Frank unless noted otherwise) and programs featuring multiple performers are marked as dramas.

Additional information augments this listing:

(cast members of the dramas are enclosed in parentheses)
... based upon the credits announced at the conclusion of each program - note that there may be misspellings! The following key identifies those performers who appear more than twice:

AH Avery Hart AJ Annalee Jeffries
AM Arthur Miller BD Beth Dixon
BM Bernie Mantell BS Barbara Sommers
DR David Rapkin DSJ David St. James
ES Eric Sears FMA F. Murray Abraham
FZ Farley Ziegler GZ Grace Zabriskie
HP Harvey Per HW Helen Wilson
IW Irene Wagner JP Joseph Palmieri
LB Larry Block LE Laura Esterman
LM Larry Massett LN Lester Navscer
MH Mark Hammer NA Nick Aulette
PM Paul Mantell RC Ryan Cutrona
RF Rosemary Foley TJ Tim Jerome

[musical artist and title is noted between square brackets]
Some sources of background music used in selected programs are identified.

{ Comments are enclosed in curly brackets }
The author of this FAQ has annotated the listing with a few comments.

>>> various NPR Productions <<<

1978

The 80 Yard Run
monologue - one hour
{ KCRW's program list placed this show in the middle of the 1979 entries, but a KCRW announcer's introduction to this program claimed this to be Joe Frank's very first show, initially broadcast in 1978 }

1979

A Call in the Night
drama - one hour
(BD, ES, AM, BM, IW & Joe)

Arena
drama - one hour
(AJ, AM, BM, RF, ES, Joe & TJ)

The Death of Trotsky
monologue - one hour
[Miles Davis, "Solea", from "Sketches of Spain"]

'Til You're Gone
drama - one hour
(AM, Robin Bartlette, TJ, BM, IW, ES, RF, DSJ, Marcel Rosenblatt & Joe)

Summer Notes
drama - one hour
(TJ, BD, AM, LN, RF, BM, Fran Dorn, DSJ & Joe)

1980

The Rare Recording
drama - half hour
(BM, ES, AM, IW, FMA, Christina Moore & Joe)

Joe Frank in Concert
monologue - half hour
{ Live segments recorded at Bushido, a gallery in NYC }

1982

The Decline of Spengler
drama - one hour
(Joe, BS, JP, LN, IW, TJ, Leslie Katz (or Cass), DR, RF, Charles Potter,
AM & Brother Theodore)
[Steve Reich, from "Music for Eighteen Musicians"]

Lies
drama - one hour
(Joe, MH, FMA, BS, Christina Moore, TJ, AM & Jane Hunt)
[Mother Mallard's Portable Masterpiece Company, "Ceres Motion"]
[Philip Glass, "Part One" from "Music In Twelve Parts"]
[Steve Reich, from "Music for Eighteen Musicians"]
{ contains "The Night Watchman", which was used to conclude
All Things Considered on Halloween, 1979 }

1983

The End
drama - half hour

Pilot
drama - half hour
(BS, Clark Gordon, PM, LB, IW, Joe, AM & TJ)
[Pat Metheny, "As Falls Wichita, So Falls Witchita Falls"]

The Queen of Puerto Rico
monologue - half hour

Sales
monologue - half hour
[Steve Tibbetts, "Walking" from "Northern Song"]

Warheads
drama - half hour
(LN, PM, AM, MH, IW & Joe)

Questions
drama - half hour
(TJ, MH, AM, PM, ES, IW & Joe)

1984

A Tour of the City
drama - part 1 one hour, part 2 half hour
(Alan Hunter, Marilyn Casky, BS, AM, Richard Bower, TJ, MH, JP, LB & Joe)
[Steve Reich, from "Six Marimbas"]
[Harold Budd, "Flowered Knife Shadows" from "Lovely Thunder"]
[Brian Eno, from "On Land"]
[Tangerine Dream, "Remote Viewing", from "Exit"]
[Popol Vuh, "Brothers of Darkness - Sons of Light" from the soundtrack
of Herzog's "Nosferatu"]

Across the River
drama - half hour
(AM, PM, LN, AH & Joe)

1985

Dreams of the River
monologue - one hour

Dear Annie
monologue - one hour

A Pact With God
monologue - one hour

Pretender
monologue - one hour

When She's Asleep, She Looks Like an Angel
monologue - one hour

Just Get Me Out of Here

3. How about video and writing? Listing of his non-radio work

Joe Frank on screen:

A short video was presented at the Santa Monica Public Library in 1988. It showed Joe speaking in the KCRW studio, a woman driving up to a pay phone and making the calls heard in "Thank You, You're Beautiful", and material from "Pretender", including the scene of Joe with the pillows stuffed up his shirt.

Jerry Summers, one of Joe Frank's cohorts in the studio, says that "... Joe did a short for CBS for a late-night summer-replacement show called 'The Midnight Hour'. The piece was 'Memories', a re-working of a WIP story. It aired (as I recall) late August or early September 1990, on the final night of 'Midnight Hour'."

A short film has been aired as filler on the Los Angeles PBS station, KCET, showing a montage of urban images (among which is Joe at the microphone) accompanying the first segment from "Islands".

Three shorts are available on Playboy's "Inside Out" anthology series, released on videotape in 1992:

Volume 2 contains "The Hitchhiker"
(which dramatizes the first segment of "Nausea")

Volume 3 contains "The Perfect Woman"
(which is similar to part of "Sleep", and also dramatizes part of "The End")

Volume 4 contains "Jilted Lover"

Joe Frank stars in these features.

... and the 1995 Zima commercial

Joe Frank in print:

An article about Joe called "Radio Noir", by Jamie Diamond, can be found in the Los Angeles Times Magazine of Sunday, November 22, 1987. The Wall Street Journal profiled him in an article in their March 15, 1988 edition. Another article, by Dick Lochte, called "Frankly, Joe's Branching Out", appeared in the March 1989 issue of Los Angeles Magazine. Much more verbiage (generally quite favorable) appeared in the wake of the release of his book of short stories, _The Queen of Puerto Rico_, which was published in 1993 by William Morrow and Company of New York.

Contents of _The Queen of Puerto Rico_ :

Tell Me What To Do
Fat Man
Night
Green Cadillac
Date
The Queen of Puerto Rico
Winter
The Decline of Spengler

{ Fat Man contains material from "Dreams of the River", and Winter
has similarities to "When She's Asleep, She Looks like an Angel" }

Joe Frank on disk - commercial recordings:

"Strange Cargo Hinterland" is a 1995 William Orbit production.
It's a CD on the Discovery label. The track "Montok Point"
contains some brief monologues by Joe Frank.

4. Is he still on the radio?

The following stations play Somewhere Out There:

KCRW 89.9 FM http://www.kcrw.org
Santa Monica College
Santa Monica, California
Sundays at 11AM

WFMU 91.1 FM http://wfmu.org
Upsalla College
East Orange, New Jersey
Thursdays at 7PM

The following stations play repeats of Work In Progress or In The Dark:

KDVS 90.3 FM http://www.kdvs.org
Davis, California
Saturdays at 11PM

KPFA 94.1 FM http://www.kpfa.org
Berkeley, California
Thursdays at 11PM

5. Are tapes of the radio programs available?

Joe Frank's programs are available on tape from KCRW.
Write to them for more information at:

KCRW 1900 Pico Blvd, Santa Monica, CA 90405

or call 310-450-5183 or 800-392-8855

Several Somewhere Out There programs are available on KCRW's Joe Frank
web page (www.kcrw.org/c/jfrank.html) in the Real Audio format.

This is a living document. If you have any corrections or updates, especially
concerning the schedule on your local station, please email rlooney@csc.com.

Frequently Asked Questions (FAQ) File for OTR
Old-Time Radio
(FAQ edited and copyrighted by Lou Genco (lgenco@old-time.com))

Last Modified: 09/08/96
---------------------

Copies of this FAQ are distributed monthly to rec.answers,
rec.radio.info, rec.broadcasting, rec.antiques.radio+phono and other
newsgroups; and are on file at bloom-picayune.mit.edu in the file:
/pub/usenet-by-group/news.answers/radio/old-time-faq.

(This file is best viewed with a NONproportional font)
---------------------

Table of contents:

Q1. What is "OTR"?
Q2. You haven't mentioned OTR music, why not?
Q3. Where can I buy recordings of old radio shows?
Q4. Which vendors have (lower prices) (higher quality) (faster
response)?
Q5. Are OTR shows rebroadcast? If so, where and when?
Q6. I remember a great show called (x). When was it aired?
Q7. Are there any books about OTR?
Q8. Does anybody trade tapes of OTR shows?
Q9. What's this stuff about Copyright?
Q10. How can I get my local radio station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
Q16. Is there a World Wide Web page (URL) I can access for more info?
Q17. Is there an email newsletter on OTR? How do I subscribe to it?
Q18. Can I get archived copies of old issues of the OTR Digest?
```

Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at
your site?
Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?
Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?
Q29. I am interested in re-creating some OTR drama. Where can I get scripts?

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the very early 1960s. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures. Some individuals classify the resurgence of this type of radio programming in the '60s and '70s as "Revival Radio", and similar programming since the '70s as "Modern Radio Drama". Purists even discriminate between the "Golden Age" (late 30's and the decade of the 40's) and the "Silver Age" (50's). In any case, there are plenty of programs of various types that are enjoyable entertainment. Best of all, they don't require a large screen TV to enjoy 'em -- the "visuals" are provided by the listener's imagination.

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band. There are also some Old Time Music on the Radio WWW pages (apparently for Bluegrass music), not affiliated with ours.

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes and CDs of OTR programs. A partial list can be obtained from my OTR WWW site. Many public libraries have a small stock for perusal as well. Some vendors and collectors even have their own WWW pages.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR Digest to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at http://www.old-time.com.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at http://www.old-time.com

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the new National Radio Club's _AM Radio Log, 16th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at +1 615 865 1525 voice, or +1 615 865-2598 fax. The address is M Street Corp., P.O.Box 1479 Madison, TN 37116-1479 Price is $44.95 plus S&H

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR Digest, or look through the program databases at my site). Also see answer A14 below. Please do NOT send requests to -me- to name or find specific programs or radio personalities for you.

Q7. Are there any books about OTR?

A7. Yes, there are many books related to OTR. See my WWW page for a partial bibliography.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

There are also several "book finding" services (one of which is listed on my WWW page) that will help obtain old/out of print books.

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR Digest. My WWW page has a database of private traders as well. Leave a note in the OTR Digest if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights have been renewed. Examples of the latter include The Shadow (Conde Nast) and some of Arch Oboler's productions. See my WWW site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Local stations may be able to redistribute OTR available via satellite downlink. Ask the station managers to check with either:

Collectors Radio Network (The Radio Vault)
1-800-739-7900

Yesterday USA (YUSA)
(214) 690-3636
YUSAOTR@aol.com

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables
and sound processing units that can dramatically
improve old recordings. Their sound processing unit
runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all
their material at the following site:
ftp.atd.ucar.edu. Log on with the usual anonymous
then, your routine password. head on over to
/pub/dat-heads/ You will find a wealth of info up
there. All the digests to the current day, and mike
faqs, as well as market postings on equipment. Highly
recommendable for anyone to get their feet wet in this
media. Happy taping.

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter)
occasionally take a "Y" cord and connect the output of
your cassette player to both "sides" of the "Y". Plug the
combined side of the "Y" into your stereo. If the sound
is mush(ier) than what you hear normally, you have a head
alignment problem (assuming that the tape you are
listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible
difference. Other audio optimization features are of
negligible value for OTR. Dolby HX also requires no
playback decoder.

[Dolby HX uses or "preserves" the Dolby noise reduction method of the master tape when duplicating - lvg]

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and
leave a note in the OTR Digest asking about local clubs for
your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are
different. Why?

A13. Sometimes broadcasts are dated according to their original
broadcast date, and sometimes according to a date on which they
have been rebroadcast. For instance, the Armed Forces Radio
Service rebroadcast many Mutual Radio transcriptions at a later
date. Your tape may be of one of these later dates. Alternately,
somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes
on different programs! For instance, a few Suspense shows were
re-scripted / re-cast for Escape. You might also find
similarities between certain SF shows as done on X Minus 1 and
Dimension X.

Q14. Is there any place where I can get a complete listing of all the
episodes in a particular program serial?

A14. Some of the OTR Digest subscribers have contributed Program Logs
for several well-known series. The logs are available at my WWW
site. While you are there, check the "Humongous OTR Database" (a
database of contributed catalogs and libraries, which will
eventually contain most of the readily-available programs for
popular OTR series). At present, the database exceeds 100,000
records, and is searchable with your WWW browser.

The "logs and publications" entry in my WWW page gives names and
addresses of several vendors of these items (thanks to
RadioJoe5@aol.com (Joe Coleman)). There is also a table
of logs and log sources at http://www.old-time.com

Jay Hickerson maintains several logs and lists, as well as -Hello
Again-, an OTR newsletter. Jay is the author of -The Ultimate
History of Network Radio Programming and Guide to All Circulating
Shows- (last supplemented in Oct 95). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the
themes of OTR programs?

A15. Again, some vendors include this information with their
catalogs. If you would like to contribute your interpretations
of the themes, send them to the OTR Digest for inclusion in
one of our databases.

Jim Widner and others have contributed some synopses / introductions
to various programs. They are on file at his site
(http://www.otr.com) and mine.

Many of the local and national OTR clubs maintain informational
libraries with this material.

Q16. Is there a World Wide Web page (URL) that I can access for more information?

A16. Yes, there are several WWW sites. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start, since the major OTR WWW pages have links or pointers to each other. If you learn of any others, I'd appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.old-time.com

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

World Wide Web URL:
http://www.airwaves.com

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Yes. The Internet OTR Digest is a freely available electronic newsletter, mailed every night to subscribers. Traffic has increased considerably, and the digest is usually mailed more than once a day!

To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR Digest?

A18. Yes. The OTR Digests and Index are updated frequently, and are accessible at:

http://www.airwaves.com

Readers with a WWW browser can access a "smart" archive program. This program can sort and display old OTR articles by author, subject, thread or date submitted. Just the thing to use when you

want to catch up on a discussion thread, without plowing through a lot of extraneous material. Point your browser at:

http://www.airwaves.com/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the takeup reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time. There is very little fidelity loss when using this medium to duplicate programs.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings, and their fidelity is limited by the slow tape speed.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which

record at 15/16 IPS, and other products of interested to
Visually Impaired persons. Price of 4 track recorder
around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines,
Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in
response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at
1-800-622-0022 or call Radio World magazine at
703-998-7600 for subscription information. Radio World is
an industry trade and has used equipment listings in the
classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the
Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note
on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines
and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi
machine from a linear machine is that the audio track is
recorded helically (diagonally) on the tape along with the
video track. On linear machines the audio is recorded at the
upper edge of the tape (and a control track at the lower
edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal
as would be the case with linear recording. Instead the
analog audio signal frequency-modulates a carrier which is
then recorded between the video tracks. A duplicate signal
is also recorded linearly to maintain compatibilty with
linear VCRs. The FM signal recorded on the HiFi track should
not be confused with FM radio broadcasts. One of my
customers thought the FM switch on his HiFi was for
recording FM from the radio. Today's machines no longer use
the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other
source) onto HiFi VCRs is virtually indistinguishable from
the source. The material can be dubbed to cassette with no
generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

From: ErikS74342@aol.com

I'm using a brand-new dubbing Sony deck that has given me terrific results over the last three months. (Sony TC-WR565, about $200 at Circuit City). It's a dual-motor model, with precise LED volume meters and tape counters. It is one step below Sony's best dubbing deck, which offered few additional features for an additional $70. I wouldn't recommend Sony's entry-level models, which skimp on the details. This deck automatically encodes tapes with Dolby HX.

This particular deck comes with a pitch control that can be used to correct pitch problems with master tapes -- a godsend when working with too-fast reel-to-reel source copies. (Sony also offers the TC-WR465, without the pitch control, for about $20 less. Believe me, it's worth the price.)

To reset volume levels and correct other deficiencies with master tapes -- yes, you need a second cassette deck and a graphic equalizer.

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have

a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO <click> TWO <click> TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake the tape and immediately make a copy. But if you forget to do it and it re-hydrolyzes, you can bake it again.

John Tucky (grumpy@en.com) takes the opposite approach, with his suggestion:

For those who are squeemish about putting a valuable tape into a hot oven, you can put the tapes in a frost-free refridgerator. The humidity in there is very low - that's why everything dries out if it isn't covered or wrapped. It'll take more than 8 hours - might require several days. But then, what's a week to a 50 year old radio show?

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. A pointer to his FAQ may also be found at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see
r.a.m)
- Focusses on radios, phonos, and related materials made
before the 60s
- Avoids "ham" radio gear (the Boat Anchors group
covers that)
- Has a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast
Pioneers' Library". This is an excellent resource for the serious
/ professional researcher. It can be accessed through my WWW
site, or directly via the URL:
http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware
resources may also be found at http://www.old-time.com

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an
excellent choice for picking up distant AM stations that carry OTR
programming. Although the tuning dial has notoriously poor
calibration, the sensitivity and selectivity seem superior to other
radios. A SuperRadio FAQ is available via http://www.old-time.com

David Moisan maintains a text FAQ for the GE Super Radio at
ftp://ftp.shore.net/members/dmoisan/faqs/gesr_faq.txt
he also has a hypertext formatted FAQ at
http://www.shore.net/~dmoisan/faqs/superradio/gesr_faq.html

-Some- readers have had good success with the Select-A-Tenna
antenna advertised in several magazines, and the Grove Catalog.
The S-A-T seems to be rather directional, and may eliminate
off-axis interference.

Ham Radio magazines sometimes carry information about small loop
antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left
this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, drop me a stamped,
self-addressed envelope:

Dan Hughes
WPCD, Parkland College
2400 West Bradley Ave
Champaign IL 61821

If you are interested in AM Broadcast Band reception, and
technical artlcles related thereto, send a SASE to the following
address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at http://www.old-time.com):

Atlanta Radio Theatre Company: http://members.aol.com/artcradio
ZBS Media http://www.zbs.org/zbs.html
LodesTone Productions
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop
http://www.mrtw.org/mrtw

There is also a mailing list for folks interested in current radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at
your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file
for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers.
To get the latest edition, send e-mail to one of the addresses below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:
send usenet/news.answers/internet-services/access-via-email

To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
Enter only this line in the BODY of the note:
send lis-iis e-access-inet.txt

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at MIT, and is available from the MIT mailserver. For more info on how to get files by email from MIT, send a message
TO: mail-server@rtfm.mit.edu

SUBJECT: [blank]
BODY:
help
end

I have also initiated a simplistic fileserver. At present, it can handle only a few files (stations.otr, otr.faq, help). If you have ONLY email access to the Internet, and wish one of these files, send an email
To: files@old-time.com
Subject: send filename

where filename is one of: stations.otr, otr.faq, help
do NOT use brackets or quotes
do NOT put anything in the body of the message (it won't be read)

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained to OTR topics. Folks interested in early TV shows might be interested in this note from Kathy O'Connell (oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman named Linda has just started a list devoted to 50's-60's Television. You can contact her at LEEKNIGHTS@delphi.com I signed on immediately, and it's a wonderful place to meet other people interested in this subject. Very much like the OTR list, but for television!!!

Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

A26. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Many of the soundbytes can be downloaded, and played on your computer's sound card, others will play "realtime" through your multimedia system.

Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A27. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a

small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one one I like best has some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase orders, prepayment, cash and other nuisances).

Polyline Corporation
1233 Rand Road
Des Plaines IL 60016
(708) 390-7744
FAX (708) 390-9886

or, their West Coast branch (where I got mine)
PolyWest Corporation
16018 Adelante Street, Unit C
Irwindale CA 91702
(818) 969-8555
FAX (818) 969-2267

They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in white and CPCN.4+4M/RBLU in royal blue. Outside dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.

I paid $2.11 each plus tax and shipping for my latest batch (November 1995). The minimum economical order is 40 albums. You can order smaller quantities, but the price is $4.68 EACH. Check with Polyline before ordering. The prices change frequently.

Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to read your page?

A28. Yes. Although my WWW page is best viewed with Netscape, I also have a text-only menu that might be easier on your reader. Use the URL http://www.old-time.com/txtindx.html

There are many blind OTR collectors who might be able to help you as well. Two experts in OTR as a hobby and Internet / computers are: Henry Brugsch <hbj@enterprise.net> and Ronald Staley <rstaley@netcom.com>. One or the other would be able to help you use your computer and reader to access my pages or maintain your

OTR collection.

Q29. I am interested in re-creating some OTR drama. Where can I get scripts?

A29. Charlie Matkin <cmatkin@earthlink.net> sent us a note saying:

My former partner in New Orleans Radio Theatre, Inc. is closing out his extensive supply of scripts. You may contact him as follows:

John Barber
P.O. Box 70711
New Orleans, LA 70116

(504) 943-6091

Also check with local or national OTR clubs. Many have a "print library" that includes scripts.

All Rights Reserved. Not-for-profit distribution encouraged.

Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?
Q29. I am interested in re-creating some OTR drama. Where can I get scripts?
Q30. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the very early 1960s. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures. Some individuals classify the resurgence of this type of radio programming in the '60s and '70s as "Revival Radio", and similar programming since the '70s as "Modern Radio Drama". Purists even discriminate between the "Golden Age" (late 30's and the decade of the 40's) and the "Silver Age" (50's). In any case, there are plenty of programs of various types that are enjoyable entertainment. Best of all, they don't require a large screen TV to enjoy 'em -- the "visuals" are provided by the listener's imagination.

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band. There are also some Old Time Music on the Radio WWW pages (apparently for Bluegrass music), not affiliated with ours.

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes and CDs of OTR programs. A partial list can be obtained from my OTR WWW site. Many public libraries have a small stock for perusal as well. Some vendors and collectors even have their own WWW pages.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR Digest to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at http://www.old-time.com.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at http://www.old-time.com

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the new National Radio Club's _AM Radio Log, 16th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at +1 615 865 1525 voice, or +1 615 865-2598 fax. The address is M Street Corp., P.O.Box 1479 Madison, TN 37116-1479 Price is $44.95 plus S&H

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR Digest, or look through the program databases at my site). Also see answer A14 below. Please do NOT send requests to -me- to name or find specific programs or radio personalities for you.

Q7. Are there any books about OTR?

A7. Yes, there are many books related to OTR. See my WWW page for a partial bibliography.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

There are also several "book finding" services (one of which is listed on my WWW page) that will help obtain old/out of print books.

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR Digest. My WWW page has a database of private traders as well. Leave a note in the OTR Digest if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights have been renewed. Examples of the latter include The Shadow (Conde Nast) and some of Arch Oboler's productions. See my WWW site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Local stations may be able to redistribute OTR available via satellite downlink. Ask the station managers to check with either:

Collectors Radio Network (The Radio Vault)
1-800-739-7900

Yesterday USA (YUSA)
(214) 690-3636
YUSAOTR@aol.com

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping.

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo. If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible
difference. Other audio optimization features are of
negligible value for OTR. Dolby HX also requires no
playback decoder.

[Dolby HX uses or "preserves" the Dolby noise reduction method of
the master tape when duplicating - lvg]

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and
leave a note in the OTR Digest asking about local clubs for
your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are
different. Why?

A13. Sometimes broadcasts are dated according to their original
broadcast date, and sometimes according to a date on which they
have been rebroadcast. For instance, the Armed Forces Radio
Service rebroadcast many Mutual Radio transcriptions at a later
date. Your tape may be of one of these later dates. Alternately,
somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes
on different programs! For instance, a few Suspense shows were
re-scripted / re-cast for Escape. You might also find
similarities between certain SF shows as done on X Minus 1 and
Dimension X.

Q14. Is there any place where I can get a complete listing of all the
episodes in a particular program serial?

A14. Some of the OTR Digest subscribers have contributed Program Logs
for several well-known series. The logs are available at my WWW
site. While you are there, check the "Humongous OTR Database" (a
database of contributed catalogs and libraries, which will
eventually contain most of the readily-available programs for
popular OTR series). At present, the database exceeds 100,000
records, and is searchable with your WWW browser.

The "logs and publications" entry in my WWW page gives names and
addresses of several vendors of these items (thanks to
RadioJoe5@aol.com (Joe Coleman)). There is also a table
of logs and log sources at http://www.old-time.com

Jay Hickerson maintains several logs and lists, as well as -Hello
Again-, an OTR newsletter. Jay is the author of -The Ultimate
History of Network Radio Programming and Guide to All Circulating
Shows- (last supplemented in Oct 95). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR Digest for inclusion in one of our databases.

Jim Widner and others have contributed some synopses / introductions
to various programs. They are on file at his site (http://www.otr.com) and mine.

Also check Frank Passage's logs at my site; many contain a short synopsis of the program.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) that I can access for more information?

A16. Yes, there are several WWW sites. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start, since the major OTR WWW pages have links or pointers to each other. If you learn of any others, I'd appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.old-time.com

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

World Wide Web URL:
http://www.airwaves.com

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Yes. The Internet OTR Digest is a freely available electronic newsletter, mailed every night to subscribers. Traffic has increased considerably, and the digest is usually mailed more than once a day!

To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR Digest?

A18. Yes. The OTR Digests and Index are updated frequently, and are accessible at:

http://www.airwaves.com

Readers with a WWW browser can access a "smart" archive program. This program can sort and display old OTR articles by author, subject, thread or date submitted. Just the thing to use when you want to catch up on a discussion thread, without plowing through a lot of extraneous material. Point your browser at:

http://www.airwaves.com/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the takeup reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time. There is very little fidelity loss when using this medium to duplicate programs.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate

in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings, and their fidelity is limited by the slow tape speed.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibilty with linear VCRs. The FM signal recorded on the HiFi track should

not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

From: ErikS74342@aol.com

I'm using a brand-new dubbing Sony deck that has given me terrific results over the last three months. (Sony TC-WR565, about $200 at Circuit City). It's a dual-motor model, with precise LED volume meters and tape counters. It is one step below Sony's best dubbing deck, which offered few additional features for an additional $70. I wouldn't recommend Sony's entry-level models, which skimp on the details. This deck automatically encodes tapes with Dolby HX.

This particular deck comes with a pitch control that can be used to correct pitch problems with master tapes -- a

godsend when working with too-fast reel-to-reel source copies. (Sony also offers the TC-WR465, without the pitch control, for about $20 less. Believe me, it's worth the price.)

To reset volume levels and correct other deficiencies with master tapes -- yes, you need a second cassette deck and a graphic equalizer.

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO <click> TWO <click> TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake the tape and immediately make a copy. But if you forget to do it and it re-hydrolyzes, you can bake it again.

John Tucky (grumpy@en.com) takes the opposite approach, with his suggestion:

For those who are squeemish about putting a valuable tape into a hot oven, you can put the tapes in a frost-free refridgerator. The humidity in there is very low - that's why everything dries out if it isn't covered or wrapped.

It'll take more than 8 hours - might require several days.
But then, what's a week to a 50 year old radio show?

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. A pointer to his FAQ may also be found at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m)
- Focusses on radios, phonos, and related materials made before the 60s
- Avoids "ham" radio gear (the Boat Anchors group covers that)
- Has a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast Pioneers' Library". This is an excellent resource for the serious / professional researcher. It can be accessed through my WWW site, or directly via the URL:
http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware resources may also be found at http://www.old-time.com

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios. A SuperRadio FAQ is available via http://www.old-time.com

David Moisan maintains a text FAQ for the GE Super Radio at
ftp://ftp.shore.net/members/dmoisan/faqs/gesr_faq.txt
he also has a hypertext formatted FAQ at
http://www.shore.net/~dmoisan/faqs/superradio/gesr_faq.html

-Some- readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran plans with dimensions and number of turns, etc to build one of these antennas. I have built several and I'm no mechanic. If you (or anyone else reading this) would like a copy of the article and plans, drop me a stamped,

self-addressed envelope:

Dan Hughes
WPCD, Parkland College
2400 West Bradley Ave
Champaign IL 61821

If you are interested in AM Broadcast Band reception, and
technical artlcles related thereto, send a SASE to the following
address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern
drama. Check the lists on your local Internet provider to see
which are available to you. Here is a list of some of the WWW
pages for radio drama (more may be found at
http://www.old-time.com):

Atlanta Radio Theatre Company: http://members.aol.com/artcradio
ZBS Media http://www.zbs.org/zbs.html
LodesTone Productions
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop
http://www.mrtw.org/mrtw

There is also a mailing list for folks interested in current
radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files
at
your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following
file
for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail
servers.
To get the latest edition, send e-mail to one of the addresses
below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:
send usenet/news.answers/internet-services/access-via-email

To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
Enter only this line in the BODY of the note:
send lis-iis e-access-inet.txt

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at
MIT, and is available from the MIT mailserver. For more info on
how to get files by email from MIT, send a message
TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

I have also initiated a simplistic fileserver. At present, it can
handle only a few files (stations.otr, otr.faq, help). If you
have ONLY email access to the Internet, and wish one of these
files, send an email
To: files@old-time.com
Subject: send filename

where filename is one of: stations.otr, otr.faq, help
do NOT use brackets or quotes
do NOT put anything in the body of the message (it won't be
read)

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where
can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained
to OTR topics. Folks interested in early TV shows might be
interested in this note from Kathy O'Connell
(oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman
named Linda has just started a list devoted to
50's-60's Television. You can contact her at
LEEKNIGHTS@delphi.com I signed on immediately, and
it's a wonderful place to meet other people
interested in this subject. Very much like the OTR
list, but for television!!!

Q26. I have never heard "Old Time Radio". Can I get an audio sample
via Internet?

A26. Yes, if you have a suitable WWW browser and sound card. Connect
to any of the WWW sites mentioned above, and follow the pointers
to their audio clips and / or soundbytes. Many of the soundbytes
can be downloaded, and played on your computer's sound card,
others will play "realtime" through your multimedia system.

Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A27. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one one I like best has some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase orders, prepayment, cash and other nuisances).

Polyline Corporation
1233 Rand Road
Des Plaines IL 60016
(708) 390-7744
FAX (708) 390-9886

or, their West Coast branch (where I got mine)
PolyWest Corporation
16018 Adelante Street, Unit C
Irwindale CA 91702
(818) 969-8555
FAX (818) 969-2267

They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in white and CPCN.4+4M/RBLU in royal blue. Outside dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.

I paid $2.11 each plus tax and shipping for my latest batch (November 1995). The minimum economical order is 40 albums. You can order smaller quantities, but the price is $4.68 EACH. Check with Polyline before ordering. The prices change frequently.

Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to read your page?

A28. Yes. Although my WWW page is well viewed with Netscape or Microsoft Explorer, I also have a text-only menu that might be easier
on your reader. Use the URL http://www.old-time.com/txtindx.html

There are many blind OTR collectors who might be able to help you as well. Two experts in OTR as a hobby and Internet / computers are: Henry Brugsch <hbj@enterprise.net> and Ronald Staley <rstaley@netcom.com>. One or the other would be able to help you use your computer and reader to access my pages or maintain your OTR collection.

Blind visitors who depend on DOS-based software to access the net, or who use a reading program to audibly display their computer's output might be interested in a program called "Nettamer".
The Nettamer home page is at http://people.delphi.com/davidcolston

Q29. I am interested in re-creating some OTR drama. Where can I get scripts?

A29. Check your local or national OTR clubs. Many have a "print library" that includes scripts. You can also point your browser at the University of Maryland's script page, at
http://www.itd.umd.edu/UMS/UMCP/BPL/scripts.html

Charlie Matkin <cmatkin@earthlink.net> sent us a note saying:

My former partner in New Orleans Radio Theatre, Inc. is closing out his extensive supply of scripts. You may contact him as follows:

John Barber
P.O. Box 70711
New Orleans, LA 70116
(504) 943-6091

Q30. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the
old radio or to the tape recorder that recorded the program?

A30. In addition to the old radio being mistuned, similar problems can be caused by one or more of the tape recorders used before you received your copy of the program. Print-through has already been mentioned in Q & A 19. Bob Burnham has a nice explanation of two more problems: crosstalk and channel leakage.

Crosstalk and Channel Leakage are 2 different things. OTR collectors seem to have the most problem with channel leakage.

When you hear another program faintly playing in the background in normal direction, this is usually Channel Leakage. This is a leftover problem from the 1970's & early '80's when most collectors traded on open reel

tapes which were quarter-track mono -- there were
different (separate) programs on left & right channels.
This allowed 6 hours of shows to be placed on one reel.
Unfortunately, many collectors would duplicate L & R
shows simultaneously. Depending on the quality of the
equipment (and its condition) it was common for one
program to bleed into the opposite channel...especially
if the collector was careless and allowed over-modulaton.

Crosstalk results when a tape is recorded (or played
back) on a machine with mis-aligned tape heads. It can
also occur when trying to record over a 1/2 track
recording with a 1/4 track machine with dirty or
mis-aligned erase head. You usually will hear another
program playing IN REVERSE in the background.

HOW TO PREVENT CHANNEL LEAKAGE AND CROSSTALK...

If duplicating quarter track reels, copy ONE channel or
track at a time. As for crosstalk, make certain your
machines are kept in proper alignment. Use a high quality
BULK ERASER if you re-use old tapes... this is especially
true for those who use reels.

Sorry, there is NOTHING you can do to remove these flaws
once they are there.

All Rights Reserved. Not-for-profit distribution encouraged.

3244. Bill Pfeiffer Burned Out in House Fire

Newsgroup: rec.radio.broadcasting
Date: 1996-12-14 00:00:00 UTC
From: TELECOM Digest Editor <ptownson@massis.lcs.mit.edu>
Message-ID: <121496.0064eert768@massis.lcs.mit.edu>
Source record: 24261
Cross-posted to: rec.radio.broadcasting,rec.radio.info,rec.radio.swap,alt.radio.digital,alt.radio.pirate,alt.radio.scanner

I am very sad and sorry to have to report to the net that William Pfeiffer was the victim of a very serious fire in his home in Springfield, Missouri during the overnight hours of Thursday into Friday morning.

The fire is believed to have started in some faulty electrical wiring in a wall, but the cause has not been officially detirmined. The fire began at about three minutes after midnight at the start of Friday, December 13. Fortunatly Bill was awake and working at his computer at the time so he was able to escape without injury.

It was somewhat more difficult to evacuate his elderly mother who lives there with him, and she received some injuries in the fire and is now hospitalized.

This was essentially a 'flash fire' in that it spread extremely rapidly; in a matter of five minutes or less the entire place was on fire. The fire department responded very quickly but to no avail. There was nothing for them to save. The fire was so intense and the heat so great that his two vehicles which were parked in the driveway immediatly next to the house melted and/or burned.

He has nothing left at all save the clothes on his back and the most important thing of all, his mother. He lost all of his computer equipment; all of his software; all of his personal possessions. The house was totally gutted, and all in a matter of a few minutes. You see, he did not have a lot to start with and the place they were living was not that large.

Bill has asked me to notify as many people as possible of this tragedy, and in particular to let the subscribers of his journals know what happened. His group rec.radio.broadcasting will continue as will his other e-publications. Right now he has to scramble to put together a place to live, and he has to attend to his mother in the hospital.

Some of you may recall that Bill originally lived here in the Chicago area. I have been a friend of his for some twenty years. I 'got him started in computers' several years ago. About three years ago he decided to move from Chicago and a declining inner-city neighborhood to a rural area near Springfield, Missouri. In addition to his e-journals, he has recently begun a business designing web pages.

Now, everything is gone. Period. Unfortunatly, there was ** no insurance ** on the house and only a little insurance on one of the two vehicles.

The Red Cross in Springfield has arranged for Bill and his mother to have a place to stay for a few days while they start to build their lives over again.

If you can help him in any way at all, please do so. He will be very, very grateful for any support given at this time. If you are able to help, please send *checks* payable to his name, at an address being used to receive his mail:

William Pfieffer
Post Office Box 8746
Springfield, MO 65801

His phone has been 'emergency call forwarded' by the phone company to a place where messages can be taken and he asked me to NOT give out the number since he does not wish to burden those people with his calls. However if you wish to verify any of the above or feel it best to talk to him in person, please send a message to my attention with your phone number included; I will see that he gets the message. Until he is able to get a new computer he will not be receiving email on any sort of timely basis.

He wishes everyone a happy and joyous holiday season, and a happy new year as do I, but my own holiday will be dampened with the terrible news which awaited me when I returned to my own home Friday evening. Despite my own financial burdens in the past two years I suddenly feel very grateful indeed for the things I have.

I am really sad and very upset to have been called up on to present this news. Again, please respond to Bill as you feel appropriate.

Patrick Townson
TELECOM Digest Editor
comp.dcom.telecom moderator

I am William Pfeiffer, the person Pat Townson wrote about in this
article.

I just wanted to tell those who read it that while I do apprecaite
Pat's efforts to spread this far and wide, I never realized just how
far and wide he would spread it <g>.

I really only expected him to post to his telecom groups and maybe a
few mailinglists I dont know about. Pat's interest in my situation
caused him to post to many groups, including rec.radio.broadcasting.
Pat, being a moderator himself, posted to rec.radio.broadcasting
directly and I did not see his posting until after they hit the net.

Pat did not know I had already posted my plight to
rec.radio.broadcasting. If he had, he would not have not posted there
(to essentially duplicate my post).

I thank Pat for his concern and exuberance. For those who saw both my
post and his post to r.r.b, just realize I would not have posted his
note to rrb if I had seen it. Not because I disapproved of the
content, but merely because it was duplicitous.

Thanks to all who have written. If you would like to talk to me,
please feel free and encouraged to write me in email.
